TARIFF CHANGES

COMMONWEALTH OF AUSTRALIA.

STATUTORY RULES.

1905. No. 39.

REGULATION UNDER THE CUSTOMS ACT, 1901.

I, the Governor General in and over the Commonwealth of Australia, acting with the advice of the Federal Executive Council, hereby make the following Regulation under the Customs Act, 1901, to come into operation on June 1, 1905.

Dated this seventh day of June, One thousand nine hundred and five.

REGULATION UNDER THE CUSTOMS ACT, 1901.—STANDARDS FOR CONDENSATIONS, ETC.

The following shall be the standards according to which duty shall be charged on the undermentioned articles when in dried or concentrated form:—

Whole egg (without shell).—6·03 ounces to be taken as equivalent to one dozen fresh eggs.

Egg albumen.—3·25 ounces to be taken as equivalent to one dozen fresh eggs.

Egg yolk.—11·38 ounces to be taken as equivalent to one dozen fresh eggs.

1905. No. 48.

REGULATION UNDER THE CUSTOMS ACT, 1901.

I, the Governor General in and over the Commonwealth of Australia, acting with the advice of the Federal Executive Council, hereby make the following Regulation under the Customs Act, 1901, to come into operation forthwith.

Dated this fourth day of July, One thousand nine hundred and five.

*Amendment of Customs Regulation No. 101.*¹

Regulation No. 101 of the Customs Regulations, made on June 16, 1904, is hereby amended by the omission of the words:

‘Nutrium milk powder.—Three and a half times that of preserved milk.’

1905. No. 49.

REGULATION UNDER THE CUSTOMS ACT, 1901.

I, the Governor General in and over the Commonwealth of Australia, acting with the advice of the Federal Executive Council, hereby make the following Regulation under the Customs Act, 1901, to come into operation forthwith.

Dated this twentieth day of July, One thousand nine hundred and five.

DRAWBACK ON SUGAR USED IN MAKING JAM AND SIMILAR GOODS.

Conditions of Drawback.

1. Where goods, such as jams, jellies, and similar goods, are (after April 1, 1905) made with sugar at a factory in which both imported sugar and Australian sugar are used in the manufacture of the goods, drawback may be allowed on the exportation of the goods in respect of the sugar contained therein to the extent allowed by Regulation 132 of the Customs Regulations (Statutory Rules 1904, No. 25) if the collector is satisfied:

- (a) that the goods were made at the factory during a specified calendar year; and
- (b) that during that year imported duty-paid sugar, to an amount equal to or greater than the amount in respect of which drawback is claimed, was used at the factory in the manufacture of similar goods; and
- (c) that the drawback claimed would not, if added to the drawback (if any) previously allowed in respect of any similar goods manufactured in the factory during that year, amount to more than would be lawfully allowed on the export of the whole amount of imported sugar used in the factory in the manufacture of similar goods during*that year.

Time when Claim must be made.

2. No drawback shall be allowed except in respect of sugar contained in goods made in the calendar year in which the claim for drawback is made or in the preceding calendar year.

Declaration on Export Entry.

3. The declaration on the export entry in cases provided for by this regulation may be in the following form:

I (or we) declare that I (or we) am (or are) the exporter (or exporters) of the above mentioned goods, and

- (a) that the goods were manufactured at (here specify factory and place where situate) during the year one thousand nine hundred and (here specify the year), and
- (b) that during the year above specified imported duty-paid sugar was used at the said factory in the manufacture of the above or of similar goods to an amount equal to or greater than the amount upon which drawback is now claimed, and
- (c) that the drawback claimed would not, if added to the drawback (if any) previously allowed in respect of similar goods manufactured in the said factory during the said year, amount to more than would be lawfully allowed on the export of the whole amount of imported sugar used in the manufacture of similar goods during the said year.

Signed and declared before me this day of 19 .

Exporter.

Collector.

1906. No. 1.

REGULATION UNDER THE CUSTOMS ACT, 1901.

I, the Governor General in and over the Commonwealth of Australia, acting with the advice of the Federal Executive Council, hereby make the following Regulations under the Customs Act, 1901, to come into operation on the first day of January, 1906.

Dated this 14th day of December, One thousand nine hundred and five.

AUSTRALIAN GOODS AND SAMPLES EXPORTED.

Section 151.

(1) Regulations 103 and 104 of the Regulations under the Customs Act, 1901 (Statutory Rules 1904, No. 25), are hereby repealed, and the following substituted in lieu thereof:

(2) 103. The conditions under which goods, the produce of Australia, sent out of Australia may be re-imported or brought back to Australia free of duty shall be as follows:

- (a) The goods must be re-imported or brought back to Australia within two years from the date of their being sent away from Australia; and
- (b) If an export entry has been passed in respect of the goods, the collector must be satisfied that the goods re-imported or brought back to Australia are the goods or part of the goods specified in the export entry; and
- (c) If no export entry has been passed in respect of the goods, the Comptroller-General must be satisfied by statutory declaration or otherwise that the goods are the produce of Australia and have been re-imported or brought back to Australia within two years from the date when they were exported or sent out of Australia.

1906. No. 32.

REGULATION UNDER THE CUSTOMS ACT, 1901.

I, the Governor General in and over the Commonwealth of Australia, acting with the advice of the Federal Executive Council, hereby make the following Regulation under the Customs Act, 1901, to come into operation forthwith.

Dated this seventh day of April, One thousand nine hundred and six.

Section 168.

DRAWBACK REGULATIONS.

Regulation 132 of the Customs Regulations (Statutory Rules 1904, No. 25) is amended by omitting the words and figures:

'Jams and jellies... .. $\frac{5}{12}$ '

and inserting in lieu thereof the words and figures:

'Jams and jellies... .. $\frac{1}{2}$ '

1906. No. 56.

REGULATION UNDER THE CUSTOMS ACT, 1901.

I, the Governor General in and over the Commonwealth of Australia, acting with the advice of the Federal Executive Council, hereby make the following Regulation under the Customs Act, 1901, to come into operation forthwith.

Dated this thirteenth day of July, One thousand nine hundred and six.

REGULATION UNDER THE CUSTOMS ACT, 1901.

Section 151.—Re-importation free of duty of goods, the produce of Australia.

In addition to the conditions prescribed by Regulation 103 of the Regulations under the Customs Act, 1901 (Statutory Rules, 1906, No. 1), the following condition shall be a condition under which goods, the produce of Australia sent out of Australia, may be re-imported or brought back to Australia free of duty, namely:

- (d) The Minister must be satisfied that the re-importation or bringing back of the goods will not unfairly disturb the market for the goods in Australia generally, or in the place or town where the goods are proposed to be landed.

1906. No. 57.

REGULATION UNDER THE CUSTOMS ACT, 1901.

I, the Governor General in and over the Commonwealth of Australia, acting with the advice of the Federal Executive Council, hereby make the following Regulation under the Customs Act, 1901, to come into operation forthwith.

Dated this sixth day of July, One thousand nine hundred and six.

141. AMENDMENT OF CUSTOMS REGULATION 101.

Regulation 101 of the Customs Regulations, made on the 16th June, 1904 (Statutory Rules 1904, No. 25), is hereby amended by the addition of the following:

Solcof coffee.—1 lb. of Solcof to be deemed equal to 3 lbs. of coffee.

STRAITS SETTLEMENTS.

I.—Order No. 67, dated January 16, 1905, of the Governor in Council, prohibiting the exportation of Straits Dollars.

Whereas by Section 3 of ‘The Coin Import and Export Ordinance, 1903,’ it is provided that subject to the approval of the Secretary of State it shall be lawful for the Governor in Council to prohibit the exportation from the colony of such coins whether legal tender within the colony or not as are in such order specified:

Now I, the Governor, and Commander-in-Chief of the Straits Settlements, by virtue of the powers vested in me by the said Ordinance, with the advice of the Executive Council and subject to the approval of the Secretary of State, do hereby prohibit the exportation from the colony to any place outside the Malay Peninsula, Netherlands, East Indies and Borneo of the coin known as the Straits Dollars from and after the sixteenth day of January, 1905.

II.—An Ordinance to consolidate and amend the Law for collecting a Revenue of

Excise upon Intoxicating Liquors.

(No. XIX, dated August 3, 1906.)

1. (1) This Ordinance may be cited as ‘The Liquors Ordinance, 1906,’ and shall except as in this Ordinance specially provided come into operation on the first day of January, 1907.

PART I.

Duty.

4. (1) There shall be paid upon intoxicating liquors the duties following (that is to say):—

On all spirituous liquors.	\$2.40 per gallon
On all sparkling wines.	1.50 per gallon
On all still wines.	1.00 per gallon
On all other intoxicating liquors (excepting native wines and spirits and toddy, which shall be free from duty).	24 cts. per gallon

(2) The duty upon intoxicating liquors imported by sea shall be payable:

(a) if such liquors are not forthwith in accordance with the conditions of a permit issued under this Ordinance removed into a bonded or licensed warehouse or into another ship;

before the removal of them from the ship in which they are imported;

(b) If such liquors are forthwith removed into a bonded or licensed warehouse;

before the removal of them from such bonded or licensed warehouse unless such removal is for export or into another bonded or licensed warehouse, and in the latter case the quantity removed is not less than forty gallons in cask or the reputed equivalent thereof.

(3) The duty upon intoxicating liquors imported by land shall be payable at such time and place as may be prescribed by rules made under this Ordinance.

(4) The duty upon intoxicating liquors distilled, made or prepared in the colony shall be payable before the removal of such liquors from the factory in which they are distilled, made or prepared.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

Canadian Commercial Agents.

Australasia.....	J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
	D. H. Ross, Stock Exchange Building, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.
China.....	H. J. Craig, 18 Szechuen Road, Shanghai.
France.....	A. Poindron, 101 Rue Réaumur, Paris.

	E. O'Kelly, 17-19 Victoria Street, Belfast.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., April 15, 1907.

QUOTING PRICES.

It would be well for Canadian manufacturers to quote also the sterling price, the equivalent of the price in currency, to intending buyers in England, and thus remove any feature of doubt as to cost in their minds. It not infrequently happens that competition in the lines under consideration is very keen, and a small difference in the cost may prejudice the sale. The fluctuations in sterling exchange are slight, and if the value of the £ is computed at \$4.866 or fractions thereof on this basis, it would simplify matters. I was called on recently by a member of a firm to confirm his computation of currency prices into sterling, before he would give an order for a carload.

QUOTING C.I.F.

Another matter of importance is quoting c.i.f. Manchester or Liverpool as required, as the belief prevails that the Canadian shipper can obtain cost of freight insurance and charges more easily than the buyer here, and to some extent it is felt to be part of his business to do so. I can safely say that much time would be saved, and orders more likely secured if this plan is adopted.

BENT-WOOD FURNITURE.

A combine has of late been formed amongst the Austrian bent-wood manufacturers, who have a large trade in England in all articles of furniture of this class, and in consequence they have advanced the prices materially. The trade here naturally resent this, and suggest that Canadian manufacturers should take advantage of it, and push their sales with greater vigour. Nothing tends more to loosen the conservative dealings of British firms than a concerted attack upon their profits. It is admitted that Canadian furniture of this class is not deficient in style or strength to the Austrian, but that it lacks the fine polish of the latter, ascribed to the varnish used containing resin. This indifferent finish is said to apply to other articles, and it cannot be insisted too strongly that the manufacturers interested in export trade should endeavour to finish all articles for this market fully equal to the continental.

At the present time there is a good demand for wood bedsteads in any of the hard woods Canada is so abundantly favoured with, and the market here only needs careful cultivation to enable the Canadian manufacturer to increase his output.

SIBERIAN BUTTER.

A curious factor in the provision market at the present time is Siberian butter. Huge supplies are being brought to London, and, according to expert advice, shipments will be 20 per cent in excess of last year. The strange statement is made that there is no demand in Siberia for this butter, and it is mainly manufactured for English consumption. Last year over 600,000 cwts. of the product were imported, though six years ago about one-third that quantity was received. New Zealand and Australian agents are complaining that it is adversely influencing their butter, for it

can be obtained 25 per cent cheaper. It is stated that a considerable quantity is sold in Manchester and district.

MILLIONS IN ASSURANCES.

According to a blue-book just issued, ninety-five assurance companies were in existence within the purview of the board of trade in 1906, of which seventy-seven were classed as ordinary, nine as industrial, and nine in both classes.

In the ordinary business, according to the latest returns, there were 2,397,915 assurances in force, representing £754,352,481, not counting re-assurances, and 55,462 annuities for £2,526,489. In the industrial section there was the great number of 25,544,045 assurances for the sum of £251,556,107, these figures not including sickness and friendly society contracts.

In compiling this summary the accounts of fourteen foreign and other companies have been omitted, either because the business is not ordinary assurance, or because the extent of it in the United Kingdom cannot be ascertained.

BRITISH TRADE RETURNS.

The board of trade returns for March show that the imports for the month amounted to £57,738,731, an increase of £4,477,101 as compared with last year.

The exports amounted to £34,723,034, an increase of £3,071,872 as compared with last year.

For the first quarter of the year imports show an increase of £16,950,810, and exports an increase of £10,669,890 over the same period of last year.

P. B. MACNAMARA.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, April 1, 1907.

PROVISIONS *re* MARKING FOREIGN BUTTER IN DENMARK.

The Danish Agricultural Department has established the following rules in regard to the marking of foreign butter packed in hermetically sealed tin cans:—

1. Hermetically sealed cans containing foreign butter shall, when offered for sale and for export from Denmark, be marked with the words 'Tkke Dansk' (not Danish), with plain letters at least $\frac{1}{4}$ -inch high and of red colour.

2. The colour of the can and the colour of the inscription, which otherwise may appear on the can, shall be plainly different from the above mentioned red colour. On the labels attached to the cans the same mark as mentioned above shall also be stamped in red colour on a ground strongly different from red.

3. If the inscription or label on the cans are in another language than Danish, a translation to this language of the words (not Danish) 'Tkke Dansk' must also appear.

4. The cases in which foreign butter in hermetically sealed cans are packed shall, on two opposite sides, be marked as above, but the letters on the cases shall be at least 2 inches high.

5. On the cases, cans and labels the name and address of the seller or exporter shall appear, even though in the same there should be found a Danish name of a place.

6. The above regulations go into force on October 1, 1907.

PROPOSED PROVISIONS *re* SALE OF PRESERVED EGGS IN SWEDEN.

Before the Swedish Riksdag (parliament) there has been made a motion about the drawing up of similar special provisions for the sale of preserved eggs, as are now in force for the sale of margarine, so that preserved eggs shall not hereafter be offered for sale in the retail stores, except they are plainly stamped as being preserved goods.

PRICES OF CREAMERY PRODUCTS IN NORWAY.

Prices of creamery products have not been so high for 40 or 50 years as those prevailing during 1906. The average price of creamery butter in Christiania was thus in 1906: kroner 196.50 per 100 kilogrammes (\$52.40 per 220½ lbs.). The lowest price was kr. 170 (\$45.33) and the highest kr. 250 (\$66.67). Ten years ago, in 1897, the average price was kr. 23.05 (\$6.15) lower, and that year was considered a very good one at the time.

Also for cheese the prices were very good during 1906, especially as far as the finer grades are concerned, such as imitated Swiss cheese and Jarlsberg cheese, which have commanded from \$1.10 to \$3.25 per 220½ lbs. higher prices than the next preceding years. The large demand for cheese during 1906 has also resulted in its being sold in a comparatively unripe state. The raise in price therefore really is larger than the figures shown by the statistics.

ALUMINUM INVENTION.

According to Swedish papers, Mr. E. L. Rinnan, of Upsala, Sweden, has lately made an invention by which aluminum can be extracted from blue clay, by which process the price of the product will be reduced four times. The silicic acid, which is latent in the clay masses, will also be utilized by the new method.

Simultaneously with the Swedish inventor a Norwegian engineer, Mr. Linding-Larsen, has made independent investigations into the matter and has succeeded in inventing a method which seems to be of the same nature as that of Mr. Rinnan. It is stated that Mr. Linding-Larsen has lately been communicating with a foreign company about the utilization of the new method, and that a representative of the company will arrive here shortly to negotiate for the conclusion of a contract.

PIG-IRON PRODUCED FROM NORWEGIAN ORE.

In the 'Meddelelser fra Norges Oplysningskontor for Noringsveiene' (a government institution), there appears in the edition for March 16 an article which will no doubt be read with interest by Canadian mine owners, &c. The following is a translation:—

'Attempts to produce pig-iron from Norwegian ore reduced with Norwegian carbon have for the first time met with success, the carbon being in the shape of graphite, which is found in great abundance in different parts of the country, mostly in the north, where deposits to the extent of 10-20 metres and more are found close to the sea.

'This mineral has hitherto remained practically unnoticed, it being insufficiently pure for crucibles, pencils, &c., whereas it cannot be used as fuel. Now, however, Mr. Albert Hiorth, C.E., has succeeded in producing good iron from poor ore, unsaleable for the use in blast furnaces. During experiments, which took place at the new electro-chemical establishment of the Technical School of Christiania, iron sand containing 13 per cent titanitic acid was smelted together with graphite as a medium of reduction, and lime as slaggy material. With these materials, which are rather impure (the graphite thus contains about 20 per cent silica), the iron produced, when analyzed, showed only a trace of titan and 0.01 per cent silica. The experiment has thus proved that graphite can be used for the reduction of ordinary iron ore to good pig-iron, even of highly titaniferous ores, in which Norway is so rich, and which are now without value.

C. E. SONTUM.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., April 27, 1907.

THE NORTH OF ENGLAND AS A CANADIAN APPLE.

In the counties of Yorkshire, Durham and Northumberland, which form the northeast part of England, there is a population nearly equalling that of the whole of Canada, almost entirely dependent upon foreign sources for its supply of fruit. The United States has been catering to this market for years and with the newly established service of liners between Hull and Australia, the latter country has now entered the field. Cape Colony has also recognized the importance of this market and is making efforts to cultivate a trade in South African-grown fruit, especially in pears.

The most remarkable development, however, which has occurred in recent years is the great expansion in the imports of Canadian apples. According to the most reliable estimates three-fifths of the apples which have been offered for sale in the three northeastern counties during the past season were shipped here by Canadian growers, Ontario contributed the most to this supply, the shipments from Woodstock, Bowmanville, Dundas, Palermo, and Colborne, being especially plentiful.

PROSPECTS FOR NEXT SEASON'S TRADE.

Judging by the preparations which fruit salesmen are making for the coming season there is every indication that the imports of Canadian apples will even surpass those of last season. Under the system of importing fruit direct from the actual Canadian grower to the merchant house on this side which originated from the number of inquiries that have appeared in the Trade and Commerce Weekly Report, and which met with so much success last season, the trade, even then was considered remarkable. Now that the season has finally drawn to a close an estimate can be formed of the trade done under this system. It is computed that no less than 53,000 barrels of Canadian apples came direct to Leeds, one firm alone accounting for 35,000 of this number; this does not, of course, include the shipments sent to Hull, Bradford, Sheffield, Newcastle-on-Tyne, and other large centres in the north of England; neither does it account for the thousands of barrels which have been purchased by auction at the Liverpool and Glasgow auction rooms.

With a reliable Canadian packer and a reputable English merchant house, local salesmen have begun to realize that this direct trade can be conducted with perfect harmony. There is not the least doubt that many firms who refrained from importing direct last season in order to see what success their more go-ahead competitors would meet with, will, themselves, be working under this system during the coming season, as the strict government inspection of Canadian apples before shipment, (which is becoming to be well known fact on this side) gives them a greater confidence in buying Canadian-packed apples over any other fruit.

ARRANGEMENTS FOR SHIPMENT.

Canadian growers should be able to secure direct through-freights to any local centre either by the Manchester Liners, Limited, or any of the Liverpool-Canadian lines or the Thomson Line, which has direct sailings from Montreal to Newcastle-on-Tyne during the season. In addition to these, although there is no direct service from Montreal to Hull, it is quite possible that steamers belonging to some other line will make direct sailing to that port from Montreal. This was the case last season when the ss. *Oxonian* and the ss. *Virginian*, of the Leyland Line, made several voyages direct to Hull with cargoes of Canadian apples and other products.

THE QUESTION OF REPRESENTATIVES.

During the past twelve months a deeper interest has been taken in the possibilities of developing this market by Canadian apple shippers. Several Canadians have visited this office in connection with the fruit traffic and have been introduced to 'Would-be' importers which has led to business relations being established. It would undoubtedly be a good thing for all the larger exporters to either personally visit or send a representative to this country, as this would enable them to make arrangements for shipments with firms of the best standing, a matter which is one of the utmost importance when the financial arrangements are considered. There need be no doubt as to the reception they would receive, as these firms are almost as anxious to get in touch with good Canadian packers as the latter are to become connected with reliable houses on this side. This is shown by the number of representatives of local firms who visited Canada last season for the sole purpose of making arrangements with Canadian growers for shipments of apples to this district.

CANADIAN VS. UNITED STATES FRUIT.

Some of the representatives who also visited the chief apple-growing districts in the United States reported that fruit growers in that country were much concerned at the headway which Canadian apples had made on the British market, and the preference shown for them whenever they could be obtained. This they attributed to the strict government inspection of Canadian apples before shipment, and some exporters are said to be asking that the United States government should adopt a similar inspection to protect the reputation of United States fruit being further injured by unscrupulous packers in that country. There is also a unanimous opinion among local fruit men that the United States packers reduced both weight and the size of their barrels last season.

SELLING APPLES BY WEIGHT.

A suggestion is made by a Hull fruit importer that Canadian apples should be sold by weight. The well-known superiority in the weight of Canadian apples over those of the United States has long been recognized in Scotland, and for this reason, the imports of Canadian apples into Glasgow last season are said to have equalled those into Liverpool. The practice of selling apples by weight has also been adopted to a certain extent in Wales. This importer suggests that each barrel have stencilled upon it the exact gross weight of the barrel and the net weight of the apples alone. 'Take, for instance,' he says, 'a barrel of Canadian No. 1s, and a barrel of United States fruit of similar quality: the Canadian barrel on an average weighs about thirteen stones, whereas the United States barrel will only weigh about twelve.' Under the present system of auctioning fruit in England the buyer chooses the most attractive looking of the two, ignoring the fact that if he decided on the United States barrel he is paying the same price for twelve stones which would enable him to purchase thirteen stones of Canadian apples. 'The Scotch buyer,' he states, 'approaches this difference and insists on buying by weight alone—the appearance of the apple is not the only consideration to him.'

NOVA SCOTIAN APPLES.

Apples from Nova Scotia are not in demand here, not because the fruit is inferior as it is quite the equal of the apple from Ontario, but because the capacity of the Nova Scotian barrel is smaller than the one from Ontario, by at least twenty pounds. The sooner the Nova Scotia men use a barrel the equal in capacity to that from Ontario, the better for their trade, for if the smaller barrel is used much longer, their trade, as far as this district is concerned, will be almost entirely lost.

SYSTEM OF PACKING.

On the all important question of packing it may be said that barrels are mostly employed, 90 per cent of the Canadian apples which arrive in this district being packed in this manner. Boxes should only be used in packing the highest class fruit which are bought by the salesmen on this side for supplying a special trade. (See my report in the Monthly Report for January, 1907, page 1133.) Canadian packers are also strongly recommended to place a sheet of cardboard at the top and bottom of each barrel before nailing down the lid as this acts as a preventative to dirt and grit making an impression upon the fruit which forces its way into the barrel during transit.

FINANCIAL ARRANGEMENTS.

The financial arrangements which may be made between the Canadian grower and English buyer, is, of course, a question to be decided between themselves, and the majority of the firms prefer to pay cash against bills of lading, providing they know the packer or shipper, the kind of apples, and style of packing which he uses. Still, I can see no reason why a large commission trade should not be done with the merchants in the interior cities, just as safely from a financial point of view as with brokers at the ports; and when a shipper's apples are once in demand by sales on commission, he can turn his business into a cash one at any time.

LEEDS APPLE IMPORTERS.

Below I append a list of the principal fruit firms in the north of England having capacities for disposing of from 250 barrels to 1,000 barrels per week during the season, and who are anxious to do Canadian trade:—

Town.	Name of firm.	Address.
Sunderland....	J. E. Laird..	Low Row.
Darlington..	J. & J. Thompson..	Union Row.
West Hartlepool..	J. T. Meed..	No. 3 Warehouse.
West Hartlepool..	J. Brooks & Son..	Tower Street.
Sheffield..	Joseph Roper & Sons..	Castlefolds Market.
Sheffield..	W. Snowden..	Castlefolds Market.
Sheffield..	W. Gunstone & Sons..	Park.
South Shields..	John Gidroy & Sons..	Mill Dam.
South Shields..	John Wann & Sons..	Mill Dam.
Halifax..	Hilbert Brothers..	Union Street.
Leeds..	J. W. South & Sons..	Kirkgate Market.
Leeds..	Wm. Crase..	Kirkgate Market.
Leeds..	G. H. Hampshire..	Kirkgate Market.
Leeds..	Alf. Eagle..	Kirkgate Market.
Leeds..	Wm. Johnson..	Kirkgate Market.
Barnsley..	J. Bradbury..	Midland Street.
Barnsley..	Barnsley and District Fruit and Potatoe Merchants Association..	Barnsley.
Huddersfield..	Emsley & Collins..	5 Brooke Street.
Huddersfield..	W. & A. Bletcher..	Fruit Market.
Castleford..	D. Sainter & Sons..	Albion Street.
Newcastle-on-Tyne..	R. B. Pringle & Son..	St. Andrew Street.
Newcastle-on-Tyne..	Bowe & Waters..	4 St. Andrew St.
Newcastle-on-Tyne..	John Gilroy & Sons..	St. Andrew Street.
Newcastle-on-Tyne..	W. Longfield & Son..	1216 Green Market.
Newcastle-on-Tyne..	Wilson, Young & Co..	6 Green Market.
Newcastle-on-Tyne..	John Wright & Son..	Green Market.
Newcastle-on-Tyne..	Newcastle Fruit Merchants' Associaton, Limited, Pringle Buildings..	St. Andrew Street.
Newcastle-on-Tyne..	Dun & Company..	Green Market.
Hull..	A. Blyenburg, jr..	73 Humber Street.
Hull..	J. Bradmun & Co..	7 & 8 Humber St.
Hull..	Thomas Bulman & Co..	12, 13 Humber Street.
Hull..	Dunn & Green..	Humber Dock Side.
Hull..	Gibson, Bishop & Co..	Humber Dock Side.
Hull..	Julius Meyers Successors.	15 Humber Street.
Hull..	Wray & Scott..	29 Humber Street.
Hull..	Stirling & Gibson..	Humber Street.
Hull..	John Seed & Sons..	Humber Street.
Hull..	J. Pinder & Son..	72 Humber Street.
Hull..	B. & J. Shaw..	Humber Street.
Hull..	White & Son, Ltd..	Humber Street.
Hull..	Wm. Cussons, Limited..	Beverley Road.
Hull..	John Walker..	Humber Street.
Hull..	W. Rawson & Robinson..	69 Humber Street.
Hull..	Richard Hinchcliffe..	Humber Place.

JNO. B. JACKSON.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, April 27, 1907.

FLOUR MARKET IN NEWFOUNDLAND.

During the past fifteen or twenty years the flour trade of Newfoundland has undergone a very great change. Formerly the fisheries were supplied with low-grade flours from the United States, the bulk of the flour then imported being what was known as New York Supers and Twos.

High-grade flour was at that time regarded as a luxury, and was only used by the wealthier classes of the population, consequently the imports of the latter would only represent about ten per cent of the total imports. Of late years, mainly owing to good fisheries and the general prosperity of the colony, the flour most in demand is now high-grade, Manitoba Patent and American Spring Wheat Patent and second patent.

For fishery supplies the lowest grade now required is winter wheat 90 per cent, the bulk of this flour is imported from the United States, say $\frac{2}{3}$ American and $\frac{1}{3}$ Ontario wheat. Winter wheat patents are not wanted in any quantity, the demand now being for either Manitoba Patent or American Spring Wheat Patent, the consumers having arrived at the conclusion that with the latter flours they get better results, and more bread than from the soft winter wheats.

Manitoba patents and second patents are becoming more popular each year, and it would appear that in time they will, to a large extent, shut out the American Spring Wheat flours. The demand during the fall of 1906 was altogether in favour of the former in the cash trade, but as the American flour was quoted lower than the Manitoba it suited the merchants better for supply purposes and the credit trade, there being a larger margin of profit on the same.

COPPER ORE.

Reports have appeared in the local newspapers of the discovery of a very valuable deposit of copper ore on the Exploits river, in the vicinity of Red Indian lake, within easy access to the railway, and not very far from good shipping facilities by water.

TARIFF CHANGES.

Some recent changes in the customs regulations are said to be the cause of considerable dissatisfaction on the part of importers and friction with the customs officials, objection being taken to the exaction of duties on freight charges in addition to invoice prices to port of shipment to Newfoundland.

The following particulars in regard to the duties on packages will be found useful to Canadian exporters:—

TAX ON PACKAGES.

Cases costing at port of export over 2s. and up to 4s. shall be valued at.	\$0 40
Costing 10s. and under.	0 50
Costing 15s. and under.	0 60
Costing 20s. and under.	0 70
Costing 25s. and under.	0 80
Costing over 25s. and under.	0 90

TAX FOR BALES.

Coverings such as bailing, including hooping or cording, in which dutiable goods are contained, when not included in the cost of the goods, costing at the port of export 5s. and under, shall be valued at.. . . .	\$0 50
Costing 10s. and under.. . . .	0 60
Costing 15s. and under.. . . .	0 70
Costing 20s. and under.. . . .	0 80
Costing over 25s.. . . .	0 90

Straw wrappings, when used as outside coverings on dutiable goods, and when not included in the cost of the goods, shall be valued at half their cost at the port of export.

Crates, in which earthenware is packed (including straw) shall be valued at one-fourth their cost at the port of export.

WET GOODS PACKAGES.

In making entry for goods, the coverings inclosing which being dutiable, the value for coverings shall be as follows:—

Carboys containing acids.. . . .	each	\$1 00
Puncheons.. . . .	"	1 50
Hogsheads.. . . .	"	1 50
Half hogsheads (ale or beer).. . . .	"	0 75
Quarter casks.. . . .	"	1 00
Octaves and barrels.. . . .	"	0 60
Half octaves.. . . .	"	0 40
Quarter octaves.. . . .	"	0 30
Bottles—ale, beer and porter, quarts.. . . .	per dozen	0 20
Bottles—ale, beer and porter, pints.. . . .	"	0 10
Bottles—brandy, whisky, &c.. . . .	"	0 20
Flasks—no cups.. . . .	per case of 2 dozen	0 40
Flasks—no cups.. . . .	" 4 "	0 80
Flasks—with cups.. . . .	" 2 "	0 60
Flasks—with cups.. . . .	" 4 "	0 70
Decanters.. . . .	" 1 "	1 00
Bottles—Gin, quarts.. . . .	" 1 "	0 10
Bottles—wine.. . . .	per dozen	0 20

E. D. ARNAUD.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, April 15, 1907.

MONTHLY RETURN OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Return, for the two months ending February 28, of the present and the previous year:—

Exports to Canada.

	1907.	1906.
Silk tissues, habutae.....	\$38,773	\$56,084
Silk handkerchiefs.....	3,588	10,765
Cotton tissues.....	637	391
Mats and mattings for floor (Hanagoza)...	22,134	8,925
Porcelain and earthenware.....	16,276	11,943
Lacquered ware.....	595	466
Tea.....	31,123	13,453
Rice.....	46,080	13,453
Straw-plaits and Chip-braids.....	370	1,488
Camphor.....	348	2,666

Imports from Canada.

	1907.	1906.
Flour.....	\$ 9,807	\$15,988

The 'principal items' given in the Monthly Return number only twenty-five of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of trade the Annual Return has to be awaited.

GENERAL TRADE RETURN.

	PRINCIPAL IMPORTS INTO JAPAN		
	For February, 1907 Value.	Two months ending February 28, compared.	
		1907, Value.	1906, Value.
	\$	\$	\$
Flour.....	280,387	479,963	1,248,576
Butter.....	4,528	6,438	14,466
Salted salmon.....	9,500	116,621	168,861
Condensed milk.....	77,769	149,434	122,405
Fertilizers.....	522,357	1,028,821	477,639
Leather, sole.....	101,872	144,997	111,783
Lead, pig, ingot and slab.....	45,004	94,429	140,096
Printing paper.....	111,704	204,391	223,629
Cotton duck.....	4,138	7,665	12,535
Cotton prints.....	46,566	111,884	123,833
Cotton satins and italians.....	76,888	144,969	183,911
White shirtings.....	39,827	78,420	162,505
Gray shirtings.....	14,676	45,912	525,964
Pulp, wood.....	80,802	139,305	163,263

TOTAL IMPORTS.			TOTAL EXPORTS.		
February, 1907. Value.	Two months ending February 28.		February, 1907. Value.	Two months ending February 28.	
	1907, Value.	1906, Value.		1907, Value.	1906, Value.
\$	\$	\$	\$	\$	\$
18,988,576	39,166,164	33,151,428	16,708,092	30,898,553	25,735,116

HIGH-PRICED FLOUR.

Since the tariff, effective just six months ago, gave a decided preference to wheat over flour, there has been some inquiry for wheat quotations and as to the probability of supply. Although there have been some transactions, the general report is that prices are too high. One of the latest answers is that 'You Canadians are too well off, your prices show that you have a better market than we can offer you.'

To a recent inquiry for business from a Canadian Milling Company, a leading firm here say that they will be very glad to hear from the Canadian Company with their best proposals, but 'at the same time we must admit that although we have tried for a long time to do business in Canadian flour, we have so far been unable to make any headway owing to the competition of the cheaper American qualities.'

Another leading firm thank this office for the information, but 'regret to say that owing to the high price of Canadian flour it is impossible for us to do business, therefore feel that it is useless to trouble the inquiring company with our correspondence.' These are representative houses, with widely extended connections, who know the market thoroughly, and whose business it is very desirable to have. There are others, who take up the inquiry, first class houses too; but they have the same market to cater to, and great expectations are therefore not in order. The general tenor of correspondence with the milling and grain operators in British Columbia and Alberta impresses one with the comparative unreadiness of the trade there to present a strong front in this market. Milling and elevator facilities are as yet seemingly in the early preparatory stages. And that is after all only a reasonable condition, because these things involve large expenditure of money which could not be ventured upon unless the crops to supply them could be anticipated.

TRANSPORTATION FACILITIES.

Then there is the matter of transportation facilities. The Canadian Pacific has a great name, and has done and continues to do great things for Canada, in the Orient. But the opinion here is that the traffic is up to the facilities; and that flour and grain from Vancouver will not compete with those products from Seattle and Tacoma until the facilities are greatly increased.

As to the unreadiness for efficient exportation to this market, I find in the *Vancouver Daily Province* an interview very much to the point, under date March 6.

The manager of a Vancouver milling company, interviewed, says that 'within the last thirty days we have received inquiries for approximately a million bushels hard wheat for shipment to the Orient, principally to China. We have shipped about a thousand tons of this hard wheat to the Orient within the last two or three months, and the reports we have received from there are that the grain is very satisfactory for mixing purposes. The indications are that a large amount of our grain will be used by the mills in the Orient in the future, in fact they are very anxious to secure our grain. They mix it with the softer wheats from Australia and Puget Sound, and it adds strength to their product.'

'The trouble with us is that we are unable to get this wheat, as what surplus there was—probably about two million bushels of milling wheat in Alberta—was in the greater part moved east last fall because of lack of elevator capacity. There are large amounts still in Alberta, but they are being held for milling purposes. The surplus stock for export is now practically exhausted. Were that not the case this Oriental business could be handled.

'Could we not get the wheat from Saskatchewan? No, it costs too much to get the grain from there, because the long haul to the coast is too expensive.

'I have just returned from an extensive trip through Alberta, where in the grain trade I found prospects for the coming summer extremely bright. A very large increase of winter wheat is in the ground, and this grain is looking exceptionally well. From present indications Alberta will have at least five million bushels of wheat for export this year, where she had less than two million bushels available last year. We are confident that a large part of that surplus grain will move to Vancouver. While the demand from the Orient is now making itself manifest, I believe that in the future Mexico will take quantities of our highest grade grains.

'We are now installing machinery in our flour-mill. We expect to commence operations in time to place our floor on the local market by May 1.

'As to surplus for export, we have sufficient inquiries from the Orient alone to enable us to operate our mill night and day from the start. We have our eyes on the Orient, and expect to develop that trade as rapidly as conditions warrant; but we intend for the time to make Vancouver and British Columbia our principal market, and will use nothing but No. 1 hard wheat from the Northwest in the manufacture of our flour. Our surplus stocks will be exported.'

What the party giving this interview says, is consistent with what I have before me in his company's correspondence with this office. It is consistent too with what has always been advanced upon this subject in these reports; that is, that the flour and grain trade of Canada tributary to the Pacific are not yet ready, but are getting ready, to take an aggressive part in the Oriental market.

It is confirmatory too of the mention made from time to time in these reports of the seeming fact that it is too often 'surplus stocks,' left over after the home demand has been supplied, that are offered for the Oriental trade. I would say here that, in order to effect profitable competition in the Japanese market with Oregon, Washington, and California flour, it will be necessary to make a specialty of flour manufacture acceptable to this market.

THE NEW TEA CROP.

Shizuoka Prefecture is an important tea growing district. A newspaper correspondent, under date April 15, says:—

'Even though unusually cool weather has prevailed in this locality since early spring, the growth of the tea plants is fully expected to be satisfactory. Consequently the output will be about the same as that of ordinary years, though picking will be delayed three or four days as compared with last year. Although money is easy in this locality, firing charges will be 15 to 20 per cent higher than last year, and the new tea will certainly be dearer than that of last year as far as transactions at the beginning of the tea season are concerned. In some districts in Shizuoka-ken, there is depression among tea dealers, so that no sales of raw leaves under "previous contract" have so far been reported, though there were many such sales at this time last year.'

It may, therefore, be inferred that the tea season is upon the whole favourable, although somewhat backward.

ALEX. MacLEAN.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, May 4, 1907.

HAY.

In my report of December 4 (see Monthly Report for October, 1906, page 645) last, I drew the attention of Canadian exporters to the fact that hay would likely be scarce and expensive in this market, and the prices I then named as probable have been exceeded, as the figure went as high as \$30 per ton. At the present time the market is completely cleared out of baled hay, and the only supplies to be obtained are furnished by local farmers, who are offering small quantities of loose hay at a price equal to about \$40 per ton. Until some outside supplies can be obtained when navigation opens with the Gulf ports it is not likely that there will be any material reduction in the above quotation.

E. D. ARNAUD.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., May 1, 1907.

EGG MARKET IN NORTH OF ENGLAND.

The egg importing firms situated in the north of England are already making preparations with Danish, Swedish and other European exporters for shipments of eggs for this country for delivery between the first of October, 1907, and the end of January, 1908. It therefore behoves Canadian exporters to make similar preparations for shipments of eggs to the British market, as Canadian glycerined eggs are very acceptable here. To cater to the requirements of this market, Canadian shippers are advocated to send their eggs glycerined, as by this process of preserving they are said to arrive here much sweeter than otherwise.

IMPORTANCE OF PACKING.

Messrs. Wallaces, of Huddersfield, who are amongst the largest provision dealers in the north of England, state as follows: 'The reason Canadian eggs have not made the same headway on the British market as Canadian cheese and other products have done is due solely to the errors of a few certain shippers. The whole trade in Canadian eggs may be characterized as "erratic." One month a shipment may come in fine condition, the next shipment to arrive in the following month will be totally the

reverse. I have seen Canadian eggs which were in such bad shape that they were sticking to the sides of the boxes.'

This confirms my report on several occasions that one shipper's false packing not only spoils his own reputation, but the whole reputation of the Canadian egg trade in the estimation of the receiving firms on this side.

BUTTER PACKAGES.

On the all-important question of package, I am still of the opinion that all Canadian butter shipped to the north of England markets should be sent in casks. Practically every dealer makes this suggestion:—

'Box packing has so long been associated with inferior butter in the north of England, that Canada's present system of sending butter to this country in boxes is simply ruining her chances of making any decided impression on the large imports of continental and other foreign butters. In fact, it is said that for this reason alone Australia's attempts to compete in the north of England markets in box-packed butter have not been so successful as expected.'

The reason is not far to seek: the north of England is the stronghold of the Danish butter trade. Two-thirds of all the Danish butter imported into England is received from special butter steamers at Newcastle-on-Tyne, Hull, Goole and Grimsby, and immediately on being landed is distributed by fast express trains on the different railroads to the various centres.

DANISH BUTTER UNIFORM.

The Danish butter is the only brand of butter received in England which is always good and uniform in colour and texture. No buyer, be he buying wholesale or retail, desires to see or to sample Danish butter; the brand on the cask is sufficient. Let the buyer drop into the smallest grocery shop and buy his pound of best Danish, he can depend upon its quality without investigation. This butter which is always right, and never rancid or off flavour, is known to everyone by its cask form. For these reasons, not only the shopkeepers but the public are prejudiced against box packing by reason of the fact that all inferior butters, and the legions of butter mixtures as well as margarine, are packed in boxes, and when they see butter on a shop counter of a square or oblong shape, like a box, they run away with the idea that the butter itself is inferior, or perhaps 'margarine' or next door to it. When the housewife enters the store she is prejudiced right off against butter put up in the shape of a box, if it is standing side-by-side against some more butter in the shape of a cask. The former is something inferior in her opinion. This is a very old prejudice in the north of England, but it must not be supposed that this prejudice exists all over the British Isles; in fact, in the south of England box-packed butter is said to sell equally as well as cask-packed butter. Canadian butter also would appeal much more to the public in the north of England if it were not so 'highly coloured.' It should be made as near approaching a very pale straw colour as possible, and should not be salted more than one-half as much as in Canada.

JNO. B. JACKSON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, April 8, 1907.

QUEENSLAND TRADE.

I have received from the Collector of Customs, Brisbane, the following figures respecting the trade of Queensland :—

	1905.	1906.
Imports..	£3,163,631	£3,748,523
Exports..	3,404,856	4,314,250

The trade with Canada for the years 1905 and 1906 was as follows:—

	1905.	1906.
Imports..	£26,128	£28,493
Exports..	1,469	4,910

These figures do not include the Canadian articles received from other States. The principal articles imported from Canada during these years were:—

	1905.	1906.
Apparel and attire..	£ 940	£ 983
Boots and shoes..	553	937
Preserved fish..	3,502	788
Agricultural implements and machinery.. . . .	12,579	9,422
Pianos..	801	1,286
Machines and machinery, N.E.I.	2,108	2,083
Medicine..	248
Printing paper..	402	924
Cotton piece goods..	1,435	2,558
Bicycles..	2,105	2,436
Furniture..	788

The principal articles exported for the two years to Canada were:—

	1905.	1906.
Butter..	£985	£ 47
Bacon and ham..	46	154
Maize..	89	153
Potatoes..	46
Tin ingots..	4,224

NEW SOUTH WALES.

The customs authorities have furnished me in detail with the imports and exports from and to Canada for the year 1906. For the purpose of comparison, I have prepared figures for the year 1905:—

CANADIAN IMPORTS.

Items.	1905.	1896.
	£	£
Animals, horse		30
Apparel	5,010	3,351
" minor articles		33
Arms, cartridges	1,024	1,640
" rifles, shot guns		796
Bags, baskets, boxes	13	32
Belting, composition		7
" leather		24
Biscuits		900
Blacking		10
Books, printed	220	199
Boots and shoes	5,633	6,765
Chains, N.E.I.		138
Cheese	214	184
Cocoa, chocolate		3
Confectionery		60
Cordage		190

" free		2,871
Mangles		47
Electrical appliances, N.E.I.		792
Machinery, printing	860	5,893
Sewing machines		3,223
Typewriters	383	4,780
Machines, weighing	1,933	3,712
Medicines	538	7,326
Machine tools		1,105
Metal bolts, nuts		21
Mixed metalware		99
Metal manufactures, N.E.I.	724	1,050
Pipes, tubes		175

The goods of Canadian origin received into New South Wales from the other States of the Commonwealth are given as £24,758, which would make the total receipts of goods from Canada into this State at £178,481. These figures, as it will be seen, include some goods that did not originate in Canada, but came via Vancouver. On the other hand, it omits Canadian goods that came by New York.

It seems to be impossible, from any figures available, to ascertain what is the actual trade between this State, or indeed the whole of the Commonwealth, and Canada. A letter received by the last mail from a Canadian exporter, states that his invoices were directly upon New York, where his goods are paid for, and that he is unable to trace them afterwards.

THE WHEAT CROP.

The Australian yield of wheat is estimated at 71,138,697 bushels as against 68,520,772 bushels in 1905-6 and 54,497,382 bushels in 1904-5. The estimates of the Australian crop commonly are a little high, but against a return of 71,000,000 bushels it should leave for export about 40,000,000 bushels. The export last year was 37,639 bushels, though it was estimated a year ago that it would have gone up 40,000,000 bushels.

The New Zealand harvest has been a very poor one for all grain crops. The yield is estimated by the government to have been 4,948,440 bushels. The New Zealand production has declined for several years, as the following figures respecting the wheat harvest show:—

Year.	Acres.	Yield Bushels.	Average per Acre.
1906-7	206,185	4,948,440	24
1905-6	222,183	6,798,934	30·60
1904-5	258,015	9,123,673	35·36
1903-4	230,346	7,891,654	34·26
1902-3	194,355	7,457,915	38·37

It was estimated that about one and three-quarter million bushels were carried over from the crop of the previous year, which with this year's crop would give enough for home consumption. As stocks are not allowed to go so bare, New Zealand will require to import some wheat or flour this year, and indeed, has already imported some from Australia. There should be a demand, however, for Canadian hard wheat flour, and arrangements have been made for securing it.

OTHER NEW ZEALAND GRAINS.

Oats have been cultivated in New Zealand to a greater extent than wheat. The South African war gave a great impetus to the production of this grain, for which the southern portion of the island was suited. Since the war there has been a decrease in the acreage sown, and decrease in the yield per acre, it having been 25 bushels to the acre as against 45 bushels per acre in 1902-3. Barley, which is not so large a crop, was also a poor one this year, having returned 26 bushels per acre as against 40·69 in 1902-3. It must be noted that the year 1902-3 was almost a record year in New Zealand agriculture. The return of wheat this year is nearly an average of the yield for ten years from 1891 to 1901. The diminution of the yield does not, therefore, necessarily indicate serious soil deterioration, though it is natural to expect that the small area steadily cultivated is producing this consequence.

The area devoted to grain in New Zealand has been decreasing somewhat, but the acreage devoted to grass and green crops has rapidly increased, having doubled in the last twenty years. Dairying and the raising of lambs for the English market has proved more profitable than the growing of grain, except during the years of the South African war. New Zealand has hitherto supplied Australia with some of its barley and a considerable quantity of its oats, but should the lessened production continue, it will have little or nothing to spare for any deficiency in the yield of Australia. Should the next Australian harvest be seriously affected by drought, there would be a heavy demand upon Canada to supply the Australian requirements.

The latest price that I have of flour at Wellington, New Zealand, is Australian, £9 5s. to £9 10s. per ton. The duty is £1 per ton.

CROW'S FOOT ELM.

At a recent exhibition, amongst the timbers shown were some samples of Crow's Foot Elm from Queensland. I am informed that it is a timber abundant in that State, and is a large tree growing 200 feet in height and from 15 to 20 feet in girth. It has been tested as a substitute for hickory as a vehicle timber. I have been favoured with a copy of the following test, made at the University of Melbourne, by Professor Kernot, Professor of Engineering of that university:—

Cross Breaking Test No.	Description.	Span.	Breadth.	Depth.	Breaking Load.	Ultimate Deflection.	Remarks.
631	Crow's Foot Elm.....	in. 36	ft. 1·96	ft. 1·92	lbs. 350	ft. 1·2	Fairly fibrous fractures, rather short.

Compression Test No.	Description.	Length.	Breadth.	Thickness.	Stress in lbs.	
					Total.	Per sq. in.
1,163	Crow's Foot Elm.....	in. 12	ft. 1·96	ft. 1·92	31,000	8,238

Weight per cubic foot=46·7 lbs.

It is claimed that the breaking stress is double that of hickory. If these statements should prove true, it may be useful in Canada.

J. S. LARKE.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., May 4, 1907.

WOODEN GOODS.

From time to time I have sent on inquiries for all kinds of wooden handles, and although in some cases these inquiries have been answered, Canada is not doing as much in these articles as she should. The quantity required here is practically unlimited, particularly axe, hammer, pick, shovel, broom and chisel handles. Large quantities of hickory pick and sledge hammers are imported from the United States by firms in this district.

Shovel handles may be made from either ash or birch, and the sizes called for are from 4 feet to 6 feet by 1½. Pick handles in beech, birch, hickory and maple are inquired for at prices ranging from 36 inches to 42 inches. Basswood broom handles can be disposed of here in large quantities.

DOWEL STICKS AND SKEWERS.

I am also continually receiving inquiries for dowel sticks, 3 feet long in all diameters, and for butchers' skewers there is a large demand.

TIMBER FOR BOXES AND BARRELS.

Large quantities of packing cases are used here of every size, and I would be glad to hear from Canadian firms in a position to ship wood for the purpose, cut to sizes as needed by the various firms.

QUALITY, AND REGULARITY OF SHIPMENTS.

I would warn Canadian manufacturers that if trade is to be done in this country they must be prepared to follow it up. Regularity of shipments is demanded beyond everything. Odd lines are of no use. People here are prepared to contract for large quantities, but they must be shipped on time, and quality must be guaranteed.

P. B. BALL.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

SUN BUILDING, CLARKE ST.,

BRISTOL, ENG., April 30, 1907.

SOME BRISTOL INDUSTRIES.

In the following table is found a list of goods manufactured in or near the city of Bristol, together with the figures showing the values of such goods, imported into Canada from all sources during the fiscal year 1906. Canadian importers may be surprised at the extent of the list, and if they are interested in any of the lines mentioned it will afford me pleasure to put them in touch with the manufacturers, when I have every reason to believe they will be quoted prices at least as attractive as can be obtained elsewhere:—

	Value in Dollars.
Ale, beer, &c...	413,475
Agricultural implements...	1,814,564
Biscuits...	53,771
Brooms and brushes...	286,167

THE PORT OF BRISTOL.

Taking the decennial periods for the past fifty years, it will be seen that the trade of the port has made good progress, and has trebled itself in the period named. The results are as follow:—

Year.	Foreign.	Coastwise.	Total.
	Tons.	Tons.	Tons.
1857.....	133,342	494,280	677,622
1867.....	276,446	522,264	819,710
1877.....	518,857	588,796	1,107,653
1887.....	611,546	690,259	1,301,805
1897.....	818,084	755,431	1,573,515
1907.....	1,088,294	1,046,873	2,135,122

GHERKINS.

I wish to correct an error which found its way into my report of March 31, published in Monthly Report for March, 1907, page 1513. It is there stated that Canadian gherkins have heretofore been found 'too small in size.' The reverse has been the case. Small gherkins are wanted for this trade, but some shipments from Canada have been too large.

W. A. MacKINNON.

• AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(Mr. D. H. Ross.)

STOCK EXCHANGE BUILDING,
MELBOURNE, April 15, 1907.

AUSTRALIAN WHEAT AND FLOUR FOR CHINA AND JAPAN.

The development in Australian wheat and flour trade with the East now in progress is a matter of considerable importance. The origin of the movement was the Chinese boycott of American goods, which diverted part of the flour trade from America to Australia. Last year's exports of flour to the East consequently showed a substantial increase, while, in addition, an export trade in wheat for Japan has been established. This year the trade thus started shows a tendency to increase still further. Many Australian brands of flour have become known to the Chinese in a way that is bringing a regular flow of orders, the great advantage of China trade being the tenacity with which the Chinese stick to a brand of which they have ascertained the merits.

The volume of business has outstripped the regular accommodation of the three steamship lines in the trade, and a number of additional steamers have been taken up. The extra steamer announced by the three lines for this month's loading is expected to take fully 6,000 tons, mainly flour. A steamer from Adelaide will take about 3,500

tons, including a considerable proportion of wheat. A steamer cargo of 4,000 tons wheat has been engaged to be loaded for Japan. Another cargo of about 3,500 tons is to be loaded for the East from Melbourne. Altogether about 17,000 tons are expected to be shipped from Australia by the end of May or early in June under special arrangements, in addition to usual shipments by the regular lines. With continued good seasons in Australia, exporters of wheat and flour are looking forward to a market of magnitude and permanence in the far East.

AUSTRALIAN DRIED FRUITS.

There are two irrigation settlements in Australia from which raisins, sultanas and currants are now being marketed, namely Mildura (Victoria), and Renmark (South Australia), both of which obtain water from the Murray river. The growers are formed into associations which grade and pack the fruit for local and export trade. The export prices are much lower than the rates quoted within the Commonwealth. Owing to the combination of growers the Australian requirements are first filled, after which the surplus for export is made available. The good keeping qualities of Australian dried fruit is evidenced by the perfect condition of last year's pack now being distributed to local buyers. The total quantity produced in Mildura and Renmark is about 2,500 tons of sultanas and 2,300 tons of lexias. Although not officially declared, it is now practically certain that 700 tons of sultanas and 500 tons of lexias will be available for export this season, which, with good seasons, will be considerably augmented from year to year.

CANADIAN ORDERS FOR AUSTRALIAN DRIED FRUITS.

In my report of March 18 (Monthly Report for March, 1907, page 1525) I stated that samples of, and special quotations for, Australian dried fruit had been forwarded by a Melbourne exporting house to many wholesale grocers in Canada. During the last fortnight orders have been received, by cable, for some fair parcels—chiefly Lexias—which will be shipped to Vancouver at an early date. Further orders are expected by the Canadian mail due here on the 23rd instant. By this mail the Superintendent of Commercial Agencies, Ottawa, will receive standard samples of Australian dried fruit and, upon application to him, the name and cable address of the Melbourne exporters will be available.

EXPORT PRICES AND FREIGHTS ON DRIED FRUITS FOR CANADA.

The present wholesale export prices for Australian dried fruit—upon the basis of samples in possession of the Superintendent of Commercial Agencies, Ottawa—are as follows:—

Brown Lexias.. . . .	2½d. = 4½ cents per lb.
Brown Lexias—extra.. . . .	2½d. = 5 “
Sultanas—2 Crown.. . . .	4 d. = 8 “
Sultanas—3 Crown.. . . .	4½d. = 9 “

Packed in iron hooped cases each 56 lbs. Terms sight-draft against documents, less 2½ per cent f.o.b. Melbourne. The rate of freight from Melbourne to Vancouver is £2 12s. 6d. (\$12.77) per ton of 2,240 lbs. The freight for inland Canadian points has not yet been arranged, but buyers can doubtless obtain full particulars from the offices of the Canadian Pacific Railway Company. In the interests of reciprocal trade between Canada and Australia, I shall be glad to receive inquiries from Canadian importers of dried fruit for any further particulars desired.

ENORMOUS INCREASE IN EXPORTS OF AUSTRALIAN BUTTER.

The production of butter in Australia at the present time will only leave a comparatively small surplus for shipment to England, after providing for local consumption, and for regular supplies for South Africa and the East. The season's output—about closing—is easily a record one. The total shipments to England since July 1, 1906, to date compare with that of the corresponding period of the previous season as follows:—

From.	1905-06. tons.	1906-07. tons.
Melbourne..	12,549	16,123
Sydney..	7,168	10,106
Brisbane..	3,049	4,320
Adelaide..	588	879
Total..	23,354	31,428

The total shows an increase of 8,074 tons, and constitutes ample evidence of the great expansion in the dairying industry throughout Australia.

COMPULSORY INSPECTION OF AUSTRALIAN BUTTER EXPORTS.

The Commonwealth Commerce Act, which—so far as exports are concerned—came into operation on October 1, 1906, provides for the compulsory inspection and supervision of all food products to be exported beyond Australia, so that all the states are now placed upon the same basis. Prior to the Commerce Act, the Victorian government had regulations under which butter was voluntary graded, and stamped accordingly, at the request of the manufacturers or shippers. This provision in the State Products Act was availed of by nine-tenths of the shippers. The Victorian government has for many years had the advantage of carrying out inspectional work through having, under expert control, a large cool storage business of their own. Although there are about ten cool storage works in Victoria, practically the whole of the butter exported is passed through the government cool stores. As over 16,000 tons of butter were exported from Victoria during the last nine months, the magnitude of the work accomplished can be realized, especially when it is considered that the bulk of the exports is confined to a period of six months in each year.

INSPECTION AND GRADING OF AUSTRALIAN BUTTER.

The regulations under the Australian Commerce Act provide for a specific form of marking on packages with a trade description, the basic principle of which is that all brands shall be true to description. Butter for export must be branded 'Pure Creamery Butter,' if it is manufactured from centrifugally separated cream, and the name of the state where manufactured—say 'Victoria,' the word 'Australia'; the 'Net weight' and also the name of the manufacturer, or the name of the exporter or his registered trade mark. The exporter may place on the package any other matter, such as 'Choicest Butter' or 'Finest Butter,' but, if such is done, the contents must be strictly in accordance with the brand.

No poor quality butter is permitted to bear a superlative qualification, as was frequently the case prior to the coming into operation of the Commerce Act. It was found upon experience that absolutely the worst butter exported from Australia was contained in packages bearing superlative terms. On account of opposition from one of the states—where no supervision had previously been enforced—grading of butter for export is not yet compulsory in Australia; it is left at the shipper's option, but inspection is absolutely necessary before shipment can be made.

STANDARD OF QUALITY OF AUSTRALIAN BUTTER.

The Australian Commerce Act regulations stipulate that the manufacturer—in making application for inspection—has to certify that the butter contains more than 82 per cent of butter fat, and less than 16 per cent moisture; 4 per cent salt; 3 per cent casein, and 5 per cent boric acid, and any colouring matter deemed harmless by the department. If the butter is found to be in accordance with the specification an export permit is issued. There is no injustice caused to the manufacturer in signing such a certificate (which is part of the advice note), because the very fact that the word 'Butter' is branded on the packages renders him liable to a penalty for attempting to export butter bearing a false description, if its composition is not as already specified. The regulations provide for 'Milled Butter,' which is described as a mixture of butter from two or more creameries or dairies, or creamery and dairy butter.

BUTTER CLASSIFICATION AND ISSUE OF GRADING CERTIFICATES.

In addition to the compulsory inspection of all Australian butter for export, the Commerce Act regulations provide for its classification at the request of the manufacturer or owner. When classification is desired, the department grades the butter, brands the Commonwealth stamp on the packages—together with the certificate number—and issues a grade certificate. The best quality butter is designated as 'First Class Superfine,' and the points for this class range from 94 to 100 points. The next grade is called 'First Class,' the points being from 86 to 93, inclusive, then comes 'Second Class,' from 75 to 85 points, and 'Pastry,' under 75 points. It may be stated that the request to classify a shipment and departmental compliance with same does not embrace any indicating brand on the package as regards quality. The certificate may be for either first or second quality butter, but the department only applies the grade stamp when an additional written application is received for such to be done.

POPULARITY OF COMMONWEALTH BUTTER GRADING CERTIFICATES.

So popular has the classification and issue of grade certificates become—on butter for export from Australia—that although the regulations have only been in operation since October 1, 1906, only 84 per cent of the butter shipped since then from the state of Victoria has been inspected in accordance with the compulsory requirements of the Commerce Act. All the shippers have taken advantage of the voluntary classification section and have had their butter graded and branded with the grade certificate number. In addition, over 30 per cent of the exporters have had their butter grade stamped with the words 'First Class Superfine,' 'First Class,' or 'Second Class,' as the case may be. Grading certificates are issued on the day consignments are examined.

Factory managers and exporters are notified by the department of the nature and extent of the defects in the quality of the butter inspected, and suggestions are made as to overcoming same. Although the sole aim in grading is obviously to improve the quality, sellers and buyers make use of the butter grade certificates for trading purposes. Now many orders are cabled from England for specific quantities weekly based upon the government certificate as to points of quality at a certain f.o.b. price. It is estimated by the superintendent of the government cool stores that over £400,000 worth of butter business was transacted in Melbourne on the basis of government grading certificates during the first four months the regulations were enforced.

'FIRST CLASS SUPERFINE' AUSTRALIAN BUTTER.

First class superfine butter can be described as a quality which cannot be found fault with. It may be perhaps wanting to some extent in those fine characteristics, such as a full nutty aroma and flavour which go to make up a perfect butter, but,

broadly speaking, if the butter has no apparent defect it comes under this grade. The highest scoring butters receive 89 points, 99 and 100 being kept in reserve for qualities that are only very rarely met with.

'FIRST CLASS' AUSTRALIAN BUTTER.

First class butter embraces that which is suitable for any superior table, and although having any one or more of the defects usually found in butter such as 'slightly cloudy moisture,' 'slightly mottled,' 'slightly stale in flavour,' &c., it is on the whole considered as a good sound quality. Better class consumers would purchase this quality at a figure below the top price. Eighty-six points is the minimum awarded for this classification.

'SECOND CLASS' AUSTRALIAN BUTTER.

The minimum number of points is 75 awarded in designating second class butter. This quality may not be suitable for sensitive palates, but it is not unfit for table use, and is superior to the ordinary lines of pastry butter exported.

'PASTRY' AUSTRALIAN BUTTER.

Pastry butter is simply defined as a quality unfit for table use but suitable for cooking purposes. The various interpretations given agree with the actual difference in value when the local market is in a normal condition, that is to say, pastry butter usually sells at 2½d. per lb. below top prices for choicest.

METHOD OF EXAMINING BUTTER.

The largest butter factories in Victoria have four or five registered brands, and each day their output is forwarded to the cool stores. The product of such factories is generally uniform in quality, and hence it has hitherto been the practice to select three boxes of each brand from the bulk for inspection purposes. It was calculated that three boxes would give a good index of the average quality. The butter is weighed by the department, and, as far as possible, brands are concealed from the grader, but as many as 12,000 boxes of butter are received in a single day—during the height of the season—at the government cool stores in Melbourne, all the precautions cannot well be carried out.

It has been found that in many cases this method of obtaining samples is unsatisfactory, and a provision in the regulations is at the moment being put into operation for making each churning with a distinctive mark. The factory manager will, when despatching consignments, have to indicate in the advice note the number of sub-marks included, besides the number of boxes of each mark. This system will enable one box of each mark to be taken as a sample for the grader to examine, and a truer verdict of the quality of the whole consignment will be arrived at. The graders at the government cool stores examine all butter independently and in duplicate. Notes are compared at frequent intervals during the day, and where a difference in points occurs a re-examination of the butter is made, and if a mutual decision cannot be arrived at, the superintendent or his assistant is called upon to act as umpire.

HOW EXPERT BUTTER GRADERS ARE APPOINTED.

It is essential that all applicants for the position of butter graders must have a thorough knowledge of the practice and science of dairying, and in this way the department endeavours to secure the services of practical men of experience. Written papers are submitted by the Melbourne University and a Board of Examiners, con-

sisting of both trade and official representatives. Then an oral examination and finally a test in butter grading completes the competitive examination. A number of boxes of butter having definite faults are placed before the applicants upon which they have to submit a report. As the government take all the responsibility of grading it is obvious that it is necessary to secure reliable men to whom good salaries must be paid, which places them beyond the reach of ordinary temptation.

BUTTER GRADERS EMPLOYED AS DAIRY INSTRUCTORS.

The butter export season lasts for only six months of each year in Australia, although smaller quantities are shipped all the year round. The work of grading employs the Melbourne staff actively for only half of the year. It is now the intention of the Victorian government to utilize graders' services as instructors at the Agricultural Short Course Classes conducted in country centres during the winter months, and also to carry out experiments and make personal visits to butter factories to instruct the staff employed therein. By performing their duties as graders these men make better instructors, because of the data obtained during the export season, and, on the other hand, by acting as instructors amongst the butter factory managers for six months a year, they make better graders and must in time become highly qualified in both capacities.

AUSTRALIAN OPINIONS ON GRADING BUTTER.

It cannot be denied that considerable controversy has recently taken place both in Melbourne and London in regard to the subject of butter grading, and a certain section of buyers and exporters desire to have modifications made in the present system operated under the Australian Commerce Act. On the one side it is asserted that the verdict of the graders is too low, but on the other side some London buyers declare that the verdicts are invariably too high, and hence the department is placed in a somewhat awkward position, depending upon how the question is viewed. That the system will be improved by the experience gained during this season is unquestionable, and in time any friction hitherto existing will be removed by the graders becoming more expert in their work, and a larger number of boxes of each shipment being examined. Compulsory grading and branding—with the Commonwealth stamp—of butter for export is looked forward to by the authorities as one of the ultimate results of the gradual evolution in legislation governing the shipments of food products from Australia.

INCREASE IN EXPORTS OF AUSTRALASIAN WOOL.

The Australasian wool exports for the period as from July 1, 1906, to March 31, 1907, as compared with the corresponding period of 1905-6, show a net increase of 213,808 bales of which Australia contributed 181,969 bales, and New Zealand 31,839 bales. The exports for the nine months ending on March 31, 1907 are as follows: from Australia 1,555,030 bales, from New Zealand 366,408 bales, thus making the Australasian total 1,921,438 bales, of which the bulk was sold in the local markets. Prices continue firm, in fact upon a somewhat improved basis, as the demand remains as active as at the opening sales of the season.

APPOINTMENT AND EMPLOYMENT OF AUSTRALIAN TELEPHONE ATTENDANTS.

Applicants for employment in the Commonwealth Telephone offices are subjected to an examination in the subjects of handwriting, spelling and arithmetic (first four rules, simple and money). A candidate is not eligible for appointment as a telephone attendant unless her age was, at the last birthday preceding appointment, not less than

16 nor more than 25 years. Appointments are made on probation only, during which each appointee is tested as regards her hearing, speech and general management of—and deportment over—a telephone. When such tests are passed permanent employment is secured. Successful candidates in each state are appointed in the order in which the examination is passed. With few exceptions, female operators work the switchboards (common battery and magnetic), installed in the Australian telephone exchanges which are entirely under the control of the Postmaster General's Department.

REMUNERATION OF AUSTRALIAN TELEPHONE ATTENDANTS.

On appointment, say at the age of 16 years, telephone attendants are paid a salary of £30 (\$146) per annum, which is increased on good behaviour by the following amounts: 1st year £6 (\$29.20), 2nd year £16 (\$77.86), 3rd year £8 (\$38.93), 4th year £12 (\$58.40), and 5th year £12 (58.40). On reaching the age of 21 years, attendants receive pay at the rate of £110 (\$535.32) per annum, if their period of service has then equalled three years. The salaries are based upon a service not exceeding 44 hours of duty each week.

HOURS OF DUTY AUSTRALIAN TELEPHONE ATTENDANTS.

The hours of duty of attendants in the Australian telephone exchanges vary from 44 to 36 hours weekly (6 days). Sunday work is counted as time and half; that is to say, if in one week six days are worked and one is a Sunday, pay for 6½ days is allowed. No employee in the Australian Public Service is liable to dismissal or punishment—or other disability—for refusing on conscientious grounds to work on Sunday if the chief officer has been notified accordingly. At the same time, no employee can refuse when called upon by the officer in charge, to perform Sunday work in cases of necessity. After 44 hours of duty has been completed in each week, overtime is calculated for telephone operators at the following rates, those receiving under £100 (\$486.66) per annum are paid 1s. per hour (24 cents), those receiving over £100 are paid 1s. 6d. per hour (36 cents).

VACATION AND HOLIDAYS GRANTED TELEPHONE ATTENDANTS.

The Commonwealth regulations prescribe an annual leave of absence from duty—in telephone exchanges—of 18 days on full pay, and there are also statutory holidays, numbering about 10 each year, to which the attendants are also entitled. It is obvious that duty cannot be avoided on public holidays, but attendants working upon such occasions are entitled to equivalent time at a subsequent date.

VICTORIAN ONIONS FOR CANADA.

The *Manuka*, due at Vancouver on May 9, is taking forward 120 tons of Victorian onions, shipped to the order of Canadian firms. A smaller consignment has been shipped for Puget Sound ports. This season's crop is one of the best on record, and, with fair weather conditions on the Pacific, the onions should be landed in first-class condition.

SAN FRANCISCO MAIL SERVICE ABANDONED.

Canadian firms interested in Australian trade should take notice that—at least for the time being—the San Francisco mail steamers have been withdrawn from the New Zealand and Australian trade. This is the first cessation in that service which has been running for some thirty years. All Canadian mails for Australia and New

Zealand should be endorsed—'Via Vancouver.' The Canadian-Australian steamers are scheduled to leave Vancouver on May 24, June 21, July 19, August 10, and September 13. The necessity of prompt attention to Australian correspondence is—even more than ever—accentuated by this rather unexpected announcement.

CANADIAN-AUSTRALIAN STEAMERS—VANCOUVER TO SYDNEY.

The *Manuka* leaves Sydney to-day a full ship in every respect as regards passengers and cargo. For several weeks past, it has been impossible to secure a vacant berth on this fine steamer. The *Aorangi*, scheduled to sail for Vancouver on May 13, has also all her passenger accommodation completely booked. Passengers for Canada and the United States can now only secure cabins in the steamer sailing from Sydney on June 10. The usual shipments of seasonable Australian and other products continue to fill all the cargo space, whilst the outward bound steamers from Vancouver have, almost invariably, as much cargo as they can carry.

AUSTRALIAN TRADE CONDITIONS.

Independent of the good weather conditions, the present prosperity of Australia is caused to a great extent by high prices ruling the last two seasons for wool, butter and other staple exports. Imports and exports are increasing in value, the revenue continues buoyant and the outlook is considered to be satisfactory in every respect. The building and lumber trades, particularly, in these states, are very active at the present time.

CANADIAN TRADE NOTES.

Orders for usual lines of Canadian goods are being forwarded by Melbourne agents by this mail. Some agricultural machinery and implements—subject to the lower rates of duty—to be built to Australian specification are being placed with Canadian makers not hitherto interested in exporting to this part of the world. New samples of 'made in Canada' manufactures are being shown to wholesale importers of dry goods and hardware. The mail closes without anything of special moment to report.

D. H. ROSS.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND, AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, April 18, 1907.

NEW ZEALAND.

A dry season has considerably affected the dairying industry of New Zealand. From November to February the exports of butter and cheese were largely in excess of the similar period for the year 1905-6. But February and March showed a decline. There is now an improvement and the probability is that the year ending September will show a very considerable gain in the exports. The cheese exports for 1906-7 are 112,973 boxes for seven months, as against 90,021 boxes for 1905-6. The April shipments of butter are likely to show a greater shipment for eight months than for the previous twelve months. The shipments for the balance of the year are, however, likely to be light. There has been an increase in the shipments of frozen meat, so that the outlook notwithstanding the drought, is very good.

NEW ZEALAND FACTORIES.

A recent return shows that there has been a very considerable development in industrial operations in New Zealand. The figures show a comparison between the year 1906 and the census year, 1901, the summary of which is as follows:—

	1906.	1901.	Increase.
Number of establishments*	4,186	3,680	506
Hands employed—			
Males.	44,946	36,292	8,654
Females.	11,413	10,555	858
Totals.	56,359	46,847	9,512
Wages paid—			
Males.	£3,979,593	£2,972,193	£1,007,400
Females.	478,026	330,454	147,572

* Omitting government railway workshops and government printing office.

The value of the product for 1905 was £23,444,235 as compared with £17,853,133 in 1900. The principal increases are in industries which are necessarily local, meat works, butter and cheese factories, saw-mills, flour-mills, printing, hemp-mills, gas works, ham and bacon curing, brick and tile works, though there were fair increases in furniture, carriage building, woodware, and implement factories.

HEMP.

The export of New Zealand hemp last year was 27,779 tons, which was slightly under that of the previous year. The exports to Great Britain increased as did also those to Canada. The Canadian share was, however, but a small one. The direct shipments are given as 464 tons last year as against 264 tons in 1905. Shipments to the United States were about half what they had been in 1905.

The mills are just now well supplied with orders, but the prices in London have fallen very materially; the reduction being £2 10s. for good fair, and £4 for fair. Heavy floods have interfered with milling operations and there is a fear that, in consequence of these floods, the quality of the fibre will be inferior. Flax millers are therefore unwilling to enter into contracts for fair fibre at the present moment, particularly at the reduced prices offered. The British government has resolved to introduce the cultivation of this flax into the Island of St. Helena, and a New Zealand expert has left to supervise the operations.

JAPANESE TIMBER.

Last week a Norwegian steamship came into the harbour with a shipment of timber from the northern ports of Japan. It was composed of pine, oak, ash and bass wood, aggregating nearly 2½ million feet. A shipment had been sent to Melbourne some months ago and was so well received that this cargo to Sydney was the result. Another steamer is loading with 2½ million feet of the same timber for Sydney. The timber is imported as logs, squared by the axe, and is thus free of duty. It would be interesting to know what resources in timber Japan has, either in her own territory or in Korea.

If large quantities can be economically obtained it will not only interfere with the trade from North America in timber, but assist materially in developing Australian exports to China and Japan. There is no experience of the quality of the timber here, but in Melbourne it is reported that the pine will take the place of Baltic timber for bulding purposes, and that the other timber is very valuable for the purposes for which American oak, ash and bass wood has hitherto been used. A company has been formed for carrying on this industry.

PULP BUTTER BOXES.

Owing to the high price of timber, out of which Australian butter boxes have been made, experiments have been made with butter boxes made from wood pulp. The experiments show it to be free from any odour or taint likely to affect the butter injuriously, and to be strong. If shipped empty, it would be a very bulky cargo, and the freight has suggested the formation of a company here for the manufacture of the boxes. Should this be done, it will open up a new market for Canadian pulp. As yet action has not been taken.

NEWSPAPER.

Producers of paper in Canada show renewed interest in this market. It is exceedingly difficult to arrive at the quantity of news that is consumed in Australia. New Zealand gives the quantity of paper of various kinds in her return, but Australia simply gives the value. The varied prices of the paper imported prevent an accurate estimate of the average cost per pound, but the best estimate that I have been able to make is that about 35,000 tons of newspaper are consumed in Australia and New Zealand. Three publishing firms of this city have given me their estimates: one at 1,200 tons, the second at 1,800 tons, and the third at 3,500 tons per annum, with prospects of considerable increase. There would apparently be an importation of over 12,000 tons per annum in this city.

CANADIAN TRADE.

As yet there has not been time to receive replies to but a few of over three hundred letters that have been recently sent by firms of this state to Canadian houses looking towards trade. Of the number of Canadian exporters who have replied, only a portion of them advised me, as I had suggested that they should do, and of these about three-fifths state that they are not at present able to entertain orders from Australia, but hope to be able to do so in the future. This is only what was expected from previous knowledge.

The Canadian Export Company of Canada, the only organized company that is engaged in export from Canada to Australia, has opened an office in this city with good sample rooms. They are pushing sales energetically and with every prospect of securing a large trade. Considerable orders have been sent by this mail as well as others previously.

TRADE OF CHINA.

According to a report of Mr. F. B. Suttor, the New South Wales Commissioner of Trade in China, the trade for 1904 and 1905 is as follows:—

	1904.	1905.
Imports..	£50,238,005	£67,996,578
Exports..	£34,917,807	£34,657,996

The imports into China have more than doubled in five years, and the exports have increased by about 50 per cent. As China has been troubled with internal disturbances, disastrous floods and severe famines in many districts, some idea can be formed of what the trade is likely to be in future years. Of the trade of 1905, £42,179,246 of the imports and £16,208,206 of the exports, were with British countries; the great bulk of it being with Hongkong and Great Britain. The Canadian share of the trade was: imports £363,122, exports £61,805.

The principal countries with which trade was done were:—

	Imports.		Exports.	
United States.. . . .	£11,697,769	2 2	£4,110,929	18 2
Japan.. . . .	9,325,068	19 4	5,393,629	15 9
Europe.. . . .	4,805,175	8 5	5,476,990	9 4

The United States trade, in view of the boycott that was supposed to have so largely affected it, is extraordinary. Still more remarkable is that the imports of United States goods in 1905 show an increase of £7,442,214, while the exports to the United States show an increase of £160,600.

IMPORTANCE OF SHANGHAI.

More than one-half of the trade of China was done through the port of Shanghai; Canton and Hankow each of them doing one-eighth of the amount done by Shanghai. The details of the trade are only given in part. There are increases in the importations of woollen and cotton flannel, woollen and cotton mixtures, and clothing and cloth. There is a decrease in the import of lead and bars in which Canada does some trade; the amount of which is not given.

CHINESE BUTTER AND CHEESE TRADE.

The imports of butter and cheese amount to £49,931. The importations were chiefly from:—

Europe.. . . .	£24,123
Australia.. . . .	9,093
England.. . . .	8,659
Hongkong.. . . .	7,809
United States.. . . .	4,795
Canada.. . . .	500

It is believed that the bulk of the Hongkong shipments were from Australia, as the Australian lines touch at that port, that do not run regularly to any Chinese port.

CEMENT.

There is a growth in importance of cement in casks. The importations for 1905 were £84,334. Europe, Great Britain and the United States furnished the bulk of the imports. The importations of paint and oils are also increasing.

FISHERIES PRODUCTION.

The importations of fish and fishery products for 1905 were valued at £1,944,995. The names of the countries from which these articles are obtained are not given. The importations of flour show some increase amounting to £564,772 in 1905. This flour was procured as follows:—

Hongkong.. . . .	£459,684
United States.. . . .	75,019
Japan.. . . .	45,635
Canada.. . . .	2,244
Australia.. . . .	701

The Hongkong flour was wholly imported, but the place of origin is not given.

LEATHER.

Leather is another item of considerable amount imported, last year being valued at £240,488. Besides Hongkong, the United States was the largest contributor, having

supplied £21,617 as against £7,720 from Great Britain and £2,183 from Australia. None is credited to Canada. Of leather manufactures, the imports of 1905 were £41,832, the great bulk of it coming from Great Britain and Europe.

BOOTS AND SHOES.

Of boots and shoes, the importations were £91,774. Of this amount Hongkong and England supplied over £64,000, the United States £3,903; Canada is not mentioned.

CONDENSED MILK.

Condensed milk was imported to the value of £93,611. The United States is credited with no less than £50,387, and Canada with £6,159. In this connection there seems to be a field for Canadian export of dairy cattle.

CATTLE.

It was noted that the cattle imported from Australia were very inferior and disappointing; those from the United States gave satisfaction.

RAILWAY MATERIAL.

The importation of railway material is increasing, and last year was valued at £1,117,316. Europe, Great Britain and Japan furnished the great bulk of it; the United States is credited with £68,332, Australia £66,204, Canada £443. The Australian importations would be railway ties and timber for railway work. Of household stores, composed mainly of preserved meat, preserved fish and other tinned goods, the imports amount to £362,647. The following were the chief contributors:—

United States.. . . .	£106,541
Hongkong.. . . .	105,180
England.. . . .	75,602
Japan.. . . .	74,006
Canada.. . . .	2,944
Australia.. . . .	768

J. S. LARKE.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDING, ST. JOHN'S, May 9, 1907.

SEAL FISHERY.

In my report of March 19 last (Monthly Report, February, 1907, page 1299), I referred to the departure of the fleet of sailing steamers for the ice-fields off this coast. All these vessels have now returned to port, with the exception of two which suffered shipwreck, and the general results from this fishery can now be approximately given as 236,000 seals of a value of \$490,000. The figures for last year were 341,836 seals, valued at \$607,544, so that it will be seen there is a considerable falling off in this season's operations, mainly caused by the extremely severe weather conditions that prevailed while the ships were in the ice.

CANADIAN SEEDS.

The attention of Canadian seed growers and dealers is directed to the fact that a large proportion of the supplies used in this colony are furnished by British and American exporters, the customs returns for 1906 giving the following figures for this trade:—

United Kingdom.. . . .	\$3,511 00
Canada.. . . .	2,794 00
United States.. . . .	2,642 00

Seeds for agricultural purposes are not subject to duty, which applies also to plants, trees and shrubs.

CANADIAN AGRICULTURAL TOOLS.

My attention has been called to the fact that a distinct preference prevails here in favour of Canadian and British farming tools as against those of American make for the reason that they are considered to have better wearing qualities, although not so neatly finished as the American article.

E. D. ARNAUD.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(*Mr. C. E. Sontum.*)

CHRISTIANIA, NORWAY, May 2, 1907.

DENMARK'S EXPORT OF AGRICULTURAL PRODUCTS.

With reference to the export of agricultural products from Denmark during 1906, the consulate at Copenhagen reports as follows:—

Butter.—Of Danish butter there was exported in 1906 159 mill. pounds; the corresponding figures for 1905 and 1904 were 160 and 163 mill. pounds. During the last two years, however, there has been exported considerable of cream and milk, which may be figured to represent a total weight in butter of $4\frac{1}{2}$ mill. pounds in 1906, and about 3 mill. pounds in 1905. The export from the creameries thus is actually very near the same for each of the last three years, although 1906 shows a small increase, equal to about $\frac{1}{2}$ mill. pounds of butter. The value of this export has increased considerably more, as the prices of butter, although good in 1905, went up further with about 4 per cent in 1906. The butter was principally exported to England. The export to Germany which was increasing during 1904 and 1905, went down in 1906, there being exported to that country of butter in common packing hardly 2 mill. pounds in 1906, against more than 5 mill. pounds in 1905, and 3 mill. pounds in 1904. The export of cream and milk on the other hand goes about exclusively to Germany. In 1906 it thus amounted to 15 mill. pounds cream and 11 mill. pounds milk.

The butter prices have, as mentioned above, been a little higher during 1906 than the preceding years, viz.: on an average:—

	Per. 100 lbs.
1906.. . . .	\$26 12
1905.. . . .	25 17
1904.. . . .	23 75
1903.. . . .	24 55
1902.. . . .	25 13
1901.. . . .	25 94

Pork.—The export of pork in 1906 amounted to 160 mill. pounds against the same quantity in 1905, and 185 mill. pounds in 1904. The prices, which advanced considerably in 1905, went up still more in 1906. Most of the pork goes to Great Britain; thus of the export in 1906 only 5 mill. pounds went to Germany and less than 1 mill. pounds to other countries, the balance to Great Britain.

Eggs.—In 1906 there was exported of this article about 20 mill. scores, against 21 mill. scores in 1905, and 21½ mill. scores in 1904. The egg export culminated in 1903 with 23 mill. scores. There has thus during the last years been a reduction in the quantity exported; but the prices have been rising, which for a considerable part must be credited to the general rise of prices on nearly all articles of food; but also to the energetic efforts of the Danish exporters and producers to improve on the quality. Ninety-nine per cent of the exported eggs go to Great Britain.

Cattle and Meat of Cattle.—Of live cattle there was exported in 1906 105,000 head, against 124,000 in 1905, 92,000 in 1904, and 63,000 in 1903. During the same years there was exported respectively, 23½, 31, 25 and 23 mill. pounds of meat. The exceptional large export in 1905, both of live cattle and meat, was due to the expected higher duty in Germany, which also went into effect on March 1, 1906. About the whole of this export goes to Germany.

Horses.—There was exported in 1906 nearly 25,400 head, against 29,400 in 1905, and 26,100 in 1904, nearly all to Germany.

NORWEGIAN WOOD-PULP MARKET.

Of this year's output of mechanical wood-pulp in Norway there is at the present moment hardly more than five to seven per cent unsold, and although this winter the production has been larger than ever, there is hardly any pulp at the mills. The prices are steadily rising. Several of the larger mills, therefore, refuse to entertain proposals for contracts over next year, until the autumn is well advanced, as there is no probability of a drop in the value of pulp-wood. It is reported that a number of Norwegian capitalists are going to start a cellulose mill in Russia in the neighbourhood of 'Archangel.' The intended output of this mill is 10,000 tons a year. An application has been made to the Russian government for obtaining concession and permission to import the machinery for the new mill free of duty. The share capital, which is fully paid up, amounts to somewhat above 1 million kroners (\$270,000).

MORE NORWEGIAN PAPER MILLS.

A new paper mill is going to be built at Drammen, Norway, by Messrs. Kierulf & Haavind, proprietors of the paper mill recently started in the same town. The power is to be electricity. Two paper machines, which, it is said, will be the largest yet made for the manufacture of grease-proof paper, have been ordered from Mr. N. Füllner, Warenbrun, Germany, who is a favourably known maker of such paper machines.

C. E. SONTUM.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,

EAST PARADE, LEEDS, ENG., May 8, 1907.

RUSSIAN EGG TRADE.

The following particulars of the Russian egg trade from H.M. Consul at Riga may be of interest:—

‘The Russian egg trade, which a few years ago was considered to be scarcely worthy of notice, has developed to such a degree, and attained such a position, that eggs now figure in the front rank of exports from the Russian Empire, and as Riga is the chief outlet for the enormous quantities which are annually shipped to the markets of Western Europe, it is here that some idea of the trade may be formed.

‘In 1905 the total quantity of eggs exported from Russia was returned at 195,757 tons, of which 81,325 tons were sent from Riga. Last year the total quantity shipped must have been somewhat less, and it was reported that there was a slight falling off in the production, while the current year may see a further decline, owing to the famine on the Volga, but this check is considered to be only temporary, and an advance later on is predicted.

‘But although Riga may be the principal port of export, it must not be imagined that the eggs shipped thence are gathered anywhere in the neighbourhood. No eggs are sent from the Baltic provinces or any of the neighbouring governments.

‘The real egg producing region, from which supplies are drawn for the foreign markets, may readily be traced on the map. It starts at Tchernigoff, in the southwest, and sweeps round in a curve towards the northeast, embracing on its way the governments of Kursk, Kharkoff, Voronezh, Tamboff, Saratoff, Penza, Samara, Simbirsk, Nijni-Novgorod, Kazan, and ends at Viatka, but the more prolific districts are those of Voronezh, Tamboff, the Volga, and Kazan, while a large trade appears to be developing at Viatka. Eggs are also obtainable in Siberia, and at a cheap rate, but their quality is not to be depended upon.

‘The manipulation of the egg business in Russia has been worked up to a high degree of perfection, and the agents of the firms in this trade are legion. Every available district has been tapped, and the only areas that have not, as yet, been exploited are those without adequate means of communication, and consequently dangerous to touch. In the regions mentioned the agents are engaged from May to September or October in collecting, packing, and forwarding the eggs to the coast for shipment, but before they can be sent abroad, they are carefully sorted by experts and repacked according to class.

‘The merchants or representatives of the continental firms engaged in the trade, pay periodical visits to the egg districts in order to see for themselves the condition of the country, and to form some idea of the prospects for future operations.

‘The prices of eggs vary according to district, time of season, and class of egg, and range between £2 11s. and £5 15s. per case of 1,440 eggs, f.o.b. station. There is no rule by which prices are fixed, although some districts yield better eggs than others, and the merchants, in making their contracts for a season, very often run considerable risks which may only be covered by a favourable out-turn of the sorting.

'The freight to a port of shipment is according to mileage, and generally calculated per wagon of 100 cases or 10 tons. From Kozloff, in the government of Tamboff, to Riga the charge per wagon is £19 3s., while from Kazan to Riga it is £26. The freight per steamer from Riga to the east coast of Great Britain is between 22s. 6d. and 23s. 6d. per ton.

'The great bulk of the trade is done through the port of Hull.'

TASMANIAN PEARS.

Two varieties of Tasmanian pears, viz.: Beurre Clairgeans and the Vicar of Wakefield are being received here at the present time in good quantities. They are shipped in cases, each case consisting of three trays. The sizes of the cases are 2 feet 3 inches long, 15 inches wide and 6 inches deep; each tray being separate and detachable. In the Beurre variety the three trays contain 164 pears, and in the Vicar of Wakefield variety, 103 pears, as the latter is a larger fruit. Each pear is wrapped in paper, nicely packed, and are delivered here in first-class condition. The wholesale prices realized here are from 15s. to 18s. per case.

I can hardly understand the reason why Canadian shippers do not send more of their 'best pears' to England during the fruit season, packed in a similar manner to the Tasmanians. There is always a splendid market for good pears received in proper condition and correctly packed.

PEACHES.

We are also receiving from South Africa a liberal quantity of peaches, shipped in boxes containing three trays similar to the above; each tray containing about 24 peaches. The wholesale prices realized here at present are from 18s. to 20s. per tray.

These peaches arrive here in excellent condition, and I can see no reason why Canadian peaches, during the season, should not arrive in England from Canada in a first-class condition, seeing that the South African fruit has more than double the distance to travel when reaching England. I feel quite sure that a large business could be built up in the proper season in Canadian pears and peaches packed along similar lines.

JNO. B. JACKSON.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B., YOKOHAMA, May 15, 1907.

THE WHEAT TRADE.

There has been some importation of milling machinery, in some cases coming from Pennsylvania via the Canadian Pacific Railway route. And there is quite a noticeable increase of interest taken in wheat, under the incentive of a customs tariff rate discriminating between flour and wheat in favour of the latter. Excepting in a few special cases, interest will now focus upon next harvest, only about three months forward.

In case of a substantial increase of production beyond the demands of home consumption, there will probably be increased activity in pushing Canadian flour this way. But correspondence indicates such a degree of unreadiness, in respect of facilities for shipment, that there should be care not to expect too much, however, great the crop may be.

An importing and exporting house at the coast, answering inquiry as to official inspection and grading, and giving the standard grades, then answer inquiry as to facilities for shipment.

They say : ' Apparently there is a lot of pioneer work yet to be done. As to through rates, our elevator connections have no idea as to through rates to the Orient, and upon inquiry at the Canadian Pacific Railway we find there are none established, but they hope to have same ready in the fall. The Canadian Pacific Railway inform us that until they know the quantity of wheat likely to be shipped they cannot give any definite rate, but that if we come to them with an offer of a cargo the rate would probably be about \$9 per 2,000 lbs. Otherwise we must consider the rate to be \$10. On flour the rate is established at \$8, and we think the wheat rate will probably be the same. It will depend very largely, they inform us, on what the Ocean rates will be at the time of shipment. All of which you can understand to mean that there will be much delay in getting things down to a working and competing basis.'

Of course when all these things are brought up to date, through competing rates, standard grades established there and accepted here, and when the production of Alberta and Saskatchewan wheat will show a surplus that must be expected, there will yet be the handicap of bagging. There is no thought yet of port elevators and bulk shipping.

A Manchurian firm, writing to this office under date of April 29, says, ' There is a very large trade done in Manchuria in flour, principally American manufacture. The British consul at this port (Tairen), has asked us why some of this business cannot be diverted to the Canadian mills, and has recommended us to write to you. We should therefore be glad to be put in communication with one of the Canadian firms who would take up the business. The quality preferred for Manchuria is very glutinous and sticky. The present quotation for American flour is U.S.G., \$3.95 per brl. c.i.f., Dalny; but no fresh orders can be placed for shipment earlier than August.'

The trade returns of Tairen (Dalny) for March show imports valued at yen 30,070,000 and exports at yen 1,460,000. It is stated that the customs system to be put into operation at Tairen has been agreed upon with Sir Robert Hart. The gist of it is that the leased territory of Kwantung will be a free region, and that merchandise

will not be subject to import dues unless it passes outside that region. The arrangement is to be enforced tentatively one year, after which changes may be made according to experience.

APRIL TRADE.

The foreign export trade of Japan for April, 1907, according to advance reports, compared with that for April, 1906, amounts to

	Yen.
1907....	34,515,252
1906....	28,810,777

The increases for April this year were in greater part in rice, sake, beer, cigarettes, coal, wood, waste silk, camphor, raw silk, cotton yarns, copper (pig and slab), straw-plaits and chip-braids, silk handkerchiefs, cotton tissues, cotton towels, cotton undershirts and drawers, porcelain and earthenware, lacquered ware, umbrellas (European), mats and mattings, hanagoza.

The decreases for April this year were in greater part in tea, sugar (refined), silk tissues, habutæ, looking-glass.

The foreign import trade for April, 1907, compared with that for April, 1906, amounts to

	Yen.
1907.....	53,432,869
1906.....	42,727,797

The increases for April this year were in greater part in wheat, flour (wheat), cotton (raw), wool, flax, hemp, jute, &c., oil-cake, leathers, indigo (dried), iron (pig and ingot), iron (bar, rod, plate and sheet), iron pipes and tubes, paper, oil (petroleum), locomotives, railway cars and wagons, machinery.

The decreases for April this year were in greater part in tea, sugar (refined), silk (rail), shirtings and cotton prints, woollen cloths and serges.

MONTHLY RETURN OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Return, for the three months ending March 31, of the present and the previous year:—

EXPORTS TO CANADA.

	1907.	1906.
Silk tissues, habutæ....	\$ 60,714	\$ 81,603
Silk handkerchiefs....	4,883	16,088
Cotton tissues..	813	1,146
Mats and mattings for floor....	28,981	15,050
Porcelain and earthenware....	20,569	18,324
Lacquered ware.....	975	512
Tea.....	37,831	21,942
Rice....	62,720	22,590
Straw-plaits and chip-braids..	370	1,506
Camphor....	348	2,666

IMPORTS FROM CANADA.

	1907.	1906.
Flour..	\$ 22,156	\$ 19,835

The 'principal item' given in the Monthly Return number only twenty-five of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of trade the annual return has to be awaited.

GENERAL TRADE RETURN.

PRINCIPAL IMPORTS.					
	For March, 1907, Value.	Three months ending March 31 compared.			
		1907, Value.	1906, Value.

THE SPECULATIVE RAGE SUBSIDING.

The fever stage of speculation has run its course. The mania was acute enough for six months past, and there were grave doubts and fears prevalent that the optimism of many would tend to exhaust the vitality of the patient; but convalescence has set in, and with it the doubting people are growing more cheerful, although they may have to wait a while for the full restoration of confidence. The fittest are surviving; and they prove to be not one in five of the promising formations of joint stock capital that the newspapers have been announcing for months past.

The *Nichi-Nichi* (the Daily), an influential newspaper, appeals to public opinion to range all its powers against 'the swelling of the currency, or against the lack of moral courage to resist inflation and effect timely restriction.' It adds in substance that it is erroneous to hail the current inflation as the wholesome fruit of the development of the country's resources; it has no such sound foundation. It is argued that there is no irredeemable paper afloat; but the redeemable, if not judiciously restrained, ends in becoming irredeemable. The paper would warn the responsible financiers that 'the policy of encouraging note issue by the Bank of Japan, on the strength of loan balances as specie deposited abroad, is likely to raise the issue of redeemable currency to the danger limit, if it is not there already.'

Mr. Sakatani, the Minister of Finance, addressing the 'Economic Association,' at Tokyo, referring to the pessimistic views of some people and journals, said that

'the specie and bullion owned by the government totalled 500 million yen, and the amount of convertible notes issued was only 270 million yen. The Japanese financial world therefore could be considered to have still an ample margin of elasticity. But it required careful deliberation to solve the question how to use the margin. Since the rise of new enterprises, the government had been careful to delimit the banking world from the industrial. The recent checking of the enterprise craze seemed therefore to little affect the money market. The minister was confident that good enterprises could now easily work their way to success. Foreign business men were now promoting various enterprises in Japan, in anticipation of the revision of the customs tariff in 1911. He hoped that the Japanese business men were not falling behind their foreign confreres.

Business continues depressed. The present is between seasons with tea, silk and rice, as exports, and with some important lines of import. But the outlook for crops is favourable so far; and the fact that there have been few failures in trade, and no material weakness felt in that direction, goes to sustain general confidence.

SHIPBUILDING IN JAPAN.

While heartily felicitating its country upon the high percentage of growth shown by the shipbuilding enterprise, elevating it to the fifth position in national marine, the Tokyo *Asahi* (Rising Sun) turns the other side to popular view. It says that 'the discounting features of this remarkable increase are found in the fact that the shipbuilding business in this country receives ample official aid, that more than half the high tonnage recorded is made up of warships—a fact that shows the development is the result of official rather than private enterprise. Again, in regard to these warships, they were built in this country primarily for the reason of economy, but on certain military grounds with no consideration of financial disadvantages. The practice of subsidy here is not indeed an exception to that of the European governments, but none of them can equal this in the sacrifice of economic strength for naval growth. We shall hail the day when our shipbuilding business will reach high position by international competition, free from official protection.'

FISHERY ARRANGEMENTS.

The Russo-Japanese fisheries protocol, agreed upon and officially announced, has amongst its provisions the following :—

The sphere of the fisheries shall be the Russian coasts of the Sea of Japan, Okhotsk and Behring seas, except rivers and inlets.

The regular fisheries for salmon, herring, cod-fish, &c., shall be sold by auction.

No restriction will be imposed as to nationality of fishermen. For the fisheries within the Amur gulf, Russian subjects must be engaged as fishermen, except in the case of overseers.

All sorts of fish, marine animals and vegetation, may be caught. Seals are excepted.

As to methods of preserving fish, there will be no special restriction. Guano may be made of herring and other fish caught by the herring net, and salmon and other fish may be salted.

MONETARY STRINGENCY.

The timely nipping in the bud, of the speculative growth after-the-war, is making the consequent depression of trade pass along lightly, leaving in its course as yet few evidences of a serious business squeeze. At such times the banks get loaded up with money, because of the low tide of trade and the doubtful face of commercial paper. That is very much how it is here at present, and it is rumoured that the banks are about to materially lower the rate on deposits. The local press are saying that if this state of affairs goes on, no bank will declare a dividend of over 10 per cent, at the end of this half-year.

AN ESTIMATE OF MONEY MARKETS

Mr. Takahashi, just returned from London, where he had been engaged in connection with the conversion of the Japanese war loans, interviewed by the Tokyo press, expressed satisfaction with the success of the renewed loan on both the London and Paris markets.

Commenting, he said that in France the people were influenced by a spirit of money-saving, and therefore have plenty of money on deposit. For that reason it would appear that France should be a most suitable source from which to procure large loans. But there were drawbacks. The French discouraged the output of gold coin and bullion. Coupled with this, he thought the policy of the government was unfavourable to float a Japanese loan. In the United States the economic conditions had been bright since last year, and the capitalists were so eagerly bent on home commercial and industrial enterprises that they did not seek investment abroad. He contrasts the stock markets of Japan and the United States in a manner favourable to the former, his line of reasoning being that in Japan stocks are more widely distributed among the people than they are in the United States, and are consequently more secure against sharp fluctuations since they cannot be manipulated so easily by great capitalists. He regarded the money market in Germany at the present time as very tight. All things considered, he thought the loan now being issued, of \$40,000,000 for the Manchurian railway, would be floated on the London market. London was truly the world's market; an immense quantity of stocks of all countries being now held in England pending an easier condition of the money market.

THE FUTURE OF JAPANESE TEA.

On the basis of statistics showing the output and exports of tea during the past ten years, the *Osaka Asahi*, entertains pessimistic views about the future of the tea trade, which now occupies the foremost place next to raw silk. In Europe and America, says that journal, there are indications that coffee, cocoa, and chocolate are gradually superseding tea; and this tendency is also observable even in Asia, especially in Japan. The output of Japanese tea during the past ten years showed a diminution; while the exports to America and other tea-consuming countries also disclosed similar conditions. Below are the details:

OUTPUT.

	Lbs.
1896.	70,275,659
1897.	70,022,994
1898.	69,804,283

1903.	48,229,806
1904.	47,483,925
1905.	38,833,628
1906.	40,028,371

With the advent of the new tea season, considerable activity is manifested on the markets as well as in tea-producing centres of the country. According to the latest telegrams received by the foreign office from New York, Chicago and other points of North America, the demand for Japanese green tea there is unusually brisk this year, and it is stated that the stock at New York and Chicago is nearly exhausted.

ENCOURAGING SILK PRODUCTION.

The Department of Agriculture and Commerce has decided to grant aid, by way of subsidy, to certain experimental farms and agricultural schools that are under prefectural administration, to enable them to undertake the experimental cultivation of the mulberry tree. The leaf of the mulberry is the food for the silk worm, and the policy of the department is to extend the growth of the tree into districts that heretofore have not been thought climatically favourable, and thus correspondingly enlarge the cocoon producing area.

It is announced too that the Railway Department, in pursuance of the same policy, will make a reduction in the freight rate upon cocoons, to take effect on June 1.

ZINC PRODUCTION.

Japan is rich in zinc, but it is a large importer of the metal from foreign countries. They say that is because they cannot refine it. It is now said that a Japanese has invented a method of refining the metal, and the work will be started on a large scale.

JAPANESE EMIGRATION—A COMMERCIAL ENTERPRISE.

Emigration, from Japan, and also from China, to the newer countries of the two American continents, and to Hawaii and Australia, differs essentially from the same term when applied to describe the movement of population from the over-peopled countries of Europe to the west, say to Canada, for example. It is a matter of private enterprise at both the emigrating and the immigrating points. Specific demand at the latter point is met by specific supply at the other, as in an ordinary commercial transaction, which in several respects it resembles.

The 'Continental Emigration Company is sending six hundred Japanese emigrants over to Mexico by the Oriental Steamship Company's ship, *Manshu Maru*, which will leave Kobe on April 25.' This, or a paraphrase of it, is the reference to quite a common event by the press of the country.

The *Japan Times* is authority for the further announcement that 'the Trans-Oceanic Emigration Company has received an order from Mexico to send 6,000 Japanese labourers, in course of this year, to be employed in mining, railway construction and cultivation. The Kumamoto Emigration Company also is going to forward some 400 emigrants during May.'

In Japan there is a great deal of labour to sell; and there are countries that are in want of labour and are ready to buy it. The intermediate agency, the emigration companies, perform very much the part of commission merchant. It operates on the joint stock plan, with the requisite capital. Through agencies it enters into contracts to supply a stipulated number of labourers. It contracts with the labourers for a given term of service at a stated rate of wages. It pays the transportation service, but collects from the emigrant the amount of his passage. In some cases it advances, or gives credit to the emigrant for the passage money, and binds him under his contract to refund from his wages. A 'boss' goes in charge who sees to the carrying out of these arrangements. Towards the mainland Asiatic countries, this method of aiding emigration does not apply. In that direction the enterprising and adventurous Japanese, looking for new worlds to conquer, is left to go as he pleases, and he is going in considerable numbers.

In fact, in various interesting current expresses, the idea is discoverable equivalent to what we mean when we say 'Trade follows the Flag.' And one does not readily get rid of the impression, in view of the force of use and custom, that the Oriental emigrant will for a long time have a hankering preference for many things from his own country.

The *Nippon*, an influential paper at Tokyo, regards the present as an 'epoch-making opportunity in the history of Japanese emigration,' and says in substance that legislative exclusion from America (United States) taken for a fact, forces upon Japan the necessity of turning attention to other countries.

The *Kokumin* (The Nation), however, foresees that with the extent of undertakings in Korea and Manchuria, in the near future there will come active demand for Japanese labour, and that the failing supply of European labour in the several states of South America will leave a wide open field for the surplus labour of this country. With these prospects in view the American (United States) industrial interests are warned that the time will come when it will be more difficult to get Japanese labour than it now is to exclude it.

THE INTERNATIONAL EXHIBITION.

It is announced that 'a Director-General and other functionaries, for the Grand International Exhibition to be held at Tokyo in 1912, will be appointed within a few days, with offices in the Department of Agriculture and Commerce. With two million yen appropriation, for this fiscal year, the selection and the purchase of a site will be made, and the designs of buildings prepared. The construction work will be provided for and commenced next fiscal year.

PROGRESS IN FORMOSA.

The acquisition of Formosa, with its alien and largely barbarian population, has brought with it to Japan perplexities akin to those of the United States in the Philippines. But these are being surmounted, in great part by diligently pursuing the policy of industrial development.

At present the yearly rice crop is stated to be 4,000,000 koku or 20,000,000 bushels. And the yearly sugar crop about 133,000,000 lbs. The camphor industry produces 5,000,000 yen, and tea 6,000,000 yen annually. This is about how things are at present in the way of marketable products.

But there is an irrigation scheme in course of being worked out, for which the estimated required capital is \$80,000,000 in ten yearly appropriations.

The result of this irrigation improvement will be to double the yield of rice, and treble the production of sugar, so that these two items alone will rise to a value of \$50,000,000.

The industry of sugar refining, and rice hulling, consequent upon this increased production, also are attracting the attention of capitalists, with several minor industries amongst which are paper and hemp manufactures. It is therefore confidently assured on the authority of the governor of the island that Formosa will continue not only a prosperous agricultural country, but that it is about to enter upon great industrial development.

ENCOURAGEMENT OF AGRICULTURE.

The Minister of Agriculture and Commerce at a conference of the heads of experimental farms, held recently, dwelt upon the necessity of farmers being instructed in improved agricultural methods instead of the old ways to which they have been accustomed for generations. The object of experimental farms was to study the science of agriculture, and to propagate the results among the farmers. Special attention

should also be paid to the management of industrial guilds (or unions), which were a very important means for the promotion of agriculture. Encouragement of the use of vegetable fertilizers, and improved methods of feeding the soil, were also of urgent necessity.

The minister said the department intended to distribute a superior species of swine and poultry among the various districts, for breeding purposes.

MAIL LOST—THE 'DAKOTA.'

The steamship *Dakota*, wrecked on March 3 when approaching the coast of Japan, enroute from American ports to Yokohama, carried a large collection of mail bags, some of which would be from Canada, the greater portion of which was lost.

If any correspondence addressed to this Commercial Agency, being transmitted about that time, fails to receive attention, it may be assumed that it did not reach its destination, and should be repeated.

BRITISH WEST INDIA ISLANDS.

The following excerpts are taken from a report made by the representatives of the Toronto, St. John and Halifax Boards of Trade who visited the West India Islands for the purpose of investigating the possibilities of extending and furthering trade between Canada and those islands.

The delegates left Halifax on February 15, and held meetings at Bermuda, Trinidad, Grenada, Barbados, St. Lucia, Dominica, Montserrat, Antigua, Nevis and St. Kitts. At the different points the delegates were met by representative business men and others of the community, who gave them full details of trade and other valuable information.

FLOUR.

The result of the information secured seems to point to the fact that, on the whole, the use of Canadian flour in the West Indies is becoming gradually more universal; but owing to the fact that goods shipped via New York are credited to the United States in the statistics kept in the West Indies, it is impossible to ascertain how much Canadian flour reaches there. The prejudice against Canadian flour seems to be gradually dying out, but in many cases the theory that our flour will not keep as well as the American is still adhered to. Information on this point, however, was more or less conflicting; the statement being freely made also that whereas, some years ago Canadian flour did not stand the climate well, there has of late been a great improvement, and we have been told in several instances that it was equally as good as the American in this respect.

BAGS INSTEAD OF BARRELS USED.

Many of the markets are now taking flour in bags of 196 pounds instead of barrels. We have not heard any complaints regarding the quality of the packages. If in bags, they should be of the best quality. A very large proportion of the consumption is of 'Super' grade, consumed by the poorer classes. The dealers would prefer a somewhat whiter flour than is shipped from Canada at present under this grade. There is also a large consumption of a grade equal to Canadian 'Extras.' The quantities of higher grades used are more limited. In Demerara the first sample shown us bore the local brand of 'King Jimmy,' made in St. Louis, U.S.A. It is a super quality, nearly equal to 'West India Belle.' Cost in New York per 196 pound sack, \$3.15. This flour keeps well for nearly two months.

It is asserted that Canadian flour of the same grade will not keep so well. The sack preserves the flour as well as the barrel, and is much preferred. Canadian flour is making decided progress. A few years ago 'West India Belle' sold for twenty-five cents per barrel more than a Canadian extra; now the Canadian brings the better price. Much depends on the colour of the flour, which must be white. Flours like the one named are used for making native cakes, or chupatties. The bakers use Extra No. 1's—not patents—such as 'St. Lawrence.'

COST IN THE WEST INDIES.

One firm said that it was principally with high grade Canadian flours that the difficulty in keeping was experienced. This firm pays for American extra goods \$4.25, f.o.b. New York. The second sample seen was 'Rainbow.' This costs from \$3.60 to \$3.70, f.o.b. New York. Canada has about seven cents advantage in freight rates, the rate from Halifax being thirty-five cents, as compared with the New York rate of forty cents, plus five per cent collection charges. This collection charge, which

Canada does not impose, is said to be an irritating one. Canadian No. 2 Extra's are getting a better hold. The bakers will not pay the price of our best grades of flour. At one warehouse where we called we were told that the Canadian flour barrel has much improved. 'We have sold as good high grade flour from Canada,' said the head of this firm, 'as can be had anywhere.' 'Five Roses' was mentioned as being a popular brand.

Trinidad imported from the United States a total of 200,000 barrels, as compared with 9,000 from Canada. Most of this is 'Super' quality, this cheap grade being required to supply the demand from the Coolies. What has come from Canada has been of 'Extra' quality. This market is also taking an increasing quantity of flour in bags. Complaints regarding the lack of keeping qualities in our flour seemed to be more numerous here than elsewhere.

Barbados.—In 1905, Canada sent \$31,000 worth of flour to this port and New York sent \$291,000 worth. We were told that the keeping qualities of Canadian flour have vastly improved, but it is still behind the American in this respect. It is well enough packed now. From the United States it comes chiefly in bags; rarely so from Canada. American bag flour has kept almost as well as the barrelled. Importations from Canada are covered by Extra's and a little Supers. The Super flour from the United States is whiter than ours, and the people prefer it for that reason. The brand does not make any difference; colour is everything. Two-thirds of the flour imported is of the lowest grade, and it is colour that sells it.

St. Lucia.—Imports in 1904 were, from United States, 13,829 barrels; from Canada, 235 barrels.

Dominica.—The quantity of Canadian flour used here has, so far, been very small. Dealers prefer American. The quality required for this market is 'Extra's.' It must be in barrels, bags being unsuited to the existing transportation conditions, all merchandise having to be landed in small boats, often in a surf.

Montserrat.—'Extra's' are used here also. Very little has been imported from Canada. Freight rates said to be higher than from New York.

Antigua.—Imports for 1904 give Canada 239 barrels, United States 12,139. Imports from Canada seem to have been confined to bakers' grades. American Supers are used also, for the shop trade. The keeping qualities of Canadian flour are represented as having greatly improved during the past year or so. Bags are taken.

St. Kitts-Nevis.—The flour trade here seems to be entirely in the hands of the United States, practically no Canadian flour being imported. This is due largely to the fact that a large trading house in New York has a resident distributing agent, located at Basseterre, through whom the trade is done.

Bermuda.—About two-thirds of the imports are Canadian. We were told that Canada has nothing to fear from American competition here, as she can apparently sell cheaper than the States and with every satisfaction. The flour used in Bermuda must be shipped in sacks. In all lines, Bermuda wants the better class of goods.

BISCUITS AND HARD BREAD.

In a number of the islands large quantities of biscuits and hard bread are imported, chiefly from the United States. In Barbadoes, for example, \$60,000 worth of this class of goods was imported in 1905, all from the States; while in the Leeward Islands the total importations amounted to \$40,000. The chief item is a hard square biscuit known as Bordeaux bread, which costs about \$2.30 per barrel, f.o.b. New York, 80 pounds to the barrel. Canada sends some pilot and soda biscuit, but should be able to compete for the large trade in hard bread.

OATS.

The whole trade in oats is supplied by Canada, although most of it goes via New York. What is wanted are white oats packed in bags of 160 pounds.

SPLIT PEAS.

The remarks made about oats apply to this article also. They are packed either in barrels of 210 pounds net or in bags of the same weight.

CANADA PEAS.

Exclusively Canadian, imported via New York, in bags of 120 pounds.

CHEESE.

Canadian cheese is holding its own fairly well in the various West India markets. In Demerara its chief competitor is the Gouda, made in Holland. The Gouda, though of equal quality, is preferred owing to being put up in 10-pound sizes, packed four in a shallow box, with partitions between. Canadian cheese, put up the same way, would have a better chance. The Gouda costs 15 cents per pound, f.o.b. Holland. In Trinidad some complaints were made as to the keeping qualities of Canadian cheese. American Unadilla is the brand most favoured. In 1905-6 there were imported into Trinidad from England, 37,000 pounds of cheese; from Canada, 18,000, and from the United States, 225,000 pounds.

Barbados.—The imports in 1905 were from Canada, 39,348 pounds, and from the United States, 9,239 pounds. The preference here as elsewhere is for small packages.

Dominica.—American cheese is greatly preferred here, the United States having more than double the trade of any other country. No Dutch cheese is used. The American cheeses are of eight pounds weight, packed four to the box.

St. Lucia.—Imports of Canadian cheese fell off from 25,000 pounds in 1904 to 10,000 pounds in 1906. This was due chiefly to the withdrawal of the troops.

Antigua.—Canadian cheese is preferred here, and is supplanting all others. Small packages are desired.

St. Kitts-Nevis.—Returns for 1906 show a substantial increase in favour of Canada. The figures in pounds imported are as follows: Canada, 21,888; United States, 811; United Kingdom, 1,340.

BUTTER.

Canadian exports show fair results in the better grades, but in many of the islands the trade calls very largely for a quality which can be sold to the populace at a very low figure. In Demerara and Trinidad this demand is supplied by French butter, which is of a quality and sold at a price with which Canadian butter cannot compete. It contains about 72 per cent butter fat, the balance being water and salt in equal proportions. It sells for 22 cents per pound. Americans are now making up a compound to compete with this. By far the greater proportion of the butter is sold by the penny-worth over the counter. It was stated that Canadian butter would not keep as well as French after being opened. In the other islands the demand for a cheap butter is filled by oleomargarine from the United States. 'Bluenose' butter shipped from Nova Scotia is well liked, though considered by some not quite equal to the Danish.

BRAN.

Large importations are made in Demerara, Trinidad and Barbados, all of which come from the United States.

HAY.

While the bulk of the hay is shipped from American ports, it was generally admitted to be of Canadian origin. Barbados being the chief consumer.

CONFECTIONERY.

Very little Canadian confectionery is sold in any of the islands, most of that used coming from Great Britain. It must be specially packed in tins or glass bottles, in weights from one-half pound upwards. Canada should be able to get some of this trade.

BACON AND HAMS.

The consumption of bacon is said to be comparatively small, but a large quantity of ham is used. The most of it comes from the United States, imports from Canada being comparatively small.

BEEF AND PORK.

Out of the total meat trade of Trinidad, for example which amounts to nearly eight million pounds, Canada supplies only 140,000. Very little Canadian meats are sold in any of the islands. Canadian pork is not packed to suit this market, as is the American.

DRY AND PICKLED FISH.

The trade in these lines is monopolized by Canada and Newfoundland, some portion of the latter being shipped via New York and credited to the United States.

CONDENSED MILK.

This is consumed in Trinidad chiefly. Total importations amounted to £25,900 sterling in 1906, Canada supplying only to the value of £937 sterling. The brands most used are Nestles and Milkmaid. Part of the importation is of condensed skimmed milk, chiefly from Germany and Austria. A little comes from Canada, but complaints of its keeping qualities are made. Handlers of Canadian condensed milk complain that they are unable to get orders filled. The consumption is reported to be increasing rapidly.

OILMEAL AND OIL CAKE.

There is a considerable importation of this article in some of the islands. Barbados takes, on an average, four million pounds per year; the Leeward Islands, one and one-half million pounds per year. The quantity sent from Canada is quite trifling, and there would seem to be a chance to push this trade.

CARRIAGES.

Light rubber-tired buggies are chiefly used. Canada does some of the trade, but there would seem to be an opening for more.

CORDAGE.

Canada seems to do better in this than in any other manufactured article, as in all of the islands she has the greatest share of the trade, due, apparently, to having pushed it with energy.

BOOTS AND SHOES.

At present this business is about equally divided between the United States and the United Kingdom, the latter gradually getting the most of the trade. It was once wholly theirs, but the United States took it from them, and now they in turn are losing it. Only a small proportion goes to Canada. The demand seems to be for low grade goods in both men's and women's wear, showy, but at the lowest possible price. Canadian manufacturers do not appear to have paid the attention to this trade it

seems to warrant, though some seem to be making progress through the attention and energy they are exerting.

MANURES AND FERTILIZERS.

In Barbados there is a large demand for sulphate of ammonia, of which about 1,500 tons per year come from Canada, and very little from the United States, England supplying most of the demand. The Canadian article is quite satisfactory, and the amount might be increased.

PAINTS AND OILS.

There is considerable trade in paints and oils in the islands, and every possibility for Canadian manufacturers to sell more goods in such lines than they are now doing.

PAPER.

Straw paper of French origin was found to be in common use for wrapping purposes in all the islands, and in British Guiana. Canadian wrapping paper and bags are being introduced.

SOAP.

Canadian soap has had a varied career. In Demerara it secured a hold on the trade several years ago, but has since been replaced almost entirely by Gossages, an English soap. This also was found to be the case in most of the other islands, with the notable exception of Antigua, where Canada has the bulk of the trade. Soap seems to be a line worth looking after. The value of the total imports in Barbados in 1905 was \$82,000. The English soap referred to is put up in 56 pounds to the box, with counts of 112, 150, 168 and 300; the 168 count is most used.

REFINED SUGARS.

There is a considerable importation of granulated and cubes, coming from the United States almost altogether. With equal prices, buyers would be ready to bring all their supplies from Canada.

LUMBER.

In this Canada supplies nearly all the demand, spruce and white pine being shipped direct from maritime province ports, while Ottawa white pine is imported via New York. Staves, suitable for making molasses puncheons are much in demand in all the islands. They have hitherto been made of red oak, but this is becoming scarce, and the question of a suitable article to replace it is now a serious one with shippers. The size required is 44 inches long, 1 inch thick, packed in bundles containing sufficient to make a package of 36-inch head.

DRY GOODS.

The business with Canada is very small. While the bulk of the trade is now being done with Great Britain, that with the United States is largely increasing, especially in cottons. Canada might get some of this. Canadian umbrellas, and tweeds of light weight, are well spoken of.

EXPORTS OF THE WEST INDIA ISLANDS.

Cocoa.—In several of the islands, notably Trinidad, Grenada, and Dominica, this forms a most important article of export. Special attention is being paid to the cultivation of the cocoa estates. We were impressed with the fact that cocoa is a beverage more suitable for general use in Canada than has been appreciated hitherto. Canada seems to draw only a small proportion of her supplies from the British West Indies, and it would seem as if more trade in this staple might be done direct.

Sugar.—Owing to the British Preferential Tariff, the exports of sugar from British Guiana and the British West India Islands have increased very materially; so much so that they supply almost the whole of the raw material used by refiners situated in eastern Canada. Statistics show that 165,000 tons were imported into Canada from the British West Indies and British Guiana during the year ending June 30, 1906. In many of the places visited the idea seemed prevalent that growers of sugar in the West Indies were not securing as much benefit as they were entitled to from the working of the British Preferential Tariff. This question was discussed fully, and it was explained that the principle of this tariff was simply to throw open the Canadian market to British products on more favourable terms than to those of foreign origin, and that it then became a question of supply and demand as to the prices paid by Canadian buyers to West Indian producers.

The correctness of this view was generally accepted, it being realized, however, that Canadian buyers must be ready to pay fair prices, as otherwise the West Indies would look to the United Kingdom for their market. In addition to the usual quantity of Bright sugar a number of sales of refining grades have recently been reported for the British market. In Barbadoes a good deal of Muscovado sugar is now being manufactured, sufficiently bright for the grocery trade. A suggestion was made there that the Canadian colour limit should be raised from No. 16 to No. 18 Dutch standard, so that sugar of the latter colour would not pay any extra duty when entering Canada.

Molasses.—The trade in this article is on a satisfactory basis, large quantities being exported to various Canadian ports principally from Barbados, Antigua and St. Kitts. In Barbados, 'Fancy' molasses is manufactured direct from the cane juice, and being of superior colour is well liked by Canadian consumers.

Fruits.—The fruit trade of the different places in the West Indies which were visited does not seem to have been highly developed, with the exception of that in limes. Dominica and Montserrat alone export limes, limejuice, &c., to the amount of £35,600 sterling, of which only about £1,000 sterling is sent to Canada. It would seem that a larger market should be found in Canada for fresh limes, they being fully equal to lemons, according to the ideas of many.

The onion trade is a very important one. They are exported in April and May, a time when there are not many other onions to compete with them. The exports in 1905 were, to Canada, 6,000 crates; to the United States, 385,000 crates.

Miscellaneous.—In Demerara a number of products were exhibited and explained to the commission. *Venezuelan block balata* can be used for any purpose for which gutta percha is used. It is consumed to a certain extent in Canada. It is now (March, 1907) worth 34 cents per pound, f.o.b. Demerara. *Demerara sheet balata* is quoted at 50 cents per pound. *Cassava starch*, considered excellent for laundry purposes, now quoted \$5.50 per barrel of 200 pounds, f.o.b. *Cocoanut oil* is used as a food product; price 85 cents per gallon, f.o.b. *Molascuit*, a meal-mixture of molasses and dried cane-fibre, considered an excellent stock-food; put up in 100 pound bags, quoted in Demerara at \$18 per long ton, f.o.b. *Rice*: This product in Demerara is now second in importance only to that of sugar. Two qualities are produced, white and brown. The former appears of good quality, and is now quoted at \$4.80 per 164 pound bag. The brown is sold largely in the West Indies, taking the place of Calcutta; price, \$4.70 per bag of 176 pounds net. *Kola Nuts*, used as the basis of various beverages; price, 7 cents per pound; produced also in Grenada.

GENERAL REMARKS.

Cotton.—The growth of the Sea Island cotton industry has, we were pleased to note, put new life into many of the planters and agricultural societies. Already ginning factories have been established at St. Kitts, Antigua and Barbados, and the product is commanding a higher price in the British market than that of any other country. The price this year is approximately 2s. per pound.

Commercial travellers.—Canadian manufacturers and exporters should make more systematic and determined efforts to place their goods before the buyers in the West Indies, who are regularly canvassed by American and English salesmen or resident selling agents, while Canadian goods are only spasmodically placed before them. Several Canadian firms have secured a good share of trade and a satisfactory increase annually, by persistent endeavour to supply what is wanted and to study details.

Drafts.—It was frequently pointed out that Canadian firms forward drafts which are received some time before the arrival of the goods, and cause friction. This could be avoided by marking them, 'Hold for arrival of goods.'

Postal arrangements.—It was stated at Grenada that Canada charges 1s. 2d. per pound on parcel post, while the United States rate is 6d., and the English 1s. for three pounds. We feel that the matter of parcel post rates to the West Indies should be investigated by our boards of trade.

Cable communication.—It was represented at Demerara that the present cable communication with Canada is very inefficient, and that cable messages from that point pass through several islands and thence to Jamaica and then to Canada. We were also informed by the delegation from Montserrat that their island has no cable communication whatever. The extension of the Bermuda-Jamaica cable might overcome these difficulties.

The question of preference.—Whenever the opportunity presented itself, we suggested the adoption by the various colonies of a preferential tariff in favour of British products. The tariffs in the West India Islands are in almost every case for revenue only, and as these do not always provide sufficient funds to meet expenditures, it was pointed out that they could fix the preferential at the present rate, and raise the general tariff. Mr. Winston Churchill's remarks in a recent speech, in favour of British intercolonial preferences, were used to show the probable attitude of the Home Government towards this all-important policy of British commerce. We learned with great satisfaction that the legislature of the Leeward Islands last year unanimously adopted a resolution in favour of a Canadian preference, and the same has been forwarded to the Home Government.

HINTS TO CANADIAN SHIPPERS.

1. Bill of lading and invoice should accompany shipment.
2. Duplicate bill of lading and invoices should be posted by first mail after shipment (as a rule, via New York).
3. Bankers should be instructed to hold drafts until arrival of goods.
4. Quotations should be made f.o.b. steamer (not f.o.b. cars) or c.i.f. at the port of delivery (not c.i.f. to Canadian shipping point).
5. Detail cost of packages and wrappings or coverings separately in invoice, as these are seldom subject to duty.
6. Packages should be plainly port-marked, marked, and numbered, and contents of each package detailed in invoice, and number of each specified on bill of lading.
7. Packages should be strong enough for lightering ashore, in which operation they necessarily receive rough treatment.
8. Goods should be covered by marine insurance, unless instructed to the contrary, and policy should include six days in steamer's warehouse, as this period is allowed for removal of goods.
9. If the shipper is doing a fair West India business, he should have a reliable representative, to whom reference can be made by bank or others, as occasion may arise.
10. Complaints have been made that letters are not promptly answered, and shipping papers are not accompanied by covering letter.

EXPORTS OF SUGAR FROM BRITISH WEST INDIES AND BRITISH GUIANA.

TOTAL Exports of Cane Sugar of Domestic Production from the British West Indies and and British Guiana, distinguishing Exports to Great Britain, United States and Canada during each Year 1900 to 1905.

NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in case of Exports, 'Exports of Domestic Produce and Manufacture.'

a The figures for Mexico include coin and bullion.

* Figures are for the years 1904, 1905 and 1906.

NEW TARIFFS.

During the month under review there have been distributed from this department to all the principal Custom-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

SAINT LUCIA.

AN ORDINANCE TO FIX A TARIFF OF DUTIES ON GOODS IMPORTED INTO THIS COLONY.

(No. 3 of 1907, Passed and assented to 27th February, 1907.)

Be it enacted by the Governor, with the advice and consent of the Legislative Council of Saint Lucia, as follows:—

1. This ordinance may be cited as the Customs Tariff Ordinance, 1907.
2. (1) There shall be raised, levied, collected and paid unto His Majesty his Heirs and Successors, for the use of this Colony, upon goods, wares, merchandize and articles imported into this Colony, or which may be warehoused at the time of the coming into force of this ordinance and thereafter entered for consumption in the Colony, the several duties of Customs set forth in the table of duties contained in the first schedule to this ordinance.

(2) The goods, wares, merchandize and articles enumerated in the second schedule to this ordinance shall be severally exempt from duty under this ordinance.

3. (1) All duties under this ordinance shall be paid and received according to the weights and measures established by the Weights and Measures Ordinance, 1851, or any other ordinance which may now or hereafter be in force declaring the weights and measures to be used in this Colony.

(2) In all cases where such duties are imposed according to any specific quantity or value, the same shall be deemed to apply in the same proportion to any greater or less quantity or value.

4. It shall be lawful for the Governor in Council at any time to exempt from the payment of duty any article mentioned in the first schedule to this ordinance or any other article whatsoever, not prohibited to be imported, upon a declaration by the importer to the satisfaction of the Governor in Council that such article is imported for the purpose of starting, developing or improving any industry intended to be established, or, being carried on, in the Colony.

5. The ordinances mentioned in the third schedule to this ordinance are hereby repealed.

6. Indecent or obscene prints, paintings, books, cards, lithographic or other engravings, or other indecent or obscene articles are absolutely prohibited from being imported into this Colony.

THE FIRST SCHEDULE.

All other articles not prohibited to be imported, and not hereinbefore enumerated, and not included in the table of exemptions in the second schedule, shall be chargeable with a duty of 15 per cent *ad valorem* when imported into this Colony or taken out of warehouse and entered for consumption.

Goods not prohibited to be imported, composed of any article liable to duty as a part or ingredient thereof, shall be chargeable with the full duty payable on such article, or if composed of more than one article liable to duty, then with the full duty payable on the article charged with the highest rate of duty.

THE SECOND SCHEDULE.

TABLE OF EXEMPTIONS.

For the Manufacture of Sugar and other Products.

Boiler coating.
 Cane shoots of galvanized iron or other metal.
 Carts. Casks, empty. Charcoal, animal.
 Chemicals or their compounds.
 Coal, coke, and patent fuel.
 Coolers, cultivators, engine packing.
 Filter bags and filter bagging.
 Filter presses.
 Filters for using animal charcoal.
 Fire bricks and fire clay for furnaces or steam boilers.
 Furnaces and fire bars.
 Grubbers, harrows, horse hoes.
 Horse rakes, iron buildings.
 Lime, temper, mules, oxen.
 Pans, sugar and vacuum, ploughs.
 Polariscopes, shocks and staves, stills.
 Sulphur, trucks, trusshoops, wagons.
 Wire rope for cane carriers, woodhoops.
 Water pipes.

NOTE.—The parts or accessories of any of the above named articles shall also be exempt from duty.

For Military and Naval Service.

All articles and things of every description imported as general military, or naval stores for the use of His Majesty's military and naval forces, and all building materials and supplies imported or taken out of bond, under the authority of the treasurer, for military and naval services, under a certificate from the head of the department concerned.

Chargers imported by, and *bonâ fide* the property of, field officers, or departmental officers of relative rank, or of staff officers or adjutants of regiments, and necessary

for the proper discharge of their military duties, under a certificate from the Assistant Adjutant General or the Officer Commanding the Troops in the Colony.

Articles of personal and horse equipment necessary for the performance of military duty, under a certificate from the head of the department concerned.

Horses, mules, and other draft animals imported or purchased for the Commissariat Department, within six months of their being imported, under a certificate from the head of the Army Service Corps.

Wines and other liquors for the use of naval messes.

All articles connected with games, such as cricket bats and balls, lawn tennis racquets and balls, footballs, and other articles of a like nature, imported solely for the recreation of the non-commissioned officers and men of the garrison, when such articles are not imported by the individual, but by an established and recognized non-commissioned officers' and men's recreation club.

For Governor and Government.

All articles for the use of the Governor and the public service.

For Castries Town Board and Churches.

All articles imported for the use of the Castries Town Board.

All articles imported solely for building, repairs, or use of, or in any church or other edifice set apart for Christian public worship: Provided that the treasurer is satisfied by declaration made before him that such articles have been imported solely for the purpose above-mentioned.

For Consular Officers.

All *bonâ fide* official goods sent to the Consular Officer for the United States of America in this Colony by the United States Government for the use of the Consulate.

The same exemption shall extend to the Consular Officers in this Colony of all foreign countries where now, or at any future time, His Majesty's Consular Officers shall enjoy the privilege of exemption from customs duties in respect of official goods imported for the use of their Consulates.

General.

Alcohol (pure), chemicals, materials, and apparatus imported exclusively for medical or other scientific investigations, upon a statutory declaration being made to the satisfaction of the treasurer that they have been so imported.

Bees, beehives and all accessories for apiaries.

Bells for churches, schools and plantations.

Belting for machinery, of leather, canvas, or India-rubber.

Blood stock, imported for breeding purposes or for improving the breed of animals in the Colony, upon a statutory declaration being made to the satisfaction of the Governor in Council as to the qualities of such stock.

Bones and horns.

Books (bound or unbound), pamphlets, magazines, newspapers and printed matter in all languages, maps, charts, music, school globes, and copy books, not including account books, receipt books, bill-heads and forms; but subject to the provisions of The Books (Foreign Reprints) Importation Ordinance, 1850.

Bridges of iron or wood, or of both combined.

Bulbs and roots of flowering plants and of shrubs.

Bullion.

Cards (Christmas, birthday, and New Year), when not imported for sale.

Coal-baskets and coal-boxes for use in the conveyance of coals to and from ships.

Coin.

Eggs.

Electrical apparatus.—*See* Telegraph wire.

Fertilizers of all kinds, natural and artificial, including guano and other manures.

Fish, fresh or in ice or cold storage.

Fruits and vegetables, fresh.

Furniture.—*See* Household.

Household furniture and effects,—the property of persons coming to reside in the Colony, which is imported by them for their personal use and which has been in their use for not less than one year previously to the importation thereof, upon a statutory declaration as to the same being made to the satisfaction of the treasurer.

Ice.

Imperial Department of Agriculture:—All articles imported for the use of the Imperial Department of Agriculture, upon a declaration by the Agricultural Superintendent to the effect that such articles have been imported solely for such use.

Insecticide ingredients, and apparatus for applying them, subject to the approval of the Governor in Council.

Locomotives, railway rolling-stock, rails, railway ties, and all materials and appliances to be used exclusively for the construction, equipment and operation of railways and tramways.

Machinery for coasting steamers.

Manures.—*See* Fertilizers.

Packages or coverings in which articles are imported, if in the opinion of the treasurer they are usual or proper ones for the purpose.

Passengers' baggage:—Wearing apparel, articles of personal adornment, toilet articles, and similar personal effects of passengers, being such articles as actually accompany and are in the use of, and as are necessary and appropriate for the wear and use of, such passengers, for the purposes of the journey and present comfort and convenience, and as are not intended for other persons or for sale; and no such articles shall be exempted from duty which in the opinion of the treasurer do not fall within this definition of baggage.

Patterns and samples which in the opinion of the treasurer are imported exclusively as such.

Plants of all kinds.

Portraits and family photographs, not imported for sale.

Poultry.

Printers' ink.

Printing presses, types, rules, spaces and all printing accessories.

Professional apparatus and workmen's tools brought in by passengers for their own use.

Schoolhouses:—All articles imported exclusively for the building or repair of schoolhouses, upon a declaration being made to the satisfaction of the treasurer by the Inspector of Schools or by the manager of the school in respect of which the exemption is claimed.

Sewing machines and all parts and accessories thereof.

Specimens illustrative of natural history, mineralogy and geology.

Steam and power engines, and machines, machinery, and apparatus, whether stationary or portable, worked by power or by hand, for agriculture, irrigation, mining, the arts and industries of all kinds, and all necessary part and appliances for the erection or repair thereof, or the communication of motive power thereto.

Steam boilers and steam pipes.

Surgical instruments and appliances if imported for the use of the importer,

upon a declaration being made by the importer to the effect to the satisfaction of the treasurer.

Telegraph Company:—Receipt books, billheads and forms imported by the West India and Panama Telegraph Company, Limited, for the use of the company.

Telegraph wire, telegraphic, telephonic, and electrical apparatus, and appliances of all kinds for communication or illumination.

Tombstones, memorial tablets and railings for grave inclosures.

Trees, plants, vines, and seeds, and grains of all kinds for propagation or cultivation.

Vegetables, fresh.

Workmen's tools.—*See* Professional Apparatus.

THE THIRD SCHEDULE.

1. The Customs Tariff Ordinance, 1895.
2. The Customs Tariff Amendment Ordinance, 1902.
3. The Customs Tariff Ordinance, 1895' Amendment Ordinance, 1903.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

CANADIAN COMMERCIAL AGENTS.

AUSTRALASIA.

J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.

D. H. Ross, Stock Exchange Building, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.

CHINA.

H. J. Craig, 18 Szechuen Road, Shanghai.

FRANCE.

A. Poindron, 101 Rue Réaumur, Paris.

GREAT BRITAIN.

P. B. Ball, Room 39 and 40, Central House, Birmingham.

J. B. Jackson, cor. of E. Parade and Greek Streets, Leeds, agent for Leeds and Hull.

P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.

W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.

JAPAN.

Alex. MacLean, No. 14 Bund, Room B, Yokohama.

MEXICO.

A. W. Donly, Apartado, 91B, Mexico, D.F., Mexico.

NEWFOUNDLAND.

E. D. Arnaud, Gazette Building, Water Street, St. John's.

NORWAY.

C. E. Sontum, Grubbegd, No. 4, Christiania, Norway, agent for Sweden and Denmark also.

SOUTH AFRICA.

John A. Chesley, Rhodes Buildings, Cape Town, Cape Colony.

WEST INDIES.

G. Eustace Burke, Kingston, Jamaica.

R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.

S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.

Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

CHINA, JAPAN AND COREA.

W. T. R. Preston, Trade Commissioner, Poste Restante, Hong Kong.

CANADIAN HIGH COMMISSIONER'S OFFICE.

GREAT BRITAIN.

W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.

Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

CANADIAN IMMIGRATION AGENTS.

BELGIUM.

D. Tréau De Coeli, 29 Rue de Souci, Antwerp.

FRANCE.

Paul Wiallard, 10 Rue de Rome, Paris.

GREAT BRITAIN.

J. Bruce Walker, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.

A. F. Jury, Old Castle Buildings, Preeson's Row, Liverpool.

G. H. Mitchell, 43 Cannon Street, Birmingham.

H. N. Murray, Exeter.

L. Burnett, York.

John Webster, 35-37 St. Enoch Square, Glasgow.

John McLennan, Aberdeen.

E. O'Kelly, 17-19 Victoria Street, Belfast.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., May 15, 1907.

CANNED SALMON.

I have heretofore presented the opinions of those merchants interested in British Columbia canned salmon, who viewed with alarm the substitution of Alaska fish for British Columbia salmon.* I now give the opinion of a large Liverpool firm engaged in the trade, controverting to some extent the danger intimated as arising from the substitution.

‘Concerning the supposed sale of canned salmon of Alaska under the guise of being British Columbia production, we think the Canadian producers and the Canadian government need not fear if any such selling did occur. At the present time we should think no house would attempt such misrepresentation. We do not ourselves know of a single instance where Alaska salmon is being represented as Canadian. The consumers and grocers are too familiar with the fine, oily, tender and delicious Canadian Sockeye salmon to mistake it for the harder and less rich Alaska, and as all canned salmon is retailed in this country subject practically to buyer’s approbation on opening the can, you will easily thus see that Alaska salmon cannot prevail against Canadian Sockeye.

‘With regrd to labels, the consumers in this country years ago were used to American and Canadian labels, but with development of the packing the brands and names became so numerous as to lose identity, and consequently their significance in consumers’ eyes as a guarantee. The consumers, therefore, gradually turned in preference to the brands and labels affixed by the houses in the canned salmon trade in England, who have built up the distributive connection for Canadian Sockeye salmon, displacing thereby the Chinook salmon of the Columbia river of twenty years ago.

‘The English house had the advantage of a later inspection of the goods upon arrival here after the long sea voyage (3½ to 4½ months) which ensured closer and later scrutiny of condition and quality than if the goods were examined and labelled in the factories before shipment. The labels also keep brighter by not being affixed till about to be used.

‘The most important point amongst several, however, is the confidence which the consumer and retailer have in buying brands and goods of and belonging to responsible houses who are their own neighbours and readily accessible for responsibility, which of course can not be the case if otherwise labelled.

‘The British Columbia salmon packers, from experience, are quite conscious of this, and they evidently have impressed the Canadian government accordingly to not interfere with exported salmon by the new Act.

‘The inspection of salmon factories has been taken up by the packers willingly, which will meet with consumers’ approval in this country as a counter to the exaggerations of the yellow press of any nation whatever.’

A PIG-IRON FAMINE.

The congestion of pig-iron supplies has become so acute, consumers being unable to obtain deliveries under old contracts, that there is a veritable famine in this

* Monthly Report, January, 1907, p. 1138.

material. This is attributable to heavy shipments to the United States and Germany, and the scarcity of coke and ores. Several large firms have suspended sales for the next three months and prices generally are a shilling a ton higher. Quite recently a very large order from Japan calling for 684 pieces of structural iron for bridge building on railway lines in Manchuria, and for 50 locomotives, has been lost to Great Britain, having been placed in the United States.

FROST AND THE FRUIT TREES.

Inquiries show that the recent severe frosts have done enormous damage amongst the damson trees of Cheshire. Thousands and thousands of trees will not bear any fruit and Cheshire damsons will, therefore, be scarce again. This is no new experience to Cheshire farmers and growers, as the crops of the past few years have been exceedingly small owing to the early frosts.

CANADIAN CHEESE.

The cheese situation is most perplexing just now, at the same time Canadian cheese has had a splendid advertisement given to it by the low price at which it is being retailed all over England. It had been conjectured that the stocks of old cheese were more than the trade could assimilate before the arrival of new, and the principal retailers broke up their combination which everybody knows is established between them to maintain the price of cheese, butter, &c., several of the larger members working for their own hand.

The finest September Canadian and New Zealand cheese has been sold at 7½d. per lb., was dropped to 7d. and then to 6½d. and even at 6d. per lb. in competitive districts. Consequent upon this the consumption increased, the stocks liquidated and to-day we have the extraordinary situation of a wholesale price of 68s., and a retail price of 60s. The English retail trade, together with the wholesale merchant, are very sore about the small margin of profit they have made on Canadian cheese in the season now finished.

A little adjustment of this extreme position is only looked for, and it is to be hoped the new season will open at reasonable prices, and exporters and importers will be satisfied to buy from hand to mouth and to allow the market to take its natural course. The only two factors that should influence the price are, supply and demand, speculation induces an artificial element which bodes no good to the honest trader. Cheese from Canada must be shipped in a riper condition this season, as the prevailing fault has been its greenness all through the past season.

CHESHIRE CHEESE.

At the Nantwich Fair, to-day, there was a pitch of 55 tons of cheese. There was a large attendance of factors, and trade was fairly brisk. A clearance was effected at the following prices: Finest Cheshire, 60s. to 64s., and lower grades from 52s. One lot of finest Cheshire made 65s.

BRITISH TRADE RETURNS.

According to the Board of Trade returns issued recently, the imports last month were £56,786,007, being an increase of £9,726,787 as compared with April, 1906.

The exports last month were £34,416,866, an increase compared with April, 1906, of £7,384,560.

For the four months ending April last, as compared with the same period in 1906, the imports showed an increase of £26,683,854, and the exports an increase of £18,954,450.

The annual statement of the trade of the United Kingdom with foreign countries and British possessions for 1906 and a comparison with four preceding years was issued this morning in the form of a blue book.

The total value of imports from foreign countries and British possessions during 1906 amounted to £607,888,500, as compared with £565,019,917 in 1905, and £528,391,274 in 1902, while the exports of British and Irish produce amounted in total value to £375,575,338 in 1906, £254,234,060 in 1905, and £174,332,110 in 1902. Of the total imports of £607,888,500, the total value from British possessions, including protectorates, amounted to £142,165,240 in 1906, as compared with £106,916,457 in 1902.

Of the total exports of British produce of £375,575,338 the total value exported to British possessions and protectorates amounted to £121,341,278 in 1906, as compared with £109,091,856 in 1902.

P. B. MacNAMARA.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDING, ST. JOHN'S, June 4, 1907.

DUPLICATE INVOICES.

It has been brought to my attention that exporters from Canada frequently omit to forward duplicate invoices of goods shipped to dealers here, thereby causing them delay and annoyance in passing their entries through the customs. This is a matter of importance, and should receive attention on the part of those who intend shipping to this market.

DELAYS IN TRANSPORT.

Complaints have reached me of long delays that occur in the delivery of goods ordered from Canada as compared with those sent from the United States, and the expression of an opinion that if we intend to hold the trade we have, and increase it in the future, some improvement is necessary in the method of transportation, and suggesting the advisability of providing more frequent and regular steamship communication with Halifax especially during the winter season. No doubt some of the delay complained of may be attributed to the unusual severity of the season during the late winter and early spring, but whatever may have been the cause every reasonable effort should be put forth to prevent as far as possible any undue delay in the delivery of goods shipped in Canada for this colony.

FLOUR TRADE.

The trade in flour with this colony is at present altogether in favour of Canada, the prices being on an average forty cents lower than American. The following are the rates now quoted by retail, with the wholesale prices about 25 cents to 30 cents lower:—

Manitoba first patents.	\$5 90 to \$6 20
Manitoba second patents.	5 20 to 5 50
Minneapolis patents.	6 00 to 6 30
Kansas patents.	4 90 to 5 10
Manitoba and Ontario.	5 10 to 5 40
Winter wheat—90 per cent.	4 60 to 4 80

AUSTRALIAN AND RUSSIAN BUTTER.

The butterine factories here have been importing supplies of the above for some time, because they could be bought at a lower price than Canadian butter. The butter was packed in boxes containing 56 lbs., and cost about 23½ cents, landed here.

E. D. ARNAUD.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., May 24, 1907.

TOBACCO.

From what I have seen of the tobacco used in this country I should say there was a very good opportunity for Canadian manufacturers. Some time ago I persuaded a Birmingham tobacco merchant to import a small quantity of one of our favourite Canadian brands, and it has resulted in his doing a very good trade. In fact, he states that he sells more of this particular brand than any other in his warehouse. Of course, I do not know the process of manufacturing tobaccos, and more especially the cut goods put up in packages; but if Canadian manufacturers could send a tobacco here without any sweetening, there would be a saving of 6d. per lb. in the duty.

Cavendish and Negro Head all come under the head of sweetened, and 'other manufactured' as without sweetening. I think that many of our good brands of mixtures would sell, as 6d. per oz. is a general price. T and B, if imported through the agents here, retails at 6½d. per oz. Packages should be put up in foil in 2-oz. and 4-oz. packets, as pounds are not bought so freely as in Canada. ¼-lb. or ½-lb. in tins might go, but the smaller packets are better. Manufacturers will notice that the excise and import duty are the same. The British maker has no advantage over the exporter.

TOBACCO DUTY.

The following table gives the duty on the various kinds of tobacco:—

Tobacco unmanufactured, viz.: containing 10 lbs. or more	s.	d.
of moisture in every 100 lbs. weight thereof, if un-		
stemmed or unstripped, the lb.	3	0
Tobacco, if stemmed or stripped, the lb.	3	0½
Tobacco containing less than 10 lbs. of moisture in every		
100 lbs. weight thereof, if unstemmed or unstripped, the lb.	3	4
Tobacco, manufactured, viz.: cigars.	6	0
Tobacco, Cavendish or Negro Head, the lb.	4	4
Tobacco, manufactured in bond, the lb.	3	10
Tobacco, other manufactured tobacco, viz.—		
Cigarettes, the lb.	4	10
Other sorts, the lb.	3	10

P. B. BALL.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

SUN BUILDING, CLARKE ST.,

BRISTOL, ENG., May 31, 1907.

SOUTHAMPTON DOCK OPERATIONS.

I mentioned in Monthly Report, January, 1907, p. 1119, that there was great activity at the Southampton Docks, and that White Star boats were shortly to make Southampton their port of call in connection with the mails to and from New York. The following item shows that this matter is being energetically followed up by the authorities at Southampton:—

‘The Southampton Harbour Board decided yesterday to proceed with the dredging of the channel between Calshot Castle and the docks, in order that the largest vessel afloat may enter the harbour at any state of the tide. The London and South Western Railway Company, it was stated, intend spending £1,000,000 on new docks.’

GERMAN COMPETITION.

It may be mentioned that there are rumours, not yet supported by any important facts, that one of the German transatlantic lines proposes establishing a fast service from Liverpool to New York. The importance of the rumour lies in the fact that, if true, it indicates that German shipping interests are not willing to accept without retaliation the competition for continental traffic implied by the transference of the White Star boats to Southampton. They are credited with an intention to ‘carry the war into Africa,’ one of the first results of which policy, if it is actually carried out, will be the inauguration of a passenger rate war.

WAGES IN THE TINPLATE TRADE.

At a joint conference of the masters and men engaged in the South Wales tinplate trade, held at Swansea yesterday, it was decided to renew the present wage agreement for the ensuing year, commencing July 1, with a few minor alterations, the masters making some concessions.

VISIT OF IMPERIAL PREMIERS.

Quite the most interesting and important event of the month in Bristol has been the visit of several of the Premiers who were attending the Imperial Conference in London. Canada was represented by Sir Wilfrid Laurier and the Honourable L. P. Brodeur, while the Premiers of Newfoundland and Natal were also present, together with representatives of Australia and South Africa, Mr. Just, of the Colonial Office, and Mr. Hamar Greenwood, M.P. for York, who is also a well known Canadian.

OBJECT OF THE VISIT.

The object of those who planned this visit was to make the colonial statesmen acquainted by personal observation with the ample facilities possessed by the port of Bristol for handling over-sea commerce, either outward or inward, and for transporting the latter to towns in the West of England, the Midlands and Wales. The project had the distinguished support of the Lord Mayor and Council, who received the visiting

Premiers and conferred upon them the honorary freedom of the city of Bristol. The Society of Merchant Venturers entertained the guests at luncheon, after which they were taken in hand by the Docks Committee and shown the old docks at Avonmouth; then followed the chief excursion of the day, a tour of inspection of the new accommodation, known as the Royal Edward Docks, which are to be opened next year, and will be second to none of their kind in the British Empire. Sir Wilfrid Laurier and Mr. Brodeur both expressed themselves as highly delighted with the extent and excellence of these docks, and in their address emphasized the hope that Bristol's optimistic enterprise would result in a vast increase both in imports and exports, as between Canada and this part of Great Britain.

A FAST ATLANTIC SERVICE.

In the evening some 700 guests were entertained at a banquet by the President and Council of the Bristol Chamber of Commerce, bringing this notable visit to a magnificent conclusion. Most of the speeches dealt with the hoped-for expansion of commerce through this port, and a number of references were made to Sir Wilfrid Laurier's resolution at the Imperial Conference in favour of the establishment of a fast line of steamers between Great Britain and Canada, and Canada and Australia. This project was heartily endorsed by all the speakers, and it was made abundantly clear that Bristol means to push its claims to be the eastern terminus of such a route. It was pointed out that Bristol being only two hours distant from London renders the rail journey from this port to the capital less than half what it is from Liverpool or other competing points. The entire mercantile community of Bristol took part in the functions described, the result of which is certain to be a great revival of interest in Canada and Canadian trade.

THE CANADIAN GRAIN COMMISSION.

The Bristol Chamber of Commerce has at once taken notice of the fact that the Canadian Grain Commission is about to visit this country, and their president, himself a grain importer, has communicated through this office the willingness of the Chamber to co-operate most heartily with the Commission when it visits this part of England, and to prepare and lay before the Commissioners all possible information which may be of value to them. This heartiness will be fully appreciated in Canada.

W. A. MACKINNON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, May 14, 1907.

The returns of the bank business of New South Wales for the March quarter are indicative of the remarkable expansion of the business of the state. As compared with the December quarter, there is a gain of £2,370,874 in deposits and a decrease in the discounts of £382,983; the deposits amounting to £41,791,367, while the advances or discounts amount to only £34,030,543. As compared with a year ago, the deposits show nearly three millions of an increase, and the discounts an increase of less than two and a half millions. These figures are away above the record of previous years.

MANUFACTURERS.

The return for ten years of the manufacturers of New South Wales do not show such growth during the five years of the Commonwealth as might have been expected. The following are some figures for 1895, 1900 and 1905:—

	1895.	1900.	1905.
No. of factories	2,723	3,077	3,700
No. of employees	48,030	60,777	72,175
Value, plant and machinery	\$ 5,255,129	\$ 5,707,640	\$ 7,919,950
Wages paid		4,974,216	5,196,350

There were no figures of the total wages paid for 1895 available, nor is the value of the output available for 1900, but in 1905 the value of the output is given as £30,028,150. This is an increase of nearly six millions in value over 1901. It will be seen that the value of the plant and machinery increased very much more rapidly than the number of employees or the wages paid. There is very little difference in the wages paid between 1900 and 1905, though the operatives have increased in number by nearly 11,500. This seems to be curious, in view of the fact that wages are commonly supposed to have increased by at least 10 per cent in five years. The explanation is that, in consequence of the increase of wages more female labour was employed. The number of females employed doubled in eight years; while in ten years the male employees, only about 35 per cent. The value of the output increased more rapidly than either the number of employees or the wages paid—a fact attributable to the increased use of machinery and large improvement in the plants of factories during the last five years.

MINERALS.

The production of minerals has steadily increased for ten years: the figures being in 1896, total minerals produced, £4,431,643, and in 1906, £7,912,716. There is an increase in all the principal minerals—gold, silver, copper, tin and coal. The increase in gold was only about £5,500; silver by over a million pounds; copper increased four-fold; tin nearly four-fold, and coal nearly double. The increases in copper, tin and coal were largely due to the increased price of these metals.

REVENUE.

A return of the revenue of the state of New South Wales for the first ten months of the year shows an increase of £954,281, as compared with the same period of a year ago. The details are as follow:—

	1906-7.	Increase.
	£	£
From Commonwealth.....	2,582,726	245,887
Stamps.....	561,307	39,336
Land tax.....	347,127	14,592
Income tax.....	52,381	1,009
Land revenue.....	1,523,234	132,418
Railways and tramways.....	4,681,774	421,120
Water and sewerage.....	248,687	18,251
Harbour Trust.....	233,104	804
Total (inclusive of smaller items).....	£11,034,159	£954,281

The returns from the Commonwealth, being mainly for duties upon imports, will show the growth of that branch of the trade. The revenue from stamps shows an improvement in general trade: the land tax and land revenue, increase in the value of land and in land settlement and the items for railways and tramways. The improvement in production and general prosperity show both more goods to be carried and a larger passenger traffic. During four of the ten months, there was some reduction in passengers and freight which makes the increase of revenue still more striking.

CARBIDE OF CALCIUM.

The Australasian consumption of carbide of calcium should be of some interest to Canadian manufacturers, who should be in a position to take a fair share of the trade. The imports for Australia for the year 1905, with the country from which it originated, are given as follow (weight, 2,882 tons):—

	Value.
United Kingdom.....	£10,137
New Zealand.....	42
Belgium.....	779
Germany.....	35,180
Netherlands.....	91
Sweden.....	968
U.S.A.....	9,451

In New Zealand the importations are not given in the ordinary return, but the Customs Department have kindly given me the figures for 1906, which are as follow:—

Whence Imported.	Quantity.	Value.
	Tons.	£
United Kingdom.....	26	497
Victoria.....	116	2,162
New South Wales.....	188	1,444
Canada.....		2
Germany.....	104	1,902
Norway.....	3	55
Sweden.....	46	971
United States.....	107	1,646
Total.....	590	10,679

PRISON-MADE GOODS.

The state of New South Wales imported a number of hangman's ropes. They were shipped by the Holloway Gaol authorities, of London. Prison-made goods are prohibited, under a severe penalty, from entering the country. The custom house authorities took it for granted that, having been shipped from the gaol, these ropes were prison-made. There was no evidence that this was so, but a permit for landing was refused until the state authorities could show that the goods were made out of prison. It will be thus seen that the custom authorities throw the onus of proof upon the importer. There are very few lines of goods in Canada that could lie under any suspicion of being prison-made, but where there are goods coming here, which may also be made in a Canadian prison, it is clearly important that the exporter should with the goods send the evidence that they were made by honest labour.

Since the above was written, the custom authorities have released the ropes, upon the ground that there is no evidence to show that they were prison-made. It does not follow, as in this instance, that the onus of proof shall rest with the custom authorities and will be followed as a precedent. It will be safer for Canadian exporters to have the necessary information to accompany goods, in case they may lie under the suspicion of being prison-made.

COMMONWEALTH TRADE.

The return for the first three months of 1907 shows that while there was a decrease of imports for March of £116,742, in the three months there was an increase of imports of £1,436,843. There was a decrease in the imports of gold of £115,423; therefore, showing an increase of merchandise to the amount of over one and a half millions sterling. The export of merchandise in the three months shows an increase of £3,890,181. Against that was a decrease in the exports of gold to the amount of £2,741,084. This shows, in the first place, the wonderful increase over the exports of last year, which was a record year, and also a decrease in the export of capital, and that capital is finding a greater field for use at home. The great bulk of the increase of exports was in wool, though there had been increases of butter to a very considerable extent. Wheat and flour show a decrease. There was a tendency to hold back for higher prices.

NEW GRASSES.

There is a possibility that a sale of the seed of two new grasses, *Paspalum Dilitatum* and Rhodes Grass will be advertised in Canada. The two grasses have been great successes in Australia, where the soil and the rainfall have been suitable to their growth, and they have been as great a success under these conditions as the advertisers are likely to claim. Both are fast growers, very nutritious, and stock are very fond of them and fatten very rapidly upon them.

The Rhodes Grass brought here from South Africa is said not to be the grass which passes under that name in South Africa. Canadian farmers will have to be cautious in testing either of them, though *Paspalum* has been subjected to 18 degrees of frost and its roots have lived. So far as I can ascertain, there has been no test of Rhodes Grass, and even should it stand a considerable lower temperature than 14 degrees above zero, it by no means follows that it will stand the climate of Canada. If these grasses could stand the Canadian climate, they probably would prove to be valuable introductions.

NEW PRESERVING PROCESSES.

I find that the report of the discovery of new processes for preserving meat or fruit has reached Canada and attracted some attention. One process of which very little appears to be known here, is the oxygen process. In this process, oxygen gas is substituted for air, and the article to be carried is immersed in this gas in a sealed chamber. Experiments with meat are represented to have been very successful, but

no commercial trial has yet been made, and it is to be feared that the process will be too expensive.

Another process now under test in England is the Linley sterilizing process. Though the inventor is a Sydney man, the nature of his process does not appear to be understood here, and has had no commercial trial as yet. But one is proposed from the Argentine to London.

A third is the Vacuum process. This, too, is only one of experiment as yet. It is simply a preservation by storing in a chamber from which the air has been practically wholly exhausted. The special merit claimed for the process is the invention which enables exhaustion to be made so nearly perfect at a moderate cost. That articles will carry in such a chamber is well known. The commercial possibility of carrying out the process is not so certain and remains to be demonstrated.

Should the claims of the inventor prove to be correct, it will not only be valuable in the carrying of meat and perishable products, but also in certain manufacturing products.

Skin has been tanned into good leather by an immersion in liquor in twenty-four hours or less with this process. Experiments are being pushed, and shortly there will be, undoubtedly, a publication of the results.

IRON AND STEEL.

The first blast furnace operated in Australia upon commercial lines was opened yesterday. Iron has been produced for a week or two, and it is claimed to be of excellent quality. Bar iron has been made from the product in puddling furnaces and steel in open-hearth furnaces, and both are pronounced to be of a high grade. Should these works succeed, it will affect a good many importations, though not to any considerable extent, the Canadian trade. So far as can be foreseen, there is no reason why Australia should not produce its own pig-iron and steel.

NEW ZEALAND EXHIBITION.

This exhibition closed a month ago. While I am uninformed as to what practical results will flow from it, yet it has been an excellent advertisement for Canada. Australians who saw it speak in very high terms of the Canadian exhibit and of the courtesy of the Canadian officials.

There is necessity, however, for a good deal of caution on the part of Canadian exporters. Commonly, one of the results of such an exhibition is to put men who may not be adventurers, but are unfit to secure trade, in possession of the names of possible exporters. Canadians, therefore, may expect to receive communications from such persons, as well as from adventurers, asking for samples of value and promising very fine returns, if they receive the agency. In such cases, whether they be adventurers or not, the Canadian exporter is not likely to receive either trade or any cash in return for his samples.

NEW ZEALAND.

The trade conditions of New Zealand are very favourable. The financial condition is very easy. The bank returns for the March quarter show a substantial increase in the deposits of a million and a half, as compared with similar returns of the previous year. There is some decline in the exports of frozen meat and of dairy-ing produce, owing to the dry season. But nevertheless, the promise of the future is good.

NEW ZEALAND HEMP.

The government of New Zealand have introduced new regulations respecting the inspection of the 'Phormium Fibre.' All bales must be 4 feet long by 2 feet in width, and all hanks shall not exceed 5 pounds in weight. It must carry tags which bear the registered brand of the mill wherein it is made and the distinctive number of the bale, with a space to enable the grader to fix the grade mark of the bale.

In grading, 100 points is perfection, of which 20 points each are allowed for stripping, washing, scutching, colour and strength.

- (A) Grade or ('Superior') must have 91 to 100 points.
- (B) Grade or ('Fine') must have 81 to 90 points.
- (C) Grade or ('Good Fair') must have 71 to 80 points.
- (D) Grade or ('Fair') must have 61 to 70 points.

No bale awarded less than 51 points will be allowed to be exported. If a bale is damaged after inspection, it must be reinspected.

FREIGHT.

The importance of freight is not yet apparent to those who seek trade in Australia. I have received a number of letters, one of which states that 'I could get as good a freight rate as any one in America.' A second, in the same city, says that 'I fear I cannot do business in Australian goods, as my freight rate, I find, is higher than that of rivals in the United States.' A third reports the same thing and explains 'that he finds that ordinarily a common rate from New York to Australia is quoted, but the United States exporters, doing a larger business and being directly represented in New York, get offers of reduced rates, when he does not.'

Just now it is of still greater importance to look closely into freight rates, as there is a probability that the ordinary freight rates, which have been stable for some time, are now likely to be cut, owing to two German lines of steamers having entered into the trade between Australia and New York. Hitherto, the freighting has been done by the conjoint action of a number of New York export firms and of two or three English lines of steamers. Two German lines appear to have joined with an English line, the Tyser, and formed an independant concern. The entry of these new lines is not well received by the concerns engaged hitherto. The latest advices state that a freight war is likely to ensue.

FOODS, MEDICINES AND CLOTHING.

The importation of foods, medicines, clothing and one or two other lines are governed by several Acts, both Commonwealth and State. These are so important that most of them have been referred to from time to time, as they come out. It is advantageous to have a consolidation of the principal regulations governing them. Besides the regular Customs Act, which is too long for publication, there are two Acts of the Commonwealth to which special attention must be given.

THE COMMERCE ACT.

The first is that known as the Commerce Act of 1905. The regulations under this Act are important items for importers and are as follow:—

'5. (I.) The importation of the goods enumerated in this regulation is prohibited unless there is applied to the goods a trade description in accordance with this Part.'

'(2.) The goods to which this regulation applies are as follow:—

'(a.) Articles used for food or drink by man, or used in the manufacture or preparation of articles used for food or drink by man;

'(b.) Medicines or medicinal preparations for internal or external use;

'(c.) Manures;

'(d.) Apparel (including boots and shoes), and the materials from which such apparel is manufactured;

'(e.) Jewellery;

'(f.) Agricultural seeds; and plants;

'6. (I.) The trade description to be applied in accordance with this Part shall comply with the following provisions:—

'(a.) It shall be in the form of a label or brand affixed in a prominent position to the goods, or to the coverings containing the goods; and

'(b.) The label or brand shall set out in legible characters a true description of the goods, and the name of the country or place in which the goods were made or produced; and

'(c.) In case where any weight or quantity is set out, the label or brand shall specify whether the weight or quantity so set out is gross or net.

'(2.) In the case of the following goods, the trade description shall, in addition, comply with the following provisions:—

'(a.) In the case of medicines prepared ready for use, and containing 10 per cent or more of ethyl alcohol, if the average dose recommended exceeds one teaspoonful (60^o minims), the trade description shall set out the proportion or quantity of alcohol in the medicine.

'(b.) In the case of medicines prepared ready for use, and containing any of the following drugs (or the salts or derivatives thereof), viz.:—opium, morphine, cocaine, heroin, stramonium, veronal, nux vomica, cannabis, indica, bromides, sulphonal, trional, paraldehyde, or any synthetic hypnotic substance, phenazonum, phenacetinum, or acetanilidum, or any allied synthetic substance, chloral-hydrate, belladonna, cotton root, ergot, or any abortifacient, the trade description shall set out the names of all such drugs so contained.

'(c.) In the case of manures, the trade description shall set forth the principal active constituent thereof.

'(d.) In the case of articles of apparel, the trade description shall state the name of the principal material from which the article is made and the term "wool" or any term implying that the material is all wool shall not be applied to any such material unless it contains at least 90 per cent of pure wool. If the material contains wool, but less than 90 per cent of pure wool, the description shall also state the other substances contained in the material.

'(e.) In the case of articles of apparel manufactured from materials containing wool, but not containing as much as 90 per cent of wool, the trade description shall set out the substances contained in the material.

'(f.) In the case of boots and shoes, the trade description shall set out the principal material from which they are made, and unless the soles are solid leather, without admixture or addition, the description shall state the fact, and nature of the admixture or addition.

'(g.) In the case of leather containing any loading of any mineral or any other weighing substance, the trade description shall state the name of the loading or other weighing substance contained in the leather and the percentage thereof.

'(h.) In the case of articles described as gold, the description shall state the carat number indicating the proportion of pure gold in the article.

'(i.) In the case of agricultural seeds, the description shall state the name of the seeds and their condition as to soundness, cleanness and freshness.

'(j.) In the case of plants, the description shall state the names of the plants and their condition as to freedom from or affection by any disease or pest.

'(k.) In the case of milk, the description shall describe the milk as Condensed Milk, Concentrated Milk, Dried Milk, or Condensed Skimmed Milk, as the case requires.

'(3.) This regulation shall not apply to small packets of seeds sent by post or to seeds imported otherwise than as merchandise.'

AUSTRALIAN INDUSTRIES PRESERVATION.

The second Commonwealth Act is one passed in the session last year 'for the preservation of Australiana industries' and 'for the repression of destructive monopolies.' Its purpose is indicated by its title, and though formidable in appearance, it has not yet created any difficulty. The first part, 'for the repression of monopolies,' provides:

'5 (I.) Any foreign corporation, or trading or financial corporation formed within the Commonwealth, which, either as principal or agent, makes or enters into any contract, or engages or continues in any combination—

'(a.) with intent to restrain trade or commerce within the Commonwealth to the detriment of the public, or

'(b.) with intent to destroy or injure by means of unfair competition any Australian industry the preservation of which is advantageous to the Commonwealth, having due regard to the interests of producers, workers, and consumers,

is guilty of an offence.

'Penalty: Five hundred pounds.

'(2.) Every contract made or entered into in contravention of this section shall be absolutely illegal and void.

'6. (I.) For the purpose of the last two preceding sections, unfair competition means competition which is unfair in the circumstances, and in the following cases the competition shall be deemed to be unfair unless the contrary is proved:—

'(a.) If the defendant is a Commercial Trust;

'(b.) If the competition would probably or does in fact result in an inadequate remuneration for labour in the Australian industry;

'(c.) If the competition would probably or does in fact result in creating substantial disorganization in Australian industry or throwing workers out of employment;

'(d.) If the defendant, with respect to any goods or services which are the subject of the competition, gives, offers, or promises to any person any rebate, refund, discount, or reward upon condition that that person deals, or in consideration of that person having dealt, with the defendant to the exclusion of other persons dealing in similar goods or services.

'(2.) In determining whether the competition is unfair, regard shall be had to the management, the processes, the plant, and the machinery employed or adopted in the Australian industry affected by the competition being reasonably efficient, effective, and up-to-date.'

The other portions of this section are not likely to have reference to any Canadian exporter.

The portion 'for the prevention of dumping' is one that after a process of law, certain goods are prohibited from being imported, or must be imported under certain limitations. These are goods in which the competition shall be deemed unfair.

'18. (I.) For the purpose of this Part of this Act, competition shall be deemed to be unfair, unless the contrary is proved, if—

'(a.) under ordinary circumstances of trade it would probably lead to the Australian goods being no longer produced or being withdrawn from the market or being sold at a loss unless produced at an inadequate remuneration for labour; or

'(b.) the means adopted by the person importing or selling the imported goods are, in the opinion of the Comptroller-General or a justice, as the case may be, unfair in the circumstances; or

'(c.) the competition would probably or does in fact result in an inadequate remuneration for labour in the Australian industry; or

'(d.) The competition would probably or does in fact result in creating any substantial disorganization in Australian industry or throwing workers out of employment; or

'(e.) the imported goods have been purchased abroad by or for the importer, from the manufacturer or some person acting for or in combination with him, or accounting to him, at prices greatly below their ordinary cost of production where produced or market price where purchased; or

- '(f.) the imported goods are imported by or for the manufacturer, or some person acting for or in combination with him or accounting to him, and are being sold in Australia at a price which is less than gives the person importing or selling them a fair profit upon their foreign market value, or their fair selling value if sold in the country of production, together with all charges after shipment from the place whence the goods are exported directly to Australia (including Customs duty).'

STATE LEGISLATION.

The state legislation solely respects health and sanitation and, so far as Canada is concerned, applies only to a limited number of food products and the use of antiseptics therein. In New South Wales it is provided that not more than one antiseptic preparation shall be used in an article of food. The antiseptics permitted are: 'Formic aldehyde, boric acid, hydrofluoric acid, benzoic acid, salicylic acid; and preparations of them shall be deemed to be antiseptic preparations.'

For milk, condensed or otherwise, butter, cheese, canned and bottled foods, jams and jellies, fresh fish, vinegars and pickles, it is provided that the limit of the use of these antiseptics shall be not more than one-thousandth part of a grain per pint or per pound. Practically, this prohibits their use in the articles above named.

There is an exception of boric acid in the case of butter where it may be used to the extent of 35 grains per pound.

It is requisite that a label shall be affixed to the vessel or parcel containing the food mixed with an antiseptic, as follows:—'This food is mixed with (*here name the antiseptic or the antiseptic preparation*), and contains (*here state the number of grains*) grains of (*here name the antiseptic*) to the (*here insert the word "pint" in the case of liquid food, or the word "pound" in the case of solid food*).'

This label must be a special one and contain nothing besides the quotation above.

QUEENSLAND.

The Queensland regulations declare that any preservative substance other than cane sugar is an injurious ingredient in jams, jellies, conserves, fruits preserved or fresh, and other products in general. Respecting butter it provides:

'(a.) Butter shall contain not less than 83 per cent of butter fat.

'(b.) Butter shall not contain more than 0.5 per cent of boracic acid (that is, 35 grains of boracic acid per pound of butter).

'(c.) Butter shall not contain more than 4 per cent of common salt.'

Other conditions are:

'(a.) No jam which has been made from a mixture of several fruits shall be sold unless the vessel containing the same has affixed to the outside of such vessel a label having conspicuously and legibly written or printed thereon the words "Mixed Fruit Jam."

'(b.) No mixed food shall be sold unless the vessel, package or wrapper in which the same is supplied has affixed to the outside of such vessel, package or wrapper a label setting forth in letters conspicuously and legibly printed thereon that the food is mixed, and the name of the substance mixed with the food.

'(c.) No food mixed with a preservative substance other than cane sugar, shall be sold unless the vessel, package or wrapper in which the same is supplied has affixed to the outside of such vessel, package or wrapper a label setting forth in letters conspicuously and legibly printed thereon, the nature and amount of the preservative substance mixed with the food.'

NEW ZEALAND.

New Zealand has no similar legislation respecting the importation of foods, but a Bill was introduced at the last session, which will be introduced at the coming one, dealing with this matter.

Until the Act is finally passed and the regulations provided, it will be of no service to give the proposed Bill.

J. S. LARKE.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING,
MELBOURNE, May 13, 1907.

DREDGE MINING AND HYDRAULIC SLUICING IN VICTORIA.

Gold mining by means of dredging, hydraulic sluicing and centrifugal pumps has developed, during the last three years, into a most important industry in the state of Victoria. It has resuscitated some old alluvial mining districts—considered to be worked out—from a dormant state to a condition of activity and speculative excitement. The success of mining by means of dredging and hydraulic sluicing rests almost entirely upon the expeditious mode of treatment of large areas, as in most instances the ground operated upon is of a character that had been proved too poor to be made payable by the ordinary methods. Miners accustomed to exploit gold-bearing gravels upon river banks had—before the advent of gold dredging—been compelled to abandon some rich runs of ground on account of their having dipped underneath the stream.

GOLD-DREDGING AND HYDRAULIC PLANTS IN VICTORIA.

It is estimated that there are now in operation in various districts in the state of Victoria some 90 bucket dredges and hydraulic-pump sluices. The cost of a modern dredge, fitted with improved appliances, in a great measure depends upon the nature of the ground to be dealt with, but assuming that the depth does not exceed 35 feet, the machinery, lumber used in construction and cost of building should not—under ordinary transportation facilities—cost more than £5,000—say \$24,333. The engines used are generally 16 H.P. of a similar type to the English makes of Marshall's or Ruston and Proctor. Boilers are chiefly 20 H.P., while the winches require a 4 or 5 H.P. engine. For ground 30 to 35 feet deep it has been found necessary to have a 20 H.P. engine and a 25 or 30 H.P. boiler. The equipment of some recently built dredges has been made in this state.

OBJECTIONS RAISED AGAINST GOLD DREDGING.

Objections, raised in Victoria, of stream pollution and destruction of agricultural land against bucket dredging are in the main ill-founded. The dredge puts no foreign matter into the stream, and there can, therefore, be no pollution, whilst discolouration of the water is—in this country at least—frequently due to natural causes. Bucket dredging consists of lifting the material from the bow of the dredge and depositing it, after the gold has been extracted, at the stern of the vessel. The value of agricultural land under which deposits of gold-bearing gravel are found has vastly increased in the various dredging districts.

RESULTS OBTAINED BY GOLD DREDGING IN VICTORIA.

The principal gold dredging in Victoria is in the vicinity of Bright—distant nearly 200 miles from Melbourne by railway. The river at one time covered the whole of the flat land between the hills, consequently there is river gravel everywhere and gold is more or less distributed throughout the whole valley. There are no serious difficulties to overcome, as clay is almost entirely absent from the gravel, and most of the bottom is false and soft. The wash, except in the higher reaches of the river, is light and very easily treated. The depth rarely exceeds 25 feet, the average being 16 feet. The valley is considered to be ideal dredging ground, and any property showing a prospect of 2 grains of gold to the cubic yard, by fair prospecting, is good enough for at least 20 per cent return on the capital invested. The average turnover for each dredge is from 5,000 to 6,000 yards per week.

A modern dredge recently treated three acres of ground to an average depth of 12 feet in five weeks, which means some 58,080 yards total, or an average of 11,616 yards per week. The cost of treatment amounted to 1½d. (3½ cents) per yard, and the wash averaged in value 4½d. (9 cents). From this result it can easily be seen that a 2-grain proposition can be made highly remunerative under favourable conditions. Chiefly through lack of experience, several pioneer dredging companies failed, but that the industry is now placed upon a firm foundation is unquestioned. In the district of Bright, 22 dredges are operating payable ground and returning handsome dividends. From these 22 dredges, gold valued at £123,000 was obtained in 1906, and, as the average amount of wages, expenses and depreciation of each dredge did not exceed £60 per week, no less a sum than £68,000 would be absolute profit from a capital outlay of about £110,000.

It is estimated that ultimately over £2,000,000 worth of gold will be recovered at Bright which could not have been won by any other process than by dredging. This ground had been abandoned by old gold diggers as unpayable, and at one time over 20,000 Chinamen were upon this field, so that practically very little ground was left untried. While the exact figures are not yet available, the Victorian Mines Department state that in 1906, approximately, over 85,000 ounces of gold were obtained by dredging and sluicing in this state, the value being about £340,000.

HOW TO ACHIEVE SUCCESS IN GOLD DREDGING.

Victorian experience has proved that there is little or no risk in bucket dredging for gold, if the property to be worked has been intelligently prospected and investigated and the local conditions are favourable. The work of dredging is simplicity itself, besides which the cost of the plant is comparatively small, but in this state—as well as in New Zealand—some purely speculative dredging enterprises were promoted upon chance, with the result that many thousands of pounds were lost which could have been saved by judicious prospecting at small expense. The nature of the wash, the depth and character of the bottom, the water supply and absence of clay are all important elements in successful gold dredging.

PRESERVATION OF FRESH FRUIT.

Considerable interest is being taken in Melbourne over the invention of a local engineer, who claims to have perfected an entirely new and inexpensive method for the preservation of a long period of fruit and other perishable produce. Very satisfactory experiments have been conducted for nearly a year, and as a result patents are now in contemplation for all countries interested in the storage and export of fresh fruit. The inventor states that the deterioration in fruit is largely due to evaporation, and he has devised a simple process by which the evaporation is greatly retarded. The experiments have been conducted in a chamber formed of insulated walls and roof, the special feature of which is a ventilator that saturates the air which passes through, thus giving such a humid atmosphere that the fruit cannot throw off moisture.

Fruit stored under such conditions for over six months opened up in splendid condition. The merits claimed for the invention are its reliability, insignificant expense and simple operation, for no costly refrigerating machinery has to be provided. The process has been strongly commended by a responsible officer in the Victorian Government's Department of Agriculture. There seems little reason to doubt that much more will be heard of this invention in the near future. Developments will be carefully watched and commented upon in a future report from this Canadian commercial agency.

AUSTRALIAN DRIED FRUIT SHIPMENTS TO CANADA.

The Canadian-Australian steamer *Aorangi*, leaving Sydney to-day, takes forward to Vancouver over 60 tons of Australian dried fruit—chiefly lexia raisins—shipped by a Melbourne firm in execution of orders received by cable from Canadian importers. In view of the yearly increasing output in Victoria, great interest is taken by growers in the new outlet found in Canada for their products. The co-operation of the producer is essential if a permanent trade is to be established with oversea centres of population. The standard Australian boxes contain 56 pounds, but should Canadian importers prefer dried fruit in 50-pound boxes, this alteration in the package can be arranged for next year's shipments.

AUSTRALIAN APPLES FOR UNITED KINGDOM AND CONTINENT.

The exports of apples from Australia and Tasmania to the United Kingdom and the Continent so far this (1907) season are given as follows:—

From.	Cases.
Melbourne.	114,498
Hobart.	514,036
Adelaide.	20,144
Sydney.	9,994
Total.	658,672

The shipments are 278,093 cases in excess of the exports for the corresponding period of 1906. Recent sales in London of Victorian apples are reported at from 9 shillings (\$2.19) to 14 shillings 6d. (\$3.52) per case, Tasmanian being at about the same figures. A final shipment of apples will be made, as an experiment, from Hobart about the last week in May, to arrive at London in July. It would appear that the Continent offers a better market than Great Britain, at least during the early spring months.

VICTORIAN APPLES AT BREMEN.

Victorian apples were sold in Bremen this month as high as 19s. 6d. (\$4.75) per case. A cabled report stated that the fruit had carried in excellent condition and had met with a splendid sale. The supply was not equal to the demand, further consignments being anxiously waited for, and the market at Bremen was reported strong for prime fruit in large quantities.

THE REVENUE OF THE AUSTRALIAN COMMONWEALTH.

The excellent trading conditions now existing throughout Australia are reflected in the substantial increase of over £603,000 in the Federal customs and excise revenue for the ten months ending April 30, in comparison with a similar period of last year. The total revenue collected—independent of the states—was £8,131,000, as compared with £7,527,000 up to April 30, 1906. The revenue is expanding in all departments, and it is anticipated that the increase for the twelve months ending on June 30, over the preceding year, will be considerably over £750,000.

CANADIAN SHIPPING DOCUMENTS.

Australian importers of Canadian goods report very serious inconvenience in not receiving bills of lading by the same steamer that conveys the shipments from Vancouver. This trouble has been accentuated by the withdrawal of the San Francisco steamers from the Australian trade. When shipments arrive before the necessary documents, they are frequently stored and temporarily insured, thus causing additional expense, or a bank guarantee has to be given to indemnify the agents of the steamer before the goods can be delivered. Canadian shippers are urged to mail shipping documents promptly, as any delay means a reflection upon their business capacity and causes much annoyance and expense to their Australian constituents.

CANADIAN TRADE NOTES.

The first direct shipment of Canadian maple sugar and maple syrup has just been landed in Melbourne. Fair indents have been secured in Melbourne for glazed kid by the representative of a leading firm of Canadian manufacturers. Canadian-made typewriters' supplies—new to this market—are being ordered by Australian importers by this mail. The introduction of high-class Nova Scotian lobsters into this market is resulting in regular business. Orders for furniture and chairs are going forward to Canadian sources of supply by this mail.

AUSTRALIAN DRIED FRUIT FOR ENGLAND.

Just as the mail is closing, I have been advised that large shipments of Victorian dried fruit—lexias and sultanias—are being made to London. There may be some difficulty in filling Canadian orders, if they are not received promptly in Melbourne by cable.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. G. Eustace Burke.*)

KINGSTON, JAMAICA, June 4, 1907.

IMMINENT CIRCULATION OF MONEY.

It is gratifying to be able to announce that the British government have declared for a free grant for the colony of £150,000 and a loan of £800,000 to the inhabitants of the colony in connection with the catastrophe of January 14 last, to enable Kingston to be rebuilt, on easy terms, and its poorer citizens reimbursed somewhat of their terrible losses. His Excellency the Governor has intimated that within the next two months he hopes the organization to carry out the provisions of the grant and loan will be in working order.

In addition to the above circulation of money, the War Office authorities have made a grant of £81,000 towards the rebuilding of Up Park Camp. Again, the

Jamaica Co-operative Insurance Company has entered into a compromise with its policyholders whereby a considerable sum of money is now being paid out. There are, however, no signs up to now that the English insurance companies are likely to entertain any suggestions of compromising claims of their policyholders.

Still, I venture to affirm that not within any recent history of the colony has there ever been such a circulation of money among all classes as promises to be in Kingston within the next three or four years.

ADVICE TO CANADIANS.

It is clearly advisable that Canadians interested in buildings and building materials should avail themselves of an early opportunity to be on the spot and look out the situation.

THE BUILDING LAW.

While it is certain that at the meeting of the Legislative Council shortly to be held, there will be some changes in the recently passed building law, one thing is certain, and that is, that the provisions for rebuilding the business portions of the city, on the basis known as reinforced concrete structures, will stand.

THE DROUGHT.

The terrible drought that has been passing over the island for the last nine months has practically laid low all the provision crops, such as is mostly consumed by the labouring population. Cattle has also suffered severely. The result is that enormous quantities of flour, meal, corn, oats, &c., are being imported from the United States of America in increasing quantities, and I fail to see the reason why Canada should not share in the extra supply. This, however, is a matter left to the producers themselves.

BUTTER AND CONDENSED MILK.

Marked scarcity with high prices have been the ruling features for the last two or three months regarding these articles of every-day diet. Canadian butter is fairly on the market, but why Canadian manufacturers of Canadian condensed milk did not make a serious bid for the very large trade, it is difficult indeed to understand.

TRADE GENERALLY.

Trade in all lines may be said to be bright, many storekeepers affirming that they are doing better than before the earthquake. This is not surprising, owing to the very high rate of the labour market. Never in the memory of the oldest inhabitant have wages of all descriptions been so high; thus, the labouring classes have had a free hand in spending money, and which conditions must continue for a considerable time.

G. EUSTACE BURKE.

DRIED APPLES AND OTHER FRUITS.

It is understood from information supplied from an authoritative source that the evaporating industry is making gradual progress in Canada, and could develop more readily if a larger and more constant export trade could be relied upon. In view of this, and for the information of some Canadian correspondents who have written upon the subject, inquiries have been made in Great Britain with a view to ascertaining if Canadian shippers of dried apples and other fruits are obtaining a fair share of the United Kingdom market.

MARKET FACILITIES

Within the last few years there has been a remarkable improvement in the facilities in Great Britain for obtaining supplies of fresh fruit, and at the present time apples, bananas, oranges and some other fruits can be obtained at almost every season of the year at moderate prices. This must to a certain extent influence the consumption of preserved fruits, and in the case of apples the large trade done by Canadian packers in gallon apples must also, to a considerable extent, affect the use of the dried article. All the same, there is a considerable importation of many varieties of dried and preserved fruits. Those consumed in the largest quantities are probably prunes, figs and apricots, and, at the present time, Canada is apparently not concerned in any of these, although there seems reason to believe that the apricot could be cultivated in certain parts of the Dominion advantageously.

CONSUMPTION OF DRIED FRUITS.

In order to indicate the consumption, official statistics are appended from the annual statement of trade of the United Kingdom, issued by the statistical office of the Custom House, for a period of four years. These figures are designated 'Dried fruits unenumerated,' and include all importations of evaporated or dried apples, bananas, lychees, peaches and pears, without sugar.

As a result of inquiries instituted, it has been found that dried apricots figure in the Board of Trade returns under the heading 'Fruit; plums, dried or preserved,' presumably because they are held liable to a duty of 7s. per cwt. No statistics as to the separate quantities of the individual fruits are kept by the authorities, but it is probable that the fruits under the heading are mainly apples.

CANADA'S SMALL PROPORTION.

From an inspection of the figures it at once becomes apparent that Canada is obtaining but a fractional proportion of the trade. As this state of affairs must be unsatisfactory to Canadian evaporators and shippers, several of the principal London dealers have been consulted as to the reason of this, and two of them have kindly given their views on the subject in writing. (See letters 'A' and 'B' appended.) From these letters it would appear that it is not so much the quality of the goods as the superior packing and business methods of the American shippers which, at present, enables them to control the trade. It should, however, be remarked that it is understood from several sources that some of the goods supplied by Americans are of Canadian origin.

DRIED PEACHES.

A certain amount of trade is also being done in dried pears and peaches, and the opinion has been expressed that there should be possibilities for stimulating an increased demand for dried peaches, which latter opening should be of particular interest to districts of Canada where peaches are annually produced to a degree largely in excess of the demand. Regarding peaches, and indeed the other goods of which Canada is a producer, we are told that Canadian shippers need only study the quality and methods of packing of the United States shippers in order to ascertain exactly what the United Kingdom requires.

From the information collected from various quarters, all points to the fact that Canada could readily obtain a larger share of trade in this market by adopting better methods, and from statements made by houses in Germany and Holland—countries which are larger consumers of dried fruits than the United Kingdom—the same opinion would appear to be held by large importers.

DRIED FRUITS IMPORTED INTO GREAT BRITAIN.

Importation into the United Kingdom according to the general statement of trade published by the statistical office of the Custom House, of 'Fruit, dried, unenumerated':—

	QUANTITIES.				VALUE.			
	1902.	1903.	1904.	1905.	1902.	1903.	1904.	1905.
	Cwts.	Cwts.	Cwts.	Cwts.	£	£	£	£
Total.. .. .	32,332	42,722	28,548	17,537	55,080	67,770	45,538	27,849
From United States.....	28,590	37,978	22,128	12,985	48,673	59,400	34,805	21,143
From Canada.....	971	1,808	2,055	1,888	1,613	3,015	2,596	2,235

Note.—The above figures include all importations of evaporated or dried apples, bananas, lychees, peaches and pears, without sugar. They do not include dried apricots.

LETTER 'A.'

LONDON, ENGLAND, April 27, 1907.

DEAR SIR,—In reply to your favour, we have handled at odd times several consignments of Canadian evaporated apples. Generally speaking, the quality and flavour of the fruit have been excellent. We are of opinion, however, that a better price would be realized if more care was taken in the packing and the grading. The whole cored should be graded in different sizes, and the large pale fruit should be packed alone in smaller boxes. As far as apple rings are concerned, we are of opinion that the Canadian quality is better than the American, which in the last few years has degenerated considerably; the fruit soon becomes discoloured, and there is a great deal more moisture left in it than what is desirable. We are of opinion that the Canadians should take the opportunity of marking their boxes on all four sides and the ends as well, if possible—'Canadian produce,' or 'Packed in Canada.' It would be also desirable in the Apple Rings to attempt packing under more grades of quality, and we believe that the result in money return would be considerably more if this method were adopted.

In the case of the finest quality of Whole Cored and Apple Rings, a little lace paper pasted inside and round the boxes, and covering the top of the fruit, when freshly opened gives an excellent impression, and induces the grocers to use the boxes for show purposes in their windows.

We believe that a large proportion of the existing trade for these goods could be easily secured to Canada if a few matters like we have pointed out were given some attention, and we shall be very glad to assist in popularizing any of our colonial produce.

Yours faithfully,
(Signed)

LETTER 'B.'

LONDON, ENGLAND, April 22, 1907.

DEAR SIR,—Your favour to hand.

For the last two or three years Canadian evaporated apples have been higher in price than American, and as buyers here show no preference for one over the other, the English trade has practically all been done with New York.

Americans have clearer ideas than the Canadians of the qualities they are expected to ship under the usual descriptions of prime, choice and fancy, and until there is a change in this respect Canadians, we are sorry to say, will be at a disadvantage.

We do not know of any other fruit suitable for evaporating or drying that Canada can successfully produce.

Dried prunes are largely imported, and apricots and pears have a considerable sale. A few peaches are consumed here also, but we have no knowledge that these fruits can be produced in Canada, at any rate in competition with California.

Yours truly,
(Signed)

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., June 5, 1907.

EVAPORATED APPLES.

There is a very fair demand for evaporated apples in this district, and the prospects for Canadian exporters doing a large business here are considered very good; especially as the only two countries who are at all serious competitors are the United States and France. The United States send large quantities into Liverpool, and France also ships quite a large quantity of the apple known as the 'Normandy pippin,' and which has met with fair success in these markets. The great drawback to the latter apple is that it is not cored, but it is much prized for its flavour and appearance, and generally fetches the high price of ninepence per pound.

Two kinds of evaporated apples are placed upon the market here, viz.: 'Ringed'—that is, the apple is pared, cored and then sliced. These are in particular demand for pies, &c. The other kind is 'whole' apples, either cored or uncored, which are used more extensively for puddings, desserts, &c.; and for this reason the largest apples should not be sent whole, as when cooked they are too large for dessert use.

I have before me some samples of Canadian apples received from a dealer in this city, both 'ringed' and 'whole,' which are an exceedingly nice sample, and meet with a ready sale at sixpence per pound (wholesale). There is one drawback to the 'ringed' variety, viz., that they do not retain their flavour the same as the 'whole' variety. When the latter is cooked they swell to a large extent, and make a first-class dessert dish, especially as they have no cores, and this dish is becoming as popular with the industrial classes as apricots, prunes and figs. Aside from the drawback to the 'ringed' variety above mentioned, these 'ringed' apples have one advantage: they are a boon to the busy housewife, inasmuch as she is saved the trouble of slicing them before using them for pie baking, pastry, &c.

METHOD OF PACKING.

The merchants here are quite well satisfied with the manner in which the evaporated apples come from the United States and France, and these reach the British market as follows:—

1. Both 'ringed' and 'whole' in boxes or cartons, holding generally one pound of fruit, and each crate containing four dozen cartons

2. The apples, whether 'whole' or 'shredded' in bulk, loose in 50-pound boxes; the apples being well protected from the box by being covered with parchment paper, or a like material.

The latter method is advocated in preference to the former, as they meet the requirements of the shopkeepers on this side, as often the shopkeeper in a small way will be asked for half a pound of evaporated apples, and if he buys them in cartons he is forced to take out one-half and wrap it up, and thus spoiling the whole of the carton. Under the other system all the shopkeeper would have to do would be to take the order out of the 50-pound box.

If Canadian exporters could see their way to send these apples in one-pound cartons, and get them on the British market cheaper than they could sell those that are loose in the boxes, naturally a preference would be given for them, but I would advise all exporters to send the apples loose in 50-pound boxes. It must be borne in mind that the apples, whether 'ringed' or 'whole,' must be cored, well dried, and well coloured, and as near their natural colour as possible.

PRESENT MARKET PRICES.

The ordinary wholesale grocer in England does not deal in evaporated apples; in fact, it is almost impossible to find one who does. The wholesale men who deal in this class of goods are the brokers or merchants who deal exclusively in dried fruits, from whom the smaller grocers and fruit merchants throughout the cities buy this class of fruit. For the present, at least, and for the above reason, it will be impossible for Canadian exporters to do a direct trade with the interior towns; but such trade will have to be done through the dried fruit brokers and importers in the large ports, such as London, Liverpool and Glasgow.

I am told that the price of evaporated apples here should never be more than sixpence per pound, and if the price is more, people naturally prefer to buy prunes, apricots or figs. Still as cheese is becoming one of the great staple foods for the working classes in this country, apples, both green and evaporated, are coming into greater demand, as it is considered that apples go better with cheese than any of the other fruits.

The present prices in this city for evaporated apples is eightpence per pound (retail) for 'whole cored' apples, and sixpence per pound (retail) for the 'rings.' The following are also the present wholesale prices received from a branch firm of London dried fruit brokers who have an office in this city:—

'Whole cored' apples, in 50-pound boxes.	44s.
'Rings,' in 50-pound boxes.	37s.
'Ringed,' superior quality, known as 'fancy,' in 25-pound boxes	44s.

I am of the opinion that the well-known reputation of Canadian barrel apples on the British market will materially assist in developing a large trade in Canadian evaporated apples. In order, however, to avoid confusion with the United States product, exporters should bear in mind the necessity for branding every package and box with the designation that they are of 'Canadian' production. I cannot too strongly emphasize this fact. I shall be pleased to refer any Canadian exporters to local merchant houses in this district who may be anxious to import this class of apples.

JNO. B. JACKSON.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. Ball.*)

30 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., June 10, 1907.

EVAPORATED APPLES.

Birmingham is not a large wholesale centre for evaporated apples. Liverpool and London are the two great markets for direct importers of these goods. Hitherto there has been a large retail business done in Birmingham, but it has been mostly in American goods.

SIZE OF BOXES.

I find that the larger portion of the trade here is done in boxes of 28 lbs., or $\frac{1}{4}$ cwt., special care being taken to make up to English weights, as everything of the kind here is sold by the cwt. (112 lbs.). A small amount of trade has been done in the small boxes, but the great difficulty has been with the better class of retailers. They do not care to trust the packers with packing for them.

The expression used to me by a large retailer here was, 'If your government will exercise the same care in looking into the packing of evaporated apples that they do in regard to the fresh apples, I have no doubt that a large trade can be done.'

RETAIL PRICE.

The retail price of evaporated apples here is 10d. per pound, and in putting them up in small packages attention would have to be paid to this price, so that not too great a price should be charged for the extra packing and package.

WHOLESALE PRICE.

The regular wholesale price at the moment for evaporated apples is 75s. per cwt. The ordinary apple rings are sold at from 40s. per cwt. Boxes are marked 'Whole Cored Pippins.'

P. B. BALL.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., June 10, 1907.

EVAPORATED APPLES.

Since the advent of shipments of green apples from Tasmania to Great Britain, the sale of evaporated apples has appreciably diminished, but there yet remains a market for them, provided they are prepared with care and put up in packages to suit the requirements of the trade. The best information obtained established the fact, that apples cored and cut in rings is the only form in which they will find best sale in the Manchester district.

SIZE OF BOXES.

The bulk of the trade here seems to favour the 56-pound packages, and the apples are packed roughly into the box and nicely faced with specially selected rings. There is a demand, however, for apple rings packed in 25-pound boxes, but this entails a trifle more expense. The trade in apple rings packed in 1-pound cartons, 48 cartons to the case, is increasing, and is quite a convenience to the retailer.

The ordinary quality is graded 'Prime,' and the better qualities 'Choice' and 'Extra choice.' Whole apples cored and evaporated also find a place in public estimation, and compete with the rings for favour.

RETAIL PRICE.

Retail prices at present are 6d. per pound for rings and 8d. for whole apples cored. In this connection it might be well to state the fact that the largest shipment of green apples ever brought to England has recently arrived consigned partly to London, Liverpool and Manchester, consisting of 125,000 cases from Tasmania. The nearest approach as to size ever made to this shipment was one of 50,000 cases, but the usual consignments do not exceed 10,000 to 15,000 cases. In view of the commencement of the soft fruit season here, but little of this shipment will be offered, being placed in cold storage for more favourable conditions.

P. B. MACNAMARA.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, June 4, 1907.

LABOUR TROUBLES AT THE NORWEGIAN WOOD-PULP MILLS.

At nearly all of the wood-pulp mills in Southern Norway strikes or lockouts are going on since about the middle of May, and there are not at this writing any prospects of a settlement in the near future between the workingmen and the mill owners. Several thousand hands are now idle. One of the largest mills, the 'Borregaard,' has alone had about 2,500 workingmen, who have now all been discharged, until the matter is settled. If no understanding is come to during the next few weeks, this will, of course, set the production back considerably. The negotiations, which have been carried on for some days between the workingmen and the mill owners, have not led to anything.

On some points the differences are comparatively trifling, but on the main question, as to wages, the two parties are widely separated. The employers say that they have gone as far as it is possible for them to do in order to meet the demands of the workingmen. The breaking off in the past negotiations may be looked upon as a complete rupture, and a long and expensive fight is anticipated.

EXPORT OF WOOD-PULP FROM NORWAY.

It may be of interest in connection with the strike in the wood-pulp industry in Norway at present to note the following figures, which show the increase in the export of this article during nearly 40 years, viz.: from 1869 to 1906:—

	Tons.
1869..	60
1870..	500
1871-1875, on an average..	4,587
1876-1880, " "	18,644
1881-1885, " "	67,909
1886-1890, " "	152,170
1895..	246,225
1901..	382,846
1902..	447,470
1903..	447,744
1904..	445,260
1905..	442,325
1906, preliminary statement..	505,120

Of the wood-pulp export in 1906 there was of mechanical dry 13,059 tons, of mechanical wet 362,229 tons, of chemical dry 122,416 tons, of chemical wet 7,416 tons, and was divided as follows on the different countries:—

Countries.	Mechanical pulp.		Chemical pulp.		Total.
	Dry.	Wet.	Dry.	Wet.	
	Tons.	Tons.	Tons.	Tons.	Tons.
Sweden	370	20	50		440
Denmark	665	13,131	2,531	827	17,154
Germany	1,854	153	6,008		8,015
Great Britain and Ireland...	2,348	221,321	63,684	5,018	292,371
France	4,125	65,538	16,095	50	85,808
Holland	175	22,873	1,575	825	25,448
Belgium	580	38,672	6,100	347	45,699
Spain	1,913	521	4,193	349	6,976
Portugal	87		837		924
Italy	613		286		899
U. S. of America	60		19,217		19,277
Mexico			1,015		1,015
Argentina			100		100
China	130				130
Japan			425		425
East Indies	139				139
Australia			300		300
Total	13,059	362,229	122,416	7,416	505,120

EMIGRATION FROM NORWAY.

In 1906 there emigrated from Norway in all 28,274 persons, of which over Christiania alone 11,290.

SWEDISH INVENTION FOR THE UTILIZATION OF SAW-DUST.

Mr. A. F. Lundeberg, engineer, at Stockholm, Sweden, has invented a new method for the utilization of saw-dust, whereby it, when finely ground and mixed with colours and a binding material and thereafter hydraulically treated, may be employed for a number of purposes including as building material, ship-fittings and furniture.

Patents have been taken out in all civilized countries, but the invention will at present only be utilized in Sweden, where a large factory is to be built for the manufacturing of different articles from the new product, especially with the view of exporting.

DANISH TRADE WITH FOREIGN COUNTRIES.

The States Statistical Bureau has recently issued a temporary statement of Denmark's exchange of products with foreign countries for the year 1906, from which the following is an extract:

'The value of the different products, which in the year 1906 were imported from abroad for home use amounts to 550 million kroner = \$146,700,000; the value of the export of inland goods for abroad is estimated at 392.9 million kroner = \$107,450. The difference between import and export is loosely calculated at 157.8 million kroner = \$42,000,000. For the generality of goods the import was greater in 1906 than for any of the foregoing years, and the absolute increase in the quantity of several articles was uncommonly large. This particularly applies to the import of raw materials for industrial and other uses. To illustrate this may be mentioned that the rise in the import of raw material in the textile industry was 70 per cent for cotton and 25-30 per cent for wool.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., June 15, 1907.

BOX BOARDS.

Notwithstanding the articles contributed by the commercial agents residing in England directing the attention of the Canadian saw-mill owners to the great opportunities the British market affords, the result in this district has been far from satisfactory, judging from the comments made by large importers. Correspondence extending over a considerable period has occurred, but little or no headway has been made as regards shipments. In the matter of box boards a very simple article, a large and profitable market exists here and should be taken advantage of by Canadian saw-mill owners. I am unable to give the quantity and value imported, but am convinced it reaches a very large amount.

The chief sources of supply are Norway and Sweden, but they have been so long engaged in this trade that the supply is becoming depleted, and as evidence thereof, prices of late have materially advanced. It is unnecessary here to give the specifications required, as they have been already furnished the department. The present is a most favourable time for negotiating and securing a market for box boards of all descriptions.

ROLL TOP DESKS AND OFFICE FURNITURE.

The British merchant is at all times open to consider prices and values, and though charged with too great conservatism in this respect in the past, it may be frankly stated that a change is being gradually effected. There exists no reason whatever but that a much larger trade can be done by Canadian manufacturers of general office furniture than at present is their portion. The United States manufacturers have secured a rather firm hold in this market, but there remains and is constantly present a field for the energetic Canadian manufacturers of these articles who finish them to meet the tastes of the British public.

A large amount of benefit must accrue from the judicious distribution of the trade indexes and manufacturers' catalogues recently sent by the Canadian Manufacturers' Association of Toronto, but the matter must not be left at that, but followed up by future distribution by the manufacturers themselves to the large dealers here and at Liverpool, but this method does not work out to the same advantageous result as personal canvas by representatives.

Would it be advisable for manufacturers in different lines to combine (for the purpose of lessening the cost to each), open up a warehouse in Manchester carrying a representative amount of stock, and placing it in charge of a responsible manager thus being in constant connection with the trade throughout Great Britain? This office will be able to furnish an approximate cost of such a step if entertained by those interested.

ALCOHOL FROM PEAT.

It is stated in the press that an eminent member of the legal profession has, after years of chemical investigation, evolved alcohol from peat, and states that it can be produced at 3d. per gallon, thus filling a long-felt want as a motor fuel by displacing the foul-smelling petrol. It is said to be more efficient in every way. It is safer to handle, and will not overheat the engine as petrol has a tendency to do. An entire absence of smoke and smell are advantages that will be welcomed by the man in the street, no less than by the man in the car.

GERMANY'S TARIFF WALL.

In the following table supplied by Mr. Lloyd-George in Parliamentary papers, the imports into the United Kingdom from Germany, and the exports from the United Kingdom to Germany are compared:—

	Imports From Germany.		Exports to Germany.	
	1904.	1905.	1904.	1905.
	£	£	£	£
Food, drink and tobacco.....	11,030,000	11,230,000	2,080,000	2,946,000
Raw materials and articles mainly unmanu- factured.....	3,547,000	3,896,000	3,893,000	4,458,000
Articles wholly or mainly manufactured....	34,318,000	38,057,000	18,585,000	21,635,000
Miscellaneous (including parcel post).....	617,000	656,000	543,000	663,000
	49,512,000	53,839,000	25,101,000	29,702,000

BRITISH TRADE RETURNS.

According to the Board of Trade returns issued recently, the imports last month amounted to £52,619,423, an increase as compared with May, 1906, of £1,201,692. The exports last month were £36,922,548, an increase of £5,197,621, compared with May, last year.

The imports for the five months ended May 31, total £280,568,392, an increase of £27,891,352 as compared with the corresponding five months of the previous year.

The exports during the five months ended May 31, totalled £173,206,400, showing an increase over the exports of the corresponding five months of 1906 of £23,252,071.

P. B. MACNAMARA.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDING, ST. JOHN'S, June 22, 1907.

BARREL STAVES.

In my report of October 23 last (Monthly Report, September, 1906, p. 474), I drew attention to the opening that existed here for the importation of ash staves suitable for the manufacture of fish drums. I am informed that there is a considerable demand at present for such stock, that the local supply is quite inadequate for the needs of this market, and that even when any can be obtained the price is considerably higher than usual.

MEAT SUPPLY.

There has been a very active demand this year for fresh meat of all kinds, especially beef, and the supplies of live stock which have been shipped to this market since navigation opened in the St. Lawrence this spring have been entirely inadequate to meet the demand. It has been no uncommon experience for intending purchasers of meat to find that they could not get what they required at any price. Of course

under such a condition of supply the price has risen to an almost prohibitive figure, while live stock have been sold at auction, sent here from Nova Scotia at a cost equal to 20 cents per lb. on the hoof. Very little, if any, change has been made during the past half century in the method of conducting the live stock trade with this colony, while there is ample room for improvement which dealers in Western Canada might well take note of.

Since the opening of the railway to Port-au-Basque, and during the winter season limited supplies of frozen dressed beef have been shipped here each year, while in summer the main source of supply has been furnished by Nova Scotia, and sent here in small sailing vessels, the quality of the stock being as a rule very inferior and unfit for the requirements of the market.

COAL TRADE.

Serious complaints are being made on all sides in regard to the exorbitant prices charged here for coal, both anthracite and bituminous, while the quality of the latter is very far from being as good as it should be. In view of the fact of the comparatively short distance of this colony from the source of supply in Cape Breton, and the excellent water facilities that exist for cheap freight, it does appear that there is a just complaint and a reason for investigation into the cause of it.

The duty charged on coal entering the port of St. John's which is applied to municipal purposes, at present fixed at \$1 per ton on anthracite and 70 cents on soft coal, is not sufficient to account for the difference in price that exists between the cost here and in Canada generally.

E. D. ARNAUD.

TARIFF CHANGES

BRITISH INDIA.

I.—DUTY ON PETROLEUM IMPORTED FOR SANITARY PURPOSES.

(Notification—By the Government of India, Department of Commerce and Industry, No. 1959-101, dated March 1, 1907.—Customs Circular No. 1 of 1907.)

In exercise of the power conferred by section 23 of the Sea Customs Act, 1878 (VIII. of 1878), the Governor General in Council is pleased to exempt from the whole of the customs duty in excess of five per cent *ad valorem* leviable thereon on importation into British India, petroleum which has its flashing point at or above one hundred and fifty degrees of Fahrenheit's thermometer, and which is proved to the satisfaction of the customs collector to be intended for use exclusively for some sanitary or hygienic purpose.

II.—AMENDED TARIFF VALUATION OF MOLASSES.

(Notification—By the Government of India, Department of Commerce and Industry, No. 3023-37, dated April 13, 1907.—Customs Circular No. II. of 1907.)

In exercise of the powers conferred by section 22 of the Sea Customs Act, 1878 (VIII. of 1878), the Governor General in Council is pleased to direct that, for the item of 'Molasses' of entry No. 8, in the notification of the Government of India in this department, No. 10123-30, dated December 22, 1906, the following shall be substituted, namely:—

No.	Name of Articles.	Tariff Valuation.		Duty.
		Rs.	As.	
8.	Molasses from Java cwt.	2	6	Five per cent.
	Molasses from other countries "	2	12	"

III.—AMENDED TARIFF VALUATION OF CAMPHOR.

(Notification—By the Government of India, Department of Commerce and Industry, No. 4133-37, dated May 16, 1907.—Customs Circular No. III. of 1907.)

In exercise of the powers conferred by section 22 of the Sea Customs Act, 1878 (VIII. of 1878), the Governor General in Council is pleased to direct that, for the corresponding items of entry No. 11 in the notification of the Government of India in this department, No. 10123-30, dated December 22, 1906, the following shall be substituted with effect from May 21, 1907, namely:—

No.	Name of Articles.	Tariff Valuation.		Duty.
		Rs.	As.	
11.	Camphor, refined, cake lb.	3	12	Five per cent.
	Camphor, partially refined, cake, in blocks of about			
	13 lb. lb.	2	12	"
	Camphor, crude, in powder lb.	2	4	"

FIJI.

I.—AN ORDINANCE TO AMEND THE CUSTOMS DUTIES ORDINANCE, 1898.

(No. XII, passed May 10, 1905, assented to May 19, 1905.)

1. This ordinance may be cited for all purposes as ‘The Customs Duties Amendment Ordinance, 1905.’

2. ‘The Customs Duties Ordinance, 1898,’ is hereby amended and shall be read as if in the list of articles exempt from duty contained in the schedule thereto the word ‘undressed’ were omitted from the clause ‘timber, undressed, cut for cases, not exceeding three feet in length, for exporting fruit.’

3. The following articles shall be added to the said list of articles exempt from duty contained in the schedule to the said ordinance, viz.:—

‘Articles imported as the property of and for the use of the Pacific Cable Board, on allowance by the Governor in Council.’

II.—THE SOLOMONS (CUSTOMS) REGULATIONS, 1907.

(‘Fiji Royal Gazette,’ No. 9, of March 1, 1907.)

IMPORT DUTY ON TOBACCO.

1. On and after the coming into force of this regulation duty at the rate of one shilling for each pound avoirdupois weight shall be collected and paid on all tobacco manufactured and unmanufactured imported into the protectorate. Provided that any duty that may have been properly and lawfully collected under the provisions of ‘The Solomons (Tobacco) Import Duty Regulation, 1906,’ that is to say, after the third day of November, one thousand nine hundred and six, shall be deemed to have been collected under this regulation.

SOUTHERN NIGERIA.

ORDINANCE TO MAKE FURTHER PROVISIONS WITH REGARD TO THE DUTIES OF CUSTOMS.

(No. 16, dated and assented to December 22, 1906.)

1. This ordinance may be cited as ‘The Customs Tariff Ordinance, 1906.’

2. The first schedule to the Customs Tariff Ordinance, 1904, and the first schedule to the Customs Tariff Proclamation, 1904, are, and each of them is hereby amended, as follows:—

Item 1 of each of the said schedules and all amendments thereof and substitutions therefor in each of the said schedules respectively is hereby repealed, and the following substituted therefor:—

(i) On brandy, gin, rum, liqueurs, perfumed, medicated and miscellaneous spirits or strong waters, not being sweetened or mixed with any article, so that the degree of strength cannot be ascertained by Tralles’ hydrometer, for every imperial gallon not exceeding a strength of fifty per centum by such hydrometer 0 4 0

And for every degree or part of a degree in excess of a strength of fifty per centum by hydrometer as aforesaid, an additional duty per imperial gallon. 0 0 1

3. This ordinance shall come into force on the 22nd day of December, 1906.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

CANADIAN COMMERCIAL AGENTS.

AUSTRALASIA.

- J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
D. H. Ross, Stock Exchange Building, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.

CHINA.

- H. J. Craig, 18 Szechuen Road, Shanghai.

FRANCE.

- A. Poindron, 101 Rue Réaumur, Paris.

GREAT BRITAIN.

- P. B. Ball, Room 39 and 40, Central House, Birmingham.
J. B. Jackson, cor. of E. Parade and Greek Streets, Leeds, agent for Leeds and Hull.
P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.
W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.

JAPAN.

- Alex. MacLean, No. 14 Bund, Room B, Yokohama.

MEXICO.

- A. W. Donly, Apartado, 91B, Mexico, D.F., Mexico.

NEWFOUNDLAND.

- E. D. Arnaud, Gazette Building, Water Street, St. John's.

NORWAY.

- C. E. Sontum, Grubbegd, No. 4, Christiania, Norway, agent for Sweden and Denmark also.

SOUTH AFRICA.

- John A. Chesley, Rhodes Buildings, Cape Town, Cape Colony.

WEST INDIES.

- G. Eustace Burke, Kingston, Jamaica.
R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

CHINA, JAPAN AND COREA.

- W. T. R. Preston, Trade Commissioner, Poste Restante, Hong Kong.

CANADIAN HIGH COMMISSIONER'S OFFICE.

GREAT BRITAIN.

- W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.

- Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

CANADIAN IMMIGRATION AGENTS.

BELGIUM.

- D. Tréau De Coeli, 29 Rue de Souci, Antwerp.

FRANCE.

- Paul Wiallard, 10 Rue de Rome, Paris.

GREAT BRITAIN.

- J. Bruce Walker, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.
A. F. Jury, Old Castle Buildings, Preeson's Row, Liverpool.
G. H. Mitchell, 43 Cannon Street, Birmingham.

- H. N. Murray, Exeter.
L. Burnett, York.
John Webster, 35-37 St. Enoch Square, Glasgow.
John McLennan, Aberdeen.
E. O'Kelly, 17-19 Victoria Street, Belfast.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

No. 14, BUND, ROOM B, YOKOHAMA, June 12, 1907.

MONTHLY RETURN OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Return, for the four months ending April 30, of the present and the previous year:—

Exports to Canada.

	1907.	1906.
Silk tissues, habutae..	\$87,409	\$110,754
Silk handkerchiefs..	10,200	25,028
Cotton tissues..	1,550	1,304
Mats and mattings for floor (Hanagoza)..	35,341	17,089
Porcelain and earthenware..	34,529	24,404
Lacquered ware..	3,368	3,774
Tea..	39,331	23,670
Rice..	94,819	47,016
Straw-plaits and chip-braids..	550	1,506
Camphor..	348	4,181

Imports from Canada.

	1907.	1906.
Flour..	\$45,946	\$ 24,304

The 'principal items' given in the Monthly Return number only twenty-five of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of trade the Annual Return has to be awaited.

GENERAL TRADE RETURNS.

Principal Imports.	For April, 1907. Value.	Four months ending April 30, compared.	
		1907. Value.	1906. Value.
	\$	\$	\$
Flour, wheat..	362,650	1,080,169	1,760,908
Butter..	10,440	20,063	26,856
Salted salmon..	30	119,130	168,863
Condensed milk..	103,962	297,574	254,846
Fertilizers..	3,365,102	6,772,785	4,516,486
Leather, sole..	143,068	348,864	193,481
Lead, pig, ingot and slab..	2,814	16,384	9,366
Printing paper..	166,756	495,472	426,325
Cotton, duck..	4,057	18,565	31,078
Cotton, prints..	37,949	205,019	277,121
Cotton, satins and italians..	63,766	256,856	368,417
White shirtings..	64,840	176,940	291,856

TRADE RETURNS FOR 1906.

The 'Annual Return of the Foreign Trade of the Empire of Japan,' usually issued about the third week of March, just received, is the only detailed trade return published. This volume is now issued for 1906, and from it the returns of trade between Canada and Japan are in part submitted, as follows:—

Imports from Canada.

	Quantity.	Value.
Butter... ..	46,140 lbs.	\$ 11,479
Cheese... ..	9,479 "	1,910
Flour, wheat... ..	4,141,329 "	81,821
Salted salmon and trout... ..	7,700,288 "	203,877
Salted salmon and trout, roes... ..	137,398 "	2,894
Whisky... ..	2,506 litres.	1,533
Comestibles, in cans...	1,628
Comestibles, all others not otherwise specified...	8,409
Fenders, grates, stoves, and fittings thereof...	539
Lead, pig, ingot and slab... ..	2,372,241 lbs.	85,180
Paper, printing... ..	224,640 "	22,571
Fertilizers...	28,100
Pulp (sulphite)... ..	69,590 lbs.	856
Boards, for deck, flooring, &c... ..	70,532 S. feet.	3,483
Lumber and timber... ..	89,622 C. "	27,343
Bicycles... ..	27 number	494
Soap, toilet... ..	1,211 lbs.	274
Soap, washing... ..	124,590 "	4,398

Principal Items of Import from Canada—1905 and 1906 compared.

	1906.	1905.

GOVERNMENT BUILDING.

The Governor General of Formosa offers a prize of 30,000 yen for the best plan for building the offices of the Governor General of Formosa. The competition is open to any resident of Japan and the applicants must send in two plans. The date for sending in plans for the first competition is from November 1 to 30, this year; and that for the second, from December 1 to 25, next year.

Successful first candidates will number not more than 10, each of whom is to receive a prize of 1,000 yen. These persons only are allowed to go through the second competition; in this the first prize will amount to 30,000 yen, second 15,000 yen, and third 5,000 yen. Particulars are published in the *Official Gazette*.

CONFERENCE OF INVENTORS.

The *Japan Times* makes the announcement that advantage will be taken of the coming Grand Exhibition in 1912 to hold an international conference of the world's inventors at Tokyo, promoted by the Japan Association for the Protection of Industrial Rights.

CANADIAN FLOUR.

A reliable and valued source of correspondence in Western Canada, interested in the Canadian flour trade, writes as follows:—

'We are pleased to note that Canadian flour is becoming more generally used in your markets. We fully believe that Canadian flour will have a larger trade in the Oriental markets, if Canadian millers and wheat-growers could get it out of their heads that there is no other wheat or flour in the world to compare with theirs. You will understand we do not state that Canadian flour is not all right in quality, but we do think and know from experience that Pacific Coast States' flour gives splendid satisfaction in milling as to yield, &c., and contains many good qualities appreciated by the household, and privately we think it would be for the general good of Canada to have you write more in your reports on this point, in order that the Canadian millers may better appreciate the strength of the competition they have to meet. This might also apply to some extent to the transportation companies who are inclined to charge higher rates of freight from Canada to the Orient, and not disposed to recognize or appreciate the keen competition they are up against from American mills.'

It is the Alberta and Western Saskatchewan wheat that is going to do it. Doubtless the millers will rise to the occasion when it offers; the raw material must become available to them. For some months past, flour labelled Enderby, Okanagan, Edmonton and Cardston has been seen carted along the streets of Yokohama and Tokyo, some of these brands frequently. This is the result of wheat-growing tributary to the Pacific. Although the Canadian prices are said to continue too high to be competitive, yet there has been sufficient movement to give promise of what will follow upon the greater production of Alberta wheat.

Of Canadian manufacturers generally, there is little evidence of present ability or intention to appear in this market.

CANADIANS TOO BUSY AT HOME.

A manufacturer from the Maritime Provinces passing through lately, taking the 'around the Globe' trip, was asked if he did not wish to look into the market here

with the view to export to this country. He said, 'No, he was out for his health,' although his appearance did not indicate anything disturbing in that direction. Being pressed, he said, well the fact was, unless things had gone wrong since he left home, his company had enough to do in their line to supply the home market. Upon its being suggested that the Canadian manufacturers must be making money, being so well off for a market: Well, he said, that was so in a way, and it was not so, for his firm had to put their profits so largely into extensions of premises and plant; and he thought his 'situation in that respect was that of the manufacturing business generally throughout Canada. The prosperity of the country was marvellous.'

TEXTILES.

Another Canadian manufacturer, largely interested in textiles, literally travelling for his health, said he had got away from business and he was going to strictly let it alone for a time; 'but in any case the demands of a rapidly developing home market were such that they could not pretend to offer business to Japan.'

CANADIAN NEWS PAPER.

At this end of the Canadian line, this was depressing. A few days afterwards, however, there was something of a reaction in the sight, on the Ginza, the Broadway of Tokyo, of several dray-loads of news paper, the rolls bearing the name of the manufacturer, the familiar name of J. R. Booth, Ottawa, Canada. The importation of printing paper from Canada came from nothing in 1904 to 6,000 yen in 1905, and to over 45,000 yen in 1906.

MORE MONEY POWER WANTED.

At the recent ordinary general meeting of the shareholders of the Chartered Bank of India, Australia and China, one of the leading British banks operating in the Far East, held in London, the chairman, in giving explanations of a large addition to the capital, justified the proposal on two grounds: the increased volume of business, and the increased value of the great trade staples with which they had to deal.

Referring to Japan's chief staple production, he said: 'I would just notice, in passing, that the coming silk crop of Japan is likely to cost in financing it some £18,000,000, as compared with £14,000,000 last year. Fortunate Japan! It is not surprising that with these two causes, activity of trade and high prices, over and above all other money-absorbing interests, we should have seen during the past winter high bank rates and high discount rates, and almost what I may call a scarcity of money.'

REVISING CHAMBER OF COMMERCE METHODS.

A conference of the Secretaries of Chambers of Commerce throughout the empire will be held during the first week of July at the Department of Agriculture and Commerce in Tokyo. The principal object of the conference is to unify procedure, which at present is different in each case, and also to devise means of reconciling misunderstandings that often arise between merchants and the chambers of commerce.

THE COPPER INDUSTRY.

Within the past year there has been much disagreement and destruction of property in connection with the copper mining industry. This is an example of how readily the Japanese workman adopts the recourses of his Occidental neighbour. Like the mob elsewhere, the Japanese mob is not always logical. One of his peculiarities is his inclination to destroy property; a way he has of giving expression to his displeasure, as in the case of the Tokyo and Yokohama riots about the Portsmouth Treaty, and the copper mine riots of a year ago, the damage amounting to millions of yen.

The strikers now holding out at one of the principal mines have burned the buildings and machinery, and thus destroyed their means of living, and caused a loss that the industry will have to bear.

Copper mining and smelting is, however, a valuable industry in Japan. The total output amounts in quantity to about 40,000 tons annually, and in value to about \$10,000,000.

ESTIMATE—BARLEY CROP.

The barley crop this year is estimated at about 19,800,000 koku (99,000,000 bushels), showing an increase of about 5 per cent, as compared with the total crop last year, and an increase of about 2 per cent over the average yield.

THE WHEAT CROP.

The wheat crop now being harvested in Japan is estimated at 20,344,672 koku, which is 231,198 koku, or 4.2 per cent increase, as compared with the average year's crop. A koku is equal to five bushels.

THE TRADE WITH SIBERIA.

Tsuruga, a port with excellent harbour, on the west coast of Japan, has sprung into prominence upon the probabilities of the Siberian trade.

The foreign trade of this port from January to May, this year, amounted to 738,320 yen, of which 347,691 yen were imports. Compared with the figures for the corresponding period of last year, the total is more than double. The trade between Tsuruga and Vladivostock has been confined to exports only before April last, when goods began to come from Vladivostock to Japan. The value of imports from the Russian port for the second ten days of last month amounted to 16,500 yen. The goods imported from Vladivostock are chiefly beans, bean cake, and wheat bran, products used in Japan for fertilizing and as fodder for pigs, horses and cattle. This traffic was at one time shipped at Newchwang for Kobe. The causes of the change are the reduction of freight charges to the Russian port, and competition by steamers across to Japan. The *Japan Chronicle*, enabled to view this matter from a Kobe standpoint, doubts that the 'imports at Tsuruga will continue to increase at the present rate,' but points out that 'an immense quantity of bean cake is used for fertilizer in Fukui, Ishikawa and Toyama Prefectures. Beans are largely used also for making miso (Japanese soup), and that in and about Nagoya factories have been started to make bean cake with imported beans; and the import trade in beans through Tsuruga has a very favourable prospect.'

Japanese merchants have begun to direct attention to the importation of flour from Siberia. Some of the leading flour merchants of Kobe and Yokohama are now investigating the prospect of trade in Siberian flour. If the result be satisfactory, it is expected by the vernacular press that flour will in time be largely imported from Siberia. But the same press is fond of indulging anticipations of this kind. The exporters from Canada need not slacken in their preparations. It will take a long time to get ready for the quantitative of wheat export from Vladivostock.

HUSBANDRY IN THE FAR EAST.

As it is in Siam, so it is in Japan, and also in all that Asiatic mainland which is within the sphere of Japan's protectorate and Japanese influence. There are, according to quotations from the *Siam Free Press* 'glorious agricultural prospects to be realized,' and thereby 'the burdens of the people made lighter,' now that 'the government are seriously giving their attention' to that end. The hope is expressed by the same authority that 'this new policy of relieving the masses by developing the country will lead to the introduction of labour-saving machinery, thus making it easy to multiply every year the area cultivated. 'If to-day Siam had the

steam-plough, sower, reaper, thresher, and so on, instead of the buffalo and the wood plough and the other primitive methods of cultivation in vogue, how much better the crops, vaster the area under crop, and greater the people's means and the trade of the country would be.'

That plea is applicable to Japan in a general way. The arable superficies may be less suited to the operation of farm machinery in Japan than upon the mainland. But no observing person can travel Japan without seeing that there is abundant scope for the profitable operation of many farm implements that apparently the Japanese farmer knows nothing of.

MARKET FOR CANADIAN MACHINERY.

For the present, farm machinery may be left over for consideration by, say, our successors—that is a wide enough limit. But there should be some farm implements, amongst those made in Canada, or patterned after them, that could be used to advantage, if the people here concerned were persuaded. The American grain-cutting 'cradle,' when offered for the cutting of crop that for ages had been reaped with the sickle, got a discouraging reception. The advantage was obvious from one point of view; but those whose labour was to be saved would see only disadvantage, and they would have none of it. It may be safely assumed that the Japanese, whose labour is the better part or perhaps the whole of his capital, is human enough to resist the use of an article that may seem to threaten to deprive him of the present means of living.

But of the minor farm implements, it would appear that there might be some introduction, if the venture were well considered. It would strike the stranger, say from Canada, that the plough might be introduced—that is, a one-horse plough—steel mould-board and share-point, with wood beam and handles, suited for the turning of what is literally garden soil. This would serve to displace the hoe, which is not the garden or potato hoe, that has much to its credit in Canada and elsewhere, but an entirely different article, that is driven into the ground and pulled forward, and thus takes out and turns over its bite of soil. The plough I have indicated could be used in the small divisions of land allotted to the several crops, other than rice, and evidently would save an immense amount of manual labour applied to the raising of grain and vegetables.

The grain crop of whatever kind in Japan is usually 'planted' in rows. It may be supposed that a seed-drill might be contrived that would sow the seed more evenly and economically than by the hand process.

TRANSPORTATION IN THE EAST.

The extent to which carrying is the method of transportation is one of the things that surprise a stranger, wherever he goes, throughout the Far East. A cargo of coal to be loaded or unloaded, a building basement to be excavated, or a mountain to be moved—the coolie, with a spring-bar on his shoulder, and a basket hung from each end of it, does the trick. One coolie with his shoulder-load does not amount to much; but a legion of them kept going, like the cups on an elevator belt, in time the result is marvellous. It is often, in that and like cases, suggested that a wheelbarrow would be a good thing here. It occurs to one also that a dump cart would be a useful thing in town and in country. I have not seen either a wheelbarrow or a dump cart, or any substitute for them, in this line of industry, other than the coolie with shoulder-bar and baskets, since I have been taking observations in this country.

A thousand and one things might be taken up and dealt with, as the plough and the seed-drill, and the dump cart and wheelbarrow have been dealt with here; but to go farther and give assurance that it would be found practicable to introduce these things and give them a fair trial, might prove to be an indiscretion. The experiment should be tried by those manufacturers who are looking for a market. It might be something of a lottery, like gold mining; but there may be millions in it.

ESTIMATE—SILK CROP.

The total yield of cocoons this year is estimated at about 2,250,000 (1 koku equals 5 bushels), showing a decrease of about 10 per cent, when compared with the figures recorded for last year. The poor yield of mulberry leaves, owing to the unusually cool weather experienced in the spring, and damage caused by frost, will affect silk production in the country, and this fact is accountable for the decrease in the estimated yield. The estimate, however, shows an increase of about 3 per cent, as compared with the average recorded for several years past. Present prices for silk are regarded as being very high.

ENCOURAGING MIXED FARM PRODUCTS.

The Minister of Agriculture and Commerce has issued instructions to the various prefectural authorities, urging them to take measures for the encouragement of farmers in the rearing of poultry. The instructions are, in substance, to the effect that poultry might well be made a profitable complement to the agricultural industry. For this reason, instructions have been issued from time to time, reminding the local authorities of the necessity of encouraging the business, with the satisfactory result that farmers keeping poultry have largely increased in number of late; but the general production of poultry is still insufficient to supply the demand, and the annual value of the importation of eggs yet exceeds 1,000,000 yen. If syndicates could now be formed, say the official advices, in connection with the poultry business, for financing, buying and producing fowls and eggs, and placing these products on the market, the business would, it is thought, grow into a source of great profit for farmers. The Department of Agriculture and Commerce is ready to import fowls of the best species for breeding purposes, and to supply those who require them.

It may assure and comfort intending visitors to Japan to know that wherever they go they can, even in advance of this progressive purpose of the Department of Agriculture, be provided abundantly with fresh eggs. Of course, on the routes of travel, 'foreign food,' prepared by Japanese cooks in every appetizing form, can be had at all times. In the out-of-the-way places it is different; but where the way-faring foreigner, whether gourmand or gourmet, can get fresh eggs, he can manage, by selecting from the Japanese ordinary menu, to live, perhaps not, as the saying is, 'like a fighting-cock,' but he can comfortably survive a crisis, and be thankful. This, of course, not because of the lack of good, wholesome food, and whole-souled hospitality; the difficulty suggested is one entirely of taste.

A. MACLEAN,

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. G. Eustace Burke.*)

KINGSTON, JAMAICA, June 25, 1907.

TARIFF CHANGES.

At a meeting of the legislative council of the colony held on 18th instant, an amendment to the present tariff law was introduced, which involved the placing on the free list of Portland cement, and also the necessary equipments for the erection of steel buildings.

The latter, previous to the passing of the law, were subject to an import duty of 16½ per cent *ad valorem* on first cost. Cement was rated at 2 per cent per barrel of 400 pounds.

G. EUSTACE BURKE.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

SUN BUILDING, CLARKE ST.,
BRISTOL, ENG., June 29, 1907.

EVAPORATED APPLES.

From correspondence and interviews I gather that the principles governing this trade are comparatively simple, and that the requirements for a successful development of Canada's share in it are equally simple, or easy to be observed.

PRESENT SUPPLY.

The British trade in evaporated apples is almost monopolized by the United States, New York State having an overwhelming proportion of the business, while California gets most of what is left.

CANADA'S SMALL SHARE.

Figures just issued by the British government for the year ended December 31, 1906, indicate that Canada is far behind the United States in exporting evaporated fruit to the United Kingdom. The import figures are as follow:—

	Quantity.	Value.
Total imports.	cwt. 24,164	£48,736
From the United States.	" 21,197	42,718
From Canada.	" 408	703

CANADIAN PREFERRED.

As in many other lines, I have the most hearty assurance of those engaged in this trade, that the Canadian product will be welcomed, and that, quality and price being approximately equal, supplies from Canada would have a decided preference in this market.

PACKAGES.

Three packages only need be mentioned: the 50-pound boxes, the 25-pound boxes, and the one-pound cardboard carton. These packages, I am told, are quite satisfactory to the trade, though there is room for a two-pound package, to be retailed at slightly less than 1 shilling, the object being to have it a little cheaper than two of the one-pound packages, which sell retail for sixpence. The bulk of ordinary fruit comes in 50-pound boxes; the 25-pound boxes, and still more the carton, should be reserved for fancy fruit. With regard to the carton, it is essential that it should be made attractive, neat in shape, tastefully printed, and (as some recommend) lined with a waxed or oiled paper.

GRADES.

The trade recognizes three grades, namely: prime, choice (sometimes called extra choice), and fancy. In determining the grade, colour is the chief requisite, and of course, a clear, clean white is the most desirable colour. Size of rings is a secondary consideration, though fair size is expected in the 'fancy' grade. There is, however,

no fixed rule for determining whether a box of apples is in fact entitled to the grade mark under which it may be offered; the only standard is a somewhat vague one, set by the packers themselves in competition with one another. That is to say, if a certain shipper's 'fancy' or 'choice' is inferior to the average of the same grades shipped by his competitors, he will very quickly lose his reputation. Grading, therefore, though not artificially exact, must be carefully attended to, and the standard observed season after season.

PACKING.

The packing must, of course, be carefully and neatly done, the package being substantial, and completely filled with fruit. I am given to understand that 'facing' is allowed and even expected; that is to say, that the upper layer is expected to be arranged with particular care so as to be attractive, and the quality of fruit used in it may be somewhat superior to that through the package. What is *not* expected is that 'fancy' fruit should be shown on the top layer, while the bulk of the package consists of greatly inferior samples, or 'rubbish.' Particularly in the case of 'rings' it is essential that the fruit throughout should be in fact 'rings,' and not quarters or odd scraps, such as have sometimes been found beneath a very attractive 'face' of rings.

SETTLEMENT OF DISPUTES.

This brings us to the question of differences of opinion between the packer on one side of the Atlantic, and the purchaser on the other. Under the present system such differences are usually adjusted by the broker through whom the order was placed. Questions regarding grading, packing and weight (which is guaranteed within 1 per cent) are thus settled between two parties in the same city, an arrangement which naturally gives the purchaser much greater confidence in buying.

PRICES.

The average price during the last seven years is reported by a large firm as having been about 30s. per cwt. (112 pounds), c.i.f. Bristol, for 'Primes.' Last year 'Primes' began at 33s. and rose to 45s. per cwt., while 'Choice' ruled from 37s. to 43s., and 'Fancy' from 42s. to 48s. It will be readily understood that in seasons such as the last, when prices are high, consumption is restricted, while in cheap seasons the trade expands to an extraordinary degree. 'Fancy' rings retail at about 5½d. a pound, or in cartons at 6d. a pound. Whole-cored frequently bring 7d. retail, but the Newtown Pippin, whole-cored, which arrive just before Christmas, often bring as much as 9d. a pound. If a similar quality could be landed earlier, it would sell extremely well.

CANADIAN TRADE.

Canadian packers are at present, as above indicated, practically unknown here. To get an opening they should negotiate through reliable brokers and endeavour to secure trial orders, which I am assured will be readily placed, if satisfactory references are furnished. If such trial orders are found to compare favourably in quality, packing and appearance with supplies from New York State, substantial orders are sure to follow, and the result will be a permanent trade of great value. It need hardly be added that if these conditions are not observed, it would be better for Canadian packers not to undertake an export trade to Great Britain.

'RINGS' AND 'WHOLE-CORED.'

In the above notes, except where 'rings' or 'whole-cored' are specified, the statements made are intended to apply to both.

W. A. MacKINNON.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(Mr. D. H. Ross.)

STOCK EXCHANGE BUILDING,
MELBOURNE, June 10, 1907.

CANADIAN TRADE WITH AUSTRALIA IN 1906.

The Commonwealth statistician has supplied me with a proof copy of the returns of the Australian imports from and exports to Canada during the year 1906. The returns are not so detailed as those of the previous year, which is illustrated by the item of 'all other articles' in the imports from Canada being given at £23,645, as against £5,079 in 1905. It will be impossible to make a comparison with recent years until the complete returns for 1906 are published, which will show the country of origin of all goods imported into the Commonwealth. From the figures supplied a comparison with the last three years is as follows:—

Australian imports from Canada,	1904..	£222,064
“ “ “ “	1905..	230,981
“ “ “ “	1906..	303,751
Australian exports to Canada,	1904..	29,352
“ “ “ “	1905..	43,288
“ “ “ “	1906..	72,688

In the Australian exports to Canada in 1906 there is an item of gold (specie), valued at £660,000, which is not included in the above figures, as this item was a remittance made by the Canadian-Australian steamers to Vancouver for transmission to San Francisco.

AUSTRALIAN IMPORTS FROM CANADA, 1906.

In previous reports (Monthly Reports, July, 1905, page 123; June, 1906, page 2121), I clearly explained the reasons why the Commonwealth trade statistics are unreliable so far as the returns showing the value of imports from Canada are concerned. The same conditions continued in 1906, and will continue while the bulk of Canadian exports to Australia is shipped from the port of New York. The figures supplied herein show that the value of Australian imports from Canada increased in 1906 by £72,770 (say \$353,662) over the previous year. The increase is chiefly attributable to the items of textiles, drugs and chemicals, apples, barley, machines and machinery, paper, spirits, vehicles and 'all other articles.' The falling off in imports is shown by decreases in the items of lumber, agricultural implements and machinery, and fish. Manchurian pine is undoubtedly obtaining a firm hold on the Australian market, and the reduction of imports of lumber is likely caused by this competition against Canadian spruce. Agricultural implements and machinery show a reduction of nearly £5,000, but the figures do not represent the actual values, for it is probable that at least a portion of these goods were included in the item of machines and machinery which shows an increase of £25,000 over the previous year. The decline of some £14,000 in the 1906 imports of Canadian fish can only be explained by the fact that heavy stocks were carried over from the previous season by importers, and that some orders could not be executed owing to high prices asked for frozen and canned salmon at the beginning of the season.

AUSTRALIAN EXPORTS TO CANADA, 1906.

Exclusive of gold (specie), the Australian exports to Canada, which in 1906 amounted in value to £72,688, show an increase of £29,400 over 1905—an amount exceeding the value of the total exports to the Dominion in 1904. The figures given probably only represent the direct shipments to Vancouver, as it is obviously impossible for returns to show the value of Australian products which reach Canada via England or the United States. A considerable quantity of Australian wool is doubtless purchased by Canadian woollen mills (for mixing purposes) in London and Boston—and the same contention applies to hides, skins and other commodities. The principal increases are in meats (frozen mutton and lamb), butter, wool, tin and cocoanut oil.

AUSTRALIAN TRADE RETURNS OF CANADIAN TRADE, 1906.

Until such time as the complete returns of all Australian imports for the year 1906 are made available, it is not possible to prove any inaccuracies and omissions in the figures supplied herewith. It may be stated, without reservation, that Australian imports from Canada in 1906 were considerably larger than shown in the accompanying return. This aspect of the position may be dwelt upon in a subsequent report.

AUSTRALIAN SUGAR FOR CANADA.

An important development in the Australian sugar trade is likely to occur during the ensuing season if the crushing reaches the anticipated results. The present Australian consumption averages 190,000 tons as against a production last year of about 204,000 tons. South Africa may continue an outlet for a small portion of surplus stocks, but growers are looking forward to Canada as the most promising market, particularly if some advantage might be obtainable under a preferential trade arrangement. It is interesting to observe, in the light of traffic preference between Canada and Australia—as well as of reciprocal trade between the two countries—that the *Moana* sailing to-day takes forward a shipment of 600 tons of Australian raw sugar to Vancouver. A much larger quantity would have been shipped had the necessary cargo space been available.

MINERAL PRODUCTION OF THE COMMONWEALTH.

The value of the gold output for the different Australian states aggregated £14,546,513 in 1906, and £15,569,263 in 1905. The mineral output of the Commonwealth, exclusive of gold, for 1906 gives a fine result and serves to compensate for the disappointment felt at the decline of the gold yield during the year. The high prices ruling for metals has stimulated search in many directions for tin, copper and lead. No discoveries of importance have been made recently, but districts deserted for years are being reopened and are increasing the production.

The values of the Australian mineral production, other than gold, are given at £12,149,405 in 1906 and £8,923,640 in 1905. Therefore, in the past two years minerals to the value of over £51,000,000 have been produced in Australia. Such figures show the great importance of the Commonwealth of the mining industry, both as an avenue for employment and as a source of wealth to the community. The export of zinc concentrates began to assume large proportions during 1906, but the figures then reached will be vastly overshadowed in the near future.

EXPORT OF APPLES FROM AUSTRALIA AND TASMANIA.

In former years the export of apples and pears from Australia and Tasmania to England and the continent ceased towards the end of April. This year, however, it was decided to forward later consignments in order to ascertain whether the shipping season might profitably be extended. In accordance with this decision shipments were made during the last three weeks, with the idea of testing the London market in July, at which time it is anticipated that the glut of soft fruits at Covent Garden will have passed. Shipments of apples from Australia for the last two seasons compare as follows:—

	1906.	1907.
	Cases.	Cases.
From Victoria..	46,381	115,573
“ Tasmania..	261,621	527,684
“ South Australia	72,577	20,144
“ New South Wales	10,144
Total..	380,579	673,545

CANADIAN CANNED FISH.

There has been an improved business in Melbourne during the last few weeks in canned salmon, buyers operating in anticipation of higher prices for this season's pack. There has consequently been a fair amount of speculation in this line and quantities of well known brands of Canadian fish have changed hands. It is satisfactory to report that the principal Canadian packers of salmon and lobsters have exceedingly capable representation in Australia.

AUSTRALIAN WHEAT AND FLOUR.

The grain market has been very excited throughout Australia during the last fortnight. Unfavourable advices had been received by cable of the crop prospects in America and Europe. F.A.Q. wheat touched 4s. (97 cents) per bushel f.o.b. Melbourne at the end of May. Flour advanced considerably, particularly as local millers are taxed to the utmost in preparing shipments for South Africa and the far East. The mail closes with the following prices ruling for export: Wheat, 3s. 10½d. to 3s. 11d. (94 to 95 cents) per bushel; flour at £7 15s. to £8 5s. (\$37.71 to \$40.14) per ton—depending upon port of shipment. Abundant rains have fallen throughout the wheat districts, and present indications are favourable for a large harvest.

TRADE CONDITIONS.

The most marked feature in recent Australian importations has been the immense expansion in the values of apparel and textiles. Probable changes in the Customs tariff may be responsible for a portion of this increase, but the larger purchasing power of the people is doubtless the main factor. Building operations are very extensive throughout these states at the present time, and trade is exceptionally good in lumber and builders' hardware.

D. H. ROSS.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(*Mr. J. S. Larke.*)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, June 10, 1907.

NEW ZEALAND.

The prosperous condition that has characterized the trade of New Zealand for the past ten years is still unabated. The exports of the products of New Zealand show for the first three months of the present year an increase of nearly half a million pounds, and the imports of merchandise of little over four hundred thousand pounds. The exports for the twelve months ending in March last show an increase of over three million pounds as compared with the similar period of 1905-6, while the imports show even a slightly greater increase. The chief advances were in wool, frozen and preserved meat and other pastoral products. There were also increases to some extent in butter and in cheese, but decreases in flour and grains.

Bankruptcies have been few and unimportant for some time, but latterly there has been some little increase in the number of insolvencies. These are usually of small retail dealers. The prosperity of the island has induced too many people to go into trade, and as usual led to some extravagance.

POTATOES.

New Zealand is importing potatoes from Tasmania. Owing to the fair crop of Australia prices are yet low, but there is a probability that in October next potatoes could be sent with advantage from Canada. Canadian exporters should arrange business relations, so that they will receive a cable advice as to prices which will determine the possibility of shipping at a profit.

NEW SOUTH WALES INDUSTRIES.

A preliminary statement of the industries of New South Wales has been issued, which shows a considerable increase in the number of industries and hands employed. As compared with 1905, the returns of last year show that the number of establishments has grown from 3,700 to 3,828 during the year, and the hands employed have increased from 56,111 males and 16,064 females in 1905 to 59,888 males and 17,870 females similarly engaged in 1906. It will thus be seen that there is an improvement of 128 in the number of establishments, and the persons employed have increased from 72,175 to 77,758 during twelve months, or at the rate of $7\frac{3}{4}$ per cent.

There is an almost general increase in each of the various classes of industries, but the development is most marked in the building trades, metal works, and establishments treating raw materials. The actual increase in the number of male artisans was 3,777 of 6.7 per cent, and although the increase in female hands only amounted to 1,806, or less than half the numerical advance in the males, the proportionate increase amounted to 11.2 per cent.

LEGAL DECISION UPON C.I.F. QUOTATIONS.

In my report of August 7 of last year, I called attention to the report of a case decided in a court of New South Wales respecting a shipment of onions from Japan. The purchase had been made c.i.f. The onions though loaded in good condition arrived in Sydney in a bad condition. The purchaser refused to accept them, except on the shippers' account. An action was entered by the shippers to recover the price of the onions, and a counteraction by the Sydney receivers for damages for failure to deliver the quantity of onions in good condition. The trial judge decided that in shipping goods from Japan at a price c.i.f., Sydney, the risk of the transit fell on the vendor, and that he was bound to deliver the goods in merchantable condition at the port of destination. The case was appealed to the High Court of Australia, which is the highest court of appeal in Australia. The chief justice reversed the judgment of the court below, in which he was supported by his two colleagues sitting with him.

It was held that the contract was for the shipment in Japan of that season's onions. They were to be sent at certain times in specified vessels, which was done. The duty of the shippers was to ship in Japan and not to deliver in Sydney, and that the action of the Sydney buyers was wrongly brought unless it was a term of the contract that the goods should be at the risk of the vendors during the voyage. This provision was not in the contract. The vendors were, therefore, entitled to a new trial while a non-suit was entered in the case of the action of the buyers against the vendors. The decision of the High Court of Australia restores the definition of c.i.f. to the understanding in which it is usually regarded. Shipments under contract of c.i.f. mean shipments in good order at the railway station or port of export: the risk of carriage remaining with the buyers. This decision is of importance to Canadian exporters.

EXPORT OF SHEEP.

Australia has been shipping considerable numbers of high grade breeding stock to South Africa since the conclusion of the war. Some little time ago an agent from the state of Uruguay arrived in Australia and has purchased a number of sheep, paying very high prices for them. In one instance he paid 1,000 guineas for a merino ram

He paid an average price of £588 each for five, and £126 each for eight ewes. It is believed that the result of this experiment will be to open up a large and profitable market to Australian breeders.

The purchaser of the sheep, and they were bought for himself, has visited the merino countries of the world, and asserts that nowhere has he seen anything to compare with Australian merinos.

INTERIOR FREIGHTS.

In the matter of the addition of interior freights to the value of goods for duty in Australia, there seems to be some doubt in the minds of Canadian exporters. The broad principle is in the levying of duty on Canadian goods, that interior freight must be added to the value of the goods as exported from Canada to the nearest port of export. In the case of shipments from Nova Scotia where they are sent by rail, for example, from Truro to Halifax and thence to Halifax to New York, where they are transferred to an ocean-going ship, duty would be paid not on the freight to New York but only to Halifax, notwithstanding that the transshipment takes place at New York.

In the case of Canadian ports like Brockville and Sault Ste. Marie, situated on neutral rivers, no freight need be added at any time as they are ports of exports. Again in the case of Toronto where shipments can be made by boat to United States points, in the summer time no interior freight need be added, as Toronto in such case is a port of export and Lake Ontario is a neutral water. When the exports are made after the close of navigation, the proportion of rail freight to New York paid to Niagara Falls would have to be added to the cost of the goods, as interior freight. If goods from an interior point are shipped to Australia and might be shipped via Toronto and thence to Rochester or some other United States point, there would need be added to the invoice, the freight paid to Toronto in the summer season. The same rule would apply to Hamilton and ports on the great lakes or the rivers, where they are boundary lines.

A PROMISING LEATHER TRADE.

Messrs. A. R. Clarke & Co., of Toronto, have sent out a traveller who has visited the chief cities of Australia with samples of their glazed kid. He was well received and sold sample lines to the leading boot and shoe manufacturers of Australia. If the leather should be at all equal to the samples, there is a promise that the firm will secure a very large trade. For twelve years efforts have been made to get in Canadian leather with no great success. The trade would be begun, but would, for some reason or another, die out. Complaints would be made that the quality of the leather was not maintained. There was no evidence that the fault was with the Canadian tanner. It is possible that the New York firm distributing it may have got a cheaper quality in order to make more profit, and as the reputation of the selling firm was not dependent upon the reputation of the leather of any one tannery, it could do this without serious detriment. All the blame would be thrown upon the tanner, and the leather of another tannery would be offered for the next season.

In sending out their traveller, Messrs. Clarke & Co. have taken the first step to get a permanent footing. I believe it would be advisable that he should return and bring with him some stock, which could be disposed of at higher prices than are secured for the import orders, and make the business pay. This is another illustration that a firm to secure the best trade must do its own business.

QUEENSLAND.

In addition to the very excellent crop of sugar, which has been referred to, the returns show that great progress had been made in the pastoral industry of Queensland. Its sheep had been reduced by the drought to 7,213,471. Last January they

had increased to 14,872,413. The cattle had similarly increased from 2,543,471 to 3,390,421; the horses from 399,122 to 450,675. The figures for horses and cattle were those for 1906. The figures when returned for this year, are expected to show still greater proportionate increase. The returns of agricultural produce will also show a like development.

COTTON CULTIVATION.

During the civil war in the United States cotton was grown in Queensland as well as in Fiji. The reduced prices following the close of that struggle compelled the abandonment of the cultivation. New efforts and new experiments are being made, looking to a restoration of cotton as a Queensland crop. As high as 1,473 lbs. have been picked from a single acre. The great difficulty lying before the industry is the high prices that will have to be paid for labour. It is hoped, however, that in some districts the yield of cotton will be so large as to enable these wages to be paid.

NEW ZEALAND PROGRESS.

A return has just been received from the Registrar-General of New Zealand giving the progress of the colony for ten years from 1896 to 1906. The population has increased from 714,162 to 908,726. The land under cultivation rose from 11,550,075 acres to 14,382,787; the number of horses from 249,813 to 342,603; cattle, from 1,138,067 to 1,851,750; sheep, from 19,138,493 to 20,108,471; shipping, inwards, from 614,097 tons to 1,243,652 tons; outwards, from 627,659 tons to 1,238,214 tons. The total exports of produce increased from £9,177,366 to £17,841,346; imports, from £7,137,320 to £15,211,403.

The development is still going on. For though the colony is of small extent, there are yet very considerable areas of land to be brought under cultivation.

THE MAIL SERVICE.

The San Francisco line of steamers has definitely withdrawn from the Australian trade, sold its coaling punt and buoys, and closed up its office. A British freight line which has been carrying coal from Newcastle to San Francisco has determined to make a regular service, returning with freight from San Francisco to Sydney. Arrangements are also being made whereby it will carry the mails. The service will begin in August next and more definite information as to the dates of sailing will shortly be made. It is to be hoped that it will alternate with the Canadian-Vancouver service, though the slow passage of the freight line will not give a regular mail service.

J. S. LARKE.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(Mr. E. D. Arnaud.)

GAZETTE BUILDING, ST. JOHN'S, July 8, 1907.

PULP MAKING MACHINERY.

The United States consul in Newfoundland, in a recent report to Washington, refers to the negotiations that are in progress for the establishment of two more large pulp mills in the colony, and says: As all these contemplate the use of American machinery, it is apparent that the equipment of one or more establishments each of which represents a capitalization of \$5,000,000, will do much to swell the total of the American exports to the island.'

Canadian manufacturers of this class of machinery would do well to inquire into the possibility of making an effective competition for this trade. One of the mills referred to is already in process of construction, and has probably completed arrangements for the required machinery, but the other, I understand, has not yet made any preparations for the erection of its plant.

COD FISHERY.

The fishing season owing to weather conditions on the coast is unusually backward this year, and so far the prospects have not been very promising for a large catch. A local trade journal writing on the subject says:—

'If the signs and precedents of other years count, the new season's codfish is going to open at a pretty high price. The factors in the situation that make for this condition, are short supply of old fish on hand, and the comparatively late date at which the first new fish will be ready for market. In ordinary years, new fish in anything like large quantities could be counted to arrive in the St. John's market by the first of August; this year, from present indications, there will not be any fish ready much before the first of September. The result of this condition of affairs will be, that new fish will be inflated very much beyond its logical and intrinsic worth, and prices will be given that merchants will find it hard to market at later in the season.

'We are inclined to the belief that the price of our staple during the current season will remunerate our suppliers and our fishermen for the risk and labour expended during the prosecution of our greatest industry—the kedge anchor of Newfoundland.'

P. B. MACNAMARA.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, July 4, 1907.

EMIGRATION FROM SWEDEN IN 1906.

According to investigations made by the Swedish Statistical Bureau, the number of emigrants from Sweden during the year 1906 was 24,704, against 24,046 in 1905, and 22,384 in 1904. In 1903 the number was not less than 39,525.

The largest part of the emigrants have gone to the United States, thus in 1906 21,242 persons, in 1905 20,520, and in 1904 18,553. Of the whole emigration Canada can only be seen to have received 364 persons in 1906, against 253 in 1905.

Of the emigrants in 1906 there were 13,752 males and 10,952 females.

It has for a long period been observed that the emigration of women is more constant than that of the men. During years with a small emigration, therefore, the number of women is comparatively large, while in years with a larger emigration, such as 1906, it is comparatively smaller.

SAVINGS BANKS IN DENMARK, SWEDEN AND NORWAY.

There are in Norway in all 446 savings banks, in Denmark 513 and in Sweden 409, to which, however, comes for Sweden quite a number of the so-called 'Postal Savings Banks Offices,' which are erected in many of the post offices throughout the country.

At the close of 1905 there was deposited in the savings banks of Norway kroner 374 million = \$99,933,000, in Sweden kroner 636 million = \$169,600,000, and in Denmark kroner 622 million = \$165,900,000. Compared with the number of inhabitants Denmark thus stood much better than Sweden and Norway.

FACTORIES AND INDUSTRIES OF SWEDEN.

The report of the Swedish 'Kommerskollegii' is just out from the printers and shows that in 1905 there were in Sweden:

	Labourers.
1,281 saw and planing mills, with.. . . .	38,568
1,681 flour and grist mills, with.. . . .	4,602
172 weaveries, with.. . . .	15,917
630 iron and steel goods factories, with.. . . .	20,700
10 sugar refineries, with.. . . .	2,706
176 spinning mills, with.. . . .	10,442
138 wood-pulp mills, with.. . . .	8,897
424 mechanical workshops, with.. . . .	19,452
68 paper factories, with.. . . .	7,997
19 distilleries, with.. . . .	194
18 raw sugar works, with.. . . .	5,571
128 spirit distilleries, with.. . . .	822

	Labourers.
475 carpenter and furniture factories, with.. . . .	11,400
394 tanneries, with.. . . .	2,361
114 tobacco factories, with.. . . .	4,598
57 shoe factories, with.. . . .	4,241
253 metal goods works, with.. . . .	3,247
358 book printeries, with.. . . .	6,082
489 brick mills, with.. . . .	11,606
299 stone quarries and cutteries, with.. . . .	12,346
7 margarine factories, with.. . . .	397
467 charcoal works, with.. . . .	6,043

To the above comes a lot of smaller factories and industries, so the whole number goes up to 11,949, with 280,995 labourers.

LABOUR TROUBLES AT THE NORWEGIAN PULP MILLS CONTINUE.

The strike at the pulp and paper mills, referred to in my June report*, is still going on, and are very likely to continue, as the workmen have refused the owners' offer in regard to higher wages, and the negotiations have been broken off between the Employers' Association and the Workmens' Association. The next step during the coming weeks or months will, therefore, most likely be that the Employers' Association in the paper and pulp trade will declare a lock-out for all organized workmen.

Negotiations about higher wages are also going on at the saw and planing mills, but as the workmen in this branch got a raise last year, there is not much prospect of any important increase this year. The Workmens' Association has, however, raised demands on ridiculously high wages and if they do not withdraw their demands, it may happen that there will result strike and lockout among the organized workmen at the saw and planing mills also.

THE SWEDISH PAPER TRADE.

Big labour conflicts appear to be pending also at the Swedish paper mills. A tug-of-war between employers and workmen in the paper trade has a long time been anticipated. At some mills the strike is already going on. When the struggle has commenced, it is not improbable that it may reach big dimensions, and that all the mills may be involved. It is possible that the employers will also in Sweden meet the strike by declaring lockout.

C. E. SONTUM.

* Monthly Report, May, 1907, p. 312,

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(Mr. Edgar E. Tripp.)

PORT OF SPAIN, TRINIDAD, July 8, 1907.

TRINIDAD TRADE STATISTICS.

The trade statistics for year ending March 31, 1907, unusually late in issue, appeared last week, accompanied by very interesting diagrams and an able and valuable report by the Collector of Customs, Hon. R. H. McCarthy, C.M.G.

Both the import and export trade show a regrettable falling off, but the cause is not far to seek. The production of cocoa fell off by 30 per cent from the average of the past few years, notwithstanding largely increased cultivation, and the value of the other staple—sugar—was low throughout the year. Thus the purchasing power of the community was greatly reduced.

The government, acting through the Agricultural Society, alive to the significance and importance of the unexplained diminution in the colony's yield of cocoa, has obtained the services of an expert, in the person of Mr. O. W. Barrett, of the United States Department of Agriculture, for a term of six months, who will devote the whole of that time to practical tests and examinations into the fungoid and other plant diseases which it is thought may be the cause of the partial failure of the last year's crop. Mr. Barrett has already commenced operations in the heart of one of the cocoa districts.

IMPORTS INTO TRINIDAD.

	1903-4.	1904-5.	1905-6.	1906-7.
United Kingdom.. . . .	£ 944,804	£ 938,788	£ 957,594	£ 922,184
British colonies.. . . .	284,227	283,183	836,415	361,572
Foreign countries.. . . .	1,297,419	1,407,080	1,509,602	1,836,961
Total.. . . .	£2,526,450	£2,629,051	£3,303,611	£3,120,717

The very marked difference between the figures for British colonies and foreign countries for 1905-6 and 1906-7 is accounted for by the fact that in the former case both imports and exports were inflated in 1905-6 for the time being by reason of Trinidad being headquarters of the Royal Mail Steamers, leading to a large transit trade through the Intercolonial boats; and in the latter case, from the circumstance that in 1906-7 an unusual quantity of the products of the Spanish Main—cocoa, balata, hides, rubber, tonca beans—has been shipped through this port. The variations in value and amount of these extraneous items year by year makes it somewhat difficult to arrive at the exact measure of the colony's progress or retrogression, but I regret to say there can be little doubt that the check in the flood tide of the colony's prosperity, to which I referred in last year's report, is more in evidence now than then. An apt test of this is afforded by the Collector of Customs. He takes the population, which, by the way, has increased from 215,000 to 325,000 in 13 years, and compares it with the imports for local consumption, from 1892 to 1905-6, with the discouraging result that the purchasing power per capita has steadily fallen from 7.13 to 5.35.

Exclusive of bullion and specie and transshipments, the imports have been:—

1901-2..	£2,038,609
1902-3..	2,375,068
1903-4..	2,299,505
1904-5..	2,316,319
1905-6..	2,171,518
1906-7..	2,283,187

The apparent increase of 1906-7 over 1905-6 is due to causes mentioned above.

IMPORTS FROM CANADA SHOW DECREASE.

In view of the quantities of Canadian goods shipped through New York, only an approximate idea can be formed of the relative value of shipments to the West Indies from the United States and the Dominion, but on dissecting the articles of Canadian origin received during 1906-7, the figures given in the official returns appear to fairly represent the facts, viz.: that in the period under review imports with Canada have decreased and have increased with the States.

IMPORTS FROM CANADA AND UNITED STATES.

Canadian and United States imports for the past six years have been as follows:—

Years ending March.	Imports from Canada.	Imports from United States.
	£	£
1901-02..	98,958	672,147
1902-03..	132,962	792,189
1903-04..	119,186	675,769
1904-05..	117,054	677,421
1905-06..	139,179	651,070
1906-07..	131,102	677,283

COMPARATIVE STATEMENT OF IMPORT TRADE.

	Total.	U.S.A.	B.N.A.
Books, &c., printed..	£ 8,937	£ 931	£ 122
Boots and shoes..	54,639	22,665	724
Bread..	5,302	301	2,077
Butter..	31,765	5,417	873
Carriages..	3,349	2,182	603
Cheese..	8,241	6,235	227

Fruit..	1,458	734	6
Furniture..	14,172	3,761	744
Hay..	3,535	3,256	201
Horses..	8,624	1,844	180
Hardware (clocks, watches, &c.).. . . .	10,430	796	184

COMPARATIVE STATEMENT OF IMPORT TRADE.—*Continued.*

	Total.	U.S.A.	B.N.A.
Hardware, unenumerated.. . . .	£ 85,346	£ 17,688	£ 898
Leather, unmanufactured.. . . .	8,062	2,404	446
Machinery.. . . .	61,925	4,693	226
Manufactured articles unenumerated.	78,120	19,037	2,639
Medicines.. . . .	15,695	4,663	362
Meats.. . . .	96,471	89,160	781
Meal.. . . .	5,819	5,099	128
Milk.. . . .	29,689	227
Onions.. . . .	9,326	1,333	292
Oats.. . . .	24,234	1,120	22,589
Oil, not petroleum.. . . .	25,297	1,073	237
Paint.. . . .	6,304	891	458
Paper.. . . .	8,277	429	397
Potatoes.. . . .	12,868	1,062	7,447
Peas.. . . .	15,155	6,914	4,460
Stationery.. . . .	13,493	1,367	99
Soap.. . . .	29,967	3,173	3,941
Shingles.. . . .	120	4
Timber.. . . .	52,761	38,333	11,566
Textiles, wearing apparel.. . . .	62,190	4,741	115
Textiles, hats.. . . .	18,223	742

In the following items there is a satisfactory increase in imports, viz.:—

INCREASE IN IMPORTS FROM CANADA.

	1905-6.	1906-7.
Boots and shoes.. . . .	£ 584	£ 724
Bread.. . . .	1,831	2,077
Butter.. . . .	629	873
Carriages.. . . .	497	603
Hardware, unenumerated.. . . .	380	898
Manufactured articles, enumerated.. . . .	2,227	2,639
Oats.. . . .	20,250	22,589
Timber.. . . .	9,610	11,566
Soap.. . . .	2,206	3,041

But in the following I regret to observe a decrease, viz.:—

DECREASE IN IMPORTS FROM CANADA.

	1905-6.	1906-7.
Books.. . . .	£ 300	£ 122
Cheese.. . . .	516	227
Cordage.. . . .	3,874	2,547
Fish.. . . .	66,611	58,686
Flour.. . . .	9,183	5,871
Furniture.. . . .	1,119	744
Leather, unmanufactured.. . . .	1,600	446
Milk, condensed.. . . .	947	227

The increase in hardware is satisfactory, although a glance at the total of that trade is sufficient evidence of the ample room for improvement, of which I trust to see Canadian manufacturers avail themselves now that the ice has been substantially broken. In this connection I have received an inquiry regarding the local trade in

axes. It is not very large, the total imports being about 200 dozen a year. Axes are obtained almost altogether from the United States. They are priced according to weights, 3 to 3½ lbs. cost £5.75 per dozen; 4, 4½, 4¾ lbs., \$6.50 per dozen; 5 lb., \$6.75 per dozen, without handles. Messrs. Collins & Co., Hartford, Connecticut, are at present the principal suppliers.

CANADIAN BOOTS AND SHOES.

These have, I think, come to stay. Although still lacking in some of the style and finish, so dear to the heart of the native, which mark the European and American article, it is becoming recognized that, price for price, the Canadian boot wears best. It is advertising itself, but that is rather a slow process, and I feel convinced that with a little more of the judicious 'pushing' which is so freely given to competitors, a very much larger share of this important trade would go to Canada.

BREAD.

Formerly large quantities of biscuits in barrel, known as crackers, were imported, and were consumed generally by the masses in place of soft bread. A local factory has, however, secured the practical control of this trade, with the result that the total importation has sunk to a value of £5,300. This consists of better class biscuits principally, and Canada, with a value of £2,077, has a fair share. The soda and pilot biscuits from Canada are taking very well, but the United Kingdom still leads with sweet biscuits, by reason of distinct superiority.

BUTTER.

I hear complaints, which I fear are not altogether without foundation, as to want of uniformity in the quality of succeeding shipments of the same brand of butter, but on the whole, it is well spoken of, and the leading marks are found increasingly in the better class of households.

CARRIAGES.

Canadian buggies, &c., continue to give satisfaction. They resemble Canadian boots in this respect: they are not quite so showy as those from the States, but they wear better. Still the competition is very keen, and as there is no material difference in price, manufacturers will have quite to meet local requirements if they desire to maintain and increase the share of the business they have already secured. Such things as the following should not, I think, occur. One of the leading importers, having taken orders for four dogcarts from customers in different parts of the country, ordered them from Canada. The documents were attached to draft at sight, and the goods were, therefore, paid for before being seen. Each dogcart was sent to its destination, and from each purchaser came the indignant protest that there were *no cushions*. Of course, this was only discovered when the cases were unpacked.

SOAP.

This is another article which seems to be steadily, if slowly, working its way into the market. There is plenty of room for it; not the fancy kind, but the plain blue mottled, or brown washing soap. That received from Canada so far seems to be the right thing.

FLOUR.

In this item the returns are quite unreliable, but from no fault of those who compiled them. I think it may safely be said that more Canadian flour was consumed in Trinidad in the year under review than during any previous corresponding period. One firm alone imports between 600 and 700 bags per month via New York, and other firms in smaller quantities, all of which go to swell the volume of imports from United States. Instead of the figure stated, I think £20,000 would be nearer the actual value of flour of Canadian origin imported, and, what is more satisfactory, qualities suitable to the market are now being regularly received.

FISH.

Salt fish is one of the principal items in the food of the poor, hence the large consumption. As a rule, it is also the cheapest. This year it has ruled very high, so much so that beef has often been cheaper, and has been bought in preference. This accounts for the £8,000 falling off in the fish imports.

PERMANENT EXHIBITION COMMITTEE APPOINTED.

His Excellency the Governor has appointed a Permanent Exhibition Committee, of whom the writer is one, to organize and undertake the selection and transmission of the products of the colony as exhibits at such exhibitions as it may be decided to take part in from time to time, and a vote in council has been taken for the purpose. The committee has decided, in the first place, to take part in the exhibitions at Toronto and Halifax, to be held, respectively, in August and September, this year.

EXPORTS.

I trust to avail of an early opportunity to deal with the export returns.

EDGAR TRIPP.

SOUTH AFRICA.

REPORT OF COMMERCIAL AGENT.

(*Mr. John A. Chesley.*)

RHODES BUILDING, CAPE TOWN,
P.O. Box 668, June 24, 1907.

GOOD MARKET IN SOUTH AFRICA.

It is readily admitted by every one who is conversant with the conditions and requirements of trade in South Africa that a large and important market for agricultural products, animal produce and manufactured goods exists here. Canadian merchants, farmers, manufacturers and others interested in the export trade of Canada, should assiduously cultivate this market. Although competition for trade here as elsewhere is keen, yet with the excellent reputation maintained, which Canadian products now hold in this market, together with the constant exercise of prudent, systematic and persistent effort by Canadian exporters should result in a large increase in the export of Canadian products to the British South African colonies.

SENTIMENT FAVOURS DEALING WITH GREAT BRITAIN AND THE COLONIES.

In commercial circles in Cape Town, the sentiment is somewhat freely expressed in favour of dealing with Great Britain and the British colonies in preference to any other country. This feeling, in so far as it is applicable to Canada, is in a great measure due to the good quality of the Canadian products exported to South Africa, which in so far as I have been able to learn have given very general satisfaction.

CATALOGUES AND PRICE-LISTS.

The interests of Canadian exporters would be facilitated by supplying this agency with catalogues and price-lists of their goods. The quotations in all cases to be c.i.f., as merchants and others desire to know the cost of merchandise landed at Cape Town, or other South African ports reached by the Canadian South African steamship service. This seems necessary in view of the fact that exporters of the United Kingdom, the United States and some other countries, are represented here by local agents, who can at short notice furnish buyers with prices in all the principal lines of merchandise required. This is especially so in the case of manufactured goods.

EGGS.

There is a very active demand here for eggs. This Canadian farm product is appreciated in this market. The present time seems opportune for Canadian dealers in this article of diet to give their attention to the export of this commodity to the South African market. An examination of the trade returns for the year ending December 31, 1906, shows the value of the eggs imported into Cape Colony for the period named to be £70,129 sterling, and were imported from the following countries:—

Countries.	Quantity.	Value.
	No.	£
United Kingdom	4,591,846	19,081
Canada	1,353,600	5,169
Denmark	3,906,465	16,062
France	247,030	891
Germany	5,000	13
Holland	229,880	841
Italy	5,466,884	20,516
Portugal, Madeira	1,040,549	3,567
Russia	327,660	1,030
Morocco	131,610	376
United States of America	559,860	1,801
South African Produce	174,342	782
Total	18,034,726	70,129

It will be noticed from the above statement that Canada stands fourth in the list of countries as to the number of eggs exported to Cape Colony, and the value thereof. There does not appear to be any way of ascertaining the value of this Canadian product (which must be large) imported here through the United Kingdom, as the trade returns of Cape Colony show the country from which the article is imported as the country of origin.

FRUIT BOXES.

There is a good market here for fruit boxes, which Canadian manufacturers could very well supply. The supply of fruit boxes for this market has been for several years past imported chiefly from Norway and Sweden. The sizes of the boxes now in use here are given as below.

These dimensions were obtained from the manager of the Wellington Co-operative Fruit Growers' Association, Limited, who assured me they were the standard sizes used in South Africa:—

Outside Measurements.

- No. O. apricot box, $16\frac{1}{2} \times 10 \times 2$, at 16 s. per 100 boxes.
 No. 1 apricot or plum box, $18 \times 12 \times 2\frac{1}{4}$, at 20 s. per 100 boxes.
 No. 2A. plum or peach box, $18 \times 12 \times 2\frac{1}{2}$, at 21 s. per 100 boxes.
 No. 2B. peach box, $18 \times 12 \times 2\frac{3}{4}$, at 22 s. per 100 boxes.
 No. 3 peach or pear box, $18 \times 12 \times 3$, at 23 s. per 100 boxes.
 No. 4 pear box, $18 \times 12 \times 3\frac{1}{2}$, at 25 s. per 100 boxes.
 No. 5 half grape box, $18 \times 12 \times 5\frac{1}{2}$, at 36 s. per 100 boxes.
 Grape box $24 \times 18 \times 5$, at $7\frac{1}{4}$ d. each.

Thickness of material used in making the above boxes given as follows:—

	Ends.	Sides.	Bottoms & Tops.
No. O. apricot box.	$\frac{1}{2}$ "	$\frac{3}{16}$ "	$\frac{3}{16}$ "
No. 1 apricot or plum.	$\frac{1}{2}$ "	$\frac{3}{16}$ "	$\frac{3}{16}$ "
No. 2A. plum or peach.	$\frac{5}{8}$ "	$\frac{1}{4}$ "	$\frac{1}{4}$ "
No. 2B. peach.	$\frac{5}{8}$ "	$\frac{1}{4}$ "	$\frac{1}{4}$ "
No. 3 peach or pear.	$\frac{5}{8}$ "	$\frac{1}{4}$ "	$\frac{1}{4}$ "
No. 4 pear.	$\frac{5}{8}$ "	$\frac{1}{4}$ "	$\frac{1}{4}$ "
No. 5 half grape.	$\frac{3}{4}$ "	$\frac{1}{2}$ "	$\frac{1}{4}$ "
Grape.	$\frac{3}{4}$ "	$\frac{1}{4}$ "	$\frac{1}{4}$ "

The size of the box as given above is the outside measurement over all. The dimensions given also allow for proper ventilation. The material used is pine, and the outside of the box is planed, inside not planed. The prices named are those ruling at present c.i.f. Cape Town, but are subject to change.

The number of boxes required for the fruit export of Cape Colony for the year 1906-7 was about 90,000. The number used for the export of fruit from the other South African colonies is not included in the above, and must have been quite large. It is confidently expected that a much larger number will be needed the present year.

JOHN A. CHESLEY.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(Mr. J. B. Jackson.)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., July 16, 1907.

SELLING APPLES BY WEIGHT.

In my report of April 27, 1907 (Monthly Report, April, 1907, page 105), detailing the various opportunities which exist in the north-east of England for Canadian apple shippers to develop their trade, I called attention to the fact that a movement was on foot originating from the Hull importing firms to adopt a system of selling apples by weight.

This movement has now matured into reality. At a general meeting of the Hull and District Fruit Buyers' Association, in June, 1907, when most of the Hull fruit merchants and buyers representing the north of England and the Midlands, together with many other districts were present, the following resolution was carried without opposition:—

'That all fruits, nuts, and vegetables generally sold retail by weight shall likewise be sold by brokers, merchants and importers on the Hull market by actual declared nett weights only; that in the event of disputes the buyers to have the right, at their own cost to have reasonable proportions of bulk weighed by sworn weighers, and shall pay only upon such Weighers' Average Weights.'

The promoters of this resolution state it has been adopted in consequence of the light weights in barrelled or boxed fruit received from many districts and shippers, thus prejudicing and damaging the fruit trade generally; also because of the combination of retail buyers in many centres to secure guaranteed weights. A special committee of the Hull and District Fruit Buyers' Association, Limited, elected to administer the resolution, have arranged for the same to be brought into operation on July 1, 1907, and have appointed sworn weighers from that date. A Tare Committee, comprising seven of the leading members of the association has also been appointed.

This system of selling fruit by 'declared nett weights' will effect a radical change in the old practice of selling Canadian apples on the Hull market, and it is expected that within two years the system will become general throughout the Kingdom, as it is claimed that it serves the best interests alike both of the buyer and the seller.

HOW CANADIAN APPLES WILL BENEFIT.

The opinions passed on this resolution will be of particular interest to Canadian fruit growers and shippers as everything points to the fact that it will be to their distinct advantage. 'The way we shall work things,' remarks one importer, 'is that when we offer a barrel for sale we shall state the gross weight, and if that certain barrel weighs 140 lbs. gross and there is 21 lbs. tare, the buyer should receive 119 lbs. of solid fruit.' This is where the well-known superiority in the weight of Canadian apples in barrels will show up to advantage over apples from any other country. In future it is therefore advocated that whenever possible all Canadian barrels should be marked with the gross weight.

CANADIAN VS. AUSTRALIAN FRUIT.

While this system of selling 'by weight' will be of decided advantage in furthering the interests of the Canadian apple trade many importers are of the opinion that

it will have just the opposite effects in the case of Australian apples, which are shipped here in particularly heavy Australian hard wood boxes. This gives the English buyer the impression that he is buying a good heavy lot of fruit, whilst all the time the heaviness is really due to the kind of wood which the box is constructed of.

BRIGHT PROSPECTS FOR CANADIAN FRUIT.

Inquiries made of the leading fruit experts in the north of England show that owing to the peculiar and most unseasonable weather which has been experienced throughout Britain and the continent, there is every indication of a great shortage in the apple crops, and local importers are relying more than ever this year on the Dominion to meet the demands of their trade. The prospects for a 'bumper' export season for Canadian shippers have not been so bright for many years. According to reports which have reached local importers from the principal fruit-growing centres in Ontario, there is likely to be a particularly plentiful supply of Baldwins, Russets, and other winter supplies of apples.

FRUIT REPRESENTATIVES FOR CANADA.

The first representative of the Hull importing firms will leave next week for New York en route for Canada to make arrangements for shipments of apples, and he will be followed later by many more representatives of other firms. Judging by the preparations that are now being made, these representatives will be in Canada much earlier than they were last year.

THE MARKET FOR PEARS.

The inclement weather experienced so far this year is also partly responsible for the excellent opening which occurs on the British market for Canadian pears. Local fruit buyers who have recently returned from the French pear-growing districts report that there is every indication of a small crop, partly due to the reason already stated, and also to the fact that the 'midge' has got among the pears causing them to drop off the trees in hundreds.

Canadian exporters, however, will not be entirely bereft of competition; in fact they will even have to look to their laurels, inasmuch as Cape Colony has entered into serious competition in this trade. Last season several large consignments of luscious 'William' pears arrived from South Africa—the first of their kind ever seen in this country. They were exceptionally fine fruit and found much favour, retailing at as much as 3d. and 4d. each. There are great possibilities for Canadian exporters in this trade if they were only to show a little more enterprise in developing the market, and I shall be only too pleased to assist them at this end by putting them in touch with would be importers. There will be an excellent market with good prices in this district for all the pears Canada can send us this year.

ARRANGEMENTS FOR SHIPMENTS.

I am pleased to record that the trade inquiries which have recently appeared in the Trade and Commerce Weekly Report from north England firms desirous of making arrangements for shipments of fruit have been vigorously followed up by fruit exporters, especially those in southern Ontario, and negotiations are now pending or finally, settled by which Canadian exporters can obtain direct through freights to any centre in the northeast of England, either by the Manchester Liners, Limited, any of the Liverpool-Canadian lines, the Thomson line, whose Canadian agents are Robert Reford Company, Limited, Montreal, and should sufficient cargo offer, the liners in connection with the Leyland line (Montreal office, 17 St. Sacramento street), would also doubtless return to Hull. In addition to these services, Canadian products arrive at Hull via New York by the Wilson line.

JNO. B. JACKSON.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(Mr. P. B. MacNamara.)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., July 15, 1907.

BARLEY.

If anything were needed to implement the demand for a real good quality of malt-ing barley from Canada, it was to be found in the strong appeal made by a large im-porter who attended the meeting called at the Lord Mayor's parlor recently, to meet the members of the Canadian Royal Commission on grain, and who stated that the market was compelled to rely upon California barley for a first grade quality, and that he was satisfied that Canada produced the necessary article, but regretted it did not find its way to the British market in sufficient quantity, and in this connection I may be permitted to give the quantities and values of barley imported:—

IMPORTS OF BARLEY INTO GREAT BRITAIN.

COUNTRIES.	YEARS ENDED DECEMBER 31.

	Cwts.	Cwts.	£	£
Russia	1,362,000	1,189,400	381,458	341,467
Roumania.....	1,145,300	919,900	337,186	267,085
Turkey.....	694,200	1,632,000	225,963	489,874
U. S. of America.....	2,268,600	1,902,800	641,688	637,078
Other Countries.....	926,100	1,114,600	282,325	338,813
	6,396,200	6,758,700	1,868,620	2,074,317

PRODUCTION OF BARLEY IN GREAT BRITAIN.

To the above quantities imported, the yearly production of Great Britain must be added, and I give the acreage and bushels obtained from the report of the Department of Agriculture for the year 1905:—

England	47,288,182	1,410,287
Wales	2,817,436	91,243
Scotland	8,004,446	212,134
	<hr/> 58,110,064	<hr/> 1,713,664

It is scarcely necessary to say that the great bulk of the barley imported is for stock feeding purposes, and comes from Russia and Roumania.

MALTING BARLEY.

For malting purposes the best quality and that which commands the highest price comes from California and Montana, Chili and the Syrian coast. The market price for California barley at present is 28s. 6d. per qr, or 86½ cents per bush, and the best local barley realizes nearly the same price. It has been stated that some Canadian malting barley has arrived here with the ends of the grain broken, no doubt due to defective thrashing, and this condition reduces its price materially and its effectiveness for malting purposes.

CHEESE.

One of the largest cheese importing firms in this city has furnished me the following report:—

‘As the Canadian cheese market is now in full swing, we are pleased to report that there is a vast improvement since last we wrote you, not only in the boxing and stencilling of the goods, but most important of all, the averaging is better. Whatever cause this is due to, it is one that we appreciate from a business point of view, and there is no doubt that some good has come from the attitude that your department took at the last conference.

There is still room for improvement, and it would be much better, not only for us, but for the factorymen, if they could see the importance of keeping the goods in the factory until properly matured, especially at this time of the year. The circumstances this year is quite different to last, as there is an accumulation of stock on this side, and buyers are not so ready to rush into the market and buy the produce in its green state, as they did last year.

We only trust that the quality will continue to be as good as it has been in past years, especially seeing that we have now to rely upon Canada for the bulk of our produce.

Prices are about the same as last year, but the market is very dull, and it is most unprofitable both for the wholesale men and for the retailers. There is no life in the trade, and we could do with prices 8s. 10d. per cwt. lower.’

MANCHESTER AND LIVERPOOL CEREAL RECEIPTS.

It may prove of interest to Canadian shippers to give comparative quantities of cereals received at the points of Liverpool and Manchester for the years 1904, 1905, 1906, as obtained from the Board of Trade official returns:—

		1904.	1905.	1906.
		Tons.	Tons.	Tons.
Wheat	Manchester	251,755	197,080	247,750
"	Liverpool	1,226,400	1,201,791	1,189,648
Barley	Manchester	7,355	15,370	15,120
"	Liverpool	73,845	73,055	67,769
Oats	Manchester	8,540	9,570	8,930
"	Liverpool	19,450	24,610	23,945
Bean	Manchester	Nil.	Nil.	Nil.
"	Liverpool	17,680	16,709	7,521
Pease	Manchester	3,119	2,051	2,196
"	Liverpool	17,660	15,375	10,952
Maize	Manchester	45,170	50,400	57,600
"	Liverpool	504,009	613,395	556,860
Wheatmeal and flour	Manchester	2,075	960	2,105
"	Liverpool	95,377	94,566	90,921
Oatmeal	Manchester	1,708	1,766	2,091
"	Liverpool	7,945	8,699	9,840

BRITISH TRADE RETURNS.

The Board of Trade returns for June show that during the six months ended with June 30, the imports reached a total of £328,365,300, an increase of £27,815,747, compared with the first six months of 1906, and of £55,230,667 as against the same period in 1905.

The exports for the same period amounted to £206,317,469, or £25,723,953 more than in 1906, and £50,611,248 more than in the previous year.

P. B. MACNAMARA.

BIRMINGHAM.

REPORT OF COMMERCIAL AGENT.

(P. B. Ball.)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,

BIRMINGHAM, ENG., July 15, 1907.

PERMANENT ROAD MAKING.

Many experiments are being made in various parts of Great Britain in permanent road making. In Wolverhampton (twelve miles from Birmingham) the borough engineer has been testing four different kinds of materials in contrast with the old-fashioned ordinary macadam in order to see which system was the best qualified for the making of a substantial road surface in its resistance to heavy traffic, its imperviousness to wet, and a consequent accumulation of mud and dust.

TARMAC.

The materials used were what is known as tarmac—two different kinds—and two other processes alike embodying the use of broken granite and broken furnace slag, also soaked in tar as a binding ingredient. Tarmac seems to be gaining great favour.

PATENT QUARRITE.

Another system has followed on the heels of tarmac, known as patent quarrite, a new dustless paving. From information I gather it is a kind of waterproof macadam, and is especially designed to dispense with the mud and dust created by ordinary macadam. Quarrite has been laid down in several of the principal towns in Lancashire, and judging from the testimonials of borough surveyors, it overcomes all the difficulties of road construction, and produces a solid, even, and hard surface, free from dust, waterproof, and with resisting qualities for the heaviest traffic. Amongst other advantages, the paving, when once laid, does not break up in patches, but wears uniformly throughout. It is of course understood that in any system of road-making, due consideration of cost will be essential. In this respect in laying down the Quarrite system any class of sound rock of uniform quality, can be successfully treated by it—such as limestone, granite, whinstone, porphyry, and quartzite. Again, Quarrite does not require any periodical top-paving of tar and grit, as in the case of ordinary tarred macadam, in order to maintain the surface, and another advantage is that it can, it is stated, be renewed after years of wear, at less cost than any other kind of material used.

Should any of the cities or towns of Canada wish further information, I shall be glad to put them in touch with the holders of the patent.

P. B. BALL.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, July 10, 1907.

TRANS-PACIFIC FREIGHTS INCREASE.

According to current press reports, the Trans-Pacific Tariff Bureau recently announced its new rates for freight commencing from June 15. The Tariff Bureau is composed of representatives of some six or more companies, including the Canadian Pacific Railway Company. The rates issued apply to all vessels belonging to several companies.

The new rates are considerably in excess of the old. The following figures show the increase on commodities consigned to Yokohama, Kobe, Nagasaki and Moji:—

Canned goods in cases, \$8 is asked per ton where \$6 was the old rate. The rate on flour is raised from \$3.50 to \$4 per ton from July 1st. This is presumably to Hong Kong, because it is further stated that flour rates have taken a \$2 jump on shipments to Yokohama and a \$1 jump on shipments to Shanghai.

The rates on live stock are raised \$15 on each animal, except sheep, which remain the same. General merchandise, which heretofore had been shipped for \$8 per ton by either weight or measure, whichever figures the most, has been raised to \$10. Potatoes, sugar in bags, and sugar in boxes or barrels are raised \$2 on every ton. Nails go up from \$5 to \$6 per ton.

The Bureau has also issued a new set of rules and conditions as follows:—

Minimum charge to Shanghai, \$5.50; to other ports of call, \$5.

No shipments accepted unless the necessary space has been previously engaged.

When freight is consigned to 'order' the name of consignee or party to be notified must be given.

These rates apply from ship's side and do not include wharfage or dock charges at loading port nor the cost of lading, handling or wharfage at port of trans-shipment or destination.

Shippers of flour must furnish with each shipment 2 per cent of empty sacks to be used for rebagging during loading and discharge.

Wheat must be packed in double gunnies, or bills of lading will be endorsed 'Not responsible for bursting of bags and consequent loss of contents.'

These latter two requirements are doubtless intended to provide wider margin for rough handling, since a recent judgment of a British court in China was severe upon a case of reckless handling and consequent loss. But generally, endorsements upon bills of lading are subject to equitable interpretation; yet these latter conditions are calculated to hamper trade.

A British merchant from Shanghai, discussing in this office the many features of the flour trade a fortnight ago, gave the rate upon flour from Winnipeg to Shanghai at \$9 per ton of 2,000 lbs.; and the rate from Seattle at \$4. Without raising any question over the comparative relation of these rates, they show without further argument the disadvantage under which Canadian trade is offered in the far east. And it would seem to be fair to remark that the Canadian rate, no matter how it may be adjusted between railway company and steamship company, was quite high enough before the very considerable advance now announced.

THE PORCELAIN TRADE.

Returns made by the guild of porcelain manufacturers and dealers, of Seto, a noted porcelain centre near Nogoya, show that the output of ware in Seto from April of last year to March last was valued at \$661,120. There were 564 manufacturing establishments and 48 dealers. Of the output, 53 per cent was for the American market (American in such case always including the North American continent), 28 per cent for the home market, and 19 per cent for the Chinese market.

A NEW LUBRICANT.

Bean cake is an important production in Japan and China. It is used chiefly for fertilizing, and to some extent for the feeding of live stock. Bean oil also is an important article of commerce. Whether bean-oil is a by-product of the manufacture of bean-cake, or vice versa, is a question that is answered differently by different people. But a consular report from Mukden is authority for the statement that 'one of the principal exports of Manchuria is bean oil, whose use at the present time is largely for illuminating and cooking purposes. The manager of the Mitsui Bussan Kaisha at Tieling, however, believes that by combining it with a small percentage of some other oil it will be possible to produce a very satisfactory and cheap lubricant, and states that his company is at present performing experiments to that end.'

AVERAGE PRICES.

According to investigations made by the Bank of Japan, the average quotation of fifteen articles in Tokio during last month, out of fifty-six commodities, showed an advance, twenty-two a decline, while nineteen remained unchanged. On the average, the rate declined by 0.38 per cent on the rate for the preceding month. The decline is attributed to the depression of trade in general in consequence of the unfavourable financial conditions which have prevailed for some time.

The average quotation of commodities in Osaka for last month also showed a decline of about 0.4 per cent, as compared with the rate for the preceding month. Of sixty-four different commodities, thirty showed an advance, sixteen a decline, and eighteen remained unchanged. Amongst those which advanced are raw cotton, cotton yarn and fabrics, and amongst those which declined are mushrooms, sake, silk thread fabrics, vegetable wax, and tea, which showed a heavy decline.

SUGAR IN FORMOSA.

The sugar season in Formosa is now almost over, says the *Osaka Asahi* (*Rising Sun*), but the total output has not reached 100,000,000 kin (kin $1\frac{1}{2}$ lb.), as estimated. The total was 92,667,500 kin, showing a decrease of about 18,000,000 on the figures for last year. This decrease is due to failure of the cane crop in consequence of a drought which prevailed during the planting season. Up to the end of last month, 90,563,802 kin of sugar had been sold.

INVOICES FOR CUSTOMS DECLARATIONS.

The Superintendent of Customs has stated that while he does not at present insist upon invoices being signed by the shippers, preference and confidence are naturally given to declarations accompanied by such evidence of authenticity. Unsigned invoices can be regarded as only indicative of the value of the merchandise covered thereby, but not conclusive, and importers are strongly recommended to submit original invoices signed by the exporter. Regulations to such effect may shortly come into effect.

GINSENG.

This peculiar article of production continues to form an interesting item of trade. Late consular reports say in substance that the Chinese who will pay the price continue to buy ginseng with traditional avidity. Certain grades of the wild root from Manchuria and Mongolia are valued at from eight to forty times their weight in silver, and one particular variety, thick, large, and heavy, is often retailed at one hundred times its weight in silver. The better grades are imported solely for use by the official class at Peking, and are not found in the retail stores. Ginseng is one of those things that are not found in published trade returns, therefore information about it is obtained only by special application.

TRADE WITH MANCHURIA.

Osaka is now doing a large trade with Tairen. According to the *Asahi* (*Rising Sun*), the principal lines of goods shipped from Osaka to Tairen are cotton yarn, grey shirtings, white Japanese cotton, copper, matches, cigarettes, European umbrellas, sake, and sugar. The value of goods shipped from Osaka from January to May last, in each month, was as follows: January, \$309,313; February, \$293,129; March, \$437,678; April, \$512,205; May, \$591,031.

THE SILK PROSPECT.

Referring to this important subject, the *Japan Chronicle*, a good authority upon trade matters, says: 'The export of raw silk is a most important element of the financial question. The result of sericulture this year has been exceptionally successful, and the output of silk cocoons has shown an excess of over 20 per cent over the average, while the raw silk market is ruling very high. The No. 1 quality of best Shinshu silk, which is the standard of the silk market, is quoted at \$620 per picul (133 pounds), against \$515 of last year. The favourable market of the new silk will undoubtedly give an incentive to sericulturists, who may raise more silkworms in the summer and autumn; and if these two crops prove as successful as the spring crop, Japan may have silk to sell to the amount of upwards of \$100,000,000 this year. In that case, it will be more than enough to compensate for the excess of imports (\$32,875,000) during the first half-year, with the result of great trade activity.

BUSINESS SITUATION IMPROVING.

The *Japan Chronicle* (Kobe) of the 2nd, says the announcement that the Bank of Japan and other leading banks, both in Tokio and Osaka, have agreed among them-

selves to transact business on more liberal terms for the relief of the present financial strain, has given encouragement to business circles, but no substantial action has yet been taken by the banks. The financial situation, however, has slightly improved, and the half-yearly accounts were quietly settled in Osaka at the end of last week, without creating any special increase in the demand for money.

THE RICE CROP.

The *Japan Times* says, on the authority of the Nishiga-hara Experimental Farm, that the crop of rice this year will be abundant, to judge from the growth of the rice plant up to the present. If the weather becomes unfavourable, the crop will not be worse than in the average year. Bad weather after transplanting will not much affect the crop.

MONTHLY RETURN OF FOREIGN TRADE.

The following is a comparative statement of the value of some of the principal items of export and import between Canada and Japan, as shown by the Monthly Return, for the five months ending May 31, of the present and the previous year:—

EXPORTS TO CANADA.

	1907.	1906.
Silk tissues, habutae	\$112,725	\$127,902
Silk handkerchiefs.	18,934	33,482
Cotton tissues	1,789	1,943
Mats and mattings for floor (Hanagoza	37,331	19,796
Porcelain and earthenware	45,917	29,566
Lacquered ware	5,585	4,014
Tea.	46,833	32,610
Rice	111,719	67,544
Straw-plaits and chip-braids	550	1,944
Camphor	461	5,032

IMPORTS FROM CANADA.

	1907.	1906.
Flour.	\$55,671	\$31,062

The 'principal items' given in the Monthly Return, number only twenty-five of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of the Annual Return has to be awaited.

GENERAL TRADE RETURN.

Principal Imports into Japan.	May, 1907.	Five months ending May 31.	
		1907.	1906.
	\$	\$	\$
Flour	219,238	1,299,407	1,978,445
Butter	3,626	23,688	35,051
Salted salmon		119,131	168,863
Condensed milk	74,010	371,585	315,507
Fertilizers	1,854,065	5,240,463	4,147,147
Leather, sole	81,709	430,572	221,819
Lead, pig, ingot and slab.	24,835	146,196	395,830
Printing paper.	144,114	689,585	508,489
Cotton ducks.	4,416	22,990	33,991
Cotton prints	56,973	262,492	316,363
Cotton satins and italians	32,023	288,879	401,840
White shirtings.	68,520	275,469	347,180
Gray shirtings.	364,716	507,579	1,231,142
Pulp, sulphite.	31,713	333,387	425,026

A. MacLEAN.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE, SYDNEY, AUSTRALIA, July 8, 1907.

THE DEVELOPMENT OF NEW ZEALAND.

The Government of New Zealand has issued some statistics showing the expansion of the country between 1896 and 1906. The following are some of the most interesting figures:—

	1896.	1906.	INCREASE.	
			Numerical.	Per cent.
Population (excluding Maoris and Pacific islanders)...	714,162	908,726	194,564	27·24
Occupied holdings..... No.	58,904	72,338	13,434	22·81
Cultivation (including grasses)..... Acres.	11,550,075	14,382,787	2,832,712	24·53
Horses..... No.	249,813	342,608	92,795	37·14
Cattle..... "	1,138,667	1,831,750	713,683	62·71
Sheep..... "	19,138,493	20,108,471	969,978	5·07
Pigs..... "	239,834	242,273	32,439	15·46
Money orders issued..... £	902,160	1,686,232	784,072	86·91
Railways, Government. Open for traffic..... Miles.	2,018	2,458	440	21·80
Receipts..... £	1,286,158	2,624,600	1,338,442	104·07
Shipping—				
Vessels, inwards..... Tons.	614,097	1,243,652	629,555	102·52
Vessels, outwards..... "	627,659	1,238,214	610,555	97·27
Exports of New Zealand produce—				
Wool..... £	4,391,848	6,765,655	2,373,807	54·05
Grain..... "	346,197	139,474	-206,723	-59·71
Frozen meat..... "	1,251,993	2,877,031	1,625,038	129·71
Butter..... "	281,716	1,560,235	1,278,519	453·83
Cheese..... "	130,166	341,002	210,836	161·97
Phormium fibre..... "	32,985	776,106	743,121	2252·90
Gold..... "	1,041,428	2,270,904	1,229,476	118·05
Gum, kauri..... "	431,323	522,486	91,163	21·14
Provisions, tallow, timber, &c..... "	1,269,680	2,587,453	1,317,773	103·79
Total exports New Zealand produce..... "	9,177,336	17,840,346	8,663,010	94·39
Imports..... "	7,137,320	15,211,403	8,074,083	113·12
Output of coal..... Tons.	792,851	1,729,536	936,685	118·14
Banks—deposits..... £	14,490,827	22,422,243	7,931,416	54·73
Savings bank deposits..... "	5,065,864	11,170,025	6,104,161	120·50

Under most of these heads the increase is far in advance of the growth of the population, though that has been substantial.

The increase in population is fair considering that until comparatively recently little effort had been made to induce immigration. The development of the trade has been over four-fold of the growth of the population. Very much of this development is due to the attention that has been paid to the export of frozen lambs to England, and to dairying. The number of sheep has increased but little, whereas the export of frozen meat has increased twenty-five times the increase of sheep. The increase in the export of wool has been ten-fold that of the increase of sheep, due to a small extent to the increased yield of wool per sheep, but mainly to the increased price of wool. The exportation of butter and cheese has been remarkable, and is the legitimate result of the great attention which the New Zealand Government has bestowed upon the dairying industry. Another remarkable development is the exportation of phormium fibre. The high prices of Manilla hemp and other fibres have turned what was considered an almost valueless product of the waste lands of New Zealand into a very profitable article of export.

TEN YEARS' DEVELOPMENT OF AUSTRALIA.

The returns for the year 1906 for some items are not yet available, and hence a comparison cannot be made between 1896 and 1906 as in the case of New Zealand. As it will be of general interest, I have arranged some statistics for the ten years, 1895 to 1905.

	1895.	1905.	Percentage.
Population.....	3,539,663	4,052,474	14.5
Area under crop..... Acres.	5,211,094	9,433,455	84.8
Horses..... No.	1,679,803	1,673,805	
Cattle..... No.	11,844,534	8,525,295	(—)28.02
Sheep..... No.	91,800,270	74,403,704	(—)18.9
Swine..... No.	835,816	1,014,853	21.4
Imports..... £	44,364,054	76,034,455	71.3
Exports..... £	55,523,476	94,528,759	70.2
Imports per head of the population..... £	16-8-1	18-17-8	15.1
Exports per head of the population..... £	15-8-6	23-9-6	52.1
Exports of wool..... £	16,671,926	19,814,924	18.8
Deposits in banks..... £	88,016,328	106,515,251	21.01
Savings banks..... £	21,476,486	28,789,889	80.6

The railway statistics are available for 1906, and the comparison is made, therefore, between 1896 and 1906, as follows:—

	Miles Open.	Gross Receipts.	Working Expenditure.	Net Revenue.
1906.....	21,353	£25,565,864	£17,768,231	£7,797,633
1896.....	16,214	10,276,256	7,118,240	3,158,116
Increase.....	5,139	£15,289,508	£10,649,991	£4,639,517

In the statements of imports and exports the figures include interstate trade as well as foreign trade. Otherwise a fair comparison with New Zealand could not be made.

It would appear that Australia had made small progress in comparison with New Zealand, but it must be remembered that New Zealand has had an almost uninterrupted prosperity for the ten years, while Australia suffered from one of the severest droughts in its history from 1895 to 1903. In addition to the drought, Queensland suffered from the tick, which reduced its herds of cattle that composed its principal pastoral industry. In 1891 there were 106,419,751 sheep in Australia. In 1902 the number had been reduced to 51,903,078. Since that year Australia has made rapid progress, and the figures, if available for 1906, would show a very much better state of things than those of 1905.

The returns of the number of sheep, cattle and horses for the three States of New South Wales, Victoria and Queensland have been compiled, and they show an increase in 1906 over 1905 of 8,445,164 sheep, 705,144 cattle, and 71,980 horses in these three States. The most promising feature in the figures is the increase of crops under area. While Australia will always be a great producer of wool, meat and butter and of other pastoral products, yet its future lies in the development of agriculture. The attention which the government of the several states has shown to this branch of industry during the last ten years is bearing its fruit. On the well-watered areas the large holdings are likely to gradually disappear and be replaced by farms.

NEW ZEALAND TRADE, 1906.

Some figures in connection with the trade of New Zealand for the year 1906 are to hand. The imports of merchandise were £14,078,565 as against £12,277,079 in 1905. This is exclusive of specie and parcels, but inclusive of all specie and parcels were from the United Kingdom, £9,003,029; from the colonies, £3,886,787; from foreign countries, £3,321,387; and the total of all imports was £15,211,403. In comparison with the imports of 1896, there has been an increase from the United Kingdom of £4,288,753; from the colonies, £2,258,126; from foreign countries, £1,527,204. The increase from the United Kingdom has been greater than those from the other British possessions and all foreign countries put together. But when it comes to percentages, the imports from Great Britain have only increased 91 per cent, while those from the colonies have increased 139 per cent, and those from foreign countries, 192 per cent.

The exports have grown on the ten years as under:—

	1896.	1906.	Increase.
	£	£	£
To United Kingdom.....	7,541,981	14,047,176	6,505,195
To Colonies.....	1,246,544	3,141,327	1,794,783
To Foreign Countries.....	432,580	906,634	474,054
Totals...	9,321,105	18,095,137	8,774,032

The actual increase to the mother country appears large, but it is only 82 per cent, whereas to other colonies it is 133 per cent, and to foreign countries 110 per cent. Ultimately, foreign countries secure a larger proportion of New Zealand exports than these figures show, though they go to Great Britain first.

PREFERENTIAL TARIFF ITEMS SHOW INCREASE.

The Preferential Tariff Act of 1903 has produced beneficial results to British trade in boots and shoes, hardware and iron goods, bicycles and paper. The details are not yet to hand, but two items in respect to the Canadian trade have been published, giving the importations of furniture, paper hangings and printing paper, which show the operation of the tariff.

	Total Importations.	United Kingdom.	Canada.	United States.	Germany and Australia.
	£	£	£	£	£
Furniture..... { 1906	41,105	17,197	4,088	10,810	8,078
{ 1902	35,155	14,946	279	9,206	3,769
Paper-hangings.. { 1906	39,993	30,504	2,383	2,219	4,836
{ 1902 ..	33,327	27,329	351	4,645	614
	Cwt.	Cwt.	Cwt.	Cwt.	Cwt.
Printing-paper.. { 1906	156,724	62,340	51,074	31,255	2,194
{ 1902	117,128	44,196	1,781	61,107	2,208

The full value of the tariff on paper has not yet been experienced, as some of the importations of paper from Germany and the United States were admitted at the low rates under a contract, which only expired last year.

AUSTRALIAN TRADE, 1906.

The figures previously given out as approximate statements of the trade of Australia for 1906 have been readjusted, and the final returns show the imports to have

been £44,729,506, and the exports, £69,737,763. This gives a remarkable balance of trade in favour of Australia of over twenty-five millions sterling. Last year the balance of trade was slightly under sixteen millions sterling.

TRADE OF THE PRESENT YEAR.

The returns for the first five months of the year show the importations for that period and for the similar period of 1906 to have been, 1906, £17,236,867; 1907, £20,238,091; being an increase of £3,001,224 for the period. The exports were, 1906, £27,640,900; 1907, £29,639,773; being an increase of £1,991,873.

The proportionate decrease in exports is due to the decrease in the exports of gold for the same period, which amounted to no less than £3,411,045. There was, however, an increase of merchandise in the five months of nearly five and a half millions sterling. There are promises, therefore, that the year 1907, as intimated in January, will exceed even the magnificent trade of 1906. The rains for May and June were widespread and most useful. Prices of metals have somewhat recovered, and the prices of other products are high. Australia, generally, is in a very prosperous condition.

REVENUE AND EXPENDITURE.

This prosperity is reflected in the Commonwealth and State revenues. The Commonwealth revenue returns show receipts and expenditures to have been:—

	1905-6.	1906-7.	Increase.
	£	£	£
Customs and Excise.....	8,999,485	9,648,764	649,279
Other revenues.....	2,882,440	3,182,854	300,414
Total revenue.....	11,881,925	12,831,618	949,695
Approximate expenditure.....	4,496,194	4,985,728	489,534

The figures for five out of the six states are:—

	1905-6.	1906-7.	Increase.
	£	£	£
New South Wales.....	12,283,082	13,386,727	1,103,645
Victoria.....	7,803,916	8,308,337	504,421
Queensland.....	3,853,522	4,307,912	454,390
South Australia.....	2,806,011	3,194,610	388,599
Tasmania.....	900,727	970,456	69,729
	27,647,258	30,168,042	2,520,784

In New South Wales the surplus over the expenditure has been £1,493,271; in Victoria it is expected to be well over £800,000; in Queensland there is a surplus of £396,115; while South Australia expects one of £300,000.

The finances of Western Australia are not in as flourishing a condition as those of the other states. Prior to entering into the Federation it had very high duties, which were annually reduced, and the reduction has led this year to a deficit in its accounts.

A year ago the Commonwealth revenues showed an increase of £418,873, and the expenditure an increase of £178,742. The increases in the State revenues were: New South Wales, £930,614; Victoria, £287,969; Queensland, £258,123; South Australia, £81,816; and Tasmania, £48,033. All the increases this year are much greater.

A striking feature is that nearly one-half of the increases in revenue is due to the increased revenues derived from the state railways. This fact is an indication of the expansion of business and activity in trade.

SHEEP SALES.

The annual sheep show and sheep sales were held during the last two weeks. Some ten thousand sheep were disposed of, including British breeds and Merinoes. Merinoes, of course, being the leading and profitable line. Where so many sheep were offered, the great majority of them were ordinarily good flock sheep, the prices realized being an average of from £2 to £5 each. Of the British breed, Lincolns, Shropshires and Leicesters were in demand. Lincolns and Leicesters did not bring very high prices, 23 guineas being the highest. There were a number of good sheep amongst them, but few special. Shropshires, particularly those from the flock of Mr. Mansell, of Tasmania, a breeder known to Canadian sheep men, brought £105, £52 10s., £36, and some less. Twelve of them averaged £35 each. From other breeders, seven averaged £15, 6s. 7d.; twenty ewes, £14 8s.

Though the Merinoes did not reach to quite as high a figure as on some previous occasions, the highest price being 700 guineas as against 1,000 guineas in former years, yet the average was better than in previous years; one salesman declaring it to be the best ever held in Australia. The prices for the best sheep ranged from 100 to 700 guineas. A flock of fifteen brought an average of £181 13s.; a flock of four, £140; a flock of twelve, an average of £138 13s. 9d.; three an average of £81, and ten of £62 19s. 6d. There was a marked change of favour towards plain-bodied sheep as against the wrinkled skins that had held the fashion for some time.

NEW SOUTH WALES WOOL CROP.

The full statistics of the exports of wool for the year which closed on the 29th ultimo have not yet been prepared, but those for New South Wales have been published. The exports for this State were, 956,656 bales, being 140,194 bales more than the previous year. 708,011 bales were sold in Sydney previous to shipment. They realized an average of £14 3s. per bale. Last year the average price was £13 19s. 6d. The crop this year on this average was worth £13,536,682, as against £11,410,056 the previous year.

THE AUSTRALASIAN WHEAT HARVEST.

The government returns for the several states of Australia and of New Zealand have been published. These figures show the yield to have been eleven million bushels below the original official estimate of the harvest. It is claimed, however, by some in the trade that the official estimate of the South Australian harvest is somewhat too low. The figures of the last and the previous harvest are as follows:—

	1905-6.	1906-7.	1906-7.
	Bushels.	Bushels.	Yield per acre.
New South Wales.....	20,737,200	21,817,938	11·7
Victoria.....	23,417,670	22,618,043	11·13
South Australia.....	20,143,798	17,145,796	10·2
Western Australia.....	2,303,305	2,300,354	10·67
Queensland.....	1,137,321	1,108,902	9·68
Tasmania.....	776,478	702,300
Commonwealth.....	68,520,772	65,693,333
New Zealand.....	6,798,934	5,605,252	27·18
Australasia.....	75,319,706	71,298,585

The Australian yield in 1904-5 was 54,535,682 bushels, and in 1903-4 (the record season) 74,149,634 bushels. The New Zealand crop in 1904-5 yielded 9,123,673 bushels, and in 1903-4 it was 7,891,654 bushels.

NEW TARIFFS.

The Commonwealth Government anticipates presenting a new tariff to parliament in August, and the Government of New Zealand one somewhat earlier. In many lines both are likely to tend towards higher duties.

J. S. LARKE.

TRINIDAD AND TOBAGO.

REPORT OF COMMERCIAL AGENT.

(*Mr. Edgar E. Tripp.*)

PORT OF SPAIN, TRINIDAD, July 24, 1907.

EXPORTS OF TRINIDAD.

During the year 1906-7 the colony's exports were £2,872,325, compared with £3,168,706 for corresponding period in 1905-6, and being again considerably less than the imports. The decrease is accounted for by a shortage in the cacao crop of about forty per cent.

DISTRIBUTION OF EXPORTS.

	1903-4.	1904-5.	1905-06.	1906-7.
	£	£	£	£
To United Kingdom.....	529,211	665,397	445,889	417,824
" British Colonies.....	36,917	260,558	230,842	210,766
" Foreign Countries.....	1,061,101	931,323	1,045,174	927,454

The above figures relate to produce of the colony only, and do not include shipments.

Of local produce there was sent to Canada:—

1903-4..	£ 31,829
1904-5..	247,585
1905-6..	219,029
1906-7..	203,106

In this case, however, value is not a true indication of the volume of trade. £206,614 were paid for 127,866 bags sugar in 1905-6 against £195,584 for 201,714 bags in 1906-7.

SUGAR.

The total production of sugar was 45,000 tons, of which Canada took nearly half, and the United Kingdom practically all the remainder. The United States, which but a few years ago was looked upon by sugar planters as their sole hope in the future, figures for a value of £500. A notable feature of recent Trinidad sugar crops is that they are produced to a large extent by cane farmers. Formerly the owner of the factory grew all his own canes. Now, nearly half are supplied to the mill by small farmers, of whom there are 6,557 East Indian, and 5,777 West Indian. This arrangement tends to keep the people on the land, and is working satisfactorily for all parties.

CACAO.

The falling off in the cacao crop from 285,725 bags to 177,815 bags would have proved far more serious to the country but for the circumstances of a considerable rise in price. Thus, in spite of the great difference in quantity, the value of the exports was £973,169, against £1,196,450 the previous year. The United States were again the principal purchasers, taking 97,732 bags. France came next with 54,181 bags, and United Kingdom third with 19,777 bags. British North America is only down for 853 bags, against 1,200 last year, but official figures in this respect cannot be relied on. The greater part of the cacao consumed in Canada is no doubt purchased in New York, to the benefit of the middleman there, an incongruity which will no doubt right itself, as in the case of sugar, when the trade becomes more important.

COCOANUTS.

Over thirteen million cocoanuts were shipped last year, being a record for the colony. Prices were also good, the value being set down at £40,639. This industry is at the present time very flourishing. As a rule planters sell their crops for the year in advance, so that the business is of somewhat a speculative character for the buyer, but the latter has lately had the best of the bargain. The purchase of large quantities in advance has the advantage that suitable and cheap freight arrangements can then generally be made, otherwise sometimes difficult with this class of produce.

The United States were again the best customers for cocoanuts, thus:—

	1904-05.	1905-6.	1906-7.
	\$	\$	\$
To United States.....	8,571,495	9,054,355	11,489,951
" United Kingdom....	1,033,150	906,250	1,012,429
" British North America	610,618	659,470	314,430

ASPHALT AND MANJACK.

Asphalt shipments have been satisfactory notwithstanding the keen competition of the Bermudez Lake, now in the hands of a receiver for the government, or courts of Venezuela. The Trinidad Asphalt Company, and others interested in the 'Lake' here, exported 115,875 tons, about half of which went to the States—none to British North America. Manjack is on the up grade. 1,548 tons were shipped against 768 the previous year, 1,304 tons going to the United Kingdom and 1,752 to the States. The use and application of this product are apparently becoming known, and when the difficulties in its treatment are overcome, it will probably come into large demand.

FRUIT.

The new fruit industry has not developed as rapidly as was expected or hoped. Total exports were only of a value of £4,682, against £4,259 the previous year, a distinctly disappointing result, having in view the extra area which it was thought would be put into cultivation. A serious damper was experienced owing to the English Company which was established here to purchase fruit under arrangement with the government having given notice of intention to terminate the contract. Still, there are many persons who continue to give practical proof of their confidence in the future of the industry. It has now been demonstrated that the Island can produce bananas and other fruit equal to the best from elsewhere. The question of transportation is of course a serious one, especially during the period before the production of quantities sufficient to justify steamers providing and reserving cold storage. The Royal Mail Steam Packet Company are already doing this on some of their boats, and Trinidad fruit in excellent condition is now supplied regularly in London.

RUBBER AND BALATA GUM.

A considerable trade is done here in rubber and balata gum, principally the product of Venezuela, whence it is brought and sold to dealers here, and subsequently re-exported. It has been found, however, that this climate and soil are admirably adapted for the production of the highest quality of rubber, and its cultivation is being vigorously prosecuted. In a few years, therefore, it is likely to form a valuable item in the exports.

CEDAR.

Four hundred and seventy-two thousand three hundred and twenty cubic feet of cedar logs, valued at £57,018, were shipped during the year under review, but the demand for this timber at the same remunerative price seems to have entirely fallen off, and none is now going.

EXHIBITIONS.

The colony will be exhibiting at the exhibitions of Toronto and Halifax this year. The exhibit will be confined to bona fide commercial samples, and I commend them to the notice of your merchants. All the principal products of the island will be represented, and there will be some particularly fine samples of cacao and sugar, and some very interesting ones of rubber and other articles.

EDGAR E. TRIPP.

AUSTRALASIA.

REPORT OF COMMERCIAL AGENT FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(*Mr. D. H. Ross.*)

STOCK EXCHANGE BUILDING,
MELBOURNE, July 8, 1907.

THE COMMONWEALTH REVENUE, 1906-1907.

The financial year which closed on June 30 was the most satisfactory since the inauguration of the Australian Commonwealth in 1901. The figures are subject to slight adjustment at the annual audit, but, in the main, may be accepted as correct. The sources of revenue were as follows:—

Customs and excise.	£9,648,764
Post and telegraph offices.	3,127,569
Defence.	5,114
Patents.	18,245
Trade marks.	6,026
New revenue.	11,230
Miscellaneous.	14,670
Total revenue 1906-07.	£12,831,618
Revenue 1905-06.	11,870,926
Increase 1906-07 over 1905-06.	£960,692

The revenue from all sources exceeded the estimates by £905,118. The customs returns were £649,279 above the receipts for the previous year, and the post and telegraph offices showed an increase of £303,221 over the preceding period.

SUMMARY OF COMMONWEALTH REVENUE AND EXPENDITURE, 1906-07.

The following is a brief summary of the revenue and expenditure of the Commonwealth for the financial year which closed on June 30:—

Total revenue, 1906-07..	£12,831,618
Total expenditure, 1906-07..	4,985,728
	<hr/>
Returned to the States..	£7,845,890

The federal treasurer paid to the various Australian states £806,025 more than the obligatory three-fourths net customs and excise revenue as provided by section 87 of the Commonwealth constitution.

A NEW AUSTRALIAN CUSTOMS TARIFF.

The Parliament of the Commonwealth was opened at Melbourne on July 3, and early in the present session a new customs tariff will be introduced. Bonuses are promised to several industries, but more particularly to encourage the manufacture of iron and steel, in which development there is now a large company interested in an adjoining state. The Department of Trade and Commerce, Ottawa, will be promptly advised—by cable if necessary—of any important tariff changes affecting the principal lines of Canadian exports to Australia.

PRISON-MADE GOODS IMPORTED INTO AUSTRALIA.

The Commonwealth Customs Department, as a result of special inquiries made in over-sea countries, has decided to firmly administer the law in respect to certain goods which have hitherto been imported as of ordinary production, but are now proved to be made, wholly or in part, by prison labour, therefore prohibited from importation into Australia. In some recent instances permission has been granted to return prison-made goods to the country of origin, but importers have been warned that in future the regulation prohibiting the importation into Australia of goods made by prison labour will be strictly enforced.

It may be stated that such unfair competition has heretofore operated against the successful introduction into Australia of goods made by several important Canadian free labour manufacturing concerns.

CANADIAN NEWS PAPER IN AUSTRALIA.

The consumption of news paper in Australia is increasing from year to year, and it is satisfactory to report that the demand for Canadian paper is becoming extensive throughout these States. It is estimated that approximately the Commonwealth will this year import 60,000 tons of news paper, of which 50,000 tons are required on reels and about 10,000 tons in flat. Paper mills in the Dominion are devoting more attention than heretofore to this trade, and it is not improbable that at least one-third of the 1907 Australian imports of 'news' will be obtained from Canadian sources of supply.

CANADIAN CHEESE IN JARS.

In Monthly Report, February, 1907, page 1278, I referred to the administration of the Pure Food Acts, in Victoria and several other Australian states, particularly in regard to the prohibition from importation of cheese containing preservatives. This difficulty has been overcome by one Canadian cheese manufacturing concern. A shipment of Canadian cheese (in jars) entirely free from preservatives recently arrived at Melbourne in absolutely perfect condition both as regards quality and flavour. The consignees immediately cabled for a repeat shipment, and regular and increasing business is certain to ensue if the cheese continues to carry in similar condition.

AUSTRALIAN IMPORTATIONS OF CANADIAN FURNITURE.

The Commonwealth trade returns for 1906 credit Canada as the country of origin of imported furniture to the value of only £2,538. During the last month I have made exhaustive inquiries, and from reliable data collected concerning the exports of three leading Canadian furniture manufacturing industries it is a modest estimate to place the actual export values of their exports alone to Australia in 1906 at £30,000, besides which there are quite a number of smaller manufacturers of special lines of furniture, who are securing a portion of the Commonwealth trade.

It was my privilege recently to inspect some superb office furniture in Melbourne bearing the stamp of the Canada Furniture Manufactures, Limited, Toronto, the equal of which had not hitherto been imported from any country into Australia. With persistent energy and attention to the particular requirements of Australian furniture importers, there yet remains a wide field for Canadian enterprise to exploit.

PROGRESS IN PAPUA (AUSTRALIAN NEW GUINEA).

The Commonwealth government exercises paternal care over Papua, which comprises about 88,000 square miles of territory. The island lies immediately north of Queensland, and from a strategic point of view is of importance to Australia. Were it not for fever, mainly due to rank vegetation and decayed vegetable matter, it would be a comparatively healthy country, but the gradual clearance of the low-lying coastal districts is expected to improve present conditions. The island produces gold, copra (from cocoanuts), sandalwood, rubber, pearls and pearl shell. The Papua director of agriculture has recently planted, for experimental purposes, many thousands of Para rubber stumps, from which he predicts a successful issue. The development of the country is proceeding favourably, and large areas of land are being taken up by Australian investors interested in the production of rubber, which eventually may find its way, as raw material, to large Canadian rubber industries.

AUSTRALIAN WHEAT PRODUCTION.

The total production of wheat in Australia last season has turned out considerably less than 74,350,000 bushels, which was anticipated in January; the aggregate being now placed at 66,000,000 bushels approximately as compared with 68,520,000 bushels in the previous year. On the basis of expert calculation—after allowing for seed, home consumption and exports to date—there is less than 4,000,000 bushels available at the present time for over-sea shipment. The average yield for last season is given thus: South Australia, 10·20; Victoria, 11·13, and New South Wales, 11·70 bushels per acre. Prospects for the new season continue favourable, and the recent alternation of fine and wet weather appears likely to place the wheat crops in a forward position when the critical months of October and November are reached.

AUSTRALIAN WHEAT AND FLOUR QUOTATIONS.

Wheat is firmly held at Adelaide at 4s., and in Melbourne at 4s. to 4s. 1d. (97 to 99 cents) per bushel f.o.b. for f.a.q. In view of diminishing supplies and holders desiring higher rates, shippers find it hard to obtain full cargoes for chartered sailing ships. Flour is quoted to-day at £8 10s. to £8 15s. (\$41.36 to \$42.58) f.o.b. Melbourne, and £8 5s. to £8 7s. 6d. (\$40.14 to \$40.75) per ton f.o.b. Adelaide. With heavy orders in hand for the far East and South Africa, it is probable that present export rates for flour will continue until at least September.

MORE AUSTRALIAN DRIED FRUIT FOR CANADA.

The Canadian-Australian steamer *Manuka* due to arrive about July 31, will land at Vancouver a further consignment of about 100 tons of Australian dried fruit

(raisins) shipped at Melbourne for Canadian buyers. This new trade has exceeded the most sanguine expectations, and measures are already being taken by the leading exporting firms to increase next season's exports to Canada to at least 1,000 tons.

INQUIRIES FOR CANADIAN GOODS.

The catalogues of Canadian manufactures filed in this office have been more frequently referred to during the last month than at any other time since their receipt. Melbourne importers of a large variety of American goods are now turning their attention to Canada, more particularly on account of the exceedingly slow deliveries of orders placed in the United States. Manufacturers in the Dominion should promptly endeavour to make more determined efforts to avail themselves of the exceptional opportunity now presenting itself in increasing their exports of goods already well known, and introducing new lines to Australian buyers. If the same care and energy were devoted to the export business as is given to the home trade, the expansion in the values of Canadian exports to Australia would soon reach surprising figures. Capable representation in Australia is the principal factor in successfully introducing new lines and exploiting this important market.

CANADIAN CATALOGUES AND DISCOUNT SHEETS.

The importance of having the catalogues of Canadian manufacturers filed in the various commercial agencies is demonstrated from week to week by trade inquirers at this office. The catalogues, however, are of no immediate service unless accompanied by the latest discount sheets, preferably upon a f.o.b. New York basis, or (on heavy lines) upon a c.i.f. Australian basis. To obviate prolonged delay, which frequently means the loss of a season's business, manufacturers are earnestly entreated to send their latest export prices to this commercial agency. New catalogues with similar information will also be very acceptable.

D. H. ROSS.

TARIFF CHANGES

BRITISH INDIA.

I.—DUTY ON PETROLEUM IMPORTED FOR SANITARY PURPOSES.

(Notification—By the Government of India, Department of Commerce and Industry, No. 1959-101, dated March 1, 1907.—Customs Circular No. I of 1907).

In exercise of the power conferred by section 23 of the Sea Customs Act, 1878 (VIII of 1878), the Governor General in Council is pleased to exempt from the whole of the customs duty in excess of five per cent *ad valorem* leviable thereon on importation into British India, petroleum which has its flashing point at or above one hundred and fifty degrees of Fahrenheit's thermometer, and which is proved to the satisfaction of the Customs Collector to be intended for use exclusively for some sanitary or hygienic purpose.

II.—AMENDED TARIFF VALUATION OF MOLASSES.

(Notification—By the Government of India, Department of Commerce and Industry, No. 3023-37, dated April 13, 1907.—Customs Circular No. II of 1907).

In exercise of the powers conferred by section 22 of the Sea Customs Act, 1878 (VIII of 1878), the Governor General in Council is pleased to direct that, for the item 'Molasses' of entry No. 8 in the notification of the government of India in this department, No. 10123-30, dated December 22, 1906, the following shall be substituted, namely:

No.	Name of Articles.	Tariff Valuation.		Duty.
		Rs.	As.	
8	Molasses from Java cwt.	2	6	Five per cent.
	Molasses from other countries "	2	12	"

III.—AMENDED TARIFF VALUATION OF CAMPHOR.

(Notification—By the Government of India, Department of Commerce and Industry, No. 4133-37, dated May 16, 1907.—Customs Circular No. III of 1907).

In exercise of the powers conferred by section 22 of the Sea Customs Act, 1878 (VIII of 1878), the Governor General in Council is pleased to direct that, for the corresponding items of entry No. 11 in the notification of the government of India in this department, No. 10123-30, dated December 22, 1906, the following shall be substituted with effect from May 21, 1907, namely:

No.	Name of Articles.	Tariff Valuation.		Duty.
		Rs.	As.	
11	Camphor, refined, cake lb.	3	12	Five per cent.
"	partially refined, cake, in blocks of about 13 lb. lb.	2	12	"
"	crude, in powder lb.	2	4	"

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

CANADIAN COMMERCIAL AGENTS.

AUSTRALASIA.

- J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.
D. H. Ross, Stock Exchange Building, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.

CHINA.

- H. J. Craig, 18 Szechuen Road, Shanghai.

FRANCE.

- A. Poindron, 101 Rue Réaumur, Paris.

GREAT BRITAIN.

- P. B. Ball, Room 39 and 40, Central House, Birmingham.
J. B. Jackson, cor. of E. Parade and Greek Streets, Leeds, agent for Leeds and Hull.
P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.
W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.

JAPAN.

- Alex. MacLean, No. 14 Bund, Room B, Yokohama.

MEXICO.

- A. W. Donly, Apartado, 91B, Mexico, D.F., Mexico.

NEWFOUNDLAND.

- E. D. Arnaud, Gazette Building, Water Street, St. John's.

NORWAY.

- C. E. Sontum, Grubbegd, No. 4, Christiania, Norway, agent for Sweden and Denmark also.

SOUTH AFRICA.

- John A. Chesley, Rhodes Buildings, Cape Town, Cape Colony.

WEST INDIES.

- G. Eustace Burke, Kingston, Jamaica.
R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.
S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.
Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

CHINA, JAPAN AND COREA.

- W. T. R. Preston, Trade Commissioner, Poste Restante, Hong Kong.

CANADIAN HIGH COMMISSIONER'S OFFICE.

GREAT BRITAIN.

- W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.

- Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

CANADIAN IMMIGRATION AGENTS.

BELGIUM.

- D. Tréau De Coeli, 29 Rue de Souci, Antwerp.

FRANCE.

- Paul Wiallard, 10 Rue de Rome, Paris.

GREAT BRITAIN.

- J. Bruce Walker, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.
A. F. Jury, Old Castle Buildings, Preeson's Row, Liverpool.
G. H. Mitchell, 43 Cannon Street, Birmingham.

- H. N. Murray, Exeter.
L. Burnett, York.
John Webster, 35-37 St. Enoch Square, Glasgow.
John McLennan, Aberdeen.
E. O'Kelly, 17-19 Victoria Street, Belfast.

BRISTOL.

REPORT OF COMMERCIAL AGENT.

(Mr. W. A. MacKinnon.)

SUN BUILDING, CLARKE ST.,

BRISTOL, ENG., July 31, 1907.

THE ROYAL CANADIAN GRAIN COMMISSION.

On the 20th of June and on the 10th of July the Royal Canadian Grain Commission visited this district. Their sessions on the former date were held at Bristol, and on the latter date at Exeter. The Corn Trade Association, having had due notice, prepared evidence bearing on the vital matter of inspection, and supported this evidence by the production of samples. So thorough and systematic was their preparation that the commission expressed particular satisfaction with the evidence. It was agreed on the whole that Canadian government inspection at Winnipeg, Fort William and Port Arthur, meets the demands of the trade, and is almost, if not quite, above criticism. Importers do not hesitate to express the opinion that Dominion inspection is the most reliable guarantee they have of the quality of unseen purchases. No one, in consideration, urged the desirability of a change, either in the system of purchase by sample, or in the direction of supplementing inland by seaside inspection. The visit of the commission was warmly welcomed, and will be productive of nothing but good to the trade affected.

THE NEW DOCK AT CARDIFF.

In previous reports I have pointed out how the Southwest of England is taking its place in the shipping trade of Great Britain. Developments have been rapid at Southampton, Bristol (Avonmouth), Barry, and elsewhere. I had the privilege, on the invitation of the Cardiff Chamber of Commerce, of attending the opening of the new Queen Alexandra dock by King Edward on the 13th of this month.

THE QUEEN ALEXANDRA DOCK.

The new work, to be known as the Queen Alexandra dock, is described as the greatest of all the works carried out at Cardiff by the Bute family. It has already involved an expenditure of over two millions sterling. It is the fifth dock constructed by the second Marquis of Bute, the 'founder of Cardiff,' and his descendants, in seventy years, at a total cost of about four millions. Each marks not only a definite step in the progress of the Welsh metropolis, and in the development of the Welsh coal field, but also in the growth of the British mercantile marine, for they were required by the increasing pressure of the coal exports as well as by the changes in the character and size of steamships belonging to the collier or tramp class.

DIMENSIONS OF THE DOCK.

The dock is 2,550 feet in length, 850 feet in width, and 50 feet from coping to level of dock bottom. At the northeast end the dock has been widened to 1,000 feet

to afford greater facility in turning vessels of excessive length. The dock walls inclose an area of $50\frac{1}{2}$ acres and provide about 6,700 feet of quay space. A communication passage, 600 feet in length and 90 feet in width, between two masonry walls, connects the new dock with the Roath dock. The sea lock has a length of 850 feet between the outer and inner gates, and is 90 feet wide. The sea gates at the entrance to the lock are protected by two concrete piers extending into the channel, and the dock has a separate entrance from the channel. The sea lock is said to be one of the largest—if not the largest—in the world. Two large graving docks 800 feet in length, will be constructed at the southwest extremity of the dock, either capable of accommodating the largest vessels afloat.

THE LEWIS HUNTER COALING CRANE.

The south side will be devoted to the shipment of coal, with appliances of the most modern description, including the world-famed Lewis Hunter coaling crane, and movable tips of such a height as to meet the requirements of the largest steamers entering the dock for bunkering purposes. The Lewis Hunter crane—which the King saw at work—loads coal with the greatest rapidity and with a minimum of breakage. The cranes being movable and the railway lines leading to them so constructed as to deliver coal in almost any position on the dock side, a number of cranes can be worked simultaneously into one vessel, with the result that as much as 4,773 tons of coal may be shipped into a vessel in ten hours.

THE IMPORT TRADE.

The northwest side of the dock has been set apart for the import trade, and is already provided with two huge warehouses, served by four electrical and four hydraulic cranes.

GROWTH OF THE CARDIFF DOCKS.

The Bute docks started their career with a water area of $19\frac{1}{2}$ acres, but by 1859 this had been increased to $65\frac{3}{4}$ acres, in 1874 to $77\frac{3}{4}$ acres, in 1898 to $110\frac{3}{4}$ acres, and the water space of the Queen Alexandra dock increases it to 162 acres. In 1875, the year following the opening of the third dock, the exports of Cardiff were 3,071,303 tons, and the imports 650,243 tons; in 1888 they were 7,968,054 and 1,300,748 tons respectively. Since 1888 the export trade of the port of Cardiff has increased to 23,000,000, but of this the Bute docks claim only 8,767,000 tons, the remainder being distributed between Barry docks (9,757,000 tons), and Penarth docks (4,235,000 tons), both of these places being included in the port of Cardiff.

BRISTOL TRADE REPRESENTATIVE IN CANADA.

It is now more than two years since I pointed out to the Docks Committee the desirability of having a representative in Canada to make known the advantages of this port, and particularly of the new docks at Avonmouth, with a view to increased trade between Canada and this part of Great Britain. At the banquet to the visiting Colonial Premiers last May, the president of the Bristol Chamber of Commerce also advocated this policy, which has now been officially recommended to the City Council by the chairman of the Docks Committee. An appointment will in all likelihood be made next month. Montreal is likely to be the headquarters of this new 'Commercial Agency,' for which I bespeak a hearty welcome in Canada.

W. A. MacKINNON.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(Mr. Alexander MacLean.)

YOKOHAMA, July 19, 1907.

RESPECTING AXES AND EDGE TOOLS GENERALLY.

An inquiry from Canada respecting the market in Japan for axes does not open up much of a prospect.

The quantity imported at the two great ports may be stated as follows:—

	Quantity.	Value.	From whence.
At Yokohama	382	\$197 50	United States
At Yokohama	6	8 50	England
At Kobe	120	105 00	England
At Kobe	12	6 00	United States
At Kobe . . . (without handle)	36	30 00	United States

As to their being with or without handles, the returns fail to state, excepting as above, from which the inference would be that handles are included. Those in view in the shops have the handles.

Possibly at the lesser ports in the north, where the timber regions are, there may have been some importation, but likely even less than is above presented. There is therefore practically no trade in axes; and current information is to the effect that there is not any probability of the pattern commonly known as the American or Canadian axe coming into use to any extent.

In the course of personal observation, I have some recollection of having seen a wood-chopper's axe of the standard American pattern in a hardware store somewhere, but only one. I have seen, not often, the small size, hand axe, or hatchet, of the same pattern, in shop windows; and from the value of the axes mentioned as imported, probably these latter were mostly of the hand-axe sort. The customs published returns do not specify in respect of these articles, and the statistics given here are obtained through the courtesy of the Superintendent of Customs.

The foreign merchant here, especially those interested in American goods, would certainly have a different customs record achieved by this time if it were practicable to introduce the American pattern of axe. The same may be said of edge-tools generally. Some years ago a Sheffield manufacturer prepared a complete set or kit of carpenter and joiner tools of the very best in quality and finish, and put them in the hands of an influential agency determined to make trade in his line go. After a sufficient lapse of time, and in default of a single order, the attempt was abandoned, and the goods would not realize enough to pay the cost of carrying them out here. The reasons are clear enough, after the event. The Japanese mechanic pulls the plane and the saw, whereas the like English tools were made to be pushed; whether in the pattern of the other tools or in the way of using them, the difference is correspondingly great. That the native should adopt the English or foreign style of tool makes him smile, just as the foreigner would smile if offered the Japanese article. It may be thought by some that in the foreign settlements foreign workmen would be employed, and that

they would be using the foreign style of tools. That would be an entire misapprehension. There are no foreign workmen in this country; nor is there any possible opportunity for them.

In the case of the axe it may be said the chances of its acceptance by the Japanese woodman are still more remote; not on the ground of scientific merit, assuredly, but from overruling custom. The Japanese woodmen are not choppers. Mostly, they fell the trees and cut them up with the saw. The Japanese axe seems to be used for lopping off brush and splitting. The Canadian concerned in wood-cutting knows the 'iron wedge' used in splitting corwood and fence rails. Take a common iron wedge and put a hole through it for the handle, a straight handle, and you have the pattern if not the size of the Japanese axe. No mortal man could chop with such an implement; yet there is certainly no future apparent for the Canadian pattern of axe.

JAPAN'S IMPLEMENT INDUSTRY.

The tools and implements of the labourer, the mechanic, the farmer, and all the rest, are made within the country and used within the country by people to whom the making and the using alike have come down the line of ages from father to son. No doubt there has come down with primitive design a roughness of make and finish, that, if improved upon, would give a better impression, according to our idea. But here one discovers an apparent utilitarian trait or ruling principle; that is, that tools or implements may be best made to harmonize with the work for which they are intended. In other words, in Japan roughness of work and roughness of tools seem to have a proper relation to each other. One would judge that it was held as an economic and artistic principle, that polished steel and nickel-plated decoration were not of good taste in connection with the implements and tools of ordinary labour.

This view is sustained by reference to what is perhaps the finest class of edged steel workmanship. The secretary of the Yokohama Foreign Board of Trade, an old timer in the Far East, informed me that a British army surgeon, out here at the time of the Japan-China war, was struck with the excellence of the surgical instruments supplied to the Japanese staff doctors. He took with him upon his return home a complete case of these Japanese-made instruments, and reported afterwards that they were recognized as being essentially superior, especially the blade instruments, to those made and in use in England. And this is not an isolated assertion of the superior quality of the Japanese surgical instruments.

What has been said of axes, of the plane and the saw, may apply to the miscellaneous others, that go to make up a carpenter and joiner kit or chest of tools. There may be seen on view in some hardware stores a specimen or two, not much more than a sample, of the foreign style of edge tools and other appliances. Possibly some Japanese workmen may have crossed the Pacific and acquired some practice with the foreign hammer, screw-driver, brace and bits, and so on, and may sometimes fancy that sort of thing if only to gratify the curiosity of his untravelled associates. But that does not make Japan a market for edged tools of the foreign pattern.

PROSPEROUS COTTON ENTERPRISES.

The Kanegafuchi Cotton Spinning Company, which may be regarded as the leading company in cotton manufacture in Japan, gives to its shareholders as the result of the working for the half year ending with June a statement which shows:—

Profit for this term.	Y 1,467,328
Balance brought forward from previous term.	530,232

Total net revenue Y 1,997,560

Disposed of as follows:—

Dividends to shareholders, 22 per cent per annum . . .	Y 679,587
Several reserve funds	500,000
Pension fund to company's employees, sick, wounded, decrepid, &c.	50,000
Fund to provide hall of pleasure for the company's employees	45,000
Gratuities to members of the company	50,000
Other authorized expenditures	100,000
Balance to be carried forward	572,973
	<hr/>
	Y 1,997,560

The Fuji Spinning Company at the half-yearly meeting of shareholders, declared a dividend for the half year ending with June at the rate of 25 per cent per annum, and the sum of Y 571,645 was carried to next account. Afterwards an extraordinary general meeting of the shareholders was held, when a resolution was unanimously passed to float Y 5,000,000 worth of debentures for extension purposes.

At the half-yearly meeting of the Godo Spinning Company, the report showed the net profit of the company to be Y 893,238. Of this sum Y 60,000 has been placed to the legal reserve, Y 20,000 to the fund of the employees' technical school, Y 50,000 to the fund for the construction of a hospital for operatives, leaving Y 210,000 for a dividend at the rate of 20 per cent per annum, and Y 105,000 for an extra dividend of 10 per cent, making a total of 30 per cent. A surplus of Y 453,038 has been carried forward.

Besides showing an exceedingly prosperous half year, for the like results are said to be general in the cotton manufacturing line, these examples signify the advanced economic, scientific, and social directions towards which the manufacturing policy of the country tends. There is the ample legal reserve obligatory upon joint stock companies, the remarkable dividends, the handsome amount carried forward, and the hospital, technical school, pension, and 'Hall of Pleasure,' appropriations, all of which pays a tribute to the civilization of the Orient.

ALEX. MACLEAN.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14 BUND, ROOM B,
YOKOHAMA, July 19, 1907.

RAILWAY EQUIPMENT FOR JAPAN.

Large foreign orders for locomotives and rails for the Japanese Government railways are being contracted, and keen competition going on among foreign merchants interested, especially British, American and German. Originally the Japanese railways were stocked up with engines of the British pattern, and these are yet, as the traveller will readily see, the more generally in use. On the heavy grade sections, however, the American heavy type, such as the 'Mogul,' the 'Ten-wheeler,' and the

'Consolidated' are being introduced, and are said to have some preference. But in view of large contracts tenders are invited from the several agencies, all the great locomotive manufacturing companies being represented here, and the most favourably regarded tenders in respect of price, time of delivery, and other things equal, are likely to be the accepted.

During the late war, railway equipment to a very large amount was supplied by United States contractors, for service in Korea and Manchuria, and the terms and conditions were onerous. A large percentage of the contract sum was required as a deposit subject to forfeit; and there were penalties for delay beyond the contract term. The like conditions are said to be continued, although the circumstances are less urgent, so that contractors in this line must mean business.

JAPANESE GAUGE TO BE CHANGED.

It is commonly thought that the time is coming when the present gauge of Japanese railways, forty-two inches, will be changed to fifty-six and a half inches, for reasons of greater capacity and to conform to the Japanese railways on the continental mainland. Perhaps Canadian manufacturers will be able by that time to make themselves felt. Japan being wholly insular, and therefore without continental connection by rail, it does not seem necessary to incur the expense of widening the gauge, especially since the numerous tunnels, bridges and embankments, being on the narrow gauge plan generally, would make that expense very great. But it will doubtless come, amongst many other things that are coming to Japan, for an organization that has the sleeping car service of the Siberian railway and connections has been projecting a sleeping car service between points in western Europe and Tokyo, via Siberia, Manchuria and Korea, by ferrying across the Tsushima straits. However worthy the enterprise, it was for the time checked by the narrow gauge in Japan. It is not clear that all other difficulties were overcome, but for the present this one is effectual. The time is thought to be not far distant, however, when the oriental traveller will enter his sleeping compartment at Tokyo, and get his call to breakfast passing through the Straits of Tsushima, where the Baltic fleet lies submerged.

The latest transportation development, just announced evidently with authority, is that in connection with the nationalized lines the government has decided to carry out a thorough improvement, on a large scale, of all government lines. The work is to be completed in five years, beginning with the next fiscal year, at an estimated cost of 150,000,000 yen.* It is intended to effect a thorough revision of the traffic facilities throughout the country in time for the opening of the great exhibition in 1912. Details are at present incomplete, but the general estimates are reported to be as follows: 8,300,000 yen for double-tracking 830 miles; 22,500,000 yen for 900 locomotives; 19,000,000 yen for 19,000 freight cars; 10,000,000 yen for 1,000 passenger cars; 15,000,000 yen for enlargement and reconstruction of 30 stations, and 1,500,000 yen for construction of 5 new steamers.

A very large part of this equipment expenditure will have to go abroad.

FISHERY ENVIRONMENT.

Official expert inquiry into the marine products of Korea describes that industry as being in its infancy, and says the abundance of the seal species to be found along the Korean coast, especially in the waters around the islands on the Pacific shores is quite astonishing. The coast is haunted by an enormous number of these profitable marine animals. Sardines swarm near the shore in great schools traceable by the wide rippling areas. According to investigation by the marine product guild at Fusan,

*1 Yen is equivalent to about 50 cents Canadian currency.

the total value of the catch by the Japanese fishermen, who were engaged in fishing in those waters during last year, reached the large figure of 4,600,000 yen, while this promises a better catch than the previous one.

RAILWAY TIES FROM JAPAN.

A quantity of oak ties from Japan, received at Napa, California, last month, by the San Francisco, Vallejo and Napa Valley Electric Railroad, cost the company \$1.16 each landed at Vallejo. The price of the ties in Japan was 96 cents each, and the freight from Japan to Vallejo on 50,000 was \$10,000, or 20 cents each. The company desired California redwood ties, but was able to have oak ties cut and shipped from Japan in less time than redwood ties could be procured anywhere on the Pacific coast.

REFORESTING.

Twenty odd years ago the importance of encouraging the science of foresting, and its application, was appreciated by the Japanese. A school of foresting was founded twenty years ago, and this original institution has developed into an organized system including within its scope of operation some sixty-two schools for the training of students and the directing of popular attention to the science and practice of forestry. The forests proper appertain to the Imperial domain, and all matters relating to these forest lands are administered by the Department of Agriculture. Possibly the reforestation movement is obligatory also with regard to forests held under private tenure; that is, for every tree cut one must be planted. The control of forestry was taken up by the Imperial authorities many years ago. Statistics show that the forest area of the country, about 60,000,000 acres, is nearly equally divided between the Imperial government and miscellaneous holdings, and that in 1901 the total receipts were \$570,000. In ten years ending 1901, Japan's lumber exports amounted to \$25,000,000.

It may readily be believed that there was great timber in Japan at one time; and there is now much heard about the timber resources of the north, or what is known as the Hokkaido country. The climate throughout, like that of California and British Columbia, is favourable to forest growth. But in older Japan, where population is dense, and all land that is arable, even to the terracing of the hillsides, is under cultivation, reforestation finds scope mainly on the rugged slopes of the mountain ranges. There is practically none of the original tree growth; which is a statement, however, that does not explain much with regard to the trees of a country that has been using timber since a time long ante-dating the 'Cedars of Lebanon.' The general smallness of the standing timber strikes the observer, while he is impressed with an idea of what must have been, by many specimens of 'grand old monarchs of the forest' that are maintained with care in public parks and that line great avenues.

It must strike the observer that the Japanese are perhaps unavoidably very wasteful of the young forest growth. Nearly all the timber used in the framework of buildings in Japan is in the shape of rough-hewn poles, the cutting and transportation of which must be a large item in general industry. In this way the consumption of mere poles must be very great. Then charcoal, which is of universal use, and which is a very conspicuous item of production and transportation, is evidently made from like small timber; so that a strictly applied system of reforestation becomes a necessity if the country is not to be denuded of timber as the neighbouring country of Korea and much of China is.

ALEX. MacLEAN.

NORWAY, SWEDEN AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, August 2, 1907.

IMPORT OF NATURAL BUTTER TO NORWAY.

During the months of May and June there has been imported quite considerable of natural butter to Christiania, in all about 100,000 lbs. The butter, however, is not of Danish manufacture, but is produced by Danish dairymen in Siberia, from whence an enormous butter export has developed during the last few years. The shipments, however, all go via Copenhagen, and in this way the Danes have materially increased their already previous large butter export.

HARVEST PROSPECTS IN SWEDEN, DENMARK AND NORWAY.

The farmers of Sweden, Denmark and Norway are reported to be well satisfied with the harvest prospects. The hay crop especially will be unusually large. It is, therefore, not probable that there will be any necessity of importing hay during the coming winter, which I mention, since I have often had inquiries from Canadian hay exporters regarding the chances for export of hay to these countries, and during years with a small crop of hay there has also been some import, especially to Sweden.

Cereals, potatoes and roots, on the other hand, are reported to be more or less set back owing to the cold spring and the protracted rains during the early summer.

PRICES OF MEATS EXCEPTIONALLY HIGH.

Owing to the large crop of hay the farmers are increasing their stocks of cattle, and as a consequence are not selling or slaughtering down more than absolutely necessary. On this account the prices of all kinds of meats are exceptionally high, there being paid from 27-30 cents in whole weight pr. kilogramme (2½ lbs.) for first-class slaughtered cattle. There is some import of cattle, both live and slaughtered, from Denmark to Norway, but not sufficient for the demand. In the fall when the cattle droves come down from the grazing places in the mountains, there will probably be an improvement in the supply. Meanwhile it may be taken for granted that there will be an increase in the import of corned beef during the next few months.

LABOUR CONFLICTS.

The labour conflicts at the Norwegian pulp and paper mills are still going on, to great loss both for the mill owners and the labourers. Mr. Berner, President of the Norwegian Storting (parliament), some weeks ago offered his mediation, and negotiations have been carried on between the Employers Association and the Workmens Association, but unfortunately without any result. At a meeting on July 23, the workmen made the following proposition:—

1. Payment for overtime to be 25 per cent addition to ordinary wages for the first 2 hours, and 50 per cent for all additional overtime and Sunday work, work on Christmas, Easter and Whitsun holidays to be paid 100 per cent above ordinary wages.

2. The new tariff to be in force 3 years from the day of signature.

3. The general terms of the tariff to be the same as in the tariff of metal workers, with such small alterations as may be found necessary.

On July 24 the President submitted a proposal by which all piece-work wages would be increased by $12\frac{1}{2}$ per cent, reserving the question of day wages for special arrangement. This proposal was discussed on July 25, but was not found acceptable by the employers, who made a counter proposal, but as the workmen also refused this the Norwegian Employers Association, on Friday last, decided, in conformity with the decision of the cellulose and papermakers branch of that association, that work is to be stopped at all cellulose and paper mills belonging to the association. It is estimated that between 7,000 and 8,000 men will thus be out of work, and that the loss in wages for them will be about 1 million kroner a month, while for the mill owners the loss will be twice that.

LOCK-OUT IN THE SWEDISH PAPER TRADE.

The lock-out in the Swedish paper mills commenced on Monday last, and comprises about one dozen large mills, who, together employ nearly 3,500 hands. At the mills which are not members of the Employers' Association, work continues. At some of the mills affected by the lock-out it will be attempted to continue the work with those of the hands who are not members of the labour union, and new hands are engaged.

SULPHITE PRODUCTION OF SWEDEN.

The production of sulphite in Sweden during 1906 was: about 6,000 tons bleached sulphite, about 85,000 tons easy bleached, about 206,000 tons strong bleached; for 1907 the production is estimated at: about 9,500 tons bleached sulphite, about 97,000 tons easy bleached sulphite, about 265,000 tons strong bleached sulphite.

NEW SULPHITE MILLS IN SWEDEN.

The following new sulphite mills are under building and will bring their production on the market in 1909:—

1. Lyrsne Mills, Soderhamns district, yearly production 15,000 tons.
2. Nyhamns Mills, Sundsvall district, yearly production 10,000 tons.
3. Sunds Aktiebolag pr. Sundsvall will build a mill at the outlet of the Indal river, with an estimated production of 10,000 to 15,000 tons.

PRODUCTION OF CELLULOSE IN SWEDEN AND NORWAY.

For both of the Scandinavian countries, Sweden and Norway, the production of cellulose this year is estimated at about 600,000 tons, of which the 400,000 on Sweden's part, the remaining 200,000 comes on Norway. For 1908 the production is estimated at 700,000 tons of cellulose in both of the countries mentioned.

C. E. SONTUM.

LEEDS AND HULL.

REPORT OF COMMERCIAL AGENT.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., August 7, 1907.

BRIGHT PROSPECTS FOR CANADIAN APPLES.

As the apple season approaches the information given in my previous reports as to the excellent market for Canadian fruit this season in the northeast of England

is confirmed in every respect, and I shall be only too pleased to assist those Canadian shippers who are new to this market, in bringing them into touch with suitable connections to do business with. It should be kept well in mind that local fruit salesmen are almost as anxious to become known to reliable Canadian shippers as the latter are to become connected with reputable importing firms on this side, even more so in some cases.

Canadian apples have attained such fame on the British market that if a shipper will only make arrangements with a local importer to send him regular shipments, and see that his fruit is kept up to standard throughout the whole season, he can rely on not only doing a full season's trade this year, but in years to come also. Let him, however, send fruit of an inferior quality to the 'grade' stated, and not only his own reputation, but the reputation of all Canadian apples is materially affected for some time to come in the estimation of this new importer.

HOW TO ESTABLISH TRADE RELATIONS.

A few instances have recently come under my notice where Canadians have entered into correspondence with local importers with a view to establishing trade relations, and matters have progressed favourably, until, just when the final arrangements were about to be made, they became 'chary' of entering into the contract. Local firms do not in any way blame them for this, as they fully realize that the greatest amount of care has to be exercised by a Canadian exporter in sending his apples to a firm four thousand miles away. In some cases, however, there has been an inclination to be just a little too careful, and the suggestion is frankly made by firms who have proffered the usual bank and commercial references that when these are not considered sufficient to convince them of their standing, they should not allow the matter to drop there and then, but should adopt another course altogether of utilizing the services of some reputable inquiry organization to secure the information independently. As one importer admirably expresses it:

'Canadian shippers must undertake a certain amount of risk in their dealings with firms on this side, in precisely the same way as that which the British manufacturer has to take in his trade with Canada.'

MARKET FOR PEARS.

In my previous report mention was made of the opportunities which await Canadian pear exporters for securing a ready market for this fruit, and the following hints should be of some value as to the method of packing now in vogue. To export pears, is, of course, a totally different thing to exporting apples. The former ripen in much quicker time than the latter, and for this reason they should be packed in a hard green condition to enable them to 'come up' during transit. When a pear is being packed for export it should always be remembered that it has to arrive here in such a condition that it obtains a ready sale, as it passes through the hands of the importer, the merchant, and the retail shopman, and, even after this, has also to be in a fit condition to please the actual consumer.

On the all important question of packing there is very little room for improvement in the French system, and Canadian exporters are advocated to adopt it. Under this system the fruit is packed two layers in a box, the usual quantities being as follows: 30 large sized pears, 48 medium sized pears, 56 smaller sized pears.

On account of their very soft nature it is advocated that each pear should be wrapped in tissue paper, as should any of the fruit happen to become too ripe during transit it absorbs the juice. In the case of exceptionally small pears, these, it may be mentioned, are shipped loose in crates and are usually sold by the pound. If tissue paper is not used for packing, a layer of wood fibre should be placed above and around each layer.

IMPORTANCE OF A NAME.

If Canadian exporters intend to seriously compete with other countries in supplying pears to the British market, it is essential that they should give their fruit some good 'selling name' by which it would be known by. French shippers, for instance, have adopted the names 'Duchess,' 'Williams,' 'Louiebourne,' 'Jargonells,' 'Boncues'; while from Ghent comes supplies of 'White Philips,' 'Grey Philips,' &c. As an appropriate name for Canadian pears, 'Choice Canadians,' or something similar would meet the case, and at the same time, would prove a very effective advertisement for this class of Canadian produce. In any case, the word 'Canadian' should, in some way or other, appear prominently on the box in order to distinguish the fruit from that grown in the United States.

THE EXPORT OF PEACHES.

Although, in view of their extremely delicate nature, the export of peaches from Canada to this country does not hold out the same possibilities as the apple and pear trade, still the following particulars may be of interest to those shippers who have had the enterprise under consideration. This fruit generally arrives here in sieves containing half a bushel, which fetch a price ranging from 96 cents to \$1.20. The usual course is simply to pack them loose and cover them with very fine wood fibre which is protected by four cross sticks fixed at various angles at the top of the sieve. Opinions are almost unanimously given, however, that nectarines are a much superior fruit to stand the transit from Canada. Not only are they described as being the equal to the peach in quality (being a cross between that fruit and the plum), but they are also said to keep twice as long as the peach. They are generally packed a dozen or fifteen to the box, each box fetching a price ranging from 24 to 30 cents.

NEW OPENINGS FOR TRADE.

The keen competition experienced in certain businesses is leading some local firms to branch out into an entirely new departure in trade, and Canadian exporters should follow these events closely, as by these unlooked for opportunities are opened up for the expansion of trade. Many large wholesale houses have begun an active competition with the fruit merchants in adding special departments to their stores for the sale of green fruit, whilst, in retaliation, as it would appear, the fruit merchants themselves are beginning to stock canned apples, pears, apricots and other fruits, which has always been looked upon as the *bona fide* business of the provision men. In this connection one well-known Ontario firm has already profited by the opening, and is doing a substantial trade in supplying canned fruits to the fruit merchants, who, in turn, dispose of them to hotels and restaurants.

THE IMPORTANCE OF HULL.

Now that there are direct services of steamers connecting Hull with Montreal, particular attention should be paid to this port as a market for Canadian fruit. Buyers from all parts of the northeast of England attend this market every week, and an estimation of its value can be formed from the fact that over 150,000 barrels of imported apples were sold here last year; some of the larger firms regularly disposing of between 5,000 and 10,000 barrels of apples per week. Australian fruit shippers have now the advantage of trading direct with this port, and Canadian shippers will have to look to their laurels if they are to maintain the lead. Below I append a list of the principal importers in a position to dispose of any class of fruit sent them by Canadian exporters:—

LEADING HULL FRUIT IMPORTERS.

A. Blyenburg, 73 Humber Street, Hull.
 J. Bradnum & Co., Ltd, 7-8 Humber Street, Hull.
 Thomas Bulman & Co., Humber Street, Hull.
 William Field & Co., Ltd., 65, 66, 67 High Street, Hull.
 Gibson Bishop & Co., Humber Dock Side, Hull.
 Richard Hinchcliffe, Humber Place, Hull.
 Julius Meyer's Succ'rs, 15 Humber Street, Hull.

GREAT BRITAIN.

REPORT OF THE CANADIAN HIGH COMMISSIONER.

(The Rt. Hon. Lord Strathcona, G.C.M.G., &c.)

17 VICTORIA STREET,

LONDON, S.W., August 13, 1907.

SIR,—I have the honour to transmit, herewith, the annual report on the commercial work of this department, for the year ending March 31, 1907.

It may be well, at the outset, to call attention to the facilities which are provided by this department to further Canadian commercial interests in the United Kingdom and on the Continent of Europe.

Complete records are maintained showing the Canadian firms in the various lines of business. Publications of all kinds relating to the affairs of the Dominion, such as Directories (of all the provinces), Lists of Manufacturers, Geological Reports, Dominion and Provincial Statutes, Blue Books, Trade Journals, Newspapers, &c., in short all works which are likely to serve a useful purpose, are available to those seeking information respecting Canadian matters, and are freely patronized by the commercial community in London.

A full supply of maps, charts, &c., &c., dealing with all the provinces and chief cities of the Dominion, is also available, and is much consulted by those interested in Canadian enterprises.

Every care is taken to keep our intelligence service abreast of the times, and pains are taken to see that the supply of the various works of reference, &c., are up to date.

There is an excellent reference library of books dealing with Canada, which is used by authors and journalists, as well as by the public generally.

The Chambers of Commerce, Public Libraries, and other institutions throughout the Kingdom, and the British Consulates on the continent are regularly furnished with information respecting Canada, such as will enable many inquiries to be replied to direct on the spot.

No opportunity is lost, when Canadian interests seem to demand, a communicating with the public press, or of obtaining full publicity through them on any special matters that may arise. The press is also well supplied with the periodical reports that are issued by the Dominion and the Provincial Governments.

Within the limits of this report it is obviously impracticable to record in full detail, or to set forth comprehensively the commercial work that is performed by this department. It will, however, doubtless be sufficient for it to be generally stated that care is taken to deal promptly and effectively with the multitudinous matters which go to make up the commercial work of this office.

It is gratifying to know that the efforts of this department to advance the commercial interests of the Dominion are greatly appreciated, and this is evidenced by communications which are received from time to time, and it may perhaps be permissible to quote a few of them:—

A manufacturer at Macclesfield wrote:—

‘I beg to thank you for your favour of the 5th instant. Several of the firms mentioned therein have written to me, and I thank you for the very practical interest you have taken.’

A correspondent in Ontario writes:—

‘I am very much pleased to note the promptness of your action and the interest you have taken with regard to the felspar proposition, of which I wrote you. I received

your communications, which are of great value. I am sure that your office must be invaluable in making business connections with the English market. Thanking you for your kindness, and assuring you that the prospects are fair for opening up business relations with some English firms, &c., &c.'

The following is an extract from a letter received from a correspondent in Lancashire:—

'I am very much obliged to you for the trouble and the introductions which you are bringing before our notice. These have already resulted in some very first-class mineral properties which we can deal with being placed before us direct from the gentlemen and firms to whom you have drawn our attention. We are in communication with these, and no doubt business which will be a direct advantage to the trade of the country will ensue.'

While dwelling on this phase of the commercial work, it may be as well to again draw attention to the practice which was originated in this department, of making public, through the British and Canadian press, brief particulars of such trade inquiries as are received. The number of these inquiries continues to grow, and the work undertaken in this connection has been fruitful in effecting useful trade introductions between Canadian and British traders.

During the year 1907 there has been a large and increasing stream of inquiry, both personally and by letter.

TRADE WITH GREAT BRITAIN.

For the year ending June 30, 1906, the aggregate trade between Great Britain was represented by a sum of \$202,289,527. For the same period, the agricultural products shipped to this country from Canada were valued at \$42,305,048; and under the heading of 'manufactures,' products valued at \$7,233,232 were similarly exported.

The showing in respecting of the export of agricultural products especially must be most gratifying to all in the United Kingdom and the Dominion alike. In 1868 the value of these exports to Great Britain and the United States was \$4,056,340 and \$8,136,017 respectively. This was the record of the Canadian export trade two years subsequent to the notice (May, 1866) which was given by the government of the United States of America of the termination of the Reciprocity Treaty. It may be briefly said that the effect of this action on the part of the United States was such that the then Canadian government declared 'it was impossible to express in figures the extent to which it had contributed to the wealth and prosperity of the country' and that 'it would be difficult to exaggerate the importance which the people of Canada attach to its continued enjoyment.' This will be realized when it is borne in mind that at that time the United States was Canada's chief market.

It is a notable achievement on the part of the government and people of the Dominion to so adapt themselves to the seriously altered circumstances caused by the loss of their chief market that in less than twenty years the returns show exports of agricultural products alone to have expanded to the huge total of \$42,305,048. For the purpose of comparison it may be stated that the exports for last year of agricultural products to the United States were of the value of \$5,779,964.

SYSTEM OF INSPECTION.

In regard to the agricultural products of Canada exported to Great Britain, it may be stated that a most effective 'watch' is maintained by officers of the Department of Agriculture. The chief inspector is Mr. A. W. Grindley, who is an efficient officer, and is stationed at Liverpool, and has had a long experience of the work. Acting under the immediate supervision of Mr. Grindley are:—

Mr. Thos. E. Davis, stationed in London.

Mr. H. E. Shallis, stationed in Bristol.

Mr. Wm. Carter, stationed in Liverpool.

Mr. J. A. Findlay, stationed in Glasgow.

These gentlemen have been employed at the ports stated in reporting regularly as to the condition in which Canadian cheese, butter, eggs, fruit, and agricultural products generally, have been landed from the various steamers, and in the case of some of the more perishable products they have reported upon the time that elapsed before the delivery was taken by the consignees, and upon any preventible delay, which might be prejudicial to the Canadian shipper. The work of the chief inspector and his staff as carried on by them is a valuable one.

QUALITY IN DAIRY PRODUCTS.

The evidence given at Ottawa by the Dairy Commissioner on the result of his visit to Europe—reprints of which were distributed in this country—has been frequently commented upon, and special commendation has been bestowed upon his remarks on the great importance that all Canadian produce exported should be of the highest quality. In this connection it has been stated by a competent authority, that: 'It is certainly the fact that some very large traders on this side are studiously dropping the practice of selling the main lines of produce under specific names. They are encouraging the public to rely on their grocer's judgment, rather than to depend on names of origin or brand names, which are both troublesome and dangerous. For instance, it is the practice with one of the largest firms of distributors never to sell butter as "Danish" or "Irish," but simply according to quality and price. From a retailer's point of view this refusal to be bound by names is entirely right. But the producers, like Canada or Ireland, Denmark or Holland, must note carefully the difference as regards the *trade* demand. The trade do not ignore these national names or brands, which are so often of real importance as a guide to quality. The moral is that the producers must take care to keep their special names before the trade, and leave the traders to look after the final destination and the public preferences. Let the Canadians attend to quality, and see that the trade here know the names and brands that stand for quality; and they need not trouble to ask whether the public here know it is "Canadian" they are buying when they get good bacon, cheese, eggs, butter, apples, or anything else.'

CANADIAN CHEESE.

The exports of Canadian cheese to Great Britain have reached the imposing quantity of 1,925,835 cwts. (112 pounds), valued at £5,634,288, as against 1,858,767 cwts. valued at £4,804,172 last year, and, as compared with £1,382,699, which was the value of the product exported in 1886.

The conditions in regard to this trade have been generally satisfactory, the quality of the product comparing favourably with similar products from other parts of the world.

Some large firms here have experienced difficulty in obtaining supplies, and have expressed their desire to get into touch with the producers. The cheese, it is stated by some, goes through too many hands before reaching the importer, and it is thought by them that Canadian producers might with advantage use the facilities that exist to enable them to trade direct rather than through agents and brokers.

CHEESE SHIPPED IN GREEN CONDITION.

The short-sighted policy—not to use a stronger term—of shipping Canadian cheese in an immature or green condition, cannot be too strongly condemned. That this practice has, during the current year, prevailed to a most regrettable extent, is evidenced by numerous communications that I have before me from the leading importers of this staple Canadian product. As I have been requested by several firms of standing to bring this matter as forcibly as possible to the attention of the Canadian shipper, I append quotations from some of the letters that I have received, in the hope that they will command the most serious attention, and have some effect in leading to the discontinuance of a practice which cannot but fail, if persisted in, to have a disastrous

effect upon a trade which has been built up by great care and expense on the part of the Canadian government and people.

'But this season cheese has been shipped exceptionally green, and the quantity of moisture therefore has been correspondingly great. Farmers see prices quoted on this side and do not pause to figure what the loss in weight often means per 112 lbs. Then later in the season it is still worse when they overlook cost of carrying charges, but it is the loss in weight that we are writing about here. We really do not see why the farmer should benefit to this great extent in being paid for moisture simply because the cheese are made in a different way, and that this extra moisture evaporates so quickly and so heavily. It is not so heavy on cheese made in Ingersoll district, but still even there the moisture is greater than it formerly was. There is a law here, as you are aware, that butter must not contain over 16 per cent of moisture, and we think farmers should allow for so much moisture in cheese according to the basis their cheese show from time to time. It is the importer who suffers, as when the cheese arrive here they are sold less the average loss that is found within 5 days from date of sale, and it is the first 10 or 15 days that show the heaviest loss. Moreover, this shrinkage is now increased in transit by the improved ventilation on steamers. The enormous loss can hardly be grasped unless figures were before one.'

'... The cheese at the commencement of the season was in our opinion shipped too young. This was doubtless owing to the scarcity of old cheese and the high prices ruling, but the fact of the cheese not being allowed properly to mature, being exposed to varying temperatures so soon after it has been made, prevents its acquiring the proper texture, or nice flavour. Attention is urgently necessitated to provision of cool chambers on all steamers carrying cheese, and we consider the Canadian government should insist on this provision. Large shipments of cheese arriving in August were much heated during the passage, and this not only entailed a heavy loss to the importers but adversely affected the sale of the product.'

'... Quality (with the exception of a few weeks hot weather) as a whole has been maintained, but not improved, the chief fault being the shipment ex factory of immatured cheese.'

'... But there is one very important factor which calls for adverse comment, that is, the green condition in which the goods have been exported. We are quite satisfied that such a condition of things will not lead to any particular increased consumption, and we should be glad if you would have this matter dealt with.'

'... The only particular criticism upon the shipment of Canadian cheese, we suggest is, that there is a tendency, owing to the market, to ship them too green, that is too soon after they are made.'

As to the boxing of cheese, complaints are not now very generally made, but as showing that the trouble has not been altogether got rid of I may quote the following remarks from a prominent importer in Bristol:—

'The boxes are altogether too frail for the heavy cheese now made, and it will materially assist the trade, and we believe increase consumption, if some improved method of boxing the cheese is adopted. A considerable portion is landed nowadays in broken boxes, and the cheese through exposure gets out of condition, which prejudices the sale.'

Some observations have also reached me respecting the use of wood boxes which has not been properly seasoned, and which has had a deleterious effect on some consignments of cheese.

Attention has been directed to the dangerous practice of placing notes in glass bottles in cheese. The act may appear to be quite inoffensive in itself, but it is likely to be fraught with danger to the consumer. Cases have arisen where a cheese has been cut, as usual, and a glass bottle in the middle has been broken, thereby damaging the value of the cheese itself and creating a serious risk to the purchaser. Importers and dealers condemn this objectionable practice and every effort ought to be made to put a stop to it. Fortunately the cases are not numerous.

In concluding these remarks on the cheese trade, I give a short extract from an article published in a Bristol journal, which is of interest:—

‘Since the Chicago scare, according to some authorities, more cheese has been consumed in this country. Although we are so close to the natural home of Cheddar cheese making, it is significant of our times that immense quantities of this commodity are each week landed at our wharfs from Canada. The United States produce has little vogue in the west of England, the Dominion Cheddar being more suited to the local palate.

‘There is, therefore, considerable interest in this part of the country and throughout the large area served by Bristol merchants in the capability of Canada to supply the demand made upon it. The prospects, from a buyer’s point of view, are not so favourable. Mr. Ruddick, Canadian dairy commissioner, who a year or more ago was taking stock of the facilities of the port for this trade, estimates that by reason of the curtailed milk supply, caused by drought, the output of Canadian cheese will be considerably less this year than last, but enhanced prices will more than make up the difference to the producer. The high prices ruling at the close of the season will, Mr. Ruddick believes, prove an incentive to greater activity next year in cheese-making.’

BUTTER.

The imports of Canadian butter into the United Kingdom for the year ending December 31 last amounted to 192,093 cwt., valued at £982,064. This is a falling off as compared with the two previous years, but the decrease is not attributable to any change of opinion in this country as to the quality; but rather to the home demand; indeed one of the leading firms of importers state that their experience showed that the quality of the best factories was quite equal to that of former years, although they consider it unfortunate that the proportion of factories making the highest quality is so small, adding that the reputation of ‘finest’ is greatly prejudiced by the number of small factories making irregular and poor quality. The British demand for the finest quality of butter grows steadily, but competition from all producing countries is constantly growing keener and Canada must not neglect any opportunity of improving the quality of her product if she desires the English market. The firm above mentioned recommend as a means to this end the compulsory adoption of pasteurizing in butter making, improved cool transit facilities from inland points to the sea-board, and the compulsory dating and branding of both butter and cheese. The last named they claim would have the effect of counteracting the ‘holding’ of goods for speculative purposes, all such ‘held’ butter and cheese being it is claimed detrimental to the reputation of the article.

Australia and New Zealand continue to carefully study the requirements of the English market and the production of high-class butter has received much attention in both these countries.

The imports from Denmark are, however, the greatest in bulk, and practically rule the market. Danish butter is a pale, mild, sweet butter, easily handled, containing from ten to fourteen per cent of water, but it does not possess the body and quality of the best grades of Australian box butters. Experts generally classify New Zealand butter made while the cows are on pasture as the best that comes from abroad.

Another correspondent makes a complaint regarding the boxing of butter stating that some of the boxes are too large, while others are not properly secured, and that the wood generally used is not of sufficient hardness to prevent the cases being broken, the consequence being that the butter is exposed to the air, thereby becoming stale, and out of condition. The same firm state that the wrapping paper used is not nearly as suitable as that used by Australian and New Zealand shippers, and further suggests that it would be a good plan if all butters were doubtly wrapped.

BUTTER LEGISLATION IN GREAT BRITAIN.

The Bill which is now before the legislature in this country is one which has aroused the greatest concern here not only among those associated with the agricul-

tural and dairying interests, but in the grocery and provision trades. It is also a measure that must be regarded as of the greatest importance to exporters of butter to Great Britain. It contains many provisions against adulteration, which have been long asked for from various quarters, and one of the most important is that relating to the water limit. One of the principal provisions of the Bill is that which limits the amount of water in pure butter, and what is sold as butter, to 16 per cent. It has long been felt that a limit should be fixed beyond which adulteration of butter with watery material should be prohibited.

While stringent precautions have been taken to prevent the quality of the milk sold to the public being below a certain standard, it has been felt that it is equally necessary that equivalent restrictions should be placed on butter, more especially as methods have comparatively recently been found for blending butter with milk so as to render it, while perfectly good and palatable, yet deficient in the proper nutritious properties. In the Bill the maximum quantity of water permitted to be put or retained in butter is 16 per cent, which maximum has been arrived at after careful investigation and analysis, as the limit. While this limit is imposed as the maximum of water in what is sold as butter a maximum of 24 per cent is permitted in butter substitutes, and objection is being raised to this provision in the Bill. As butter substitutes are not exported from Canada to this country it may appear that the matter is not of direct interest to Canadian exporters, but it is perhaps as well to indicate the position as the sale of butter substitutes is increasingly prejudicial to the sale of the pure Canadian article.

Before concluding these remarks on the butter trade I think it well to give the following particulars of a full-page advertisement which has been inserted in the *Grocer*, as showing the amount of interest evinced by the Dutch government in promoting the sale in the United Kingdom of butter produced in the Netherlands:—

NETHERLAND BUTTER.

AGRICULTURAL DEPARTMENT OF THE MINISTRY OF AGRICULTURE, INDUSTRY AND TRADE.

Butter bearing this mark genuineness by one of the supervision of the Netherland

**TRADE
MARK**

is controlled as to purity and Butter Control Stations under government.

A Pamphlet containing information on the subject and List of Members of the Butter Control Stations in the Netherlands can be obtained by applying to the Netherland Consulate General, 'Finsbury Circus House,' 12, Blomfield Street, London, E.C.

On behalf of the Director-General of Agriculture,

H. S. J. MAAS,

*Consul-General for the Netherlands
in Great Britain and Ireland.*

SELECT COMMITTEE ON THE BUTTER BILL.

A Select Committee of the House of Commons was appointed last year to look into the question of the proposed butter legislation, and I was requested to give evidence before the committee in regard to the attitude of Canada. I furnished the committee with a résumé of the legislation which has been passed by the Dominion parliament in reference to dairying. I also mentioned that, if the then proposed Bill were adopted, such legislation would be favourably regarded by the Canadian authorities. I also placed before the committee such facts as circumstances required.

BACON.

Bacon to the extent of 1,190,524 cwt., valued at £3,135,391, was imported into this country from Canada during the year ended December 31, 1906, as against 1,191,390

cwt. (112 lb.) valued at £2,751,714 in 1905. The export of bacon to Great Britain in 1886 was valued at £127,315.

One of the largest firms in the trade in London consider there is a danger as far as the English markets are concerned of Canadian bacon losing its prestige, owing mainly to the declining quantity available for export, and they assert that it is imperative on the part of the Canadian farmer to devote more of his time to the hog business than he has done for the last two years. They add 'It is undoubtedly one of the most profitable departments in farming. The hogs as soon as they mature can be sold for cash, and we have no doubt that if more attention was paid to this business we should see Canadian bacon again holding the place on English markets that it held two or three years back. If during the current year the quantity again decreases, we fear it will take many years of hard work to get the British retailer of provisions interested in the article.'

A west of England firm in the trade writes that the quality has been good on the whole, but that greater care is required in curing, as there have been many cases of taint. While aware that the public demand is for mild cured bacon they contend that during the extreme heat of summer it is better to err on the side of safety than to ship the bacon too fresh.

AUSTRALIAN EGGS IN GREAT BRITAIN.

Although the Canadian export trade in eggs has not attained very great dimensions and does not, owing to various reasons connected with local demand, show much tendency to increase it may be interesting to observe what steps are being taken to create a demand in Great Britain for Australian eggs. Owing to the increased production in South Australia, where the climate is said to be exceptionally suitable for poultry, it has become necessary to find new markets and the commercial agent of the government of that state has been visiting London in connection with experiments that have been made in preserving and shipping eggs to this market. This gentleman has stated in an interview:—'I am confident that when we have completed our arrangements we shall be able to place upon the London market eggs that are equal or superior to the millions of foreign eggs consumed annually in this country, and this, too, at a price which will bear comparison with the general market quotations. At the same time Australian producers will be fairly treated.'

An important firm at Bristol, who have had a large experience in importing Canadians dairy produce, inform me that neither the eggs shipped as 'Fresh' or 'Glycerined' were as good as formerly. They do not altogether attribute this to the shippers, but their impression is that the eggs must have been gathered too late in the season, and when the weather was warm. This firm further states that greater care should be taken in regard to packing eggs, and point out that any space left between the cardboard partitions of the case should be well filled up with dry, soft wood shavings.

PRESERVED EGGS.

The poultry section of the last Fat Stock Show at Birmingham included a class for preserved eggs. Two prizes were offered and there were eighteen competitors. Both awards were secured for exhibits preserved by means of water-glass. Other exhibits were preserved in water-glass and packed in bran in air-tight tins; rubbed with lard and salt and packed in peat mould; rubbed in fat and inclosed in box; coated with solution of gum arabic, packed in bran and soldered in tin box; brushed over with glycerine and packed in dry salt; rubbed with white of egg and put in water-glass.

CASEIN.

As in previous reports I have directed attention to casein as a product which might in the future be largely produced and exported from the Dominion it may be as well to again refer to this important product. It is only within the last few years that any extensive technical application of casein has occurred but its uses are now

highly diversified, and in the opinion of those best able to form judgment on the matter it appears that the field of application open to it is very considerable. Not only is it utilized as a foodstuff but as a painting material, mucilage and cement, a colour fixing medium in the textile industry, while in the paper-making trade it is of the utmost use in a dozen different ways. An excellent work on 'casein' its preparation and technical utilization has been prepared by a Mr. Robert Scherer, translated from the German by Mr. Chas. Salter and published by Scott, Greenwood & Co., 19, Ludgate Hill, London E.C., and as it contains much valuable information on the subject I make no apology for mentioning it for the benefit of persons in Canada who may be interested in such a treatise.

APPLES.

There has been a general complaint regarding the smallness of fruit received during the past season, and the quality generally does not appear to have been as good as usual. Several importers have pointed out that a quantity of rather inferior stock was shipped, and the advisability of packing number 3 grade has been questioned by them, the opinion being that apples of that quality should not be put into packages for general use, but should be consumed for cider-making or other purposes.

On the other hand some commendatory letters have been received regarding the packing of fruit suitable for the markets in the United Kingdom, the result having been that buyers here have more confidence in purchasing when they know that a brand is really 'genuine packed'.

Many consignments appear to have deteriorated through delay in forwarding owing, it is alleged, to scarcity of cars on the other side, and losses were consequently made through the fruit having been frozen, it is stated, while en route. This, however, is a matter which may naturally be expected to right itself.

The work of the Fruit Inspection Officers in Canada appears to be giving great satisfaction to importers on this side, from the fact that persons attending sales are gaining a confidence in the inspection. In instances where one barrel out of every twenty is turned out for examination by the importers' customers, it can readily be understood that the importing firms are in a good position to judge if the inspection work has been satisfactorily carried on, and I have received most satisfactory and eulogistic testimony to the effectiveness of the inspection from reliable sources.

With regard to the respective merits of barrels and boxes, there seems to be a consensus of opinion among the largest importers in such centres as London, Liverpool and Glasgow in favour of the barrel, although I believe at certain inland points boxes are preferred. Most of the important firms, although admitting that boxes are suitable for fancy fruit which is carefully packed, assert in the most positive manner that the extra cost of the boxes is not obtainable for the ordinary run of apples intended for general consumption. Then again the barrel is more easily handled, and appears to be regarded as the most suitable package, which it will be difficult to supplant. Notwithstanding this, it seems at least probable that the interests of the Canadian shipper may lie in sending the fruit forward in boxes. This question appeared to be of sufficient importance to warrant that I should invite an expression of opinion upon it from the trade. The following are some of the replies which I received. They emanate from the largest importers and brokers:—

'It is still freely recognized that the barrel is the most suitable package and we are of opinion it will be difficult to supplant. Cases are certainly a handy package and will gradually have an increasing demand, as at certain seasons there is always a considerable quantity of this package required, but it will never oust the barrel. All the same, we would recommend that shippers should have at least a fourth cases for three-fourths barrels. With cases there should be a law established that they should contain at least fifty pounds net of apples. There are not many of them contain that quantity, generally several pounds under it. Now this is misleading. There should be a standard weight for cases as well as barrels.'

'We would strongly recommend shippers to avoid packing apples in boxes other

than fancy quality, and it is necessary to pack them with great care to avoid bruising. They are wanted for high class family trade only, and unless they are carefully selected and arrive here in first-class condition, they are likely to bring no better prices than barrels, probably less. The barrels are quite a convenient and suitable package for the ordinary retail trade, and there is no doubt that a very large percentage of the fruit is sold loose by the retailers.'

'As regards the relative merits of barrels and cases for shipping apples, we see no reason to change our opinion that the barrel package is so well known and appreciated over here that it satisfactorily fulfils all reasonable requirements. It is difficult to get the fruit carried so well in cases, whilst there is at once the fatal objection of extra cost.'

'The customers are not at all in favour of the employment of cases, and greatly prefer the barrels. It is only for very high-class apples, such as Californian and Oregon Newtown Pippins, that the cases are suitable.'

'We prefer barrels to cases for apples, as we find them more satisfactorily handled and better liked by our buyers.'

'Regarding the merit of barrels and boxes. The former in our opinion are without doubt the more serviceable package for the general run of apples grown in Ontario and Nova Scotia, but for fancy fruit such as that grown in British Columbia, boxes are preferable as the fruit runs more evenly in size and can be graded to pack evenly.'

'With regard to the merits of barrels and cases respectively, we have always held that the Canadian apple shipper will not receive a price for apples, packed in cases, proportionate to the increased cost of this package as compared with barrels, and nothing has recently transpired which would lead us to change that opinion.'

'With regard to cases as against barrels, the latter are preferable, the extra cost of the former not being obtainable except for very fancy fruit, and generally the value of ordinary varieties does not admit of this expense.'

'As regards respective merits of barrels and cases for shipment of apples, we are inclined to be conservative in our views and stick to the barrel in preference to the case, since most buyers we find are able to take the quantity which the barrel provides quite readily, and the boxes to them are somewhat of a nuisance.'

'We strongly favour the smaller package (the case) which should be made to carry a standard weight of not more than 40 pounds fruit. It is perfectly certain that a great deal of the waste and damage is caused by the heavy weight of fruit in the barrels, which owing to their bulkiness receive very rough treatment by carriers generally. The extra cost (if any) of packing the fruit in boxes would more than be repaid to shippers, by the better prices their fruit would make owing to being in sound condition. We suggest also that the better varieties should be paper wrapped in the same manner as Tasmanian fruit.'

'With reference to the style of package used, we don't think that there can be any improvement on the ordinary barrel. We consider the best method of packing is in flat hooped barrels with a corrugated pulp head at top and bottom. We consider these pulp heads are the best thing to use, and we are sorry they are not more in favour. Of course for certain apples from California, Oregon and the Australian colonies cases are the best for packing, but for Ontario and Nova Scotian apples the barrel is the right package.'

A well-known firm of importers in the west of England have intimated to me that there is room for a considerable increase in shipments of apples to their market. Great quantities of fruit have to be brought there coastwise or by rail from Liverpool in spite of the fact that there is a regular line of steamers between Bristol and Canada. This firm favour the case as compared with the barrel as they claim that waste and damage are caused by the heavy weight of fruit in the barrels. They consider that any extra cost of packing the fruit in cases would be more than repaid to shippers by the better prices obtainable for fruit in sound condition. It is suggested that the better varieties should be paper wrapped in the same manner as fruit from Tasmania. My correspondents say that there is an increasing disinclination among the growers

in Canada to send fruit on consignment, and with a few exceptions, all seem to desire to sell outright. Owing to the great risk entailed in handling apples, buyers on this side hesitate to purchase and from the condition of some arrivals there has been cause for that feeling.

INSPECTION OF APPLES.

A Liverpool paper in giving for the benefit of its readers a summary of the provisions of the Canadian Fruit Marks Act, points out that if the regulations are observed apples from Canada will earn a reputation for guaranteed uniformity which should ensure their preference on this side of the Atlantic. It is added that the inspectors appointed to see that the law is obeyed discharge their duties with thoroughness and care. Attention, however, is drawn to certain infractions on the part of shippers, one case being where the marks on barrels were altered, thereby incurring loss to the firm when the apples reached Liverpool. It is further stated that a common method of improper packing is to 'face' the top and even the bottom of a barrel with good attractive-looking fruit and to put bad stuff in the middle, one firm who ship to Liverpool having been convicted six times in twelve months and fined for violation of the regulations. The journal points out that if the Act is amended it would be as well to so increase the penalties that the fraudulent trader would in no case find it to his advantage to break the law and pay the fine rather than adhere to the standard. It is further stated that 'Under present conditions, the most effective deterrent would be the publication, both in Canada and in this country, of the names of firms who violate the Act. The importer and buyers would then know, at least, which firms not to patronize. The overwhelming majority of Canadian exporters to this country are "square" dealers, but their fruit is subjected to the same form or rigid inspection because of the acts of evildoers. Still, their own reputation, coupled with the guarantee of the government, should establish for them a name in the markets of the world likely to increase the volume of their business.'

EXHIBITION OF APPLES.

Some excellent specimens of apples grown in British Columbia were exhibited on the occasion of the Smithfield Club's last Annual Cattle Show at the Royal Agricultural Hall, and H.R.H. The Prince of Wales when inspecting the exhibits expressed his admiration of their appearance. The exhibitor on hearing of this intimated to me his desire to offer a case of the fruit for the acceptance of His Royal Highness, and I was much pleased of course, as a special thing, to be the medium of transmitting it to Sandringham for the Prince's acceptance.

In my last report I made a reference to the shows of colonial grown fruit held under the auspices of the Royal Horticultural Society at their hall in Westminster. I am glad to say that the third annual display of the kind was given in December last when excellent collections of different varieties of apples from Nova Scotia and British Columbia were on view. The notice attracted by these exhibits in the press was very gratifying, and the few characteristic extracts quoted below will doubtless be read with interest :—

Times.—'The apples from British Columbia were a wonderful collection. The certainty of a season of prolonged sunshine makes the yearly harvest invariable, now that the wise measures of the British Columbia government have successfully banished most of the apple pests. They have never had to contend with the codling moth, a well-known enemy here, and the diseases which were increasing through the stock imported from the United States have nearly been stamped out by a strict system of inspection . . . Certainly the fruit sent over for this exhibition was of the highest quality and most healthy. There is such an immense market for these apples in Canada that only especially beautiful fruit which would command a high price is likely to come to this country.'

Standard.—'Such a show as may be seen there is likely to encourage many to venture out to Canada or the West Indies to try their hand at what promises to become

- a really profitable industry. The most casual observer at the exhibition could hardly fail to realize that before long Great Britain would be able to rely on her colonies for her entire supply of fruit, and that the supply will be of a fine quality. The various kinds of apples from British Columbia are splendid specimens, proving conclusively how successful have been the experiments as to the varieties best suited to the different districts.'

Daily Telegraph.—'Much the largest display is made by British Columbia, where the cultivation of orchards, and especially the sorting and official branding of apples for export, has given the industry a standing which other colonies are enviously noting with a view to following so excellent an example. The Columbia apples at the exhibition have travelled 5,000 miles for the occasion, and are as bright and sound as any one could wish, with a result that one of the society's gold medals went to them yesterday. Nova Scotia shared honours in this direction with its sister state, receiving from the judges a silver-gilt Knightian medal for a smaller but admirable display.'

Daily Chronicle.—'An interesting exhibition is taking place in the hall of the Royal Horticultural Society in Vincent Square—the annual display of fruit from the colonies. Perhaps the most striking exhibit is that from British Columbia, displayed in cases just as they arrived. The colour of the fruit is superb, especially that of the varieties Northern Spy, Jonathan, Spitzbergen and Golden Russet.'

Pall Mall Gazette.—'Finer fruit is not to be seen in the world, and very little as fine. The fancy for red and purple varieties is still notable, and for show, at least, is much to be commended. One who has an eye for colour finds it cheering to look down the long rows of cases, brilliant with gold and scarlet and maroon, which occupy the whole width of the hall.

'The government of Nova Scotia also supplies apples and pears of excellent quality.'

Another display of Canadian apples was that made by the government of Nova Scotia at the Crystal Palace, just previously to the exhibition above referred to, and the appearance of the fruit fully maintained the reputation of the province as an apple-producing country.

A firm who claim to have handled all the principal British Columbian shipments of apples during the season state that the fruit was of unusual quality, being the finest that has ever been seen in this country, and that it realized record prices.

NUTRITIVE PROPERTIES OF FROZEN BEEF, MUTTON AND CHILLED BEEF.

In view of the wide divergence between the prices of frozen and fresh-killed meats in the United Kingdom, Messrs. W. Weddell & Company, the well-known firm of produce imports of 16, St. Helen's Place, London, E.C., commissioned Dr. Samuel Rideal, the public analyst of Chelsea, to make a scientific investigation into the nutritive and digestive properties of frozen beef, mutton and lamb, and chilled beef, comparing frozen beef and chilled beef with English beef; frozen mutton with English mutton, and frozen lamb with Welsh lamb. The report itself is too lengthy to give here in its entirety, but as the subject is of much interest, some of the conclusions arrived at by Messrs. Weddell & Co., in their preface to the published document, as the result of Dr. Rideal's findings, may be mentioned with advantage.

It is pointed out that when (in 1880) frozen meat was first imported into this country, there was naturally a good deal of prejudice against its use, mainly owing to the conservatism of the public which placed at a discount any produce not actually home-grown, and also to the belief that the process of preserving by refrigeration reduced in some way the food value of frozen meat. This prejudice was, however, based upon grounds which have since proved to be entirely untenable. The best scientific evidence has from time to time convincingly shown that as regards both nourishment and digestibility frozen meat is practically equal to fresh killed. In 1896, Dr. Rideal, the well-known London analyst, in his comparative analysis of fresh killed and refrigerated meats, subjected frozen beef and mutton to very severe micros-

copical and analytical tests, as a result of which he was not able to discover any material difference between the food values of the two descriptions.

Further improvements having brought refrigeration almost to perfection, from the sellers point of view. The satisfactory condition in which the great bulk of frozen meat is now marketed is such as amply to meet the views of even the most fastidious. But the best and most practical proof of the acceptability of frozen meat is to be found in the steady increase in the demand throughout the country. This demand has kept pace with the rapid growth of supplies, which have increased it is stated from 72,553 tons in 1890 to 308,059 tons in 1906, while during the same period the supply of home-fed beef and mutton has remained stationary.

Having regard to the foregoing, it is very apparent that the wide divergence between prices of frozen and fresh-killed meats is not justified by a corresponding difference in the intrinsic values of the two descriptions. In proportion to the prices demanded for home-killed meat, the market values of frozen beef, mutton and lamb are decidedly low, and this position can be partially accounted for only by the survival of those old prejudices, which die hard. With a view to their complete removal, further tests comparing frozen with home-killed meats have just been made by the same expert, and the details contained in the report by Dr. Rideal speak for themselves. They prove again that pound for pound the food value of frozen and chilled meat is equal to that of fresh-killed, and therefore, to those consumers to whom cheap food is a desideratum, the advantage of having the cheaper frozen and chilled meats available should be distinctly beneficial.

CONTRACTS FOR PRESERVED MEATS.

At the request of a Canadian canning company interested in packing meat for export I was recently instrumental in securing their being placed on the list of those from whom tenders are invited from time to time by the War Office. For the information of any who may desire to obtain similar treatment it should be mentioned that no good purpose is served in such cases by simply making a demand to be placed on the list. The authorities first require to be entirely satisfied that tenderers are in a position to carry out any contracts with which they may enter, to receive adequate samples for testing purposes, and to be furnished with the names of responsible resident agents in Great Britain who can expeditiously carry out the requisite steps in regard to the delivery of supplies, &c., as may be desired by the authorities.

GRAIN TRADE.

The International Conference on the subject of American certificates was held in London in November last, and one of the leading speakers (speaking in quite a representative capacity for the London Corn Trade Association) made a reference to the question of Canadian grain inspection. I venture to give a quotation from his remarks which are distinctly satisfactory to the Dominion:—

‘In justice to our colony, Canada, and especially the province of Manitoba, we should put on record that in view of the increasing quantities of grain exported, there is very little to be complained of. I have had the pleasure myself to see the whole of that inspection, and I must say that if human foresight can devise a scheme of perfection, it is realized in Manitoba. The inspectors there are appointed by the government, not by local authorities, and the inspector is removable by the government should any abuse be proved, and it is as closely as we can term it, an ideal way of dealing with the subject.’

In the same connection the following extract from a market report issued not long ago by one of the leading firms in the corn trade must also be given:—

‘Manitoba wheats have maintained former values. At the Importers’ Conference held here last week, gratifying references were made to the satisfactory method of Dominion inspection; and in the relatively high prices commanded by Manitoba des-

criptions and the confidence felt by the trade in the regularity of shipments, the Canadian authorities have their reward.'

HAY.

The following extracts from an article contributed to the 'Bazaar' recently on the subject of Canadian hay imported into Great Britain will no doubt be of interest:—

'During last year the importation of Canadian hay amounted to slightly over 43,000 tons, which quantity represented 37 per cent of our total hay imports in 1905. Canadian hay is used mainly in towns for horse-feeding purposes, being fed to cart-horses and light draught horses, such as vanners, 'bus and tram horses. Most of it is composed of a mixture of grasses and red clover. The largest proportion of the grasses consists of timothy. The hay is usually coarser than most English grown "seeds" hay or mixture. It is generally found to be palatable to the horses, and makes a very useful feed for heavy and light draught horses, as well as for cobs and ponies. Consisting as it does of a large proportion of clover, it is not really suitable for feeding to horses of the light class which are worked at fast paces. . . . Canadian hay containing a large proportion of clover may therefore very well be fed to both heavy and light draught horses and to ponies, and practical experience proves that it is a most suitable and useful kind of hay for horses of these classes, answering satisfactorily and well in every respect.

'The quality of imported Canadian hay naturally varies somewhat in different samples. Usually, however, it is found to be of good and satisfactory quality, although oftentimes it is rather stemmy and hard. Most horses do not object to such hard hay; in fact many show a decided preference for such to hay of softer and less stemmy character. Horses are found to thrive well when they are supplied with Canadian hay, provided it is in sound condition. It should be pointed out in this connection that not infrequently some trusses or bales of Canadian hay open out badly, being decidedly unsound inside as the result of having been damaged more or less badly during transit by sea-water. Such damaged hay is hardly fit for horse-feeding. In some cases the hay has been badly saved, or it has become damp whilst stored; such also is unsound, being mouldy or musty. The clover in the hay in particular is oftentimes found to be mouldy, as clover hay is more liable to develop mouldiness than the grasses. The Canadian hay is done up in pressed, large-sized trusses or bales, which weigh somewhere about a couple of hundred-weight.'

THE CANADIAN GRAIN COMMISSION.

It recently afforded me great pleasure to welcome to this country the chairman and members of the Royal Commission on the Canadian Grain Trade, a body of gentlemen truly representative of the great agricultural interests of Canada. These gentlemen created a most favourable impression wherever they went, and I am sure it would be impossible to find gentlemen better equipped for their mission, and having more deeply at heart the interests of the Canadian farmer than the members of this important commission.

When they arrived at Liverpool, they were met and entertained by the officers of the Liverpool Corn Trade Association; and subsequently I had the pleasure of receiving the commission in London, and of placing before them a number of communications which I had received from the various grain centres which were desirous of their presence.

At the same interview, a definite programme was arranged, and ultimately these gentlemen visited Bristol, Cardiff, Glasgow, Leith, Hull, Manchester, Dublin and Exeter, at all of which places sittings were held, and most important evidence was elicited.

It will not be necessary to dwell at length upon these meetings, as full reports have appeared in the public press.

WOOD PULP.

An expert in this trade writing to the *Wood Pulp Maker* (Supplement to the *Paper-Maker*) prophesies that market values for the produce on this side will be maintained. He estimates the world's entire paper production at present at six million tons—Europe contributing 3,000,000, the United States 2,500,000, and Canada 500,000, of which 75 per cent are wood papers.

Speaking of Canada in particular he states:—

‘Considering the extra new tonnage of sulphite successively brought on the market, it must be remembered that owing to conditions Canada is to a large extent, since the end of last year, out of the transatlantic export market. Speaking strictly of ground wood, as an instance, the Chicoutimi Pulp Company has been a large exporter of this product to Europe. But now the various mills in Canada owing (a) first to water drought, and a little later (b) owing to the difficulty of getting wood, furthermore (c) an acute shortage of the same, and finally (d) several fires (crippling two or three mills) are now far behind in their original tonnage of production.’

‘The conditions prevailing in Canada to curtail the production have also prevailed in an identical way in the States. There are no stocks of pulps in either of these two countries, in addition to which it must be remembered that the United States to a large extent is dependent upon Canada for its supply of pulp wood, and, nevertheless, nearly 150,000 tons of manufactured wood pulp are being imported from that country yearly.

‘The prices for Canadian goods have been so high, however, that the United States has been forced to turn to Europe for a good amount of pulp. It must also be taken into consideration that it will take some time before the depleted stocks of pulp in the States and Canada can be replenished, and this I consider one of the most important points to support the European market.’

The present short supply of pulp and paper is causing apprehension among the larger publishing concerns in this country, and higher prices for this commodities are looked for.

ARMY REMOUNTS

Attention has again been drawn to the press of this country to the question of the provision of remounts for the army and the subject of formulating a project for colonial supplies discussed. One serious aspect of the case from the army point of view is that, whereas the authorities have relied on the omnibus companies to provide them with a reserve of horses in the event of an outbreak of war, this source of supply is becoming somewhat precarious in view of the rapid disappearance of horsed omnibuses. It is many years since horseflesh has commanded such high prices as at present.

NEW CUSTOMS TARIFF.

A large amount of interest has naturally been shown by the commercial community here in regard to the provisions of the new tariff, and much correspondence with my department consequently ensued.

COMMERCIAL COURTESY.

It is sometimes charged by British traders that Canadian business men are remiss in their methods of correspondence, and that it is difficult to elicit prompt replies from them. This charge I cannot think to be well founded, but the following letter from a correspondent in Amsterdam certainly lends colour to the complaint:—

‘You were so kind as to send me a little book with addresses of Canadian exporters and I wrote a letter to every one of the 22 firms named under the heading Evaporated apple Cores and Skins, in order to get into relation with a reliable sun-dried apple packer, stating at the same time first rate American references; and only two firms replied, who were represented. Is it not queer, that for all the twenty remain-

ing firms, it was not worth while even to reply, in a matter which must doubtless interest them.

‘Whenever you come across a reliable packer of Canadian sun-dried apples in the State of Ontario, please keep my firm in mind and oblige.’

CANADIAN TRADE STATISTICS.

The large supply of the most valuable annual report of your department which you place at my disposal is widely appreciated. The monthly reports issued by your department, which reach me regularly, are also looked for eagerly.

Several applications for up-to-date lists of Canadian manufacturers have also come to hand, and I need hardly say that whenever such works of reference are available they can always be distributed with good effect by this department.

CONCLUSION.

The prosperity of the United Kingdom is shown by the trade returns to be increasing month by month. As the result, the great consumers of Canadian products, the working classes, have enjoyed a full measure of employment, and at present there is no indication of any change in these conditions. It may be stated, in conclusion, however, that the working classes of England are becoming more and more fastidious in regard to food products, and that the authorities are imposing greater precautions to ensure the admission of only high-class products in first-class condition. It therefore behoves those countries like Canada seeking the great British market to adopt the utmost care and circumspection in regard to the quality of the products intended for the British Isles.

I am, Sir,

Your obedient servant,

STRATHCONA,

High Commissioner.

NEWFOUNDLAND.

REPORT OF COMMERCIAL AGENT.

(*Mr. E. D. Arnaud.*)

GAZETTE BUILDING, ST. JOHN'S, August 13, 1907.

NEW LOCAL BANK.

A new local bank is being promoted here to be styled the National Bank of Newfoundland. A prospectus has been prepared and stock subscriptions are now being taken up. It is proposed to start with an authorized capital of \$2,000,000 of which one half is to be paid up.

It is reported that the colonial government intends to transact all government business with this local bank as soon as the necessary charter is obtained and it is able to begin operations the promoters having obtained the promise of this support. It is understood that no difficulty is likely to be experienced in obtaining all the capital that will be necessary to assure the opening of the new institution in the course of a few months.

COAL.

A local trade journal reports that some valuable coal properties at St. Georges bay on the west coast of this colony have been optioned to a London syndicate with a view to an early development and working of the areas. Until recently owing to the interference arising from the French shore treaty it has not been found possible to attract the attention of capitalists to these properties.

COD FISH.

Since writing on the above subject in my report of July 8 last the situation appears to be somewhat improved and it is generally believed that when the total result of the fishery is made known at the end of the season it will be found to be a fair average. The shortage in the catch so far has been mainly on the northern Labrador coast where the ice until recently greatly interfered with the operations of the fishermen. In the straits and on many portions of the coast of Newfoundland the fishing has been very successful and the few parcels of new codfish that have been brought to market have realized excellent prices.

The quotations at present for large merchantable are \$6.50 and for small merchantable are \$5.50 per quintal with a good prospect of these prices being maintained for some time to come.

E. D. ARNAUD.

JAPAN.

REPORT OF COMMERCIAL AGENT.

(*Mr. Alexander MacLean.*)

No. 14, BUND, ROOM B., YOKOHAMA, July 30, 1907.

EXPORTS TO CANADA.

The following is a comparative statement of the value of some of the principal items of export and import, between Japan and Canada, for the six months ending June 30, of the present and previous year, as shown by the official monthly return:—

	1907. Value. Yen.	1906. Value. Yen.
Silk, raw.		56,472
Silk tissues, habutai.	249,841	291,425
Silk handkerchiefs.	63,045	84,869
Cotton tissues.	3,581	4,494
Mats and mattings for floor.	82,683	44,496
Porcelain and earthen-ware.	123,333	79,128
Lacquered-ware.	11,704	9,233
Tea.	206,333	229,203
Rice.	268,467	161,686
Sake.	25,616	14,107
Straw-plaits and chipbraids.	1,099	3,887
Camphor.	2,777	12,083

IMPORTS FROM CANADA.

	1907. Value. Yen.	1906. Value. Yen.
Flour, wheat.	129,425	85,215
(1 yen = 50 cents.)		

The principal items given in the monthly return number only twenty-five of imports and twenty-five of exports. For information respecting the lesser and numerous items making up the aggregate of trade the annual return has to be awaited.

TOTAL IMPORTS.			TOTAL EXPORTS.		
June, 1907, Value.	Six months ending June 30.		June, 1907, Value.	Six months ending June 30.	
	1907, Value.	1906, Value.		1907, Value.	1906, Value.
\$	\$	\$	\$	\$	\$
20,588,603	132,631,954	111,524,781	16,933,863	98,475,101	88,335,359

The idea, quite widely entertained, that the trade of the country is affected by general debility is not sustained by the trade returns. Going back to the third year, the corresponding half of 1905 gave imports at \$143,231,431; and exports at \$71,883,977. This was a war half-year, and the imports were abnormal; but the gross trade of each of the three half-years—

1905.	\$214,615,408
1906.	199,860,140
1907.	231,107,055

shows a healthy progressiveness.

THE RICE CROP.

This year's rice crop promises well. The ample quantity of rain since first sowing has greatly favoured the growth of the plant. No appearance of parasites has been reported. The Doyo, or Japanese 'dog days' season set in favourably and is continuing. The weather on the opening day of the season proverbially has a very important bearing upon the success of the rice harvest; farmers are therefore very much gratified. It is reported that the growth of paddy in all parts of the empire is satisfactory up to the present. There have been cases of inundation, but the districts which have suffered are, comparatively speaking, but small in area. Crop reports to date say in effect that the favourable weather has affected the market, and prices show a downward tendency.

THE HIGH PRICE OF RICE.

The exorbitant market price of rice which has been ruling of late, says the *Kobe Chronicle*, is attracting the attention of both the authorities and the public. It is not regarded as a legitimate feature of the trade but rather as the effect of an attempt to corner the market. A good deal of distress has been caused by this movement, with the result that the Department of Agriculture and Commerce has decided to warn the directors of Rice Exchanges, and to take measures to suppress the rice 'corner'.

should the present conditions continue. In an interesting article the *Osaka Shimpō* (news report) observes that the rice market has continued to rise steadily since last spring, often reaching as high a point as \$9 on the Tokyo Rice Exchange. Authorities generally agree that the normal price of rice should be \$6.50 or \$7 per koku (5 bushels) and that the present market is excessively high.

It would appear that the speculative operators so manipulate the market as to create a high price when the farmers have to buy, and a low price when they have to sell. The Japanese farmer sells his own-grown rice, which is of high quality, for export, and buys inferior imported rice for his own consumption. But developments in the Rice Exchanges of Tokyo and Osaka have resulted in the intervention of the police and examination of the books of some of the rice brokers, the outcome of which is a state of panic amongst the speculative fraternity. The interposition of the authorities, with the excellent rice weather prevailing lately, may break down artificial values, and should assure the rice importer in foreign countries that it will be well to wait until the market settles.

INCIDENTS OF THE RICE TRADE.

An interesting story of the business recourses and methods of the Chinese is published in a vernacular contemporary.

It has been found that rice imported into Japan is produced chiefly in Korea, China, and Indo-China; and the Chinese and Indo-China rice is called Nankin rice in Japan because the trade is almost entirely monopolized by Chinese merchants. The farmers in Indo-China are generally poor, thriftless, and fond of gambling. Taking advantage of those weaknesses, the Chinese merchants contract to purchase the rice some time before harvest, and advance half the amount of the estimated value. At the same time they open gambling-houses, and recover the greater portion of the money advanced. Under these circumstances, the farmers can sell their rice only to the Chinese contractors, who charter steamers at a low rate for a term, and send the rice out to Japan very cheaply. The Japanese and European merchants, who know of the profitable nature of the rice trade in Indo-China, it is alleged, cannot get a share of this business.

In years of short crop in Japan the value of rice imported has amounted to very large figures, given at from \$30,000,000 to \$35,000,000, which doubtless affords a broad margin of profit for the enterprising holders of this peculiar monopoly.

CONDENSED MILK.

The importation of condensed milk is a growing branch of trade. There are several companies in Canada interested in the preparation of condensed milk, evaporated cream, and like products. At any rate they professed to be interested in the exportation of these things whilst the duty imposed by the Japanese customs was prohibitory. A year ago the Most Favoured Nation Treaty terms were made applicable between Canada and Japan, thus admitting condensed milk from Canada at the same rate as from competing countries.

Since the opportunity has come to the condensed milk manufacturers, and although they were duly notified of the improved situation, there has not been one inquiry in this line from Canada for marketing connections in Japan. One company, under date July 5, says 'the demand for our product at home is greater than the supply.' The attending circumstances indicate that interest in this market, on the part of Canadian manufacturers of condensed milk and analogous products, has ceased since the conditions were so improved as to enable them to promote especially that particular interest. This disappointing result of improved tariff facilities naturally suggested a cause, and inquiry for it. Of course there is the demand for home consumption; but the information is that there is a combination, or an under-

standing punctilliously honoured between the parties to it, under which the Canadian interest does not appear in this market.

If this information is correct, a point upon which I have at present no doubt, the inquiry as to whether this is not a combination unlawfully in restraint of trade may be in order.

THE FORMOSAN CAMPHOR MONOPOLY.

The Japanese, as an international trader, or commercial factor, is a comparatively new element; but he is old enough to dearly appreciate a monopoly. The salt monopoly, the tobacco monopoly, the currency monopoly, the railway monopoly, the camphor monopoly, and the telegraph and telephone monopoly, actually; and the sugar monopoly, the match monopoly, and others, talked about prospectively,—these all realized, there will remain for private enterprise (the greatest element in the national fabric) only the handling of the byproducts of the national-industrial machine.

The camphor monopoly is a very important one, held for a term of years past by the commercial house of Samuel Samuel & Co., of London and the Far East. But the term expires within a year; and in view of that incident an extensive sugar refining company is reported by the newspapers to have sold out to a more extensive competitor for the sum of \$3,250,000, with the intention, openly stated by the press, of 'obtaining the Formosan camphor monopoly when the term for which it is held by Samuel Samuel & Co., will expire.' A portion of the sum derived from the sale of the sugar refinery would be employed as the 'guarantee required by the government in the event of the monopoly being secured.' All of which may be fair notice to the firm whose term is expiring.

The many purposes to which camphor is now put, as well as the monopoly of production and sale enjoyed by Japan, is a circumstance that accounts for the extraordinary increase in value attained in recent years. Monopoly alone may not have advanced the price; but it is reasonably certain to maintain it, therefore it would seem to be unlikely that we shall see camphor again much below present value, which is nearly ten times what it was within easy recollection. German genius is said to be devoting its energies to the discovery of a substitute, or artificial camphor; and there are Yankees calculating that they can grow in Florida, in Texas, in Hawaii, or in the Philippines, anything that can be grown in Formosa, or any country that is less hot than Hades.

A flour monopoly for Manchuria, of which the great mills at Harbin are to be the centre around which all others will circumambulate, is on the tapis.

COAL TRADE BETWEEN CANADA AND JAPAN.

When I passed through Vancouver three years ago, en route to Japan, the excellent quality, the unlimited quantity, and the preparedness to enter upon the export of Comox coal, were placed before me in a highly favourable light.

In a late number the *Vancouver World* relates an interview with a coal expert, in which the British Columbia coal situation is made to appear high up amongst the possibilities of the future, but very greatly delinquent as to the necessities of the present. The interview says 'we see here ships from Japan delivering thousands of tons of coal and coke, and our inhabitants shivering in the winter for want of fuel, and that with proved but unworked coal fields lying within a hundred miles, as the crow flies,—which is not complimentary to our business enterprise and our purpose to found a great city.'

To further illustrate the coal situation, it may be relevant to say that an inquiry through this office, from British Columbia, for twenty thousand tons of coal, presents an opportunity that so far is declined by some of the greatest coal producers in Japan, without offering a price; and it is likely not to be undertaken. The 'ships from Japan delivering thousands of tons of coal and coke' at British Columbia ports, as

the off-hand sketch of an artist, is very good but rather misleading. In that way a mere incident is put in such a light that the public discover a great international traffic, only to see it dissolve as a mirage before the statistical returns at the end of the year, with disappointment to everybody.

There is coal in unbounded quantity in British Columbia and in Japan. It is true in the olden time there was such a thing as carrying corn to Egypt; but the absurdity of doing so became proverbial when the distance was much less than the four thousand, five hundred miles across the Pacific. That there has been coal transported from Japan to Canada within the last six months is correct, but merely by way of precaution against the consequences of a strike amongst the coal miners in western Canada. The coal mining statistics are not up to date, but current newspaper paragraphs say that the total annual output of coal in Japan is 13,000,000 tons, of which 11,000,000 tons are placed on the market; but the output is by no means sufficient to meet the ever-growing demand.

MANCHURIAN FLOUR. MILLING.

Upon the principle of the far-away bird and the fine feathers somewhat extravagant representations of the flour-milling probabilities in Manchuria become the more resplendent as expanding distance lends enchantment. But there is nothing in it that should deter the Alberta and British Columbia farmers from going right ahead, confident that they can sell flour in the Oriental market as soon and as long as they have it to sell.

In Manchuria, not to say Siberia, there is a vast range of country capable of grain growing; but there is practically no government, or such as is worse than none, and little sense of progress, the immediately concerned country belonging to China. Competition from that quarter may come in the future; but it is not imminent, and there is no need to fear an encounter with it either now or when it does come. The Orientals are good farmers in their way; but theirs is not a way calculated to apply to farming on the scale that produces wheat effectively for the world's market. Moreover, they do not change their way on the slightest provocation; it will be the next generation, or the next two or three times removed, before their methods of farming in Manchuria will be modernized.

The Japanese Consul-General reports, on the flour-mill industry, that the flour-mills conducted by the Russians at Harbin, having lost their chief customers since the withdrawal of the Russian troops, the flour trade has become depressed in common with all other lines of business. Half the mills have had to suspend operations, and it was reported that some of the owners of the mills were taking steps to incorporate themselves with a view to continuing the business, and extending the market with the aid of a subsidy from the Russian government.

Lately a new joint-stock company has been formed, and their plan is to consolidate all the milling interests in that region. If they fail to obtain a government subsidy, they propose to borrow 1,200,000 roubles from the Russo-Chinese Bank on the security of the machinery, plants, and premises of the mills, and monopolize the purchase of wheat and the sale of flour.

What strikes the observer here, very often and impressively, is the keen appreciation of subsidy and monopoly. But this is, after all, only the infant-industry stage, and its call for 'protection' with which the Occident is not unfamiliar.

At the time of writing, telegrams from Manchuria under date of August 2 say that serious drought prevails in the southern districts. During the past two months there was almost no rainfall. Hot weather prevails daily, the thermometer registering 100 to 125 degrees Fahrenheit. A considerable crop shortage is feared unless rain falls soon. The prices of cereals are rising.

A. MacLEAN.

JAMAICA.

REPORT OF COMMERCIAL AGENT.

(Mr. Eustace Burke.)

GRAND CENTRAL BUILDINGS,

KINGSTON, JAMAICA, August, 1907.

JAMAICA'S DYEWOOD INDUSTRY.

In view of the noticeable expansion of the above industry, and its evident importance in certain lines of manufactures, by special request from United States sources, the American Consul in this island prepared and forwarded a special communication to his government which appeared in a Consular and Trade Report issued by the United States Department of Commerce and Labour of the 3rd inst. I find it expedient as briefly as possible to reproduce a synopsis of the more important points referred to by the United States Consul, in view of the fact, that for some time now a good deal of logwood and fustic extract has been shipped from the island to Canada in direct bottoms as also via New York.

The Jamaica output of logwood represents about one-fifth of the world's supply. The tree when felled is usually about 20 to 30 feet high, the trunk having an average diameter of 12 inches, and the usual age about 10 years. After felling the logs are cut in suitable lengths for convenient stowage, after which a process of 'chipping' is proceeded with, which removes the bark and an inner layer of white wood.

The roots of the felled tree also form an important article of export, prepared in a similar manner as denoted above. While the commercial portions when cut are of a reddish brown colour, it produces a dye of a deep blue-black. While aniline colours have replaced logwood dyes in the dyeing of raw wool or woollen goods, it is still in great demand in the leather industry for which it appears to be peculiarly adapted. It is also extensively used in certain lines of textile dyeing for which it seems more suitable than any line of colours.

AN EXTRACT FACTORY.

Up to eighteen years ago all logwood was exported from this country in its crude state, then it was that a German chemist, aided with German and local capital started a factory in St. Catherine for extracting the colouring matter from the wood and exporting it in casks, the United States, Great Britain, Germany and Canada (this latter is omitted in the United States Consular Report) being ready customers. It will, I am sure, prove interesting to learn that for the fiscal year ending June 30, 1906, this company exported to the United States alone \$205,293 worth of the logwood extract, in addition to large shipments to Germany, the United Kingdom and Canada.

FURTHER DEVELOPMENTS.

A second factory has been lately located at Lacovia, in the Parish of St. Elizabeth, an important logwood centre, and which I understand is controlled by English capital. A third factory is also shortly to be established in the Parish of Westmoreland, both important logwood centres.

The result of such competition as may well be imagined is high prices to the producers. Some idea of the trade may be gathered from the fact that apart from the large quantities of the dyewood consumed by the local factories, the port of Savanna-la-mar is Westmoreland alone exports an average of 10,000 tons per year.

FUSTIC.

This is another dyewood known to botanists as *Morus Tinctoria* and which is also grown in Jamaica and subjected to the same treatment as logwood giving a bright yellow dye. It is used extensively in producing khaki shades upon cotton and wool. It does appear to me that in spite of the continual advances being made in coal-tar colours and the persistent attempt to produce dyes to completely replace natural colours, that the above woods will continue to form an important factor in the export trade of this colony. In concluding this synopsis I would mention that in taking extracts from the United States Consul's report, I have set right some few inaccuracies and omissions.

G. EUSTACE BURKE.

MANCHESTER.

REPORT OF COMMERCIAL AGENT.

(*Mr. P. B. MacNamara.*)

CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., August 15, 1907.

THE BUTTER AND MARGARINE BILL.*

A Bill bearing the above title has just passed the parliament of the United Kingdom and will come into force on January 1, 1908. Its main provisions are, that all butter factories, (that is to say, any premises on which by way of trade, butter is blended, reworked, or subjected to any other treatment), must be registered and open to the inspection of officers of the Board of Agriculture, who can take samples for analysis, &c. If any article intended for the adulteration of butter be found in a butter factory, it shall be an offence under the Act, and if any oil or fat capable of being used as an adulterant be found on such premises, it shall be deemed to be intended for that purpose unless the contrary be proved.

IMPORT REGULATIONS.

These provisions will be of much benefit to those engaged in the manufacture and sale of pure butter in the United Kingdom, as considerable quantities of adulterated produce have hitherto been turned out from places which have not been open to official inspection. Another provision is, that all butter and margarine imported into the United Kingdom shall not contain more than 16 per cent of water. Milk-blended butter may, however, be imported or prepared in the United Kingdom containing 24 per cent of water, but it cannot be sold as 'milk-blended butter' on and after January 1, 1908. An arbitrary name will be given to it, which must have been previously approved by the Board of Agriculture, and no word suggestive of butter, cream, milk, or anything associated with the dairy or the farm will be permitted to be used for the purpose. In short, the words 'milk-blended butter' will be buried in the Bill, and in future cannot be associated with the sale of this article in any way whatever.

* The manufacture, sale or export of margarine is prohibited in Canada.

MOISTURE IN MILK-BLENDED BUTTER.

Considerable diversity of opinion exists in the butter trade as to whether the government were wise or justified in allowing more than 16 per cent of moisture in milk-blended butter, but considering that it has been sold in Great Britain for the past seven or eight years, and also that a select committee of the House of Commons appointed in 1906, unanimously reported in favour of fixing the maximum it should contain at 24 per cent, it is difficult to see how the government could have done otherwise. Besides, as there was nothing in milk-blended butter of a deleterious nature, and as there is a certain demand for it, the government decided that they could not prohibit its sale. At present it can be sold subject to disclosure with any amount of water which it is capable of carrying, and it frequently contains anything from 20 per cent to 40 per cent of moisture. On the other hand many persons think that when the new law comes into force, that by limiting the moisture to 24 per cent coupled with the other restrictions imposed by the Bill, the extinction of the article will be the result.

Some manufacturers of margarine have for the past few years been using fancy names on the wrappers in connection with the sale of margarine in addition to the word 'Margarine' as prescribed by the Act of 1887. The names referred to are almost invariably coined ones, and it is alleged that they suggest to the general public that the article is butter. No fancy name or names will be permitted in future except those approved by the Board of Agriculture, and in all cases such name or names must be printed in type of the same size and in the same colour as the word 'Margarine.'

Greater powers have been conferred on the customs authorities for the taking of samples of butter, margarine, &c., at the ports of entry, and a more rigid action in this direction will take place in the future.

HOPS.

Contradictory statements appear in the press reports of the condition of this year's British hop crop, but owing to the cool wet weather prevailing, it will be gathered later than in former seasons, and in all likelihood will be below the average. The market is firm for all descriptions of hops offering, both of last year's crop and older dates, the stocks of which are now the smallest known at this period of the year in the memory of the trade. If the weather improves and higher temperatures prevail, the prospects of the growing crop will be enhanced, but under the most favourable climatic conditions the hop harvest will be quite two or three weeks later than usual. The British trade returns give the following hop imports for six months ending June 30, 1907:—

	Cwts.	Value (£).
United States.	73,275	306,219
Other countries.	17,206	72,299

The trade in hops is confined to brokers, and very few brewers evince a desire to depart from this method of buying their stock. London houses control almost the whole of the business and have representatives in the chief cities. The price prevailing as stated to me varies from 60 to 90 shillings per 112 pounds, or from 13 to 19½ cents per pound. The freight direct to Manchester from Canadian ports averages about one-half cent per pound.

POTATOES.

Disease has made its appearance amongst the potato crop in Cheshire, and large growers will be involved in heavy losses. The yield would have been an abundant one, but for the prevalence of the disease, which, in addition to the mischief it has already done, will diminish the keeping properties of the potatoes gathered in condition.

APPLES.

I have a trade report from a Liverpool firm extensively engaged in the apple trade and give that portion which may prove of interest to the Canadian apple shippers:—

'We give the comparative figures of the apple crop in the United Kingdom, from which it will be seen that it is distinctly under average, as compared with only half a crop last season:—

	Districts Over.	Districts Average.	Districts Under.	Total Receipts.
This year..	15	89	175	279
Last year	40	109	104	253

The reports from Holland, Belgium and Germany are fairly satisfactory.

The total imports from the United States and Canada into the United Kingdom during the past season were 2,089,000 barrels, as compared with 1,877,000 barrels in the previous season, and 2,140,000 barrels in 1904-5, and 3,053,000 barrels in 1903-4, which was a record.

Of last season's receipts of 2,089,000 barrels, 1,087,174 were received into Liverpool.'

BRITISH TRADE RETURNS.

According to the Board of Trade returns for July, issued recently, the imports last month were £52,213,304, being an increase of £3,605,505 compared with July, 1906, whilst the exports were £40,452,331, showing an increase of £7,009,369 compared with July, 1906.

The imports for the seven months ended July, 1907, show an increase of £31,428,379 over the same period in 1906, whilst the exports mark an increase of £32,733,322.

P. B. MacNAMARA.

NOTE.—'Special' means in the case of Imports, 'Imports for Home Consumption,' in the case of Exports, 'Exports of Domestic Produce and Manufacture.'

a Includes coin and bullion.

* Figures are for the years 1904, 1905 and 1906.

NEW TARIFFS

During the month under review there have been distributed from this department to all the principal Customs-houses and Boards of Trade throughout the Dominion, copies of all foreign and colonial tariffs and supplements thereto, as furnished during that period by the International Customs Tariff Bureau, which are always available for reference by those interested therein, resident at the principal centres of trade. The following British and Colonial are supplemental to those published in the departmental Annual Report, 1893, and the quarterly and monthly reports since published, and comprise all additions thereto or changes therein, so far as the department has authentic advice.

AUSTRALIA

A complete copy of the new Australian Tariff recently introduced in the Commonwealth parliament has just been received by the Department of Trade and Commerce. This tariff, though enforced at present, has not passed the Australian parliament. Some changes, however, will likely be made.

THE CUSTOMS TARIFF.

All imitations to be dutiable at the rate chargeable on the goods they imitate, unless such rate is less than the rate which would otherwise be chargeable on the imitations.

‘Proof,’ or ‘Proof Spirit’ means spirit of a strength equal to that of pure ethyl alcohol compounded with distilled water so that the resultant mixture at a temperature of 60° Fahrenheit has a specific gravity of 0·9198 as compared with that of distilled water at the same temperature.

The term ‘Iron’ includes Steel.

‘Sheet.’

When applied to Metals, means a sheet or plate not exceeding $\frac{1}{16}$ ths of an inch in thickness.

When applied to Glass, means a sheet or plate not exceeding $\frac{1}{8}$ of an inch in thickness.

‘Plate.’

When applied to Metals, means a plate or sheet more than $\frac{1}{16}$ ths of an inch in thickness.

When applied to Glass, means a plate or sheet more than $\frac{1}{8}$ of an inch in thickness.

‘N.E.I.’ means ‘not elsewhere included.’

‘Departmental By-law’ means By-law made by the Minister, and published in the *Gazette*.

Any article, not otherwise dutiable, composed of a combination of other articles, some of which are dutiable when imported separately, and of others free of duty when imported separately, shall be dealt with as follows:—

(a) When the value of the dutiable portion exceeds the value of the free portion, duty shall be charged upon the whole article at the same rate as would be chargeable on that portion of the dutiable portion which, if imported separately, would be liable to the highest rate of duty.

(b) When the value of the free portion exceeds the value of the dutiable portion of such article, the whole article shall be admitted free of duty.

IMPORT DUTIES.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION I.—ALE, SPIRITS AND BEVERAGES.		
1. Ale, porter and other beer, cider and perry, containing not less than two per cent of proof spirit—

96. Salt—		
(a) Brown, or dark red rock..... "	Free.	
(b) N.E.I., including pink rock..... Ton.	20s.	
97. Seed: canary, hemp, and rape..... Cental.	1s. 6d.	
98. Seed (cotton)..... "	4s.	
99. Seed (cotton), for the manufacture of cotton seed cake and denatured cotton seed oil may be delivered free as prescribed by departmental by-laws.		
100. Soap..... Ad val.	25 p.c.	
101. Spices, viz.—		
(a) Unground, n.e.i..... Lb.	2d.	
(b) Ground, n.e.i..... "	4d.	
102. Sparklets, for making aerated waters..... "	Free.	
103. Starch, and dextrine..... "	2½d.	2d.
104. Starch flours..... "	2½d.	2d.
105. Tea—		
(a) In packets not exceeding 20 lbs. in weight..... "	1d.	
(b) N.E.I..... "	Free.	
DIVISION V.—TEXTILES, FELTS AND FURS, AND MANUFACTURES THEREOF, AND ATTIRE.		
106. Apparel and attire—woollen or silk, or containing wool or silk—partly or wholly made up; including articles cut into shape..... Ad val.	45 p.c.	40 p.c.
107. Apparel and attire of any material, n.e.i., including armlets; cuff sleeve and necktie holders and clips not used in the manufacture of apparel; lace collars; lace bows; scarfs and cravats; lace fichus; plastrons; yokes; rabats and fronts; garters; corset supporters; skirt bands; skirt elevators and retainers; dress and stocking suspenders; children's rope lanyards; teething necklaces; eye shades; belts and belt frames and supports; braces and brace ends; girdles; collar springs, frames, loops, supports and fasteners; hair frames, binders and fasteners; hat guards; puggarees; pins of all kinds, n.e.i.; handkerchiefs of silk; suspensory bandages; artificial bosoms; chest protectors; shoulder pads; baptising and wading pants; bridal sets; leggings, n.e.i.; gaiters, and puttees..... "	40 p.c.	35 p.c.

IMPORT DUTIES—*Continued.*

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION V.—TEXTILES, FELTS AND FURS, AND MANUFACTURES THEREOF, AND ATTIRE— <i>Continued.</i>		
108. Articles n.e.i., including dusters, n.e.i.; cleaning pads; kettle holders; polishing, tea, glass, kitchen, sponge, counter, and crumb cloths; scapular prints; canvas water holders; animal clothing; horse and body rollers; saddle cloths; sleeping sacks; tracing cloth with designs; hair curlers and wavers; adhesive labels, and letters (textile); hangers, labels, bands, and ribbons, with woven name or design thereon; scourers, and other articles of a like character.....	<i>Ad val.</i>	25 p.c.
109. Feathers, undressed.....	"	15 p.c.
110. Feathers, dressed.....	"	30 p.c.
111. Diving dresses.....	"	Free.
112. Regalia, viz., embroidery woven sashes and collars.....	"	Free.
113. Bags and sacks of calico, hessian, n.e.i., and linen, and meat wraps, whether partly or wholly made up; and bags and sacks, n.e.i. <i>Ad val.</i>	15 p.c.	
114. Bags, sacks, packs and bales for bran, chaff, compressed fodder, potato, onion, ore, coal and wool; also sugar mats, and corn and flour sacks, and salt, gypsum, and manure bags.....	Free.	
115. Blankets (except of rubber); blanketing; flannels, including domett; rugs, n.e.i., including buggy rugs or aprons, and rugging,.... <i>Ad val.</i>	30 p.c.	
116. Carpets, carpeting, floor cloths, floor and carriage mats of any material except coir; lap dusters; and floor rugs and coverings (including felts and pads).....	"	20 p.c.
117. Coir mats and matting.....	"	25 p.c.
118. Cosies and cushions, in part or wholly made up; articles as under and the like, not being piece goods, viz., articles of furnishing drapery and napery, including quilts, table-covers, doyleys, tray-cloths, sheets, pillow-cases and covers, bolster cases, counterpanes, bed spreads, table mats, splashes, tablecloths, runners, mantle borders, toilet sets, bags for linen, brush and comb bags, nightdress cases, antimacassars, handkerchief sachets.....	"	25 p.c.
119. Curtains and blinds, n.e.i., (not including blinds attached to rollers); curtain clips, bands, loops, and holders; and blind tassels and acorns.....	"	25 p.c.
120. Furs and other skins—		
(a) Furs, being apparel or attire or other article in part or wholly made up, including furs sewn together.....	"	35 p.c.
(b) Fur and other skins, n.e.i., dressed or prepared for making up.....	"	15 p.c.
(c) Hatters' fur, not on the skin.....	"	15 p.c.
121. Gloves, n.e.i., of all materials, including mittens and flesh gloves..	"	30 p.c.
122. Hats, caps, and bonnets—		
(a) Of all descriptions and materials, n.e.i., including forms and pull-over hoods and shapes, and frames, n.e.i....	"	35 p.c.
(b) Firemen's helmets, and miners' hats.....	"	Free.
123. Parasols, sunshades, and umbrellas..... <i>Ad val.</i>	20 p.c.	
†124. Piece goods,* viz.—		
(a) Woollen, or containing wool, n.e.i.	"	35 p.c.
(b) Denims, striped and fancy.....	"	35 p.c.
(c) Silk, or containing silk or having silk worked thereon.	"	20 p.c.
(d) Velvets, velveteens plushes, ribbons, galoons, not being bindings; lace for attire; lace flouncings; millinery and dress nets; veilings; embroideries in the piece; tucked linens or cottons; boxed robes when not shaped or sewn.....	"	20 p.c.
(e) Cotton, linen, jute, and other piece goods, n.e.i.; oil baize; leather cloth; dungaree; denims, other than striped and fancy; moleskins and corduroys.....	"	10 p.c.
(f) Piece goods, other than of wool or silk, suitable for human apparel, or to be worn in connection with the human body, having on one or both sides a teased, treated, combed, fluffed, or raised nap or surface in imitation of or resembling flannel or wool in feel or appearance.....	"	25 p.c.
125. Waddings and cotton wool.....	"	20 p.c.
126. Bunting; sheathing roofing and boiler felt; felt for making polishing pads; hair fabric and hair material for covering steam pipes and boilers.....	Free.	15 p.c.
127. Saddlers' webs; upholsterers' webs; collar check; kersey; saddlers' serge and felt.....	Free.	
128. Horse-hair cloth and cloth of horse-hair and cotton or horse-hair and wool combined; hop-cloth.....	Free.	

*DEFINITION OF PIECE GOODS.—When material is defined by selvedge or by pattern for cutting up into separate articles, it is not to be considered Piece Goods but as dutiable under the heading applying to the article into which it is designed to be made. Tasselled, whipped (with or without loops) or taped curtain material, when not defined for cutting up is to be considered Piece Goods.

†Subject to rebate under the conditions specified in the Schedule hereto.

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION V.—TEXTILES, FELTS AND FURS, AND MANUFACTURES THEREOF, AND ATTIRE—Continued.		
129. Milling silk.....	Free.	
130. Canvas and duck, tent, sail and tarpaulin makers'.....	Free.	
131. Hessians and brattice cloth.....	Free.	
132. Fringes of textile materials, not being for attire.....	Free.	
133. Socks and stockings, woollen, with or without silk or other ornamentation.....	<i>Ad val.</i>	25 p.c.
134. Socks and stockings, cotton, with or without silk or other ornamentation.....	"	15 p.c.
135. Socks and stockings, silk, or partly of silk and other material not being cotton or wool.....	"	20 p.c.
136. Tents and tarpaulins, sails and flags—		
(a) Tents, tarpaulins, and sails.....	"	15 p.c.
(b) Flags and banners over 1 foot in length.....	"	20 p.c.
137. Trimmings and ornaments, n.e.i., for bonnets, hats, shoes, and other attire, not being in part or wholly of gold or silver; including buckles; clasps; slides; buttons; badges, n.e.i.; fringes, n.e.i.; braids, n.e.i.; piping; gimp, n.e.i.; crowns and bandeaux for hats; natural and imitation birds and wings; tinsel cloth; tinsel belting and thread; frillings; ruffing; pleating; and ruchings.....	"	15 p.c.
138. Bayonets, swords, scabbards, and attachments; embroidered cap peaks; waist belts; medals; and all accoutrements, badges, buttons, braid, and lace for naval, military, and militia uniforms may be delivered free under departmental by-laws.		
139. Artificial plants, flowers, fruits, leaves, and grains of all kinds and materials.....	"	25 p.c.
140. Wigs, hair-nets, and articles of natural or imitation hair.....	"	30 p.c.
DIVISION VI.—METALS AND MACHINERY.*		
141. Ammunition, viz.: shot, bullets, and slugs.....	Cwt.	5s. 6d.
142. Arms, viz.—		
(a) Double-barrelled guns and rifles.....	Each.	11s.
(b) Single-barrelled guns and rifles.....	"	5s. 6d.
(c) Revolvers, pistols, saloon and pea rifles, and air guns and pistols.....	"	2s. 9d.
(d) Barrels or actions, other—		
(1) For double-barrelled guns.....	"	5s. 6d.
(2) For single-barrelled guns.....	"	2s. 9d.
(e) Bayonets, swords, fencing foils and masks, gun, revolver and pistol covers, cases and fittings, loading tools and cartridge belts.....	<i>Ad val.</i>	22½ p.c.
(f) N.E.I.....	"	22½ p.c.
(g) Rifles, military and match, including authorized cadet rifles and Morris tubes, gun stocks in the rough, barrels (not fitted to any action) bearing the British test mark.....		5 p.c.
143. Iron, plate and sheet, viz.—		
(a) Corrugated galvanized.....	<i>Ad val.</i>	25 p.c.
(b) Galvanized not corrugated, and corrugated not galvanized.....	"	20 p.c.
144. Lamps and lampware, viz.—		
(a) Oil and other self-contained lamps, lanterns and parts thereof, including one chimney, shade and globe, or other article imported with and used as an integral part of any lamp or lantern, coach and carriage lamps and lamp irons, arc lamps and accessories, and incandescent lamps and bulbs.....	"	25 p.c.
(b) Fittings for lighting purposes, including parts thereof (except chimneys, glass shades and globes), lamps and lampware, n.e.i. (but not the columns of street lamps, metal reflectors and shades.....	"	25 p.c.
(c) Lamp, gas and electrical stoves for heating and cooking.....	"	30 p.c.
(d) Incandescent mantles.....	"	40 p.c.
145. Lamps, miners' safety.....	<i>Ad val.</i>	10 p.c.
146. Lead, sheet and piping.....	Ton.	50s.
147. Mangles, clothes-wringers and washing machines, n.e.i.....		20 p.c.
148. Agricultural, horticultural and viticultural machinery and implements, n.e.i., including cane loaders on wheels, channel-making graders, feed grinders, garden and field spraying machines, garden and field rollers, garden hose reels, garden syringes, horse road rollers and machines, lawn mowers, sweepers and sprinklers, road-making ploughs, road scoops and scrapers, scoops, stump extractors.....	"	20 p.c.

*Motive power, engine combinations, and power connections are dutiable under their respective headings when not integral parts of exempted machines, machinery, or machine tools.

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION VI.—METALS AND MACHINERY—Continued.		
149. Chaffcutters and horse gears, chaffcutters knife, corn shellers, corn huskers, cultivators other than disc, harrows, ploughs, other, plough shares, plough mould boards, scarifiers..... <i>Ad val.</i>	20 p.c.	
150. Combined corn sheller, husker and bagger, combined corn sheller and husker, discs for agricultural implements, disc cultivators, drills (fertilizer seed and grain), and all attachments thereto, stump jump ploughs, winnowers (horse and other power), seats, poles, swingle-bars, yokes and trees for agricultural machines, when imported separately..... “	25 p.c.	
151. Churns of all kinds, cheese presses, dairy coolers, dairy refrigerators, supply cans, incubators, n.e.i., foster mothers..... “	25 p.c.	
152. Stripper harvesters..... Each.	£16	
153. Strippers..... “	£8	
154. Metal parts of stripper harvesters and strippers..... Lb.	2½ d.	
155. Agricultural, horticultural and viticultural machinery and implements, viz.:— Cream separators, testers and Pasteurizers, cotton gins, fibre scutching machines, hand-worked rakes and ploughs combined, hay tedders, horse rakes, lucerne bunchers, maize harvesters, maize binders, milking machines, mouldboard plates in the rough and not cut into shape, potato raisers or diggers, potato sorters, root cutters, pulpers and graters, sheep shearing machines, straw stackers, subsurface packers, threshing machines, winnower forks (wood and steel).....	10 p.c.	Free.
156. Cutlery, of all kinds, n.e.i., including plated cutlery, clippers, knife sharpeners, manicure sets, but not cutlery in part or wholly made up of gold or silver..... <i>Ad val.</i>	20 p.c.	15 p.c.
157. Crucibles.....	Free.	
158. Diving apparatus, not including hose.....	Free.	
159. Nails, viz.:— (a) Horse-shoe nails..... Cwt.	8s. 3d.	7s. 6d.
(b) Brads (including moulders' and glaziers'), picture nails, rail-dogs or brobs, spikes, staples, n.e.i., tacks, n.e.i., wire and other nails, n.e.i..... “	5s. 6d.	5s.
160. Tanks, containing goods, or empty.—For every 100 gallons capacity or part thereof.....	3s.	
161. Weighing machines, weighbridges, scales, n.e.i., including adding and computing machines, and all attachments, cash registers, chemists' counter scales, spring balances and steel-yards, weights, n.e.i..... <i>Ad val.</i>	20 p.c.	
162. Marine engine boilers and machinery and fittings and mountings, n.e.i., for such engines, boilers and machinery, shafts, propellers, winches, liners for cylinders, windlasses, steering gear, feed water heaters, feed pumps, evaporators, auxiliary condensers, feed water fillers and ash ejectors..... “	25 p.c.	
163. Steam road rollers, including scarifier attachments..... “	25 p.c.	
*164. (a) Engines (including traction and portable), n.e.i., turbines, winches, n.e.i., boilers, n.e.i., pumps, wind-mills..... “	30 p.c.	25 p.c.
(b) Elevating and conveying machinery, pile driving plant, economizers, cranes, beer engines, cloth folding and measuring machines, wool and other presses, lifts, water and gas meters..... “	30 p.c.	25 p.c.
(c) Machines and machinery, n.e.i..... “	30 p.c.	25 p.c.
165. Machinery and parts thereof, viz.:— Steam engine indicators and recorders; patent porcelain and steel rollers for flour mills; roll shells; typewriters (including covers); zinc refining retorts; fire engines; stitching machines; sewing machines (including cabinets and covers); button-hole punching and sewing machines; darning machines; straw envelope-making machines.....	10 p.c.	Free.
*166. Machinery and machines; and machine tools n.e.i., viz.:— (a) Machines n.e.i., used in the tanning of hides and skins, and in the preparation of leather; automatic can-making and closing machines; machinery for scouring and washing wool; machinery for the manufacture of paper, and for felting; soap-cutting machines; artesian boring machines..... <i>Ad val.</i>	25 p.c.	20 p.c.
(b) Machine tools— Hat-making—Hydraulic blocking press for making straw hats..... “	25 p.c.	20 p.c.
India rubber working—Hose machines, steel stamps, steel tyre mandrils, spreading, tread drums, washer cutting..... “	25 p.c.	20 p.c.

* Subject to rebate under the conditions specified in the Schedule hereto.

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION VI.—METALS AND MACHINERY—Continued.		
*166. Machinery and machines; and machine tools n.e.i., viz.:—Continued. (b) Machine tools—Continued— Metal working—Wire netting machines, blowers for foundry and mining purposes, pneumatic hammers, steam hammers up to and including sizes up to 16 in. cylinders, punching and shearing machines, combined or separate, sizes up to $\frac{1}{2}$ in., slotting machines, sizes up to 12 in. stroke, centreing machines to centre up to 6 in. diameter, bolt screwing and nut tapping, combined or separate, sizes above $\frac{3}{8}$ in. and up to 2 in., bending rolls in sizes to bend up to $\frac{1}{2}$ in. plate.	Ad val.	25 p.c.
Artesian boring tools, n.e.i.	"	25 p.c.
Boot-making machine tools, n.e.i.	"	25 p.c.
Tire benders and shrinkers.	"	25 p.c.
Tinsmiths' tools, being machine.	"	25 p.c.
167. Machine tools, as prescribed by departmental by-laws.	Free.	20 p.c.
168. Any dutiable machinery or machine tool, or any part thereof specified in any proclamation issued by the Governor General in pursuance of a joint address passed on the motion of Ministers by both Houses of the Parliament, stating that such machinery, machine tool or part cannot be reasonably manufactured within the Commonwealth, and that it should be admitted free.	Free.	
169. Tools of trade for the use of artisans and mechanics and tools in general use, as prescribed by departmental by-laws.	Free.	
170. Mixed metalware and platedware, n.e.i.	Ad val.	30 p.c.
171. Manufactures of metal, n.e.i.	"	30 p.c.
172. Saws, n.e.i.	"	25 p.c.
173. Brasswork and gun metal work for general engineering and plumbing and other trades.	"	30 p.c.
174. Type, printers'	"	25 p.c.
175. Fire extinguishers, hand.	"	20 p.c.
176. Screws, n.e.i., including screws with nuts not being bolts and nuts, sash screws and attachments, engineers' set screws, music stool and table, roofing and spiral screws.	5 p.c.	Free.
177. Mining engines and machinery, n.e.i.	Ad val.	35 p.c.
178. Electrical machinery, viz.:— (a) Generators, motors up to the capacity of 500 h.p., fans, starting and regulating rheostats.	"	30 p.c.
(b) N.E.I.	"	17½ p.c.
179. Electrical and gas appliances, viz.:— (a) Electroliers, gasaliers, chandeliers, pendants, brackets, switches, controlling devices, n.e.i., radiators and zinc tubing.	"	25 p.c.
(b) N.E.I.	"	17½ p.c.
180. Electrical materials, viz.:— Accumulators or storage batteries, including glass cells used therewith, cable and wire (covered), carbons, testing meters and instruments, translafor, insulating tapes, meters, resistance coils, static transformers and terminals, photo-meters for gas and electricity.	5 p.c.	Free.
181. Rails, fish plates, fish bolts, tie plates and rods, switches, points, crossings and intersections for railways and tramways.	Ad val.	12½ p.c.
182. Iron pipes, cast and wrought, n.e.i.	"	30 p.c.
183. Iron and steel tubes or pipes (except riveted or cast) not more than 4 inches internal diameter, including flexible metal tubes, gallo-way and vertical parallel boiler tubes, water bore casings, wrought iron fittings for pipes.	Free.	
184. Rolled iron or steel beams, channels, joists, girders, columns, trough and bridge iron and steel, not drilled or further manufactured, shafting, cold rolled, turned or planished.	Ad val.	17½ p.c.
185. Bolts, nuts, rivets and washers, n.e.i.	"	30 p.c.
186. Barbed wire.	"	30 p.c.
187. Wire netting.	"	30 p.c.
188. Electrotypes and stereotypes for advertising purposes.	1s. 1d.	
per block of 12 square inches and under. for every square inch over 12 square inches.		
189. Ammonia condenser coils and coils for sugar boilers and the like, corrugated cylinders for boilers.	Ad val.	25 p.c.
190. Plates (except plain tin) and sheets and pipes and tubes of any metal, tin plated, polished or decorated.	Ad val.	15 p.c.
191. Aluminium, bronze, yellow metal, Britannia metal, nickel, and German silver, viz.:—Pigs, ingots, scrap, blocks, bars, strips, sheets (plain), plates (plain) pipes (plain), and tubes (plain).	Ad val.	Free.
192. Anchors, over 10 cwt.	5 p.c.	Free.

* Subject to rebate under the conditions specified in the schedule hereto.

IMPORT DUTIES—*Continued.*

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION VI.—METALS AND MACHINERY—<i>Continued.</i>		
193. Anodes and hooks for plating purposes.....	5 p.c.	Free.
194. Bolts, carriage ($\frac{3}{4}$ of an inch and under in diameter and 4 inches and under in length).....	5 p.c.	Free.
195. Brass, viz.:—Scrap, bars, sheets (plain), pipes (plain), tubes (plain), and strips.....	Free.	
196. Capsules, metallic.....	5 p.c.	Free.
197. Chain, n.e.i., not made into serviceable articles.....	5 p.c.	Free.
198. Copper, viz.:—Strips, scrap, bars, rod wire, sheets (plain), pipes (plain), and tubes (plain).....	Free.	
199. Cylinders for anhydrous ammonia and for gas.....	5 p.c.	Free.
200. Droppers, patent steel of all lengths.....	5 p.c.	Free.
201. Eyelets and eyelet studs.....	5 p.c.	Free.
202. Fasteners, machine belt.....	5 p.c.	Free.
203. Thimbles and block fasteners for lasts.....	5 p.c.	Free.
204. Leaf and foil of any metal.....	5 p.c.	Free.
205. Locks, including knobs, keys, escutcheons, and staples.....	5 p.c.	Free.
206. Pins (not being gold or silver or gold or silver-plated), viz.:—Gimp, solid-headed short toilet, plain wire hair, plain safety, and crochet hooks.....	5 p.c.	Free.
207. Platinum, viz.:—Bars, strips, tubing, pipes, sheets and plates.....	Free.	
208. Retorts, pans, condensers, cylinders, and other articles used in the manufacture of acids and in laboratories, and made of platinum.....	5 p.c.	Free.
209. Printers' Materials, viz.:—		
Circles, clumps, curves, knives (paring), rules, leads, and slugs.....	5 p.c.	Free.
210. Rabbit traps, dog traps, vermin traps.....	5 p.c.	Free.
211. Saddlers' and harness makers' materials, viz.:—Saddlers' tacks (not cut), and nails, snaps (harness and halter), spurs (not being partly or wholly of gold or silver, or plated), and spur boxes.....	5 p.c.	Free.
212. Scales, viz., chemical, analytical, and assay, including weights; and precision and physical balances.....	Free.	
*213. Scrap iron and steel, and, subject to Departmental by-laws, materials for use as scrap iron.....	Free.	
214. Screw hooks, eyes and rings.....	5 p.c.	Free.
215. Sprinklers (not being partly or wholly of gold or silver) for perfume bottles.....	5 p.c.	Free.
216. Standards, steel fencing of all lengths, and pillars.....	5 p.c.	Free.
217. Steel, band or ribbon for making band-saws or band-knives.....	5 p.c.	Free.
218. Steel grit and steel wool, and steel balls for other than cycle bearings.....	5 p.c.	Free.
219. Steel knives for hand tobacco cutters and hand tin openers.....	5 p.c.	Free.
220. Steel, rough-shaped, for chaff-cutter and other knives.....	5 p.c.	Free.
221. Tin plates, plain.....	5 p.c.	Free.
222. Tubes (collapsible) empty.....	5 p.c.	Free.
223. Washers and rivets, copper.....	5 p.c.	Free.
224. Wedges, patent, for droppers and standards.....	5 p.c.	Free.
225. Wire cloth, wire gauze.....	5 p.c.	Free.
226. Wire, n.e.i.....	10 p.c.	Free.
227. Zinc, viz.:—Bar, scrap, sheet (plain), and circles and ingots bored or unbored for cyanide gold process, and zinc sheets (perforated with round holes of less than $\frac{1}{8}$ of an inch diameter), for meat safes and covers.....	Free.	
228. Zinc blocks for marine boilers.....	5 p.c.	Free.
†DIVISION VIa.—METALS AND MACHINERY.		
229. Iron and steel—		
(a) Scrap iron and steel and pig iron.....	<i>Ad val.</i>	12½ p.c.
(b) Ingots, blooms, slabs, billets, puddled bars and loops, or like crude manufactures, less finished than iron or steel bars, but more advanced than pig iron (except castings).....	"	12½ p.c.
(c) Bar, rod, angle, tee, sheet and plate (plain), wire and hoop.....	"	12½ p.c.
(d) Machinery, machines and parts—		
Mowers, reapers and reapers and binders.....	"	17½ p.c.
(e) Iron and steel tubes and pipes, not dutiable under division vi.....	"	12½ p.c.
(f) Spelter.....	"	10 p.c.

*To continue only until the coming into force of "Division VI(a) Metals."

†To come into operation on dates to be fixed by proclamation, and exempt from duty in the meantime. Proclamation to issue so soon as it is certified to Parliament by the Minister that the manufacture to which the proclamation refers has been sufficiently established in the Commonwealth.

IMPORT DUTIES—Continued.

(153) Strippers.....	"	£8 5s.
(154) Metal parts of stripper harvesters and strippers....	Lb.	2½d.
(159) Nails, viz.:— (a) Horseshoe nails..... (b) Brads (including moulders' and glaziers'); picture nails; rail-dogs or brobs; spikes; staples, n.e.i.; tacks, n.e.i.; wire and other nails, n.e.i.....	Cwt. " "	8s. 5s. 6d. 5s. 3d.
(160) Tanks containing goods, or empty.—For every 100 gallons capacity or part thereof.....	"	3s. 3d.
(161) Weighing machines; weighbridges; scales, n.e.i.; including adding and computing machines, and all attachments; cash registers; chemists' counter scales; spring balances and steel-yards; weights, n.e.i.....	Ad val.	25 p.c.
(162) Marine engines, boilers, and machinery, and fittings, n.e.i., and mountings, n.e.i., for such engines, boilers, and machinery; shafts; propellers; winches; liners for cylinders; windlasses; steering gear; feed water heaters; feed pumps; evaporators; auxiliary condensers; feed water fillers, and ash ejectors.....	" "	27½ p.c. 27½ p.c.
(163) Steam road rollers, including scarifier attachments..	"	27½ p.c.
(164) (a) Engines (including traction and portable) n.e.i.; turbines; winches, n.e.i.; boilers, n.e.i.; pumps; windmills.....	"	32½ p.c.
(b) Elevating and conveying machinery; pile driving plant; economizers; cranes; beer engines; cloth folding and measuring machines; wool and other presses; lifts; water and gas meters....	" "	32½ p.c. 27½ p.c.
(c) Machines and machinery, n.e.i.....	"	27½ p.c.
(166) Machinery and machines, and machine tools, n.e.i., viz.:—		
(a) Machines, n.e.i., used in the tanning of hides and skins, and in the preparation of leather; automatic can-making and closing machines; machinery for scouring and washing wool; machinery for the manufacture of paper, and for felting; soap-cutting machines; artesian boring machines.....	"	27½ p.c. 22½ p.c.

*To come into operation on dates to be fixed by proclamation, and subject to the duties specified in division vi. in the meantime. Proclamation to issue so soon as the duties specified in division VIa. have been brought into operation.

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION VIIb—Continued.		
229. (a)—Continued. Division VI.—Continued. Item (166)—Continued.		
(b) Machine tools—		
Hat-making—hydraulic blocking press for making straw hats.....	<i>Ad val.</i>	
India-rubber working—Hose machines; steel stamps; steel tyre mandrills; spreading; tread drums; washer cutting.....	27½ p.c.	22½ p.c.
Metal working—Wire netting machines; blowers for foundry and mining purposes; pneumatic hammers; steam hammers, up to and including sizes up to 16 in. cylinders; punching and shearing machines, combined or separate, sizes up to ¼ in.; slotting machines, sizes up to 12 in. stroke; centreing machines to centre up to 6 in. diameter; bolt screwing and nut tapping, combined or separate, sizes above ½ in., and up to 2 in.; bending rolls in sizes to bend up to ¼ in. plate.	27½ p.c.	22½ p.c.
Artesian boring tools, n.e.i.....	27½ p.c.	22½ p.c.
Boot-making machine tools, n.e.i.....	27½ p.c.	22½ p.c.
Tyre benders and shrinkers.....	27½ p.c.	22½ p.c.
Tinmiths' tools, being machine.....	27½ p.c.	22½ p.c.
(171) Manufacture of metal, n.e.i.....	32½ p.c.	27½ p.c.
(172) Saws, n.e.i.....	27½ p.c.	22½ p.c.
(177) Mining engines and machinery, n.e.i.....	37½ p.c.	27½ p.c.
(181) Rails, fish plates, fish bolts, tie plates and rods, switches, points, crossings, and intersections, for railways and tramways.....	22½ p.c.	17½ p.c.
(182) Iron pipes, cast, and wrought, n.e.i.....	32½ p.c.	27½ p.c.
(184) Rolled iron or steel beams, channels, joists, girders, columns, trough and bridge iron and steel, not drilled or further manufactured; shafting, cold rolled, turned or planished.....	22½ p.c.	17½ p.c.
(185) Bolts, nuts, rivets, and washers, n.e.i.....	32½ p.c.	27½ p.c.
(190) Plates (except plain tin) and sheets and pipes and tubes of any metal, tin plated, polished or decorated.....	20 p.c.	
DIVISION VII.—OILS, PAINTS AND VARNISHES.		
230. Blacking, including dressings, pastes, and polishes for leather; furniture oils, pastes, and polishes; and bronzing and metal liquids.....	<i>Ad val.</i>	
231. Graphite of plumbago, black lead, and foundry black, in bulk.....	40 p.c.	35 p.c.
232. Bronzing and metal powders.....	Free.	
233. Tallow and greases—	20 p.c.	
(a) Greases, including axle grease, and tallow unrefined, in packages not exceeding 4 lbs. in weight.....	Cwt.	
(b) In packages exceeding 4 lbs. in weight.....	4s.	
234. Oils—	2s.	
In vessels not exceeding one gallon, viz.—		
(a) Quarter-pints and smaller sizes.....	Doz.	
(b) Half-pints and over quarter-pints.....	1s. 6d.	
(c) Pints and over a half-pint.....	3s.	
(d) Quarts and over a pint.....	6s.	
(e) Over a quart.....	12s.	
In vessels exceeding one gallon, viz.—	Gal.	
(f) Cotton seed.....	4s.	
(g) Cotton seed when denaturated as prescribed by departmental by-law.....	2s.	
(h) Olive.....	6d.	
(i) Castor, colza, linseed.....	2s.	
(j) Lubricating (mineral)*.....	6d.	3d.
(k) Mineral, n.e.i.; naphtha; benzine; benzoline; gasoline; pentane; petrol; turpentine substitutes, and the like.....	3½d.	
(l) Solar oils, and residual oil†.....	¾d.	½d.
(m) N.E.I., including cloth oil.....	¾d.	
(n) Castor-oleine and other saponifiable oils.....	6d.	
(o) Kerosene and other refined petroleum oils, in packages less than 10 gallons in content.....	6d.	
(p) Kerosene, and other refined petroleum oils, n.e.i.....	3d.	
	Free.	

*An admixture not exceeding 2 per cent of any vegetable or animal oil or other foreign matter shall not be deemed to render the oil liable to any higher duty.

†When the Department is in doubt as to the exact nature of any oil so described it shall be denaturated in accordance with departmental by-laws.

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION VIII.—EARTHENWARE, CEMENT, CHINA, GLASS AND STONE—Con.		
256. Scientific apparatus (glass), viz.:— Beakers, flasks, test tubes, vacuum tubes, burettes, weighing bottles and tubes, eudiometers, nitrometers, radiometers, fat extraction tubes, filter pumps, gas, washing, reduction, absorption and drying bulbs, towers and tubes, glassware, graduated in centimetres, grains, minims, ounces and grammes, also carbonic acid, sulphuretted hydrogen, decomposing water and bacteriological apparatus of glass.....	Free.	
257. Screens, process engravers'.....	Free.	
258. Bottle stoppers, n.e.i., of all kinds and materials.....	Free.	
259. Bottles, n.e.i., flasks and jars, empty, including packing, measuring outside the package as imported— (a) From one dram up to and including 10 ozs. of fluid capacity.....	Cu. ft. 2s.	1s. 9d.
(b) Over 10 ozs. of fluid capacity.....	1s. 1d.	1s.
(c) Wine, beer, spirit and aerated water bottles.....	10d.	9d.
260. Bottles, n.e.i., flasks and jars, filled, irrespective of whether the contents are liable to duty or not— (a) Up to and including 2 ozs. of fluid capacity.....	Doz. 1s. 1d.	1s.
(b) Over 2 ozs. of fluid capacity.....	10d.	9d.
261. Glue, gelatine of all kinds, and cements, n.e.i., including mucilage and belting compounds.....	Ad val. 40 p.c.	30 p.c.
262. Printing roller composition.....	35 p.c.	
263. Dry gums, shellac, sandarac and mastic.....	Free.	
264. Slate slabs, split, and with rough edges.....	Ad val. 15 p.c.	
265. Slate slabs, sawn or chiselled on one or more faces, or on one or more edges.....	" 20 p.c.	
266. Wrought slate, n.e.i.....	" 30 p.c.	
267. Roofing slates.....	" 25 p.c.	
268. Stone and marble— (a) Unwrought, including rough or scabbled from the pick.....	" 10 p.c.	
(b) Slabs or scantlings, sawn on one or two faces.....	" 15 p.c.	
(c) Slabs or scantlings, sawn on one or more faces and one or more edges.....	" 20 p.c.	
(d) Wrought, n.e.i.....	" 30 p.c.	
(e) Wrought, ornamental.....	" 35 p.c.	
(f) Dust and chips.....	" 20 p.c.	
269. Bathbricks.....	Free.	
270. Oil and whet stones, also lithographic and emery stones.....	Free.	
271. Pestles and mortars, agate.....	Free.	
272. Stone, viz., in the rough, n.e.i.....	Free.	
DIVISION IX.—DRUGS AND CHEMICALS.		
273. Acetic acid, extract, or essence of vinegar— (a) Vinegar, standard (as prescribed by departmental by-laws), the product of malt or grain or fruit juice by alcoholic and acetic fermentation, containing not more than 6 per cent of absolute acetic acid.....	Gall. 6d.	
(b) Vinegar, not the product of malt or grain or fruit juice.....	" 2s.	
(c) Solutions, extracts or essences containing more than 6 per cent but not more than 30 per cent of absolute acetic acid.....	" 3s. 9d.	
(d) Solutions, extracts or essences containing more than 30 per cent of absolute acetic acid for every extra 10 per cent or part thereof.....	" 1s. 3d.	
(e) Acetic acid, in crystals or powdered form.....	Ad val. 15 p.c.	
274. Acids, viz., muriatic, nitric and sulphuric.....	" 15 p.c.	
275. Carbonate of ammonia.....	Cwt. 5s.	
276. Carbonic acid gas.....	Lb. 2d.	
277. Carbide of calcium.....	10 p.c.	Free.
278. Drugs and chemicals, viz.:— (a) Salicylic and boric acids and other food preservatives, n.e.i., salicylate of soda, sulphites and bisulphites of potassium, bisulphate of sodium, calcium and magnesium, and foaming powders and liquids, including malto-peptone, yeast food, yeast food preservatives, yeast nourishment, quillaya bark, saponarins, glycerizin and its compounds,.....	Ad val. 25 p.c.	20 p.c.
(b) Saccharin and other similar substitutes for sugar, and substances capable of conversion into such substitutes for sugar, when imported for medicinal purposes only, in accordance with departmental by-law, in packages of not less than 11 lb. weight....	Lb. 30s.	
279. Cresylic acid, crude creosote oil and tar oil, saponaceous mixture of creosote, carbolic acid.....	Gall. 6d.	
280. Naphthaline.....	Ad val. 25 p.c.	
281. Cyanide of potassium.....	Free.	

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION IX.—DRUGS AND CHEMICALS—Continued.		
282. Voltoids of sal-ammoniac.....	Free.	
283. Insecticides, sheep washes and disinfectants, n.e.i.....	Free.	
284. Fly papers, chemical and sticky.....	15 p.c.	
285. Thio sulphates (hydrosulphites), and hydrosulphites containing zinc sulphite and formaldehyde.....	Free.	
286. Chemical compounds and simple drugs.....	Free.	
287. Bacteriological products and serum, as prescribed by departmental by-laws.....	Free.	
288. Carbonate and bicarbonate of soda.....	Free.	
289. Tartaric acid, cream of tartar and citric acid.....	5 p.c.	Free.
290. Essential oils, non-spirituous, n.e.i.....	Free.	
291. Medicines:—		
(a) Pharmaceutical preparations, patent and proprietary medicines and other medicinal preparations and compounds (not chemical), medicinal extracts, essences, juices, infusions, solutions, emulsions, confections, and syrups, pills, pilules, tabloids, soloids, ovoids, tablets, capsules, troches, cachets, suppositories, pessaries n.e.i., plasters, poultices, salves, cerates, ointments, liniments, lotions, pastes and the like, medicinal waters and oils n.e.i., and medicines for animals.....	Ad val.	
(b) Spirituous.....	15 p.c.	
(Or according to the rates provided in Division I., whichever rate returns the higher duty.)	15 p.c.	
292. Opium, for use as medicine only, and not capable of being used for smoking purposes.....	Lb.	
293. Medicinal preparations containing opium.....	30s.	
294. Perfumery (including perfumed ammonia), camphor (in tablets), toilet preparations not containing spirit (perfumed or not), cachous, skin foods, refined lanoline, refined glycerine and vaseline, and perfumed petroleum jelly.....	Ad val.	25 p.c.
295. Unrefined glycerine and unrefined lanoline.....	35 p.c.	
296. Essential oils, and fat containing extract of flowers used in making perfumes.....	Free.	
297. Sulphuric ether, and other ethers n.e.i., non-spirituous, or containing not more than 5 per cent of proof spirit.....	Ad val.	
298. Soda crystals.....	20 p.c.	
	Free.	
	1s.	
DIVISION X.—WOOD, WICKER, AND CANE.		
299. Furniture (except of metal, wicker, bamboo, and cane) n.e.i. in parts or finished, including billiard and bagatelle tables and boards and accessories, trays, crumb trays and brushes, mattresses, bolsters, pillows, window shade or blind rollers, rollers with blinds, screens, portieres, dress stands and show figures for draping or other purposes, writing desks and cabinets, stationary cabinets, type cabinets and cases, mirrors framed or not n.e.i., blinds not being textile, panels for incorporating into furniture, ice chests or refrigerators, housemaids' boxes, meat and other household safes, bath cabinets, dental and surgical cabinets, invalid furniture and chairs on wheels, aseptic hospital furniture, including trolleys, stretchers and the like.....	Ad val.	
300. Lounges and settees.....	40 p.c.	30 p.c.
	Each.	
	10s.	
	or Ad val.	
	30 p.c.	
301. Chairs.....	7s. 6d.	
	Each.	
	or Ad val.	
	30 p.c.	
302. Billiard balls, in the rough.....	Free.	
303. Timber, viz.:—		
(a) Timber, undressed, n.e.i., in sizes of 12 in. x 6 in. (or its equivalent) and over.....	100 super. feet*	
(b) Timber, undressed, n.e.i., in sizes of 7 in. x 2½ in. (or its equivalent) and upwards, and less than 12 in. x 6 in. (or its equivalent).....	100 super. feet*	
(c) Timber, undressed, n.e.i., in sizes less than 7 in. x 2½ in. (or its equivalent), including door stocks.....	100 super. feet*	
(d) Timber, dressed, n.e.i.....	2s. 6d.	
(e) Architraves, mouldings and skirtings of any material.....	3s.	
(f) Shingles.....	5s.	
	100 lineal feet.	
	M.	
	3s.	

* NOTE.—Definition of a superficial foot.—A superficial foot of timber shall mean an area of one square foot on one surface, and being one inch or less in thickness.

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
<i>DIVISION X.—WOOD, WICKER AND CANE—Continued.</i>		
303. Timber, viz.:— <i>Continued.</i>		
(g) Pickets, undressed.....	100. 2s. 6d.	
(h) Pickets, dressed.....	M. 6s.	
(i) Laths.....	Ad val. 7s. 6d.	
(j) Laths for blinds.....	25 p.c.	
(k) Spokes, dressed or prepared (not being of hickory), 2 in. or under in diameter.....	100. 10s.	
(l) Palings.....	M. 15s.	
(m) Prepared hubs (not of elm).....	Each. 1s.	
(n) Rims, n.e.i.....	" 1s. 3d.	
(o) Staves, dressed or partly dressed, but not shaped.....	100. 2s. 6d.	
(p) Three-ply veneer.....	100 super. feet* 3s.	
(q) Veneers, n.e.i.....	Free.	
(r) Timber for making boxes or doors, being cut into shape and dressed or partly dressed. 100 feet super. face†.....	Ad val. 2s. 6d.	
(s) Picture and room mouldings.....	" 20 p.c.	
(t) Broom stocks.....	" 20 p.c.	
(u) Timber, bent or cut into shape, dressed or partly dressed, n.e.i.....	" 30 p.c.	
(v) Hickory spokes, dressed, 2 in. and under in diameter.....	Free.	
(x) Hickory, undressed.....	Free.	
(y) Elm hubs, with or without metal bands.....	Free.	
(z) Engravers' boxwood and engravers' maplewood.....	Free.	
(aa) Logs, not sawn.....	Free.	
(bb) Spars, in the rough.....	Free.	
(cc) Spokes, rims and felloes of hickory, in the rough.....	Free.	
(dd) Staves, undressed.....	Free.	
304. Wicker, bamboo and cane, all articles, n.e.i., made of, whether partly or wholly finished.....	Ad val. 45 p.c.	40 p.c.
305. Basketware, n.e.i., per cubic foot outside measurement.....	or ad val. 1s. 1½d.	1s.
	45 p.c.	40 p.c.
306. Wood, all articles made of, n.e.i., whether partly or wholly finished, including bellows, sashes and frames, wire doors, window screens, walking sticks, hods, mallets, rakes, grain shovels, saw frames, mitre boxes, wood bungs, wood type, wood rules, wash-boards and knifeboards.....	Ad val. 40 p.c.	30 p.c.
307. Wicker, bamboo, cane or wood, viz.:—		
(a) Bamboo, clouded.....	Free.	
(b) Canes and rattans, and bamboo, unmanufactured.....	Free.	
(c) Cane, compressed, in sheet and unshaped and enamelled.....	Free.	
(d) Last blocks, rough turned.....	10 p.c.	Free.
308. Brushmakers' woodware and turnery, including brush handles.....	Ad val. 30 p.c.	
309. Tool handles, unattached.....	" 20 p.c.	
310. Doors of wood—		
Sizes, 1½ in. and over.....	Each. 7s. 6d.	
" over 1½ in. and under 1¾ in.....	" 5s.	
" 1½ in. and under.....	" 3s. 6d.	
311. Photograph frames and stands for pictures, picture frames (on pictures or otherwise).....	Ad val. 35 p.c.	25 p.c.
312. Lasts and trees, wooden.....	" 35 p.c.	
313. Buggy shafts, bent but not dressed.....	Pair. 2s. 6d.	
314. Buggy shafts, bent and dressed.....	" 3s. 6d.	
315. Shafts, n.e.i., in the rough.....	" 3s.	
316. Shafts, n.e.i., dressed.....	" 4s.	
317. Bent poles, rough.....	Each. 2s. 6d.	
318. Bent poles, dressed.....	" 3s. 6d.	
319. Whiffle-tree bars.....	Doz. 3s.	
320. Shaft bars.....	Ad val. 4s. 6d.	
321. Casks, barrels and vats, n.e.i., full or empty.....	Ad val. 35 p.c.	
322. Hogsheads, second hand, full or empty.....	Each. 12s.	
323. Shooks—		
Hogshead, new.....	" 6s. 6d.	
Barrel, new.....	" 5s.	
Half hogshead, new.....	" 4s. 6d.	
Kilderkin, new.....	" 3s. 6d.	
Puncheon, new.....	" 11s.	
Hogshead, second hand.....	" 10s.	
N.E.I.....	Ad val. 35 p.c.	
324. Buckets and tubs, wooden.....	45 p.c.	35 p.c.

NOTE.—Definition of a Superficial Foot.—A superficial foot of timber shall mean an area of one square foot on one surface, and being one inch or less in thickness.

† Definition of superficial face.—The term 'super. face' means the lineal measurement of that part of the timber actually planed

IMPORT DUTIES—Continued.

Tariff Items.	General Tariff.	Tariff on Goods the Produce or Manufacture of the United Kingdom.
DIVISION XI.—JEWELLERY AND FANCY GOODS.		
325. Fancy goods, including card cases, snuff and match boxes, purses, n.e.i., wallets, thimbles, serviette rings, button hooks, shoe-horns and lifts, glove stretchers, toys, ivory and other ornamental figures, feather dusters, paper parasols articles used for outdoor and indoor games, fishing appliances n.e.i., and articles, n.e.i., used for ornamental purposes, or partly for use and partly for ornament.....	<i>Ad val.</i>	25 p.c.

BERMUDA.

THE CUSTOMS TARIFF ACT, 1906.

(No. 29, dated December 18, 1906.)

Whereas it is requisite to pass a Customs Tariff Act for providing a revenue toward the support of the government of these islands:

Be it, therefore, enacted by the Governor, Legislative Council and Assembly of the Bermudas or Somers Islands as follows:—

1. In this Act the word 'goods' means and includes all kinds of goods, wares, merchandise and live stock.

2. On and after the first day of January one thousand nine hundred and seven there shall be raised, levied, collected and paid on all goods imported into these islands, or taken out of bond from any bonding warehouse in these islands, the duties provided for by this Act, that is to say:

(1) On the goods specified in the following table of specific duties the several specific duties therein respectively set forth:—

Table of Specific Duties.

(2) On such books as are under the Copyright Act, 1848, liable to import duty, 15 per cent *ad valorem*.

(3) On all goods except such as are mentioned in the following table of exemptions, and such other goods (if any) as are exempt from import duty under any other Act, 10 per cent *ad valorem*.

Table of Exemptions.

Animals and goods imported on account of the government of these islands by any public officer or committee being the property of the public or purchased at the public expense.

Articles the property of any foreign or British colonial government imported into these islands for use at or in connection with, any establishment or institution in these islands maintained by such government solely for scientific purposes, on proof to the satisfaction of the Receiver General that such articles have been so imported.

Articles imported into these islands by or under the authority of the proper officer of His Majesty's service to be appropriated as prizes for competition by His Majesty's land or sea forces at the annual army and navy rifle meeting.

Baggage consisting of the apparel and professional apparatus of passengers and exclusive of goods intended for sale or merchandise or any goods not *bona fide* the property of the passengers.

Books except such as are under the Copyright Act, 1848, liable to an import duty of 15 per cent *ad valorem*.

Bullion.

Coals.

Coin.

Electric cable and electric cable machinery and apparatus imported into these islands by any company or person or persons under contract with His Majesty's government with the view of establishing and maintaining telegraphic communication with places beyond the sea.

Fresh fruit, except bananas and watermelons.

Horses and other beasts and all stores, provisions and goods of every description imported into these islands for the use of His Majesty's land or sea forces or any

department of His Majesty's service, being the property of His Majesty, on satisfactory proof being furnished to that effect, and on compliance by the proper officer or officers of His Majesty's government with any regulations made by the Governor in Council with respect to such importations: provided that no military officer shall, during his term of service in these islands, be allowed to import free of import duty more horses than shall be shown by the certificate of the proper officer of His Majesty's service to be required by such military officer as a necessary part of his military equipment.

Horses and other beasts, stores, provisions and other articles, and goods of every description imported into these islands by or for the use of the Naval Commander in Chief on the station and intended for use or consumption in his establishment or family in these islands.

Ice.

Official supplies imported for the use of the consulates of any foreign countries which admit similar supplies for the use of His Majesty's consulates free of duty.

Paintings, engravings, photographs and sculpture, whether monumental or otherwise.

Personal effects of inhabitants of these islands dying abroad and not intended for sale.

Regimental plate, furniture, table linen, glass, china, cutlery or band instruments, the joint property of any regimental mess or of the officers of any of His Majesty's forces stationed in these islands.

Specimens of natural history.

Tobacco dust, stems or other tobacco refuse imported solely for use for agricultural or horticultural purposes.

Trees, plants, bulbs and shrubs for planting, except such as are subject to specific duty under this or any other Act.

Uniforms, naval and military, that is to say, the special dress of naval and military officers indicating their rank and profession, and by which they are distinguished from civilians, including the necessary arms, badges, decorations and ornaments proper thereto, and imported by naval and military officers for their own personal use.

Vessels, dredgers, boats, machinery, tools, plant and materials imported into these islands by any contractor or other person for surveying or improving any of the channels or harbours of these islands under any contract or agreement with the government of these islands.

Vessels built out of these islands and subsequently sold in these islands and their appurtenances for the time being forming part of such vessels.

3. (1) The said duties shall be paid by the importer or consignee of the goods to the Receiver General or other proper officer of the Revenue Department at the office of the Public Treasury in these islands to the use of His Majesty, his heirs and successors, for and towards the support of the government of these islands, to be applied to such objects as have been or shall be authorized by the legislature of these islands.

(2) In every case in which a specific duty is imposed according to a specific quantity the same shall be deemed to apply in the same proportion to any greater or less quantity.

(3) On every cask or other package landed in these islands containing alcohol, arrack, brandy, cordials, gin, peppermint water, rum, shrub or whisky in bulk to the extent of not less than ten gallons, there shall be levied and paid by the importer or consignee into the Public Treasury, in addition to any duty payable on the contents thereof, a landing tax of three pence, which shall not be subject to refund as import duty.

4. Where the import duty payable at one time by one importer or consignee on any goods imported by one ship or payable by any person on any goods taken out of any bonding warehouse at one time, shall be paid in coin to the amount of five pounds or upwards, one-fifth at least of such duties shall be payable in lawful gold coin; pro-

vided that such gold payments shall not be required except on amounts of five pounds or multiples thereof.

5. This Act shall continue in force until and throughout the last day of December, one thousand nine hundred and seven.

FIJI.

AN ORDINANCE TO REPEAL 'THE CUSTOMS DUTIES ORDINANCE, 1898,' AND TO MAKE OTHER PROVISIONS IN LIEU THEREOF.

(No. VIII., assented to 7th June, 1907.)

Be it enacted by the Governor with the advice and consent of the Legislative Council as follows:—

1. This Ordinance may be cited for all purposes as 'The Customs Duties Ordinance 1907.'

2. On and after the commencement of this Ordinance the Customs Duties contained in the Schedule hereto shall be collected and paid in lieu of the Customs Duties heretofore payable.

3. Where any article subject to specific duty is imported in any bag, box, tin, jar, bottle or any other package intended for retail sale and marked or labelled or commonly sold as containing a specific quantity of such article, such article shall be deemed as against the importer to contain such specific quantity.

4. It shall be lawful for the Governor with the consent of the Legislative Council to direct a refund of any duties that may have been paid in respect of any materials that may have been used in the building, construction, maintenance or repair of any church or chapel or any bridge which is open to the use of the public.

5. 'The Customs Duties Ordinance 1898' and 'The Oil Fuel Ordinance 1900' are hereby repealed.

Passed in Council this seventh day of June in the year of our Lord one thousand nine hundred and seven.

List of Articles Exempt from Duty.

Agricultural implements and machines and parts thereof, the following: bottoming tools; coffee-pulpers; corn-crackers; corn-hillers; cultivators; digging-forks; earth-scoops; evaporating machines for tea, fruit and like products; fencing augers; fibre cleaning, ginning, spinning, and weaving machines; grain sowers; harrows; hoes; mattocks and picks; ploughs; scarifiers; scythes; shellers; sickles; spades; winnowing machines; handles for above wooden and unfitted.

Animals.

Bags and sacks under three bushels.

Ballast, ships'—stone or sand.

Bêche-de-mer.

Books and periodicals, printed.

Boiler-plates.

Casks and tanks for exporting molasses and spirits.

Coal.

Coats of arms, flags, and other objects sent by their respective governments for official use by consuls.

Cocoanuts.

Cocoanut fibre.

Coin.

Coke.

Copra.

Cotton, raw.

Curiosities, South Sea Island.

Cylinders for importing gas or ammonia.

Earthenware drain-pipes.

Garden seeds.

Government medals and decorations to be worn by persons resident in Fiji.

Guano.

Hides.

Horns.

Iron drums and cylinders for exporting molasses and spirits or for importing sulphuric acid.

Iron and steel rails and fish-plates, and switches, crossings, turn-tables and parts thereof, and bolts and nuts imported with and belonging to the same.

Lead for lining tea-chests.

Lint for surgical purposes.

Living oysters.

Luggage, personal, as may be from time to time permitted by the governor by any regulation made by him and published in the *Gazette*.

Machinery, and component parts thereof; agricultural, electrical, mining, sawing, sugar-making, and sugar-mill fixtures; steam-engines, oil-engines and boilers.

Manures.

Maps, including atlases and plans.

Matting for ships' dunnage.

Mats for sugar.

Microscopes.

Music, printed.

Ores.

Inside and outside packages of wood, tin, glass, paper or other material in which goods are ordinarily and actually contained.

Packages, empty, used and returned.

Paper-making machines.

Pictures and photographs, unframed.

Plants.

- Prizes imported for competition for purposes approved by the Governor.
- Pyrethrum roseum.
- Pug-mills.
- Rifles imported by and for the use of the Fiji Rifle Association.
- Sandalwood.
- School slates, copy-books, drawing-books, and other educational material and apparatus imported with the consent of the Governor for any school or mission.
- Salt for manure.
- Seeds for propagation or cultivation, including maize, beans, rice, or other grain for planting purposes on allowance by the Governor in Council.
- Shell, tortoise and pearl.
- Show-cards, patterns and cut samples, and advertising matter of no commercial value.
- Skins.
- South Sea Island produce not otherwise enumerated.
- Steel and iron punts and lighters, and plates rolled, curved, and shaped for building the same.
- Steel railway-sleepers, and bolts and nuts imported with and belonging to the same.
- Sulphur.
- Timber, cut for cases, not exceeding three feet in length, for exporting fruit.
- Tin, cut for exporting produce.
- Uniforms imported by a public servant for his own use.
- Vaccine lymph and other anti-toxins.
- Vegetables and green fruit not otherwise enumerated.
- Water and wind motors.
- Wire, fencing, barbed and plain, black and galvanized.
- Woolpacks.
- If imported to be used in connection with the manufacture of tobacco, cigars or cigarettes—machinery, cedar boxes, linings, tapes and labels for such boxes, ribbons and rings for cigars, gold-foil, silver-foil and tin-foil, cigarette papers, cartons, labels, tins and boxes for tobacco and cigarettes and labels for such tins or boxes.
- Articles imported as the property of and for the use of the Pacific Cable Board on allowance by the Governor in Council.

THE SOLOMONS (CUSTOMS) REGULATION, 1907.

(*'Fiji Royal Gazette,' No. 9, of March 1, 1907.*)

IMPORT DUTY ON TOBACCO.

1. On and after the coming into force of this regulation, duty at the rate of one shilling for each pound avoirdupois weight shall be collected and paid on all tobacco manufactured and unmanufactured imported into the Protectorate. Provided that any duty that may have been properly and lawfully collected under the provisions of 'The Solomons (Tobacco) Import Duty Regulation, 1906,' that is to say after the third day of November, one thousand nine hundred and six, shall be deemed to have been collected under this regulation.

NEW ZEALAND.

A complete copy of the new tariff recently introduced in the New Zealand parliament has just been received by the Department of Trade and Commerce. This tariff, though enforced at present, has not passed the New Zealand parliament. Some changes, however, will likely be made.

CUSTOMS DUTIES.

Resolutions from the Committee of Ways and Means.

Resolved, that all duties of Customs, and all exemptions from such duties, as specified in the schedules to the Customs and Excise Duties Act, 1888, the Customs and Excise Duties Act, 1895, the Customs Duties Amendment Act, 1900, and the Preferential and Reciprocal Trade Act, 1903, and also all duties imposed by His Excellency the Governor under section 17 of the Customs and Excise Duties Act, 1888, be repealed, and that there shall be levied, collected, and paid to and for the use of His Majesty on all goods imported into New Zealand after the sixteenth day of July, nineteen hundred and seven, or entered for home consumption after that date, the several duties of Customs mentioned in schedules A and B.

Resolved, that the goods mentioned in schedule B shall, except as otherwise provided for in that schedule or in schedule E, be exempt from duties of Customs if imported into New Zealand after the sixteenth day of July, nineteen hundred and seven, or if entered for home consumption after that date.

Resolved, that any goods delivered upon a deposit or other security of duty on or before the sixteenth day of July, nineteen hundred and seven, shall be liable to the duties in force at the time of such delivery.

Resolved, that there shall be levied, collected, and paid to the use of His Majesty on all goods specified in schedules C, D and E, and not being the produce or manufacture of some part of the British dominions, if imported into New Zealand after the respective dates hereinafter specified in this resolution, or entered for home consumption after the said dates, in addition to the duties (if any) authorized under schedules A and B, the duties of Customs following, that is to say:—

(1.) On the articles specified in schedule C, if so imported or entered after the sixteenth day of July, nineteen hundred and seven, an amount equal to the amount payable on these articles under schedule A.

(2.) On the articles specified in schedule D, Part I., if so imported or entered after the sixteenth day of July, nineteen hundred and seven, an amount equal to one-half of the amount payable on these articles under schedule A, except so far as otherwise provided in the said schedule D, Part I.

(3.) On the articles specified in schedule D, Part II., if so imported or entered after the thirty-first day of March, nineteen hundred and eight, an amount equal to one-half of the amount payable on these articles under schedule A.

(4.) On the articles specified in schedule D, Part III., if so imported or entered after the thirty-first day of March, nineteen hundred and eight, an amount equal to twenty per centum of the amount payable on these articles under schedule A.

(5.) On the articles specified in schedule E, Part I., if so imported or entered after the sixteenth day of July, nineteen hundred and seven, duties of Customs equal to twenty per centum of the value for duty as defined by the Customs Laws Consolidation Act, 1882, or its amendments.

(6.) On the articles specified in schedule E, Part II., if so imported or entered after the thirty-first day of March, nineteen hundred and eight, duties of Customs equal to twenty per centum of the value for duty as defined by the Customs Laws Consolidation Act, 1882, or its amendments.

(7.) On the articles specified in schedule E, Part III., if so imported or entered after the thirty-first day of March, nineteen hundred and eight, duties of Customs equal to ten per centum of the value for duty as defined by the Customs Laws Consolidation Act, 1882, or its amendments.

Resolved, that section 9 of the Customs and Excise Duties Act, 1895, be repealed, and that the following provisions be substituted therefor as from the sixteenth day of July, nineteen hundred and seven:—

(1.) The articles in which spirit is a necessary ingredient, permitted to be manufactured in any warehouse or place of security approved and appointed under section 26 of the Customs Laws Consolidation Act, 1882 (hereinafter called manufacturing warehouse), shall be limited to the following articles when made under such conditions, in such quantities, and according to such formulæ as may from time to time be approved by the Minister of Customs, that is to say: Perfumed spirit, spirituous preparations for the toilet, culinary or flavouring essences, and medicinal preparations (excepting medicated wine or wine mixed with food).

(2.) Before delivery from any manufacturing warehouse there shall be paid to and for the use of His Majesty a duty on such articles in accordance with the following scale, that is to say:—

On perfumed spirit.	20s. the liquid gallon.
On toilet preparations which are subject to 16s. the liquid gallon on importation	12s. “
On toilet preparations which are subject to 25 per cent duty on importation.	6s. “
On culinary and flavouring essences.	12s. “
On medicinal preparations (excepting medicated wines or wines mixed with food) containing more than 50 per cent of proof spirit.	9d. per pound.
Medicinal preparations (excepting medicated wines or wines mixed with food) containing 50 per cent of proof spirit or less.	Free.

(3.) The Minister of Customs may prohibit the manufacture of any article included under the foregoing headings, if in his judgment such manufacture is detrimental to the revenue derived from the duty on spirits.

Resolved, That all orders and decisions of the Minister of Customs issued under the authority of the Customs and Excise Duties Act, 1895, and published in the *Gazette*, classifying articles as ‘Minor articles, required in the making-up of apparel, boots, shoes, hats, caps, saddlery, umbrellas, parasols, and sunshades,’ or as ‘Articles and materials which are suited only for, and are to be used solely in, the fabrication of goods within the colony,’ shall remain in full force and virtue (except where otherwise provided in these resolutions or in the schedules thereto) until cancelled or modified by a subsequent order or decision of the Minister of Customs.

Resolved, That in the case of tea grown in any part of the British dominions and imported into New Zealand after the sixteenth day of July, nineteen hundred and seven, or entered for home consumption after that day, the same duties shall be payable as if the words ‘five pounds’ were substituted for the words ‘one pound’ in section 9 of the Preferential and Reciprocal Trade Act, 1903, and that the said section be amended accordingly.

Resolved, That these resolutions shall not extend to any of the islands situated within the boundaries set forth in the schedule to the Cook and other Islands Government Act, 1901, and that, until otherwise determined by any Act to be passed or by

other lawful authority, the duties and exemptions now in force in those islands shall continue to be paid and allowed.

Resolved, That nothing in these resolutions shall be so construed or shall so operate as to conflict with the schedule of Customs duties and exemptions contained in the order in council made by the Governor on the seventh day of January, nineteen hundred and seven, for the purpose of carrying into effect a certain treaty therein referred to, and made between the government of New Zealand and the government of certain colonies in South Africa.

NOTE.—In these resolutions and schedules, if not inconsistent with the context, the expression 'the tariff' means and includes schedules A, B, C, D and E.

The headings of the respective classes in schedules A and B are used solely for convenience of classification, and shall not in any way affect the articles specified therein, or be construed to indicate the material of which any such article is made.

The word 'iron' includes steel, or steel and iron combined.

Neither steam-engines, nor parts of steam-engines, nor boilers (land or marine), nor fuel-economizers, steam-superheaters, or mechanical stokers are included in the expression 'machines' or 'machinery' as used in the tariff.

Arsenic.

Borax.

Calcium carbide, chloride, sulphate, sulphite, and disulphite; chlorinated lime.

*Class V—Continued.*Drugs and Chemicals, viz.—*Con.*

Carbon bisulphide.

Copper sulphate, or bluestone, oxide of copper.

Iron sulphates.

Magnesium sulphite, and bisulphite.

Manganese oxides.

Phosphorus.

Potash; pearlash; potash, caustic, chlorate, cyanide, nitrate (or saltpetre), permanganate, prussiates, sulphite, and bisulphite; metallic potassium.

Silver nitrate in crystals.

Soda acetate, crude; soda ash; soda, arseniate, anhydrous carbonate, caustic, cyanide, bisulphite, hyposulphite, silicate, sulphate, sulphide, sulphite, nitrate, permanganate.

Metallic sodium.

Zinc chloride.

(NOTE.—Mixtures of any of the articles enumerated under this schedule as drugs and chemicals, with each other, or with chemicals, or substances not enumerated, shall, if not provided for elsewhere in the tariff, be charged as medicinal preparations not otherwise enumerated, or chemicals not otherwise enumerated 20 per cent *ad valorem*).

Drugs crude, not powdered, and unsuited for use as foods, or in the manufacture thereof, viz.: Barks, woods, twigs, leaves, herbs, flowers (except hops), roots, corms, gums, balsams, inspissated juices (except opium), seeds, fruits, fruit rinds, pitch, cantharides, ergot.

Essential oils, except eucalyptus; cod liver oil; oil of rhodium.

Horse, and cattle drenches.

Opium when entered to be warehoused in a manufacturing warehouse, for the purpose of making therein approved medicinal preparations.

Scrub exterminators.

Sheep dip; sheep drenches; sheep licks.

Surgeons', physicians', dentists', and opticians' instruments, also such appliances peculiar to medical, or surgical use, as may from time to time be approved by the minister, imported solely for the use of a public hospital, on a declaration by the chairman of the district board of such hospital that the goods are solely for the use of the said institution, and will not be sold, or disposed of, without payment of the duty.

Surgeons', physicians', dentists', and opticians' materials, viz.: Antiseptic dressings, gauzes, lint, tow, cotton wool, poroplastic felt, adhesive plaster, oiled silk or other fabric, spongio piline, bandages, catgut, and sterilized, and other sewings, thermometers; also appliances including splints for wear, peculiarly adapted to correct a deformity of the human body, to afford support to an abnormal condition of the human body, or to reduce or alleviate such condition, or to substitute any part of such body.

Crutches; ear trumpets, ear tubes, and audiphones, for the partially deaf. Opticians' trial cases, lenses, and frames, spectacles, and magnifying glasses, ophthalmoscopes, optometers and other measuring instruments, test cards, and diagrams, artificial eyes (demonstration and other).

Dentists' materials, viz.: Artificial teeth, tooth crowns, celluloid blanks, base plates, denture strengtheners, gutta percha stick, points, pellets, and sheets, rubber dam, amadou absorbent, absorbent paper, rubber in sheets, metal-plate, wire, foil, sticks, solder; fusible metal, porcelain powder, and enamel, inlays, modelling composition, and wax, investment compound, amalgam, and cement. Tools for lathes.

Scientific and philosophical instruments and apparatus, namely: Assay-balances; laboratory retorts, and laboratory flasks, and other instruments, and apparatus, for chemical analysis, and assay work; assay furnaces, including dentists', and jewellers' furnaces; also such instruments and apparatus, suited strictly for scientific and philosophical purposes, as may from time to time be approved by the minister.

Class VI.—Clothing and Textiles.

Brace-elastic and brace-mountings.

Brattice cloth made of jute or hessian.

Bunting, in the piece.

Butter, and cheese, cloth.

Buttons, tapes, wadding, pins, needles.

Calico, white and grey, also cotton sheetings, in the piece, up to and including October 31, 1907.

Corduroy, moleskin and plain beaver-skin, of cotton, in the piece, up to and including October 31, 1907.

Coloured cotton shirtings, flannelette shirtings, up to and including October 31, 1907.

Forfar, Dowlas and flax sheeting, when cut up under supervision in sizes not exceeding 47 in. by 36 in., for making flour-bags, and not exceeding 54 in. for lining wool mats, up to and including October 31, 1907.

Cotton or linen piece goods, and unions of the same, not otherwise enumerated, except imitation silks composed of any material or substance whatsoever, on and after November 1, 1907.

Fur skins, green or sun-dried.

Gold or silver lace or braid for military clothing, featherstitch braid.

Hatmakers' materials, viz.: Felt hoods; shellac; galloons; calicoes; spale boards for hat boxes; leathers; silk plush in the piece; linings, when cut up or otherwise, under such conditions as the minister may prescribe; blocks; moulds; frames; ventilators, and tassels.

Hessians, plain or striped, and scrim.

Leather cloth, plain colours.

Minor articles (required in the making-up of apparel, boots, shoes, hats, caps, saddlery, umbrellas, parasols and sunshades), enumerated in any order of the minister, and published in the *Gazette*.

Ostrich feathers grown in New Zealand, when returned from abroad dressed, or dyed, upon evidence being produced to the satisfaction of a collector of customs as to their previous exportation.

Sailcloth, canvas and unbleached doublewarped duck, in the piece.

Sewing cottons, silks, and threads; angola mendings not exceeding 45 yards in length; crewel, flourishing, embroidery, darning, knitting, and crochet threads of silk, linen or cotton, or unions of the same, plain or fancy.

Silk for flour dressing, in the piece.

Silk twist (shoemakers' and saddlers').

Staymakers' binding, eyelets, corset-fasteners, jean, ticks, lasting, sateen and cotell; also corset shields and busk protectors.

Tailors' trimmings, viz.: Haircloth; plain or coloured imitation haircloth; canvas; buckram; wadding, and padding; silk, worsted and cotton bindings, and braids; stay bindings; Russia braids; shoulder-pads; buckles; silesias; drab, slate and brown jeans; pocketings; slate, black and brown dyed unions and linens; Verona and Italian cloth, of cotton or wool, or unions of the same; also such other lining materials as may be approved by the minister.

Tubular woven cotton cloth in the piece for meat-wraps.

Umbrella-makers' materials, viz.: Reversible and levantine silk mixtures, gloria, and satin de chene, of not less than 44 in. in width; alpaca cloth, with border; zanella cloth, with border; also other piece-goods on such conditions as the minister may approve; sticks, runners, notches, caps, ferrules, cups, ribs, stretchers, tips and rings.

Union textiles not otherwise enumerated, in the piece, when cut up, and made into shirts or pyjamas, under such conditions and regulations as the minister may prescribe.

Waterproof material in the piece, having within, or upon it, a coating of india-rubber.

Class VII.—Leather and Articles used in Leather Manufactures.

Boot elastic.

Bootmakers' linings, canvas, plain or coloured, bag and portmanteau linings, of such materials, qualities and patterns, as may be approved by the minister.

Boots, shoes, shoettes, sandals, clogs and pattens, slippers and goloshes, namely, children's No. 0 to 6.

Cork soles and sock-soles.

East India kip, also hides, crust or rough tanned, but undressed.

Goat skins and kid skins, however dressed.

Grindery, namely, button fasteners and staples; eyelets and hook eyelets, and eyelet rings; tingles; spikes for running or cricketing shoes; boot-protectors; wood or rubber heels or knobs; leather toe-tips, 'Wells' patent or a similar make, stiffeners or toes moulded ready for use, copper toes, boot stretchers and trees, hollow-fillers, japanned toe-tips; legging springs and stiffeners; lasting tacks, pegs, brass rivets, iron rivets; brass, iron and copper cut-bills; steel points, sparrow bills; wrought, cut and malleable hob-nails; Hungarian nails; wrought and cut tip-nails; iron or wooden lasts; riveting stands for iron lasts; sole, heel, stiffening and toe-cap knives; shoemakers' wax; heel-balls; bristles, hemp and flax; rubber solution or cement; welting cut into strips or in coils ready for use; shoemakers' binding or beading; welting leather cut into strips not exceeding 1 in. in width; webbing; curriers', and bootmakers' inks or stains; bootmakers' sectional cutting boards; glass or emery paper, or cloth, on sheets, in rolls, or cut into shapes.

Hog skins.

Kangaroo and wallaby skins, undressed.

Leather, japanned or enamelled.

Saddle-trees.

Saddlers' ironmongery (except bits and stirrup-irons), hames and mounts for harness; straining, surcingle, brace, girth and roller webs; collar checks and the same articles plain, of such quality as may be approved by the minister; legging-buckles, also metal articles required to repair or complete riding or driving harness, or saddlery, to be repaired or made in the colony.

Tanning materials, crude.

Class VIII.—Furniture, &c.

Blind webbing, and tape. Worsted covered cord, and solid glace cord, for venetian, and other blinds.

Upholsterers' materials, viz.:—webbing, hair-seating, imitation hair-seating; curled hair; gimp, and cord, of wool, cotton, or silk; tufts, and studs; chair canvas.

Class IX.—China, Glass, &c.

Bottles, empty, plain, glass, not being cut, or ground; also, jars, plain, glass, or plain earthen, up to three inches diameter at the mouth.

Earthen, or glass roofing tiles; also roofing slates.

Glass plates (engraved) for photo-lithographic work.

Jars specially suited to contain sulphuric, nitric, hydrochloric, and other strongly corrosive acids, when permanently branded with the name of any such acid and the name of a New Zealand factory for the manufacture of the same.

Jars, or other dutiable vessels, containing free goods, or goods subject to a fixed rate of duty, and being ordinary trade packages for the goods contained in them.

Lamps, miners' safety, and glasses therefor; lamps peculiarly adapted for use on harbour beacons and lighthouses, also appliances peculiar to such lamps; side lights, and head lights, especially suited for the use of ships.

Class X.—Fancy Goods, &c.

Action work, and keys, in frames, or otherwise, iron, or metal piano frames, for manufacture of organs, harmoniums, and pianos; organ pipes, and stop-knobs.

Articles, being exhibits for public display only in public museums, whether purchased under bond or directly imported by, or for presentation to such museums, upon declaration that such goods will not be sold or otherwise disposed of in New Zealand without payment of any duty which may be payable.

Artists' materials—viz., Canvas in the piece or on stretchers, oiled paper or drawing paper in sheets or blocks, colours, brushes, palettes, and palette knives.

Cigarette papers entered to be warehoused in any licensed tobacco manufactory for the manufacture therein of cigarettes.

Microscopes, and telescopes, and slides, and lenses, for same.

Paintings, statuary, and works of art, whether purchased under bond or directly imported by, or for presentation to any public institution or art association registered as a body corporate, for display in the buildings of such institution or association, and not to be sold or otherwise disposed of.

Paintings or pictures, painted or drawn by New Zealand students, within three years of the time of their departure from the colony for the purpose of undergoing a period of tuition abroad for the first time, upon evidence being produced to the satisfaction of a Collector of Customs.

Photographic cameras, and lenses, including focusing cloths, and camera covers.

Photographs of personal friends in letters or packets.

Precious stones, cut or uncut, if unmounted.

Sensitized surfaces, and albuminized paper, plain, not being postcards or other stationery.

Class XI.—Paper, &c.

(NOTE.—In every case where exemption from duty is governed by a size, the equivalent area shall be exempt under like condition.)

Bookbinders' materials, viz., cloth, leather, thread, headbands, webbing, end-papers, tacketing-gut, marbling-colours, marble-paper, blue orred paste for ruling-ink, staple-presses, wire staples, staple-sticks.

Butter paper (known as vegetable parchment paper), and waxed paper, unprinted.

(NOTE.—Butter paper or waxed paper, printed, shall be charged as manufactured stationery.)

Cardboard, pasteboard, strawboard, wood-pulp board, and corrugated board, of size not less than that known as 'royal' and weighing not less than 3 oz. per sheet of 'royal' size.

Cardboard boxes, material for—viz., gold, and silver paper, plain or embossed; embossed paper in strips; gelatine or coloured papers; known as 'box papers.'

Cartridge drawing paper.

Celluloid, plain, in sheets, not otherwise enumerated.

Cloth-lined boards, not less than 'royal' size.

Cloth-lined paper, and enamelled, gelatine and metallic paper, of size not less than 'demy'; also 'ivorite' of size not less than 'demy.'

Copy-books, having printed headlines on each page; also drawing-books.

Copying paper, medium and larger sizes, in original mill wrappers and labels.

Ink, printing, of net invoice value not exceeding 4d. the lb.

Masticated para.

7474—10½

Millboard, and book-binders' leather board.

Paper, hand-made or machine-made, book, or writing, when in original wrappers, of sizes not less than the size known as 'demy,' and not being a wrapping paper, or of the same quality as a wrapping paper.

Paper printing.

Printed books, papers, and music, not otherwise enumerated, excepting advertising matter.

Class XII.—Metals.

Agricultural machines and agricultural implements, not otherwise enumerated: also parts peculiar to the manufacture of agricultural machines, and implements—viz.: Chaff-cutting knives, fittings for threshing mills, forgings or castings for ploughs, discs for harrows, plough-shares, mould-board plates, and steel-share plates cut to pattern, skeith-plates, tilt-rakes, also reaper-knife sections or fingers, finished brass, and steel springs.

(NOTE.—Agriculture as applied to the Tariff shall include horticulture and viticulture.)

Anchors.

Artificers' tools, not otherwise enumerated, not including brushes or brushware; also the following tools, namely: axes and hatches, spades, shovels, forks, picks, mattocks, quartz and knapping hammers, scythes, sheep-shears, reaping hooks, soldering irons, paperhangers' scissors, butchers' saws or cleavers; measuring bands or tapes.

Axles, axle-arms, and axle boxes.

Bellows nails.

Bicycles and tricycles, fittings for—namely: Rubber tyres, pneumatic tyres, outside covers, and inner tubes, handle grips, pedal rubbers; also the following articles when not plated, japanned, painted, or varnished, namely: drop forgings, stampings, steel balls, weldless steel tubes with or without butted ends, wood or metal rims (not bored), forks, stays, handle bars, and seat pillars, unbuilt, bracket shells, fork, and stay ends, fork tips, bridges, crowns, and lugs.

Beekeepers' tools implements, and apparatus, namely: metal fittings for bee hives, bee smokers, wax-extractors, rubber gloves, gloves of textile soaked in oil, queen cages, comb foundation, foundation machines, honey knives, honey extractors, queen rearing outfits, wax presses, tools peculiar to the use of beekeepers.

Blacksmiths' anvils, forges, and fans.

Bolts, and bolt ends, up to 24 inches in length; nuts, blank or screwed nuts, black or finished nuts.

Brass, copper, and tin, in pigs, bars, tubes or sheets; also tinned hoops.

Brass tubing, and stamped work, in the rough, for gaseliers and brackets.

Caps, percussion.

Card clothing, for wollen-mills, and for paper-mills.

Castings for ships; also propeller-screws, including only bosses and blades.

Chains, iron, plain, or with hook, swivel, or ring, attached.

Copper, brass, and composition rod, bolt, sheathing, and nails.

Couch-roll jackets, machine wires, beater-bars, and strainer-plates, for paper-mills.

Crucibles.

Emery grinding machines, and emery wheels.

Empty iron drums, not exceeding 10 gallons capacity.

Engineers', and all metal or wood or stone-workers' machine tools or hand tools, not including brushes or brushware.

Engine-governors.

Eyelets.

Fire-engines, chemical fire-engines, and chemical fire-extinguishers; also fire-hose and couplings therefor, portable fire-escapes, fire-ladders, fire-reels, and firemen's helmets, if declared, to the satisfaction of the Collector, for the use of a fire-brigade.

Fish-hooks, unmounted, and without attachments.

Gas engines, and hammers, and oil engines.

Glassmakers' moulds.

Iron boiler-plates and unflanged end-plates for boilers; boiler-tubes not exceeding 5 inches in internal diameter and unflanged; expansion rings; furnace-flues.

Iron pipes, and fibre pipes, not exceeding 5 inches in internal diameter, also knees, bends, elbows, and other fittings for same.

Iron, sheet, plate, hoop, rod, bolt, bar, angle, tee, channel, plain black; pig iron; plain iron rolled girders; rolled chequered plates; shafting, plain rolled or plain turned, but otherwise unwrought.

Iron and steel cordage.

Lead, in pigs and bars.

Machine saw-blades.

Machinery—viz.: dairying machinery (including cream-separating machines, also coolers), mining machinery, gold-saving machinery.

Medals, including only old or second-hand war medals, humane societies', and other similar medals; also old coins.

Metal fittings, for trunks, portmanteaux, travelling bags, leggings, bags, and satchels.

Metal sheaves.

Metal tubes in the rough, having a slit through their whole length, suited for the manufacture of fenders, bedsteads, gates, and the like articles.

Metal-wire of all kinds, plain, number 5 gauge and over according to British standard; metal cordage not otherwise enumerated, not being gold or silver; also barbed fencing-wire, and fencing-staples.

Metal wove-wire, and metal gauze; also wire-netting, and expanded metal lathing or fencing, in the piece.

Metallic capsules.

Moulders' chaplets, and dowels.

Perambulators, and the like vehicles, fittings for, not otherwise enumerated.

Perforated or cellular sheet zinc or iron.

Portable engines on four or any greater number of wheels, with boiler of locomotive type; also traction engines.

Printing type, and printing materials, not otherwise enumerated, suited only for the use of printers.

Rails for railways and tramways, including lay outs, and points, and crossings, for the same.

Rivets, and washers.

Set screws, engineers' studs, and split pins.

Sewing, knitting, and kilting machines.

Stem or hydraulic pressure, and vacuum gauges; pressure indicators or pressure gauges for gas or oil engines; speed indicators, engineers', for testing machinery.

Surveyors instruments—viz., steel bands, chains, measuring tapes, field instruments, and drawing instruments; draughtsmen's drawing instruments.

Tacks and nails, 1 inch and under.

Tea packing lead.

Tinsmith's fittings, and furniture, including stamped or blocked tin or copper, planished or unplanished.

Welded and flanged boiler furnaces, plain or corrugated.

Zinc, plain sheet.

Zinc plates or copper plates for photo-lithographic work.

Class XIII.—Timber, &c.

Ash, hickory and lancewood timber, unwrought.

Blacksmiths', braziers', assay and treadle power bellows.

Carriage or cart makers' materials, viz.: Shafts, spokes and felloes, in the rough; hubs, all kinds; poles if unbent and unplanned, all kinds; bent wheel rims.

Churns.

Lignum-vitæ.

Material for the manufacture of carriages, carts, drays and wagons, motor cars or vehicles, and railway cars or wagons, viz., springs, mountings, trimmings, brass hinges, tire bolts, shackle holders, step treads, rubber cloth, rubber tires, pneumatic tires, outer covers, inner tubes; also iron or metal fittings (except steps, lamp irons, dash irons, seat rails and fifth wheels) for the manufacture of carriages, carts, drays and wagons, other than motor cars or vehicles or railway cars or wagons.

Motor cars, and wheels for same.

Sieves, hair.

Wooden handles for tools.

Class XIV.—Oils, &c.

Oils in vessels capable of containing one gallon of oil or more, viz.: Refined mineral oils not exceeding in specific gravity .870 at 60 deg. F.; fish, penguin, mutton bird, seal and whale oils.

(NOTE.—Mixtures of mineral or vegetable oils, with each other, or with fish, penguin, mutton bird, seal, whale, or other oils, shall be charged with duty (1) if imported in vessels capable of containing one gallon of oil or more, 6d. the gallon; (2) if imported in vessels having a lesser capacity than one gallon, 20 per cent *ad valorem*).

Paints and colours, not otherwise enumerated.

Turpentine; turpentine substitute composed of volatile mineral oils, or of volatile mineral oils in combination with turpentine, or other volatile vegetable oils; liquid driers; terebene.

Wood naphtha.

Class XV.—Agricultural Farm Products, &c.

Linseed.

Class XVI.—Miscellaneous.

Apparatus, appliances, articles and materials, for educational purposes, as may be approved by the minister, and under conditions prescribed by him.

Bagging, bags or sacks, of jute or hessian; also cornsacks; bags made of New Zealand tow or flax.

Belting, for driving machinery, other than leather belting, and not being cordage or rope.

Binder twine, two-ply and under.

Bricks, other than fire-bricks.

Candle-nuts and candle-nut kernels.

Candle-wick.

Canvas aprons and elevators, for reapers and binders.

Canvas, indiarubber, or other hose, tubing, or piping, armoured or otherwise; flexible metal hose, tubing or piping.

Charts and maps.

Confectioners' moulding starch.

Cork, cut; bungs, fishermen's cork floats; also plain unornamental stoppers of every description for bottles, jars and casks.

Cotton and other waste, engineers.

Diving dresses and dresses suited solely for use in poisonous gases or smoke, with apparatus peculiar thereto.

Dyes; dye stuffs, and dyeing materials, crude.

Felt sheathing.

Gum boots, knee or thigh, the soles of which may be either leather or rubber.

Hawfers of 12 in. or over.

Honey and brown Windsor soap composition.

Indiarubber gloves.

Manures.

Marble, granite and other stone, hewn or rough sawn, not dressed or polished.

Netmakers' cotton twine.

Official supplies for consular officers of countries where a similar exemption exists in favour of British consuls.

Paper-makers' felts.

Passengers' baggage and effects, including only wearing apparel and other personal effects that have been worn, or are in use by persons arriving in the colony; also implements, instruments and tools of trade, occupation or employment, of such persons, not exceeding £50 in value, and household or other effects not exceeding £100 in value, which have been in use for twelve months prior to embarkation by the persons or families bringing them to the colony, and which are not intended for any other person or persons, or for sale; also cabin furnishings belonging to such persons not exceeding in value £10: Provided that goods falling within the above exemption may be admitted free, only, if imported within two years of the first arrival in the colony of the persons or families by whom they have been used.

Plaster of Paris.

Powder, viz.: Blasting powder and blasting meal.

Returned empties which are identified as such to the satisfaction of a collector of customs.

Shipbuilders' models of vessels suited only for exhibition.

Ship chandlery, not otherwise enumerated.

Ships' rockets, blue lights, danger-signals and rocket life-saving apparatus.

Stones, mill, grind, oil and whet.

Tobacco for sheep-wash, or for insecticide, after being rendered unfit for human consumption to the satisfaction of the minister.

Treacle or molasses, mixed with bone-black in proportions to the satisfaction of the minister.

Typewriters.

Wax, bottling.

Wool packs and wool pockets.

Yarns, viz.: Coir, flax, jute and hemp.

Articles and materials (as may from time to time be specified by the minister) which are suited only for, and are to be used solely in, the fabrication or repair of goods within the colony. All decisions of the minister in reference to articles so admitted free to be published from time to time in the *Gazette*.

And all articles not otherwise enumerated: Provided that all goods falling under this schedule, which are prison-made, shall be charged an *ad valorem* duty of 20 per cent.

PREFERENTIAL TARIFF.

SCHEDULE C.

Cement, Portland, and other structural and building cement.

SCHEDULE D.—PART I.

Basketware and wickerware, not otherwise enumerated, not being furniture.

Bicycles, tricycles and the like vehicles, also finished, or partly finished or machined parts of the same, not otherwise enumerated.

Boots, shoes, shoettes, sandals, clogs and pattens, not otherwise enumerated, namely: Men's, above size No. 5; youths', above size No. 1; boys', Nos. 7 to 1, both inclusive; women's, above size No. 1; girls', Nos. 7 to 1, both inclusive; boots, shoes, shoettes and sandals, clogs and pattens, not otherwise enumerated; slippers and goloshes (not including evening and court shoes, law tennis and gymnasium shoes, strapped shoes, shoes goloshed, or bottomed, in India rubber, leather, or other material).

Candles.

Carriages, carts, drays, wagons, perambulators and the like vehicles, and wheels for the same.

China, porcelain and parian ware.

Clocks, time registers and time detectors.

Cordage, rope and twine, not otherwise enumerated.

Earthenware, stoneware and brownware.

Fancy goods and toys; also sporting, gaming and athletic requisites, not otherwise enumerated, including billiard tables and billiard requisites; hair and toilet combs.

Firearms, all kinds.

Fish, potted and preserved.

Furniture and cabinetware, not otherwise enumerated, and other than iron or other metal.

Glassware; globes and chimneys, for lamps.

Hardware, ironmongery and hollow-ware.

Hops.

Iron and other nails, not otherwise enumerated, including dog-spikes.

Iron pipes and fibre pipes, exceeding 5 in. in internal diameter; also knees, bends, elbows and other fittings for the same.

Jewellery; plate, gold, or silver; plated ware; greenstone, cut or polished.

Lamps, lanterns and lamp-wick, not otherwise enumerated.

Lawn-mowers.

Motor vehicles, not otherwise enumerated, and wheels for same.

Musical instruments.

Paper-wrapping, all kinds, not printed, including blue candle, glazed cap, glazed casings, small-hand, lumber-hand, tissue, brown, cartridge and sugar papers.

Upholstery, not otherwise enumerated.

Walking-sticks.

Preferential duties upon the articles hereafter enumerated to be charged up to and including October 31, 1907, thereafter to cease and determine:—

Cream of tartar.

Glass, crown, sheet and common window.

Glass, plate, polished, coloured and other kinds, not otherwise enumerated.

Paper-hangings.

SCHEDULE D.—PART II.

Preferential duties upon the items hereafter enumerated shall only be charged after March 31, 1908:—

Bill-hooks, bush-hooks, slashers and hedge-knives.

Brooms, brushes and brushware.

Cartridges (shot), 10 to 24 bore.

Cartridge-cases.

Cartridges, not otherwise enumerated.

Cars, wagons and trucks, railway and tramway, and wheels for same.

Electric batteries and cells; furniture, fittings, instruments and appliances, not otherwise enumerated, for the generation, transmission, application, or utilization of electricity, or of electric power of any description whatsoever.

Fish, dried, pickled, or salted, not otherwise enumerated.

Galvanized iron manufactures, not otherwise enumerated, made up from galvanized iron, or from plain sheet iron and then galvanized.

Heelplates and toe stiffeners, and toe plates.

Japanned and lacquered metalware.

Laces, vamps and uppers.

Lay figures, busts and dress stands.

Leather bags and leathercloth bags, not otherwise enumerated.

Leather cut into shapes.

Leather leggings.

Leather manufactures not otherwise enumerated.

Magic lanterns, bioscopes, cinematographs, kinetoscopes, phonographs, gramophones, graphophones, and the like instruments, including accessories peculiar thereto; also limelight and the like apparatus, including accessories peculiar thereto.

Mantelpieces, other than stone.

Manufactured or partly manufactured articles of metal, or manufactured or partly manufactured articles of metal in combination with any other material whatsoever, not otherwise enumerated.

Matches:—

Wooden, in boxes containing not more than 60 matches.

In boxes containing over 60 and not more than 100 matches.

In boxes containing more than 100 matches.

Wax, 'plaid vestas' in cardboard boxes containing under 100 matches.

Wax, 'pocket vestas' in tin or other boxes, containing under 100 matches.

Wax, 'Sportsmen's,' 'Ovals,' and 'No. 4 tin vestas,' in boxes containing not more than 200 matches.

Wax, other kinds.

Matches of any material other than wood or wax.

Paper bags, coarse (including sugar bags).

Paper bags not otherwise enumerated.

Picture, or photograph, frames or mounts.

Statues, statuettes, casts and bronzes.

Tinware and tin manufactures, not otherwise enumerated.

Tobacco pipes and cases, cigar and cigarette holders and cases, cigarette cases and papers.

Woodenware and turnery, not otherwise enumerated, and veneers.

Cocoa-nut butter, cocoa or cacao butter, nut butter, and other refined vegetable butters or fats.

Lard and refined animal fats, not otherwise enumerated.

Meats, potted or preserved.

Provisions, not otherwise enumerated.

Vegetables, fresh, dried or preserved.

Fruits, preserved in juice or syrup.

Milk or cream, preserved, evaporated or dried.

Aerated and mineral waters, effervescing beverages, and beverages not otherwise enumerated.

Coffee, essence of, and essence of coffee with milk or any other food substance.

Fruit juices or imitation fruit juices, unsweetened, in containers of less than ten gallons capacity.

Fruit juices or imitation fruit juices, sweetened; syrups; raspberry vinegar, sweetened.

Baking powder; yeast preparations and other ferments; also yeast foods.

Chemicals and chemical preparations, not otherwise enumerated, including photographic chemicals, not otherwise enumerated; also, anti-incrustation, boiler and other compounds.

Dextrine and dextrine pastes or solutions.

Essences, flavouring, not otherwise enumerated.

Eucalyptus oil in bulk or bottle.

Glycerine, refined.

Medicinal preparations, drugs and druggists' sundries, and apothecaries' wares, not otherwise enumerated; also aerated water makers' and cordial manufacturers' and brewers' drugs, chemicals and other sundries, not otherwise enumerated.

Medicinal preparations (excepting medicated wines or wines mixed with food) containing 50 per cent of proof spirit or less.

Saccharin, in the form of tablets, pilules, granules, or cachets, each containing not more than $\frac{1}{2}$ grain of saccharin in combination with at least 10 per cent of alkali.

Surgeons', physicians', dentists', and opticians' instruments and appliances, not otherwise enumerated.

Leather, chamois.

Saddlery and harness; whips and whip-thongs.

Portmanteaux; trunks; travelling-bags and brief bags, of leather or leather-cloth, 10 in. in length and upwards; and carpet bags.

Furniture, knife, and plate powder and polish.

Bricks, known as fire-bricks.

Drainage pipes and drainage tiles.

Earthen flooring and garden tiles.

Filters.

Fireclay ground, and fireclay goods.

Plate glass bevelled or silvered; mirrors and looking glasses, framed or unframed.

Fishing tackle, including artificially baited hooks, other than flies.

Mouldings and panels, in the piece, or either wood, plaster pulp, metal or other material, for picture frames, cornices, walls or ceilings.

Photographic goods not otherwise enumerated.

Watches.

LLL

Artificial flies.

Oil, perfumed; also toilet preparations and perfumery, not otherwise enumerated.

Cardboard, pasteboard, strawboard, wood-pulp board, corrugated board, and cloth-lined board, not otherwise enumerated.

Cloth-lined, enamelled, gelatiné and metallic papers, not otherwise enumerated; also 'ivorite' not otherwise enumerated.

Inks, not otherwise enumerated.

Stationery and writing paper, not otherwise enumerated, also printers' menu, wedding, programme and mourning cards of cardboard, celluloid or other material, edged or embossed, but otherwise unprinted.

Calendars and showcards, all kinds.

Cardboard or paper boxes complete; or cardboard or paper, cut, or shaped for boxes, wrappers or other receptacles (including match-boxes).

Directories of New Zealand or of any part thereof; also covers for directories.

Stationery, manufactured, viz.:—Account books, manuscript books, scribbling and letter blocks, and books, plain or ruled; billhead, invoice and statement forms; printed or ruled paper, counter-books, cheque and draft forms; tags, labels, blotting-pads, sketch-books, book covers, copying letter-books, manifold writers, albums (other than for photographs), diaries, birthday-books, plain or faint lined ruled books, printed window tickets, printed, lithographed or embossed stationery, and Christmas, New Year, birthday, Easter and other cards and booklets.

Stereotypes, matrices, half-tone and line blocks.

Boilers, land and marine, including feed water-heaters, fuel economisers, steam super-heaters, and mechanical stokers.

Crab winches, cranes, capstans and windlasses.

Machinery, not otherwise enumerated.

Steam engines and parts of steam engines, not otherwise enumerated.

Bellows, not otherwise enumerated.

Blocks, wooden tackle.

Doors and sashes, either plain or glazed with ornamental glass.

Axle grease and other solid lubricants.

Harness oil, and composition, leather dressing, and belt dressing.

Animals, food for, of all kinds, not otherwise enumerated, including horse and cattle spices, and condiments, proprietary or otherwise; also hemp seed, maw seed, millet seed, canary seed and mixed birdseed.

Bags, calico, forfar, linen, flour; bagging, bags, and sacks, not otherwise enumerated, including filter bags and sheaths.

Blacking, and boot gloss, and polish.

Backlead.

Boats, launches, yachts, also all vessels propelled by means other than oars (when imported in any vessel), including all fittings therefor, not otherwise enumerated.

Fireworks, not otherwise enumerated.

Nets and netting.

Soap powder, extract of soap, dry soap, soft soap, liquid soap, soap solutions, and washing, or cleansing powders, crystals, pastes and liquids.

Tarpaulins, tents, sails, rick and waggon covers.

Marble, granite and other stone, dressed or polished, and articles made therefrom; also imitation stone, dressed or polished, and articles made therefrom, or from cement.

Soap, not otherwise enumerated.

SCHEDULE D.—PART III.

Preferential duties upon items hereafter enumerated shall only be charged after the thirty-first day of March, 1908:—

Bacon and hams.

Biscuits, ships', plain and unsweetened; also dog biscuits.

Biscuits, other kinds.

Candied peel and drained peel.

Confectionery, including medicated lozenges, medicated confectionery, boiled sugars, liquorice not otherwise enumerated, sugared, or crystallized fruits, and chocolate confectionery—

1. In plain bottles.

2. In fancy packages.

3. In small packages for retail sale containing not more than 3 lb. net weight of confectionery.

Confectionery, boiled sugars, liquorice, sugared or crystallized fruits, and chocolate confectionery not otherwise enumerated.

Glucose and caramel.

Honey.

Jams, jellies, marmalade and preserves.

Jellies, concentrated.

Nuts, namely: Walnuts, shelled or unshelled.

Pearl barley.

Peas, split.

Spices, ground, not otherwise enumerated, pepper, pimento, and olive stones, ground.

Vinegar not exceeding 6·5 per cent of acidity calculated as acetic acid.

Chicory.

Cocoa and chocolate, including cocoa beans roasted and crushed; also cocoa or chocolate mixed with milk or any other food substance whatsoever.

Coffee, roasted.

Tea not otherwise provided for.

Acid, acetic, containing not more than 30 per cent of acidity.

Acid, acetic, containing more than 30 per cent of acidity.

Soda crystals.

Handbills, circulars, programmes, playbills, printed posters, trade catalogues, price-lists, and fashion-plates; printed advertising matter not otherwise enumerated.

Composition piping.

Iron galvanized corrugated sheets.

Iron, plain galvanized sheet or hoop.

Iron tanks.

Lead piping.

Shot.

Oil, not otherwise enumerated, including mineral lubricating oil, in vessels capable of containing one gallon or more.

Paints and colours, ground in oil or turpentine; also putty; and driers not otherwise enumerated.

Paints and colours, mixed ready for use; also enamel paints, not otherwise enumerated.

Stearine.

Varnish, including lithographic varnish, gold size, liquid gold, and other metallic paints; also liquid medium for mixing with metallic paints.

Whiting and chalk.

Cattle (horned).

Chaff.

Grain—namely: Barley.

Grain, and pulse, of every kind, not otherwise enumerated.

Grain, and pulse, of every kind, when ground or in any way manufactured, not otherwise enumerated, including wheat flour.

Horses.

Onions.

Potatoes.

Prepared calf-meal.

Blue.

Gelatine, isinglass, glue and size.

Soap, common yellow and blue mottled.

Spirits, methylated to the satisfaction of the minister.

Starch.

SCHEDULE E.—PART I.

Bicycles and tricycles, fittings for—namely: rubber tires, pneumatic tires, outside covers, and inner tubes, handle-grips, pedal rubbers; also the following articles when not plated, japanned, painted or varnished—namely: drop-forgings, stampings, steel balls, weldless steel tubes with or without butted ends, wood or metal rims (not

bored), forks, stays, handle-bars, and seat pillars, unbuilt, bracket shells, fork and stay ends, fork tips, bridges, crowns and lugs.

Gas engines, and hammers, and oil engines.

Gum boots, knee or thigh, the soles of which may be of either leather or rubber.

Iron, sheet, plate, hoop, rod, bolt, bar, angle, tee, channel, plain black; plain iron-rolled girders; rolled chequered plates; shafting, plain rolled or plain turned, but otherwise unwrought.

Iron and steel cordage.

Material for the manufacture of carriages and motor cars or vehicles—namely: Rubber tires, pneumatic tires, outer covers and inner tubes.

Motor cars and wheels for same.

Paper printing.

Rails for railways and tramways, including layouts and points and crossings for the same.

SCHEDULE E.—PART II.

Preferential duties upon the items hereafter enumerated shall only be charged after the thirty-first day of March, 1908:—

Canvas, indiarubber or other hose, tubing, or piping, armoured or otherwise; flexible metal hose, tubing, or piping.

Cardboard boxes, material for—namely: Gold and silver paper, plain or embossed; embossed paper in strips; gelatine or coloured papers; known as 'box papers.'

Castings for ships; also propeller-screws, including only bosses and blades.

Iron boiler-plates and unflanged end-plates for boilers; boiler-tubes not exceeding 5 inches in internal diameter and unflanged; expansion-rings; furnace-flues.

Iron pipes, and fibre pipes not exceeding 5 in. in internal diameter, also knees, bends, elbows, and other fittings for the same.

Paper, hand-made or machine-made, book, or writing, when in original wrappers, of sizes not less than the size known as 'demy,' and not being a wrapping-paper, or of the same quality as a wrapping-paper.

SCHEDULE E.—PART III.

Preferential duties upon the articles hereinafter enumerated shall only be charged after the thirty-first day of March, 1908:—

Boots, shoes, shoettes, sandals, clogs, and pattens, slippers and goloshes—namely: children's Nos. 0 to 6.

Cork soles, and sock-soles.

Bottles, empty, plain glass, not being cut, or ground; also, jars, plain glass, or plain earthen, up to 3 inches diameter at the mouth.

Artists' materials—viz., canvas in the piece or on stretchers, oiled paper or drawing-paper in sheets or blocks, colours, brushes, palettes, and palette knives.

Photographic cameras, and lenses, including focusing cloths, and camera covers.

Sensitized surfaces, and albuminized paper, plain, not being postcards or other stationery.

Butter-paper (known as vegetable parchment paper), and waxed paper, unprinted.

Cartridge drawing-paper.

Copy-books, having printed head lines on each page; also drawing-books.

Copying paper, medium and larger sizes, in original mill wrappers and labels.

Ink, printing, of net invoice value not exceeding 4d. the pound.

Anchors.

Axles, axle-arms, and axle-boxes.

Blacksmiths' anvils, forges, and fans.

Caps, percussion.

Chains, iron, plain, or with hook, swivel, or ring, attached.

Empty iron drums, not exceeding ten gallons capacity.

Engine governors.

Eyelets.

Fire-engines, chemical fire-engines, and chemical fire-extinguishers; also fire-hose and couplings therefor, portable fire-escapes, fire-ladders, fire-reels, and firemen's helmets, if declared, to the satisfaction of the Collector, for the use of a fire-brigade.

Fish-hooks, unmounted, and without attachments.

Machinery—namely: dairying machinery (including cream-separating machines, also coolers), mining machinery, gold-saving machinery.

Metal sheaves.

Metal-wire of all kinds, plain, No. 5 gauge and over according to British standard; metal cordage not otherwise enumerated, not being gold or silver; also barbed fencing-wire, and fencing-staples.

Metal wove-wire, and metal gauze; also wire-netting, and expanded metal lathing or fencing, in the piece.

Metallic capsules.

Perforated or cellular sheet zinc or iron.

Portable engines on four or any greater number of wheels, with boiler of locomotive type also traction engines.

Printing machines or presses, embossing, bronzing, type casting, and type setting machines, cardboard making machines, and tools for same.

Printing type, and printing materials, not otherwise enumerated, suited only for the use of printers.

Sewing, knitting, and knitting machines.

Steam or hydraulic pressure, and vacuum gauges; pressure indicators or pressure gauges for gas or oil engines; speed indicators, engineers', for testing machinery.

Surveyors' instruments—viz.: steel bands, chains, measuring tapes, field instruments, and drawing instruments; draughtsmen's drawing instruments.

Tacks, and nails, 1 inch and under.

Welded and flanged boiler furnaces, plain or corrugated.

Paints, and colours, n.o.e.

Belting, for driving machinery, other than leather belting, and not being cordage or rope.

Binder-twine, two-ply and under.

Bricks, other than fire-bricks.

Candle-wick.

Churns.

Cork, cut; bungs; fishermen's cork floats; also plain unornamental stoppers of every description for bottles, jars and casks.

Felt-sheathing.

Typewriters.

Wax, bottling.

Machinery—viz.: Flour milling, refrigerating, dredging, woollen mill, paper mill, rope and twine making, oil refining, oil boring, meat preserving, leather splitting.

Soda-water machines; also machines for aerating liquids.

Steam engines, and parts thereof, for mining (including gold dredging), or gold-saving purposes and processes, or for dairying purposes.

TARIFF CHANGES

BARBADOS.

I.—AN ACT TO AMEND THE TRADE ACT, 1891.

(No. 12, dated and assented to May 1, 1905.)

1. This Act may be cited as the Trade (Amendment) Act, 1905.

2. (1) In the case of manures mixed in this island and exported there shall be allowed on such of the constituents as may have been imported and on which duty may have been paid on importation a drawback of such amount as may have been paid by way of duty on such constituents respectively, on production of a certificate from the shipper of the quantity so exported by him.

(2) On exportation of such manure, the exporter shall furnish the Comptroller of Customs with a certificate that the manure about to be exported was mixed in this island, and the said certificate shall set forth the quantities of the constituents of every ton of such manure distinguishing constituents on which duty has been paid on importation from constituents on which duty has not been paid. Should the article exported not contain the quantities of the constituents mentioned in the certificate, in verification of which the comptroller may take samples for analysis, the exporter shall be liable to a penalty not exceeding one hundred pounds to be recovered in a summary manner before a police magistrate on the complaint of the Comptroller of Customs or any other officer of Customs. The drawback shall in all other respects be subject to the provisions of section 105 of the Trade Act, 1891.

II.—AN ACT TO FURTHER AMEND THE CUSTOMS TARIFF ACT, 1901.

(No. 17, dated and assented to June 28, 1906.)

1. This Act may be cited as the Customs Tariff (Amendment) Act, 1906.

2. The words 'except kerosene oil or any of the bye-products of petroleum to be used exclusively as fuel in oil or motor engines, on a certificate to that effect from the importer' are hereby inserted between the words 'oil, kerosene, the gallon,' and the figure '4' in the schedule table A to the Customs Tariff Act, 1901 (hereinafter referred to as the principal Act).

3. Should any kerosene oil or any bye-product of petroleum so imported and which has not paid duty as kerosene be used for any purpose other than according to the terms of such certificate, the importer shall be liable to a penalty not exceeding one hundred pounds, to be recovered and disposed of according to the provisions of sections 142 and 143 of the Trade Act, 1891 (1891-60).

III.—AN ACT TO IMPOSE ADDITIONAL DUTIES OF CUSTOMS IN AID OF REVENUE.

(No. 15, dated and assented to March 28, 1907.)

1. This Bill may be cited as the Revenue in Aid Act, 1907.

2. In addition to the duties heretofore levied by way of duties of Customs under the Customs Tariff Act, 1901 (1901-2), there shall be raised, levied, collected and paid unto His Majesty, his heirs and successors for the use of this island an additional duty of Customs after the rate of ten per centum on the amount of duty raised,

levied and collected under the provisions of the Customs Tariff Act, 1901. Such additional duty shall be added to the amount payable under the Customs Tariff Act, 1901, and be collected and paid together with the same, and all the provisions of the Customs Tariff Act, 1901, shall apply to the levy, collection and payment of the additional duty imposed by this Act, so far as the same may be applicable.

3. The Revenue in Aid Act, 1902 (1902-3) is hereby repealed.

4. This Act shall come into operation on the first day of April, 1907, and shall continue in force until and inclusive of the thirty-first day of March, 1908.

COMMERCIAL AGENCIES.

The Department of Trade and Commerce invites correspondence from Canadian exporters or importers upon all trade matters, and will cause special inquiries to be made by the Commercial Agents into any subject of general interest.

Canadian Commercial Agents should be kept supplied with catalogues, price lists, discount rates, &c., and the names and addresses of trade representatives, by Canadian exporters. Catalogues should state whether prices are at factory point, f.o.b. at port of shipment, or, and more preferable, c.i.f. at foreign port.

The undermentioned Canadian agents will answer correspondence relative to trade requirements in the districts they represent.

CANADIAN TRADE COMMISSIONERS.

AUSTRALASIA.

J. S. Larke, The Exchange, Sydney, agent for New South Wales, Queensland and New Zealand.

D. H. Ross, Stock Exchange Building, Melbourne, agent for Victoria, South Australia, Western Australia and Tasmania.

FRANCE.

A. Poindron, 101 Rue Réaumur, Paris.

GREAT BRITAIN.

P. B. Ball, Room 39 and 40, Central House, Birmingham.

J. B. Jackson, cor. of E. Parade and Greek Streets, Leeds, agent for Leeds and Hull.

P. B. MacNamara, Canada Chambers, 36 Spring Gardens, Manchester.

W. A. MacKinnon, Sun Buildings, Clare Street, Bristol.

JAPAN.

Alex. MacLean, No. 14 Bund, Room B, Yokohama.

MEXICO.

A. W. Donly, Apartado, 91B, Mexico, D.F., Mexico.

NEWFOUNDLAND.

E. D. Arnaud, Gazette Building, Water Street, St. John's.

SOUTH AFRICA.

John A. Chesley, Rhodes Buildings, Cape Town, Cape Colony.

CHINA, JAPAN AND COREA.

W. T. R. Preston, Poste Restante, Hong Kong.

CANADIAN COMMERCIAL AGENTS.

CHINA.

H. J. Craig, 18 Szechuen Road, Shanghai.

NORWAY.

C. E. Sontum, Grubbegd, No. 4, Christiania, Norway, agent for Sweden and Denmark also.

WEST INDIES.

E. A. H. Haggart, Kingston, Jamaica.

R. Bryson, St. John, Antigua, agent for Antigua, Montserrat and Dominica.

S. L. Horsford, St. Kitts, agent for St. Kitts, Nevis and the Virgin Islands.

Edgar Tripp, Port of Spain, Trinidad, agent for Trinidad and Tobago.

CANADIAN HIGH COMMISSIONER'S OFFICE.

GREAT BRITAIN.

W. L. Griffith, Secretary, 17 Victoria Street, London, S.W., England.

Harrison Watson, Canadian representative, City Trade Branch, 73 Basinghall Street, London, E.C., England.

CANADIAN IMMIGRATION AGENTS.

BELGIUM.

D. Tréau De Cœli, 29 Rue de Souci, Antwerp.

FRANCE.

Paul Wiallard, 10 Rue de Rome, Paris.

GREAT BRITAIN.

J. Bruce Walker, Assistant Superintendent of Emigration, 11-12 Charing Cross, London, S.W.

A. F. Jury, Old Castle Buildings, Preeson's Row, Liverpool.

G. H. Mitchell, 43 Cannon Street, Birmingham.

H. N. Murray, Exeter.

L. Burnett, York.

John Webster, 35-37 St. Enoch Square, Glasgow.

John McLennan, Aberdeen.

E. O'Kelly, 17-19 Victoria Street, Belfast.

AUSTRALASIA.

REPORT OF TRADE COMMISSIONER FOR NEW SOUTH WALES, QUEENSLAND AND NEW ZEALAND.

(Mr. J. S. Larke.)

THE ROYAL EXCHANGE,
SYDNEY, August 5, 1907.

NEW ZEALAND TRADE, 1906.

The returns of the trade of New Zealand for 1906 have been issued. The trade of New Zealand for 1906 and four years previous was:—

	Imports.	Exports.
1902..	£11,326,723	£13,644,977
1903..	12,788,679	15,001,378
1904..	13,291,694	14,744,348
1905..	12,828,857	15,655,947
1906..	15,211,857	18,095,137

Per head of the population the trade was:—

	Imports.			Exports.		
	£	s.	d.	£	s.	d.
1902..	11	3	11	17	2	1
1903..	15	11	10	18	6	0
1904..	15	14	7	17	9	1
1905..	14	14	11	17	19	11
1906..	16	19	8	20	1	9

In the July report I gave figures showing the divisions of the trade between the United Kingdom, other parts of the empire and foreign countries, and also the increases. The imports from the chief European countries show an increase, that of Germany and Belgium being considerably so. The imports from the United States, on the other hand, show some diminution.

The Canadian share of the trade was:—

	Imports from Canada.	Exports to Canada.
1902..	£ 52,374	£ 7,366
1903..	68,329	2,421
1904..	113,485	15,961
1905..	96,119	51,329
1906..	157,088	29,815

The importations from Canada show a very large increase, being the highest in the history of the trade. How much of this is due to exhibits sent to the Christchurch exhibition, I am unable at present to speak. The trade shows some notable increases, particularly in sawn timber, boots and shoes, paper, paper hangings, gum boots, nails and potatoes. The exportations to Canada show, on the other hand, a large diminution, due to the very great reduction in the direct exports of wool and skins to Canada.

IMPORTS FROM CANADA.

The following are the items of the imports from Canada for 1904-5-6:—

Articles.	1904.	1905.	1906.
Apparel.	£1,802	£3,429	£1,522
Bicycles	5,939	1,902	1,479
Bicycle materials, dutiable.	3,169	847	1,389
Bicycle materials, free.	61	103	50
Books.	3	24	213
Boots and shoes.	11,112	8,479	10,001
Gum boots	743	4,021	8,533
Canvas	1,851	4,724	5,921
Carriages.	1,892	1,566	2,451
Cheese	83	20
Carts and wagons.	2,549	81
Calico.	59
Shirtings, cotton.	228	138	411
Flannelette.	16
Cotton piece goods.	8,447	7,694	8,165
Drapery	396	234	488
Drugs and druggists' ware.	105	47	507
Tinctures.	1	4
Fancy goods.	57	86	67
Fish, preserved.	15,738	15,076	12,762
Furniture.	3,361	3,999	4,088
Grindery.	26	31
Furs.	10	99
Hardware	742	908	781
Hosiery.	440	10	39
India rubber goods.	72	30	82
Cabinet organs.	2,032	809	878
Pianos	209	36	193
Other musical instruments.	724	301	22
Agricultural machinery	22,725	7,609	14,926
Ploughs	270	588	859
Steam engines and boilers	132	318
Gas engines	590	88
Printing machinery	98	622	939
Woodworking machinery.	850	103	5
Flour mill machinery	91
Machinery, unenumerated.	64	129	556
Patent medicines.	1	2	218
Metal manufactures	168	369	142
Mineral oil.	70	64	26
Other oil.	85	110	64
Printing paper.	10,161	18,752	33,599
Writing paper.	242	484	344
Perfumery.	2	123
Toilet preparations.	45
Photographic goods.	109	1	27
Plated goods.	410	198	95
Provisions.	299	172	364
Salt.	320	34
Whisky	496	240	286
Belting.	71	131	115
Blacking.	6	420	60

Articles.	1904.	1905.	1906.
Carriage material	£ 137	£ 378	£ 399
Insecticides	1	2
Engine packing	584	248	874
Fire hose	223
Surgical and dental instruments.	237	71	6
Lamps.	6	76	86
Leather.	247	407	477
Boot uppers	66	10
Dairying machinery	86	2	166
Knitting machinery	184
Sewing silk.	36
Weighing machines	242
Fish oil.	164
Wrapping paper.	16	313	403
Paper hangings.	2,955	1,777	2,383
Portmanteau.	223	65	68
Saddlery.	121	20	150
Grass and clover seeds.	6,655	525
Soap.	210	352	259
School apparatus.	11	15
Textiles	3	134
Tinware.	10	19	4
Woodenware.	422	625	13,839
Stationery.	164	277	133
Cardboard.	11
Tools.	296	305	261
Woollen piece goods.	39	17
Parcels by post.	462	446	414
Bookbinders' materials.	65
Tobacco and cigars	68	60
Timber, sawn.	284	310	6,801
Mouldings.	197	223	409
Chemicals.	14	2
Brushware and brooms.	29	73	11
Cordage and twine.	11	35	95
Earthenware	5	1
Felt sheathing	100
Floor cloth and oil cloth	78	7	49
Glassware	5	11	8
Mats and matting	174	105
Typewriters	60	113	27
Electric machinery.	41	89	35
Paints and colours	7	16
Pumps	4	1	15
Grindstones	2	22
Turpentine and driers.	125
Varnish	8	16
Fruits, preserved	57	11
Fruits, green	13	93	193
Animal foods.	17	4
Leather manufactures	104	36
Rugs.	82	5
Leather cloth.	22
Miscellaneous goods.	3	145
Cartridges.	2	25

Articles.	1904.	1905.	1906.
Boats	£ 110	£ 70	
Confectionery	49	21	
Doors, plain	291	
Copper manufactures	11	
Fire engines	69	310	
Fishing tackle	24	
Hops	148	14	
Castings for ships	16	30	
Pipes and fittings	673	838	
Wire netting and fencing	6	82	
Sewing machines	3	162	
Nails, iron	2,720	7,693	
Oilmen's stores	7	
Potatoes	22	1,258	
Natural history specimens	10	5	
Saddlery materials	23	38

Grease	5	
Printing ink	17	
Bolts and nuts	10	
Staples	38	
Rivets and washers	48	
Gas making machinery	15	
Candles	2,143	

EXPORTS TO CANADA.

The exports of the produce of New Zealand for the years 1904-5-6 were:—

Articles.	1904.	1905.	1906.
Butter	£1,244	£1,764	£1,636
Kauri gum	879	523	2,660
Flax	10,345	7,227	13,669
Wool	1,676	32,388	3,453
Ploughs	30
Meats, potted	47	58
Preserved milk	10	3
Provisions	59
Seeds	732	230
Skins	1,865
Skins, sheep	5,914	3,362
Hides	941
Carpeting and ruggeting		£ 155	
Cement			38

Articles.	1904.	1905.	1906.
Coal			£2,035
Drapery			84
Earthenware			13
Fish			19
Fishing tackle			23
Fruits			12
Glassware			6
Jams and jellies			5
Mining machinery			450
Other machinery			87
Onions			60
Oils			16
Paints and colours			11
Soap			23
Brandy			25
Gin			3
Whisky			53
Tobacco			28
Cigars			15
Wine			13
Parcel post			168

The balance consists of small items not of New Zealand produce.

UNDER-VALUATION OF TRADE.

In my report of September, 1906, I made a comparison in certain lines between the export returns of Canada to New Zealand and the New Zealand returns of imports from Canada, showing a difference in seven items of £22,000. There are similar differences in the reports for the year 1906. In some instances, as in agricultural implements, cotton goods and india-rubber goods, the differences are very great. In part these are made up of goods which are credited in the New Zealand returns as imports from the United States. But as these were articles that were included in the preferential list but paid no preferential duties, it is evident that they were the products of Canada. On thirteen items the amount thus imported was £27,570, as against £12,000 of such goods last year, the principal item being printing paper, valued at £19,968. It is evident, therefore, that the Canadian exports to New Zealand are very much larger than the import returns show, and, probably, than are shown by the export returns of Canada. The Canadian returns show the export of paper to the United States to be \$169,109, the bulk of which must have been re-exported, a large portion to New Zealand.

PREFERENTIAL DUTIES.

Some of the differences between the Canadian export and the New Zealand import returns are due to the differences of classification. Apparently, there was an enormous growth in the export of woodenware to New Zealand. This, no doubt, in the New Zealand returns include wood piping, of which a large quantity was supplied to the government of British Columbia, and under that title would be included nearly all the articles classified in Canada under different items of imports of wood.

OPERATION OF PREFERENTIAL TARIFF.

The imports from all foreign countries of the articles subject to the additional preferential duties amounted in 1906 to £620,600, as against £599,764 in 1905. This would

show some increase in the importations from foreign countries, but when it is remembered that the total increase of imports from foreign countries in 1906 as compared with 1905, amounted to £1,527,204, the increase of less than £21,000 in the articles included in the preferential tariff, shows that that tariff must have had effect in stimulating the imports from Great Britain and Canada. The following table of articles imported from Canada under the preferential tariff from the United States and all foreign countries, show this. In the imports from Canada I have added not only those credited to Canada in the New Zealand returns, but also articles credited to the United States, which did not pay preferential duties and which clearly came from Canada. Then, on the other hand, I have not included in the imports from Canada articles which paid the preferential duty, and, therefore, did not originate in Canada.

Again, in the list of articles from foreign countries, this year I have included such articles as are credited to the United Kingdom, but which did pay the preferential duties, and, therefore, must have originated in some foreign country. The figures in this table will not, therefore, agree with the figures given in the previous table of importations from Canada into New Zealand, nor will the imports in this table from the United States and foreign countries agree with such returns. Further, this table will not show the full effect of the preferential tariff. For example, in 1904, the importations of candles from the United States amounted to £11,509. The effect of the tariff has been to transfer that trade mainly to Canada and Burmah.

Articles.	From Canada..		From United States.		From all foreign countries.

In some of these lines the United States trade suffered heavily, while in many of them the European trade suffered still more severely. Canada did not reap the advantage that she might have done, with the exception of paper and gum boots, the United Kingdom taking most of the trade lost to foreign countries. The growth of the imports of printing paper from Canada are very satisfactory, and it is to be hoped that under the advantages that are likely to be accorded to other papers under the new tariff, there will be a like development in other lines, as wrapping paper and paper bags.

NEW TARIFF.

The parliament of New Zealand has now under consideration a tariff which involves striking changes. The preferential tariff has been extended to cover a very great variety of lines. The preferences granted in the past are preserved on Canadian goods with the exception of paper hangings, on which it is proposed that the preference shall be removed at the end of October next. I have hopes that this exception will be removed and the advantages granted under the last tariff will be retained. The new tariff covers nearly all the lines that have been shipped from Canada and some lines in which it is proposed that business could be done. The principal advance proposed is on boots and shoes, on which a specific as well as an ad valorem duty is to be placed.

It will make the duty on the finer lines with the tariff deductions not much beyond what it now is, but on some of the cheaper lines the duty will be nearly 60 per cent. This will render importations impossible. The importers are petitioning for a lessening of the duties, and it is possible that the government may make some concession in this respect. Until the Bill is finally passed, it is not advisable to point out its effects upon Canadian trade. There is little doubt, however, that when passed, it should be very advantageous.

PROGRESS OF NEW SOUTH WALES.

In my April report, I gave some figures showing the development of New Zealand, similar figures for New South Wales may be of interest. In connection with these figures it should be remembered that from 1896 to 1903 were the severest years of the drought that affected this state, beyond any other portion of the southern world, Queensland, perhaps, excepted.

These figures will show how very much the increased prices and improved processes have had to do with the prosperity of the state. Though the sheep were over four millions less in number in 1906 than in 1896, they produced over 19,000,000 pounds more of wool, which yielded nearly five and a half million pounds sterling more in price. The increase in wheat production and particularly in that of butter, proves that Australia is not to be dependent solely upon pastoral industry in the future. The chief increase in mining was in coal, though there were considerable increases in both tonnage and values of silver, lead and copper.

SALMON FALSELY LABELLED.

The new Commerce Act, when carried into operation, is likely to have a beneficial effect upon British Columbia salmon. Hitherto it is claimed that both Columbia river and Alaska salmon have been labelled as 'Sockeye,' and thus came into competition with the British Columbia fish, which is a superior article. So far, there has been no exposure of the false labelling, but salmon producers in British Columbia should send their agents here information that they may have, which will enable them to take action to protect their interests. The price of salmon has advanced in this market in harmony with the advance on the Pacific coast.

FIJIAN PRODUCTS.

The Colonial Secretary of Fiji has been for some time in Melbourne, in order to secure a reduction of the duties on bananas and some other productions of Fiji. He has offered a preferential treatment of imports into Fiji from Australia in return for the concession which he asks. It is not likely that the Australian government will, at present, meet the request. Canada ought to be able to do so, as bananas ought to carry safely from Fiji to Canada, as might pineapples and other productions of the island.

VALUATION FOR DUTY.

There is a dispute between importers and the government as to the meaning of the clause in the Commonwealth Customs Act, which places the value of the goods for duty at the fair market value of the country in which the goods are purchased. The fair market value is interpreted to mean by the custom-house official of the Commonwealth, the price at which the goods are ordinarily sold in that country. The importers, on the other hand, contend that as large buyers, they are allowed special discounts, and also in consideration of the lessened expense to the seller, sometimes special prices below these charged to home customers, and that this should be taken as the fair market value. There is reason for this contention. When a manufacturer sells in his own country he is put to expense for travelling and for advertising, which he commonly does not incur when he sells to a buyer from abroad. A decision is shortly expected upon this matter.

IRREGULARITY OF MAILS.

There seems to have been some delays in the arrival of letters in Canada by the last two mails. It is possible that this is due to letters being sent by slow freight steamers going to California or by the way of England. At this end, occasionally, an error is made in the sending of letters to Melbourne that should go to Sydney, but there is not much complaint of letters failing to be received. The receipt of newspapers, is, however, irregular, much beyond what they ought to be.

AUSTRALASIA.

REPORT OF TRADE COMMISSIONER FOR VICTORIA, SOUTH AUSTRALIA, WESTERN AUSTRALIA
AND TASMANIA.

(Mr. D. H. Ross.)

STOCK EXCHANGE BUILDING,
MELBOURNE, August 5, 1907.

AUSTRALIAN TRADE, 1901-1906.

Since the inauguration of the Commonwealth of Australia in 1901, there has been great expansion in Australian trade, but more particularly in the remarkable growth in the values of the exports. This result is to a great extent attributable to good seasons and the high prices ruling for wool, wheat, butter and other staple commodities. Through the courtesy of the newly-appointed Commonwealth statistician, I am sending herewith an amended statement of the total values of imports to and exports from the Commonwealth of Australia during the years 1901-1906, as ascertained by the official records of the Department of Trade and Customs, and published in the trade returns.

COMMONWEALTH OF AUSTRALIA TRADE RETURNS.

Year.	Imports.	Exports.		
		Australian Produce.	Other Produce.	Total.
	£	£	£	£
1901.....	42,434,011	47,741,776	1,954,396	49,696,172
1902.....	40,675,950	41,268,781	2,646,306	43,915,087
1903.....	37,811,471	45,658,883	2,591,229	48,250,112
1904.....	37,020,842	55,100,167	2,385,748	57,485,915
1905.....	38,346,731	54,127,758	2,713,277	56,841,035
1906.....	44,729,506	66,299,874	3,437,889	69,737,763

AUSTRALIAN TOTAL TRADE, 1901-1906.

The figures relating to the total value of the external trade, and value per head of population, of the Commonwealth, are given as follow:—

Year.	Total trade.	Value per head.		
	£	£	s.	d.
1901..	92,130,183	13	2	1
1902..	84,591,037	11	7	9
1903..	86,061,583	12	7	4
1904..	94,506,757	14	10	10
1905..	95,187,766	14	3	0
1906..	114,467,269	17	1	4

AUSTRALASIAN WOOL CLIP THE LARGEST ON RECORD.

A review of the Australasian wool trade for the year 1906-1907 has just been issued, and the statistics presented are recognized as authoritative in all parts of the world where wool is handled. Not only has the past season's clip been a record one, but the prices realized have been at the highest for the last twenty-five years. The Australian exports reached 1,663,130 bales, and the New Zealand exports 427,058 bales, making the grand total for Australasia 2,090,188 bales, thus not only a record, but also being the first time the 2,000,000 mark has been reached. It is estimated that an additional 40,000 bales has been required for home manufactures, which must be added to the figures relating to the total clip. The average price realized for each bale in the local markets was £14 3s. 11d., so that the total production has added £30,239,794 to the wealth of Australasia. The growing popularity of the wool sales in Australia and New Zealand is evidenced by the fact that 74 per cent was sold prior to export.

PRODUCTION OF WOOL IN EACH STATE AND NEW ZEALAND.

Through various reasons the exports of wool from each state in 1906-1907 do not indicate the actual production. The shipment figures from each state and New Zealand are as follow:—

	Bales.
New South Wales..	837,869
Victoria..	506,650
Queensland	117,550
South Australia..	146,431
Western Australia	40,789
Tasmania	13,841
New Zealand	427,058
	<hr/>
	2,090,188

AUSTRALASIAN SHEEP RETURNS.

Sheep numbers as at the close of the year, compared with twelve months previously, show a net increase of 9,711,782 head. The totals in Australasia now reach 103,548,330, and for the first time since 1897 (ten years ago) exceed 100,000,000. The returns for the various states and New Zealand are the latest available figures:—

States.	Sheep in 1906.
New South Wales..	44,132,421
Victoria..	12,937,440
Queensland	14,886,438
South Australia	6,700,000
West Australia..	3,200,000
Tasmania	1,583,560
	<hr/>
Australian states	83,439,859
New Zealand..	20,108,471
	<hr/>
Total Australasia..	103,548,330

NUMBER OF SHEEP SLAUGHTERED IN AUSTRALASIA, 1906-7.

It is interesting to note from the figures given below that the increases in flocks of Australasian sheep have taken place in spite that the slaughterings for home consumption and export amounted to nearly 16,000,000 head, as per details with particulars of population stated in the following table:—

States.	Population.	Number of Sheep Slaughtered		
		For Local use.	For Export.	Total.
New South Wales	1,543,360	3,173,185	1,253,185	4,426,370
Victoria	1,231,940	1,972,331	861,669	2,834,000
Queensland	535,110	350,918	90,682	441,000
South Australia	385,330	531,490	248,550	780,040
West Australia	262,946	525,000	525,000
Tasmania	178,276	326,500	326,500
Australian States	4,136,962	6,879,424	2,453,486	9,332,910
New Zealand	918,650	1,802,530	4,656,470	6,459,000
Total Australasia	5,085,612	8,681,954	7,109,956	15,791,910

As a considerable quantity of frozen mutton and lamb is being exported to Vancouver, the above figures should prove of interest to Canadian meat importers.

BEARING OF AUSTRALIAN COMMERCE ACT UPON CANNED SALMON.

Monthly Report, August, 1905, page 300, I referred to the fact that canned salmon was being imported into Australia under false labels, irrespective of source of supply or designation of quality. Since then the Australian Commerce Act has come into force, the basic principle of which is that all imported (as well as exported) goods must be true to description and to the labels thereon. False labelling is no longer possible, and inferior salmon will not be permitted to go into consumption in the Commonwealth under the superlative description of, say, Sockeye. Australian legislation prevents inferior food products being palmed off on consumers as prime, and the consummation long desired by British Columbia salmon packers has been realized.

AUSTRALIAN ORDERS FOR CANADIAN CANNED SALMON, 1907.

It is satisfactory to report, from personal investigation, that Canadian brands of canned salmon have, so far this season, secured the bulk of the orders in these states. In Melbourne alone over 15,000 cases of British Columbia salmon has been placed during the last few weeks, and more business is anticipated. Buyers speak very highly of the Maple Leaf brand of sockeye salmon, packed by the British Columbia Packers Association, as being a distinctly high grade fish, rich in oil and of fine appearance. Orders so far secured in this market have been, in the main, for Sockeye, as the prices have not been advanced over the rates ruling last year. The leading line of Puget Sound Sockeye—Scroll brand—has been quoted to wholesale importers at the following rates: 1-lb. flats at 7s. 4½d. (\$1.79), and ½-lb. flats at 4s. 10½d. (\$1.18½) per dozen cans, c.i.f. and e. (ex-ships slings, including exchange) Melbourne.

RED ALASKA CANNED SALMON.

Owing to heavy stocks of Red Alaska canned salmon having been carried over from last year, little business has been done this season, and no inducement has so far been held out to importers, for prices have advanced to about 3s. (73 cents) per case over the rates quoted at the opening of the season in 1906. The latest quotations for Red Alaska salmon to wholesalers are: 1-lb. flats at 5s. 6d. (\$1.33), ½-lb. flats at 4s. (97 cents), and 1-lb. talls at 4s. 10d. (\$1.17) per dozen cans, c.i.f. and e, Melbourne.

AUSTRALIAN BROWN GLOBE ONIONS.

The Brown Globe variety of onions is chiefly grown in sandy soil in districts quite close to Melbourne, within a radius of 20 to 30 miles, and is marketed between the months of November and February. They are grown in fairly large quantities

and are of fine quality, being suitable in the early part of the season—from November to January—for export. After January they rapidly skin and are seldom fit to carry any distance. In appearance the Brown Globe much resembles Italian onions, being round in shape and large in size. They are of a soft nature and are not flavoured for export to oversea countries, because, generally speaking, they have only one outside skin and are thus liable to become easily bruised. This variety has, however, been exported to America and South Africa in cases, but it is only through using extreme care in their selection and obtaining good handling in transit that shipments can be made successful. While primarily grown for early local and interstate consumption, large quantities are exported in bags to New Zealand and the distant states of Western Australia and Queensland.

AUSTRALIAN BROWN SPANISH ONIONS.

Brown Spanish onions are only grown in Victoria, so far as Australia is concerned, and they differ very materially from the Brown Spanish of European production in being much better skinned, generally having five outside skins, or envelopes. This has been achieved by special cultivation in crossing the seeds of various varieties, with the result that one of the finest onions in the world is grown. In appearance they are inclined to be flat, the idea being to create a kind of dome on top so as to throw off rain and thus bring them to perfection at maturity. On account of the climate and soil of this state being adapted to the growth of this superior product, the industry is rapidly extending. The total production this year is estimated to be between 25,000 and 30,000 tons, while the average yield for some years past has been over 20,000 tons. In many places the crop this year has been from 8 to 10 tons per acre. Brown Spanish onions commence to be marketed in Melbourne about the middle of February, and are fit for export about the first week in March. If the season is favourable for their growth, they continue in sound condition for export up to the end of October.

AUSTRALIAN SHIPMENTS OF ONIONS TO CANADA AND UNITED STATES.

For many years Melbourne produce merchants have been exporting Brown Spanish onions—in the reverse season—to San Francisco, but it is only in recent years that shipments have been made to Vancouver and other points in Western Canada. When the excellent quality of Australian onions is better known in Canada a large export trade, which is being carefully fostered in Melbourne, is looked for. The cost of casing is about 30s. (\$7.30) per ton, and exporters complain that steamship companies insist on freight on the gross weight, which, after allowing for the weight of cases, makes the freight about 20 per cent higher than if the onions were shipped in bags. Experimental shipments have, this year, been made in bags to Vancouver, and the onions arrived in splendid condition, besides considerably reducing their landed cost. There is certainly some element of danger in shipping onions in open gunnie bags to Vancouver—but apparently not a serious one—when large quantities are on board one steamer, in which case, if stacked more than three bags high, sweating might take place, whereas onions in cases are relieved from pressure and consequent injury from other cargo. The Commonwealth trade returns show that 3,322 cwt. of onions, valued at £1,589, were exported to Canada in 1906, and 8,195 cwt., valued at £2,786, to the United States.

AUSTRALIAN TRADE IN AMERICAN AXES.

Distinctly high grade axes manufactured in the United States hold the bulk of the Australian trade. The brands which find the most favour are Plumb, Kelly, Sharp and Collins. The Plumb, Sharp and Collins axe has the steel let into the blade, while the Kelly is what is, in the trade, commonly called an overcoat axe. There are some cheaper axes sold, but these do not get into the hands of the wood-chopper, being required for household purposes, where quality is not so keenly criticised. Patterns

vary considerably, from the narrow Maine to the slightly wider Yankee, and then to the Tasmanian, which has a very wide blade and short poll. The axes are invariably handled and packed in strong cases containing one dozen of a size, but more frequently one dozen of a desired assortment of weights. The greatest sale is for cases containing one dozen assorted, $4\frac{1}{2}$ to $5\frac{1}{2}$ pounds, then from $4\frac{1}{2}$ to $5\frac{1}{2}$ pounds, with a few lighter and heavier weights. There is no distinct classification in the Australian trade returns showing the quantities and values of axes imported. Axes are included in the item of tools of trade—duty free—of which the Australian importations in 1906 were valued at £341,297, the United Kingdom being credited with £161,523, and the United States with £159,350.

EXPORT PRICES FOR AMERICAN AXES.

Prices for American axes vary considerably, depending upon the brand and weight and to a slight extent the quantities ordered. The export prices are governed by an agreement entered into by the axe manufacturers in the United States. The rates are generally understood to be ex cars New York, with cartage to steamer extra. Carload lots of about 600 cases are frequently placed in Melbourne. Taking a $4\frac{1}{2}$ -lb. axe as a basis, the latest available New York export quotations, for popular brands in Australia, are Plumb's, \$9 net; Kelly's Perfect, \$9.50, less 7 per cent; Sharp's, \$9, less 10 per cent, and Collins', \$9, less 10 per cent, per case of one dozen.

DIFFICULTY IN INTRODUCING A NEW BRAND OF AXES.

To successfully place a new brand of axes on the Australian market is a most difficult matter. It would probably take several years of persistent effort and constant advertising to establish a brand now unknown, besides which quality, pattern and prices would have to be considered. In certain states the demand would be for Collins, while in others the trade would be divided between Collins and Plumb, but the Plumb axe is considered to have the largest sale throughout the Commonwealth. Competition is keen and marine freight is an important factor in being able to quote upon a c.i.f. (landed cost), Australian basis. The American axe manufacturers have their own travellers in this territory canvassing the trade and using every effort to secure orders. As a proof of continued effort, and that another brand can be introduced, it might be pointed out that a few years ago the only axe called for in Victoria was Sharp's (made by the American Axe and Tool Company), but now Plumb and Kelly axes control the bulk of the business in this state, and further, Plumb's Tasmanian pattern is used by most lumbermen in felling Australian hard woods as well as New Zealand soft pines.

CANADIAN AXES IN AUSTRALIA.

Some shipments of Canadian axes have been landed in Australia, but apparently the introduction of these goods was a spasmodic effort, and interest in the line has not been maintained to that point which should command a steady and increasing trade. While high quality is essential, there are other influences to be contended with of equal consideration, over which even lower prices would have a comparatively unimportant bearing, in securing a fair portion of the Australian axe trade for Canadian manufacturers.

AUSTRALIAN LEGISLATION ON PATENT MEDICINES.

Action has been taken by the Minister of Trade and Commerce to ensure that every patent medicine imported into the Commonwealth of Australia shall show on the label the various drugs and materials of which the medicine is composed. This is being done under the authority of the Commonwealth Commerce Act, which came into operation last year. On July 11, the minister ordered a regulation to be framed to deal with the matter. Instructions have been given to have analysis made in all cases where it is thought that there might be substances deleterious to health contained in

the medicines. The contents of all patent or proprietary medicines must be disclosed on the label of each bottle or package. The Commonwealth has no control over medicines bottled in the country. If it is imported in bulk, the bulk quantity only will come under the power of the regulation. The retailing of it has to be looked after by the states. Several patent medicines have already been stopped. One contained 30 drugs, each of which is used in about 12 ailments. The medicines were hereupon boomed as a cure for all those 360 diseases. The agents are forbidden from importing the medicine until they prove to the customs that it will do all it is alleged to do.

THE PACIFIC CABLE—DEFICIT DECLINING.

The Pacific cable, which is owned by the governments of Great Britain, Australia, Canada and New Zealand, continues to show a nominal deficit, but a declining one. The accounts for the year ended March 31 last are being adjusted in London, but it is expected that the deficit will amount to about £69,000, which will be borne by the governments owning the cable, in the following proportions: Australia, $\frac{1}{8}$ s; Great Britain $\frac{1}{8}$ s; Canada, $\frac{1}{8}$ s; New Zealand, $\frac{1}{8}$ s. The deficit is, however, really only a nominal one, as far as the working of the cable is concerned, because, when, in 1902, £2,000,000 of capital was raised by the British Government, the money was secured on the condition that it be repaid in fifty annual instalments. When accounts are made up the Pacific Cable Board has to be debited, not merely with expenses and interest, but with an annuity of, roughly, £77,000 a year as an instalment of the loan repayment. The loan repayment annuity for 1906-1907 amounted to £77,545, so that, apart from this item, the Pacific cable earned a profit of £8,500. The net deficit of £69,000 for 1906-1907 is, moreover, an improvement on the net deficit of 1905-1906, which was £72,556. The cable's revenue from messages was also an improvement on that for the previous year, being £102,000, as against £94,456 in 1905. Australia's share of the past year's deficit totals about £23,000. It was over £30,000 when the cable completed the first year's operations.

LONG-DISTANCE TELEPHONES—MELBOURNE TO SYDNEY.

The Postmaster General has arranged the charges on the recently-completed telephone line between Melbourne and Sydney at 5s. (\$1.21) for three minutes—or part of three minutes—conversation during the day, but after 8 p.m. the charge is reduced to 2s. 6d. (60 cents) for a similar period. It is intended to allow the rates to stand for three months, and provided the result is favourable a reduction may then be made. The distance between Melbourne and Sydney covered by this special service is 605 miles. Substantial reductions have also been made over all the government telephone lines, and as a result the demand for telephonic communication is rapidly increasing throughout Australia.

AUSTRALIAN EXHIBITION OF WOMEN'S WORK.

October 23 next is the date fixed for the opening of the Australian exhibition of women's work at Melbourne. It is stated that the large exhibition building will not afford sufficient capacity for displaying the goods intended to be shown. The exhibition has developed to an extent which even those closely interested did not at its inception anticipate. Besides exhibits from all parts of the Commonwealth and New Zealand, no fewer than 75 other countries will be represented, and amongst the articles coming from abroad are exhibits from several crowned heads and members of nearly every royal family in Europe. An impression exists that the undertaking is merely a small exhibition of needlework, and similar branches of women's work, and the executive finds it rather difficult to make it understood that it is a great international display. Any person or firm able to make an exhibit of work of any kind in which women or girls are employed, or the products of their labour, are entitled to take advantage of the exceptional opportunity afforded by the exhibition.

It will be held at a time when Melbourne is full of visitors to the spring racing carnival, and apart from the manifold attractions of the exhibits themselves, a number of unique and attractive entertainments and amusements have been organized. Application has been made for the necessary space required for the installation and display of exhibits to be forwarded from Canada.

DEMAND FOR PICTURE MOULDINGS.

Canadian moulding manufacturers should turn their attention to the remarkable demand for all classes of moulding suitable for pictures and mounts, which importers find hard to satisfy in Melbourne and other centres. During the last few months there has been quite a revival in Australian art and the consequent demand for picture frames has greatly exceeded anything previously experienced. I shall be glad to receive catalogues of Canadian mouldings and lowest export quotations, upon the basis of delivered ex cars New York, in order to submit same to some of the largest importers in Melbourne. If the prices are right a large business can be looked for with confidence. It would be well to submit a few small samples by parcel post in order to show the standard qualities.

THE NEW AUSTRALIAN CUSTOMS TARIFF.

It is probable that the proposed new customs tariff will be submitted by the government to the parliament of the Commonwealth within the next fortnight. In anticipation of increased duties—especially upon beer, spirits and tobacco—very heavy clearances have been recently made in all Australian importing centres. Upon the introduction of the new tariff, the Superintendent of Commercial Agencies, Ottawa, will be notified by cable of any changes of likely interest to Canadian exporters.

D. H. ROSS.

BIRMINGHAM.

REPORT OF TRADE COMMISSIONER.

(*Mr. P. B. Ball.*)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., July 20, 1907.

GREAT BRITAIN'S FRUIT CROP.

The season of the year has now come when a fair indication of the fruit crop of Great Britain can be given. From all indications the apple crop of Great Britain will be very light, one county probably excepted, Somerset, where they are looking forward to a fair crop, but for the purpose of manufacturing cider mostly.

From all I can hear, the apple crop in Canada promises to be good, and I can only still further follow out my advice to apple shippers to exercise even greater care than usual in the packing and shipping. I have followed up very closely the different shippers from Canada, and it is strange that year after year certain men always ship only first-class stuff, and very few complaints are made. On the other hand, year after year we see the same names appearing on poor quality and careless packing. I think however, that the latter cases show the amateur shipper and speculator more than the careful professional. If our Canadian shippers would only see the foolishness of making careless shipments, it would certainly pay them much better. It costs as much to ship a barrel of poorly packed and badly assorted apples to Great Britain, as it does to ship a barrel of the best, and the average made by the poor article brings the price obtained down most tremendously. Some firms have such a good name that no trouble is experienced in obtaining top prices; but the whole system of shipping to this side of the water, I do not think is good.

DIRECT SHIPMENTS.

I think that more direct shipments should be made. The filling up of Liverpool and London with no great care exercised as to quantities or regularity of shipments, allows the fruit broker to practically have command. I am glad to see that more attention is being paid to this district this year. Some large contracts have been made for direct shipments into this centre, which is one of the largest users in Great Britain; but the wholesale fruit men hitherto have been obliged to go to the larger shipping ports and buy their goods at auction.

From time to time I have received inquiries from Canada for direct shipments, and have put people into communication; but I regret to say that in several cases it has not been at all satisfactory. The sellers in Canada have their money and goods are not shipped either in quality or quantity as purchased, and in some cases lawsuits have followed, which to say the least of it, is a very expensive and very unsatisfactory way of settling matters of the kind.

PLUMS.

Plums will be very plentiful here this year. Still, as that does not interfere with anything in the matter of Canadian shipping, it may not interest our people. I believe a very large business could be done with plum pulp to the jam makers here even though the crop may be large in this country.

PEARS.

I should like to see an effort made to ship pears in larger quantities from Canada. What have been shipped are very much liked; but what really is required in this country in pears is a smaller size. All fruit is sold by the pound weight, and a pear running about five or six to the pound would bring a much larger price than those usually shipped from Canada, namely, two or three to the pound.

DECLINE OF PIG-REARING IN GREAT BRITAIN.

A report has just been published by the Pork Packers' Association of Great Britain, backed by the National Federation of Meat Traders, on the decline of pig-rearing in Great Britain. It points out that for the year ending June, 1905, there was a decrease in the number of pigs raised of 590,030 as compared with 1904. And for the year ending June, 1906, there was another decrease of 20,576; the latter figure would have been a much greater decrease but for Ireland's increasing 80,220. England's decrease for the year ending June, 1905, was 393,129, and for the year ending June, 1906, it was 99,624.

GOVERNMENT AID.

The report draws attention to the assistance rendered by the colonial and other governments by way of experiments, data, and expert advice, and hopes that the British government will follow their example. Sixteen million pounds a year is going out of Great Britain for bacon and hams, three and a quarter millions for lard, and close on two millions for pork. Evidently some efforts are to be made to try and overcome this decrease, but no large hope seems to be held out.

CANADA'S OPPORTUNITY.

It would appear to me that with the standing Canada has now as a bacon exporting country, our farmers should devote even greater attention than heretofore to the raising of pigs. It is acknowledged that no country produces a finer quality of bacon pigs than Canada.

P. B. BALL.

LEEDS AND HULL.

REPORT OF TRADE COMMISSIONER.

(*Mr. J. B. Jackson.*)

NORTH BRITISH AND MERCANTILE BUILDINGS,
EAST PARADE, LEEDS, ENG., August 28, 1907.

HULL IMPORTS.

The following are the aggregate imports of certain articles into the port of Hull up to the 27th of August, 1907, as compared with the same period for 1906:—

	1907.	1906.
Wheat, bushels	22,029,920	21,395,368
Flour, cwts.	147,657	258,668
Barley, bushels	2,686,688	1,511,728
Oats, bushels	1,057,032	2,031,888
Peas, bushels	192,240	215,160
Linseed, bushels	4,195,336	2,851,296
Cloverseed, cwts.	45,200	38,248
Rapeseed, bushels	493,600	528,144
Timber, hewn, loads	151,308	147,422
Deals, &c., sawn, loads	278,188	293,134

CROPS AND TRADE.

According to the Beerbohm estimates, the wheat-importing countries of Europe are likely to require 536,000,000 bushels this year, as against 448,000,000 bushels last year. In France the crop is about the same as a year ago, and in Scandinavia a trifle bigger, but Germany, which last year took 68,000,000, will this year require 104,000,000 bushels. Belgium and Holland will need to import about 68,000,000, and Italy about 48,000,000 bushels. Austria-Hungary, instead of having a surplus, as last year, will require to import about 24,000,000, while the United Kingdom, which last year imported 174,000,000 bushels, is expected this year to import 216,000,000 bushels.

JNO. B. JACKSON.

BRISTOL.

REPORT OF TRADE COMMISSIONER.

(Mr. W. A. MacKinnon.)

BRISTOL, August 31, 1907.

INSTRUCTION FOR GROCERS' CLERKS.

An interesting pamphlet, entitled 'Grocers in the Making,' has been published by the National Association of Grocers' Assistants. This publication describes the beginning and the development of technical education so far as the grocery trade is concerned, and is replete with suggestive matter. In Bristol the co-operation of the local Grocers' Association with the Merchants Venturers' College has led to the organization of a series of most useful and practical lectures, and the support of the Assistants Association has for the past two years assured the success of the movement.

The lectures have covered a wide field, the chief object being to stimulate in the clerk an intelligent interest in and knowledge of the various lines they handle, including sources of supply, the varying qualities of goods from different countries, the systems of distribution adopted for various products, and so on; an effort is also made to instruct the young men in methods which will enable them to set up business for themselves, and conduct it with a reasonable chance of succeeding. Leaders in the trade have freely given the students at these lectures the benefit of their experience, not only in handling the groceries, but in dealing with the 'personal equations' which arise out of transactions with importers, wholesalers and the public.

AN ADMIRABLE SYSTEM.

My reason for referring to this subject is that I am convinced that much good would result from an extension of the idea, whereby the young people intending to take up a given line of business might be provided, in the larger towns and cities at least, with practical instruction from these whose standing and experience would render their instruction of the greatest value to the business life of the community.

THE WELSH COAL FIELDS.

In connection with the recent extension of the docks at Cardiff, the following figures regarding the South Wales coal fields may be of interest:—

In 1855 the South Wales coal field exported 8,552,270 tons, and in 1906 nearly 44,000,000 tons. Between thirty and forty millions sterling are invested in the collieries, which in regard to export facilities are better off than the great Midland areas. The coal field is nearly ninety miles in length from east to west, and from eighteen to twenty miles at its greatest breadth. The whole area is estimated at about 1,000 square miles; it begins near Pontypool in Monmouthshire, on the east, extending to St. Bride's bay in Pembrokeshire on the west, and it affords employment for about 140,000 miners. It is often asked, how long will the Welsh coal field last? Sir Charles McLaren, chairman of the Tredegar Iron and Coal Company, recently estimated that 28,335,000,000 tons of available coal remained unworked.

W. A. MACKINNON.

MANCHESTER.

REPORT OF TRADE COMMISSIONER.

(Mr. P. B. MacNamara.)

STOCK OF PROVISIONS AT LIVERPOOL.

MANCHESTER, September 3, 1907.

Estimate of the stock of provisions, &c., in the port of Liverpool, on August 31, 1907; together with the figures at the corresponding date last year, and also of last month:—

	31st Aug. 1907.	31st July 1907.	31st Aug. 1906.
Bacon	16,585	15,998	22,355
Hams.....	9,870	4,018	3,816
Shoulders	7,797	5,352	4,136
Butter	5,219	3,627	14,888
Cheese (full shapes).....	88,852	69,173	58,647
" (50 lbs. and under).....	478	796	
Lard (Prime Steam Western)	8,594	9,936	4,315
Lard (Imported Pure Refined Lard) in tierces, firkins or other packages	1,892	1,649	1,702
Lardine and Compound.....	21	48	113

SWEDEN, NORWAY AND DENMARK.

REPORT OF COMMERCIAL AGENT.

(Mr. C. E. Sontum.)

CHRISTIANIA, NORWAY, GAUBEGD No. 4, September 3, 1907.

FOREIGN TRADE OF SWEDEN.

The Norwegian minister at Stockholm, Sweden reports as follows in regard to the foreign trade of Sweden for the period January-July, 1907:—

According to official information, the foreign trade of Sweden this year shows a favourable result as compared with previous years. Especially does the effects of the good harvest in 1906 now commence to be felt. The imports of grain is thus considerably lower than in 1906. It was as follows in each of the years:—

January-July.	1906.	1907.
Wheat	112,504 tons.	80,622 tons.
Oats	38,627 "	14,645 "
Rye.....	38,810 "	4,984 "

The export of the same category of goods has at the same time gone up to such an extent, that the surplus of the import, especially as regards oats and rye, has about disappeared, the crop of these grains seeming to have been quite sufficient to cover the demand of the whole country. Otherwise the import side does not show any larger difference from former years except that the import of fertilizing stuffs is continually rising.

As regards the exports it may first be noticed that during the above mentioned period in 1907 there was exported 60,903 tons pig-iron against 54,459 tons during the same months in 1906, and that the export of this article since 1903 very near has doubled itself.

The export of the principal articles belonging under the iron and steel groups show the following results:—

January-July.	1906.	1907.
Iron in bars (cuts)	3,307 tons.	3,165 tons.
Rolled wire	3,488 "	13,645 "
Tubings and fittings	6,365 "	10,594 "
Nails of all kinds	3,007 "	3,824 "

It is not, however, only the production of the above mentioned half manufactures within this group that show an increase, but also the more finished manufactures. It is especially to be noticed, that the total export during the first seven months of machinery, implements and tools from a value of kroner 11,376,000 (\$3,033,600) in 1906 has gone up to kroner 14,120,000 (\$3,765,330) in 1907, while at the same time also the import within the same group has risen from kroner 12,250,000 (\$3,260,000) to kroner 15,263,000 ((\$4,070,000).

Within the ship-building industry there is still a stagnation; import for more than 5 million kroner (\$1,333,300) and export for only 30,000 kroner (\$8,000).

The export of paper and wood-pulp is as the following, comparing figures show in rapid growth:—

January-July.	1906.	1907.
Cardboards	7,491 tons.	9,567 tons.
Paper	71,171 "	71,277 "
Wood-pulp, chem., dry	124,736 "	155,577 "
Wood-pulp, chem., wet	12,229 "	18,566 "
Wood-pulp, mech., dry	26,248 "	27,946 "
Wood-pulp, mech., wet	38,214 "	46,103 "

LABOUR CONFLICTS AT THE NORWEGIAN MILLS.

The labour conflicts at the Norwegian pulp and paper mills referred to in my June and July reports have finally been settled, and the work has been taken up again at the different mills no doubt to the satisfaction of both the mill owners and the workingmen. The agreement is binding for three years, so at least during this time the production will go on unhindered.

HARVEST PROSPECTS.

Owing to continued rain and cold weather, the prospects for a good harvest in the Scandinavian countries and Denmark are now not as good as they were a month ago. Although the quantity of hay will be unusually large, the quality is less satisfactory, and in many places bad. As to the cereals, these have not got much further than they were a month ago, the fields still standing green in most places with small prospects of ripening. Still if the weather becomes settled and it does not freeze during September, there may yet be a fair cereal crop harvested, but the chances are utterly small.

APPLE CROP A FAILURE.

The apple crop of Norway may be considered entirely a failure this year, partly on account of the cold summer and partly on account of damages done by insects in the spring. For this reason there will likely be imported quite considerable of apples to Norway during the coming winter, on which the Canadian exporters of apples should have their attention.

C. E. SONTUM.

BIRMINGHAM.

REPORT OF TRADE COMMISSIONER.

(*Mr. P. B. Ball.*)

39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., September 7, 1907.

A NEW ANNEALING PROCESS.

According to the *Sheffield Telegraph*, an engineer of Sheffield has invented a new annealing process. The principle of the new annealing furnace is that the re-heating of the steel is performed in a chemically reducing instead of in a chemically oxidizing atmosphere. This is the effect of burning air in gas instead of having, as in the ordinary annealing furnace, gas burning in air. A small producer-gas plant is an integral part of the installation. The producer-gas is led through recuperating chambers, and air already heated to a high temperature is forced under pressure into the gas. A great saving of fuel is effected in this way. A small coal, much cheaper than that at present employed in annealing, can be used, and owing to the close proximity of the producer-gas generator to the annealing furnaces, and to the fact that the furnaces are built down into the ground, with only their covers at the floor level, there is but little loss of heat through radiation.

ADVANTAGES CLAIMED.

The great advantage claimed for the new process is that the finest high-speed and crucible steels can be annealed without oxidizing or 'scaling' the surface of the bars. By the older process the scaling of the thin bars amounts to as much as two per cent of the material, which is a consideration with steel sold at as much as 1s. 3d. a pound. Moreover, the new process gives a uniform dead softness to the steel so that it may be cut with a penknife, and this is considered a valuable property in the case of steels that have to be made up into twist drills, milling cutters, reamers, &c., before being hardened again after the tools have been shaped.

No other annealing furnace for steel bars is gas-fired, and it is found that annealing can be done with four hundredweight of coal per ton of steel annealed, whereas the ordinary annealing furnace requires nearly a ton of coal per ton of steel annealed. The complete process is accomplished in forty-eight hours, whereas in all other annealing furnaces in steel works both in Great Britain and abroad the thermal treatment occupies four, five or six days, and results in more or less oxidation of the surface of the material.

P. B. BALL.

MANCHESTER.

REPORT OF TRADE COMMISSIONER.

*(Mr. P. B. MacNamara.)*CANADA CHAMBERS, 36 SPRING GARDENS,
MANCHESTER, ENG., September 14, 1907.

CIDER.

I would hesitate to say that as a beverage cider is supplanting beer, but it is a fact that it is more largely consumed now than formerly. Devonshire cider is preferred, but considerable quantities are imported from the United States. The trade and navigation returns do not give the quantity and value. In connection with a recent inquiry from Canada as to its sale, I obtained some information that may be of value to Canadian manufacturers. New oak barrels are of no use for cider, not even if they are parafined inside, and the only media fit to ship cider in are good old whisky casks, and the rule of the trade is that the price includes the barrels. London, so far as I can learn, absorbs the major part of the imports, and prices to be entertained are made delivered there. Unless the cider is made upon the most up-to-date principles it will not command a sale, and upon it being scientifically refined depends its value. Without an anti-ferment the stock will not stand shipment. A London firm writes that they are in the market to purchase up to 5,000 casks imperial gallons and in whisky casks only, and price quoted ex-ship London or Liverpool, samples submitted and stock up to sample. The wholesale price of Devonshire cider as furnished by a large and reputable firm averages from 1s. to 1s. 3d. per gallon.

CIDER WITHOUT APPLES.

Complaints are rife in Somerset of the adulteration of cider to such an extent that there is hardly anything more adulterated, but owing to the absence of any standard it is very difficult to institute proceedings to suppress it. In one of the chief cities of England, a large proportion of the samples taken of what was called cider, have been found quite unfit to drink, and were certainly not produced from the apple. In many towns, even in Somerset, it is hard to get genuine Somerset cider drawn from the wood. What the inquirer is offered is generally an insipid, sparkling, bottled product with a flashy label which never was beneath the Somerset press. The National Fruit and Cider Institute are taking samples in the hope of obtaining evidence, which will result in a standard for cider being fixed by the legislature.

C.I.F. PRICES.

I wish to emphasize my remarks contained in monthly report No. 158 regarding the importance of quoting c.i.f. prices to intending British purchasers. Within the last two weeks I have had two cases wherein prices were quoted f.o.b. factory, and parties interested here would not entertain them, and insisted on c.i.f. prices Manchester, necessitating a good deal of delay, and a possible buying of such goods elsewhere. It would also be well to quote sterling price as well as in Canadian currency.

HOUSE FURNITURE.

I am assured by the managing director of a large furniture importing company that the Canadian manufacturers of house furniture would find a much larger market in this country than now exists, if they would conform to the slight detail of finish

that the British public demands. In the matter of office furniture the Canadian article meets all the requirements, as a different class of people is interested in such, and presumably the buyers of same are more limited than in bed-room and dining-room suites and sideboards. The imports of furniture in July, 1907, were £68,431 as against £54,950 in July, 1906. The total imports for seven months ending July 31, 1907, were £336,858, and for the same period in 1906, £355,464. It is in medium class furniture, the quality most in demand, that the chief objection is taken, and then only as regards the polishing which is deemed deficient, and might easily be remedied without much cost. No objection whatever exists regarding the patterns and style of Canadian furniture in this city and district.

THE COAL TRADE.

The higher prices for all kinds of coal have to some extent been the result of an excellent demand for foreign countries. Shipments continue on a large scale, over 5,842,000 tons being exported during August, against 5,201,500 tons in the same month of last year. The figures for the first eight months of the year are 42,972,000 tons, as compared with 38,029,000 tons in the corresponding period of 1906.

Several continental countries such as Germany and France are taking much more freely than twelve months ago. If the shipping demand continues on the present scale there is little chance of relief to home users in the way of lower prices.

BRITISH TRADE RETURNS.

According to the Board of Trade returns for the month of August, 1907, recently issued the total imports were £49,296,585, as against £48,889,137 in 1906 and £46,856,729 in 1905, an increase of £407,448 over 1906, and of £2,439,856 on 1905.

The exports amounted to £37,355,044, compared with £33,492,614 in 1906 and £29,517,836 in 1905, an increase of £3,862,430 over those of 1906 and of £7,837,208 over those of 1905.

For the eight months ended August 31, 1907, the total imports amounted to £429,850,513, which is an increase of £31,848,351 over the imports for the corresponding eight months in 1906.

The exports for the same period amounted to £284,124,844, which is an increase of £36,595,752 over the exports for the similar period in 1906.

P. B. MacNAMARA.

JAPAN.

REPORT OF TRADE COMMISSIONER.

(*Mr. Alexander MacLean.*)

ROOM B, 14 BUND,

YOKOHAMA, August 30, 1907.

EXPORT OF COPPER.

Statistics apart, it is readily appreciated by people on the street that Japan is a copper producing country. A string of drays laden with copper bars or pigs is a common sight. Referring to the export of copper, the figures show its production to be a valuable and rapidly increasing industry:—

	Quantity.	Value.
1904..	Kin. 34,903,132	Yen 12,907,775
1905..	34,040,107	16,048,452
1906..	56,610,864	25,004,955

(1 Kin — 1½ lbs; 1 Yen — 50 cents.)

The principal market is Hong Kong, which with China included takes 12,236 tons at the value of \$4,254,401.

The next highest buyer is Great Britain, with 4,162 tons at \$1,581,146. But Hong Kong being a British possession, if the export to that colony be added to that of Great Britain, the British customer for Japanese copper will be found to take 13,134 tons, for which he pays \$4,615,275, which will be practically one-half of Japan's total export averaged over the latter three years.

THE PORCELAIN TRADE.

Japan has achieved much of its distinction, in the view of Foreign peoples, from the high level of excellence and the artistic fame of design associated with its manufacture of porcelain. But the so-called advance of Japan has been in some important respects a retrogression; and not necessarily so, but seemingly inevitable, very greatly to the regret of those who for art's sake appreciate artistic things.

The export of porcelain has suffered a sudden falling off, which is accounted for by two of the best authorities on trade matters in this country, in the following terms:

The *Japan Chronicle (Kobe)* says: 'Small shipments continue to be made to South China, but in North China stocks are glutting the market, in consequence of the foolishly large shipments made after the war. It is known that stocks have accumulated in Kobe and Osaka without buyers. The manufacturers in the porcelain centres are directing their attention to the home market, and business is practically suspended whilst making alterations of plant, &c. The export of porcelain goods, this year so far, is less than one-half of last year, the price declining by from 20 to 30 per cent.'

The *Osaka Asahi (Rising Sun)* referring to the present depression in the export of porcelain, observes that the value of porcelain exported about ten years ago was only some 1,800,000 yen per annum. Since, the trade increased year by year to 2,400,000 yen in 1902. The outbreak of the war between Japan and Russia further stimulated the trade, until in 1904 it increased to 3,800,000 yen, and to 5,300,000 yen the following year. After the war the trade increased by leaps and bounds, the value for last year amounting to 8,000,000 yen. Although much of this marked increase was due to the successful issue of the war, the increase should have been maintained.

As usual, however, with all Japanese manufacturers, the porcelain makers turned out bad goods and shipped them at random, with the result that Japan porcelain forfeited its good reputation abroad. This was most noticeable in America. Some of the shippers to America are known to have entirely lost their custom, while others have received demands either for damages or for reduction of prices.

The Japanese, taking on the ways of the world, find that one thing entails another. The 'strenuous life' makes strenuous living for many people; and there is no reason why the people of the Orient should be exempt from the operation of the rule. When they lived the simple life they made things for fame, enduring things. Now they have to make things to sell, things they can get their money out of; and things that will not last, so that they may the sooner have to make them again.

But the making of porcelain of high quality and chaste form is not in immediate danger of becoming a lost art. Those who want a good article, and are willing to pay the price, can get it of the highest order of merit. Those, however, who want a good thing of course, but who must have it dirt cheap, and don't know the difference, will find the Oriental, whether artist or art dealer, prepared to give them an experience of the 'Golden Rule' on the David Harum plan that should make them wiser for a long time.

GREAT INTERNATIONAL EXHIBITION.

It is current in the Japanese press, and is no doubt authentic, that the Japanese government has sent information to the governments of the powers concerning the Grand Exposition to be held in Tokyo, in 1912, from April 1 until October 31 of that year. The government explains that the exposition will be the greatest ever held in

Japan, and that the present estimates of expenses provide ample financial basis. A desire is expressed that foreign governments will support the scheme and encourage the contribution of exhibits. Foreign exhibits pertaining to education, technology, industries, machinery and electricity will be afforded space in the educational, technological and electrical halls, which are to be built by the Japanese government. Foreign governments taking part will build their own special halls for the display of their goods, in which case the sites will be let free of all charges, and special facilities will be furnished for importing the necessary building materials, &c.

Baron Kaneko, a member of the Privy Council, who has just been appointed chief director of the exhibition, is quoted by the *Osaka Jiji (Times)* as follows:—

‘The great exhibition of 1912 is one of the works for the promotion of Japanese interests abroad, and is intended to attract exhibitors from all parts of the world. The failure or success of the exhibition, therefore, will largely affect the national reputation of Japan. The authorities concerned must consequently conduct the affairs of the exhibition with the determination to obtain success even greater than has been attained by the World’s exhibitions held in Europe and America from time to time. They must plan all details, and exercise all their energies to attract foreign visitors to Japan. As the result of the Japan-China and Japanese-Russian wars, the national glory of Japan has been manifest abroad; but, by the mere influence of victory in war alone, Japan cannot claim to have entered the comity of the first-class powers. The coming exhibition will give the best possible opportunity to show the real power of Japan to the world, and her claim to enter the ranks of the first-class powers in name and in reality. The utmost efforts must therefore be made to ensure the success of the exhibition.’

SAFE BANKING.

At the half-yearly meeting recently of the shareholders of the Japan Credit Mobilier, Limited, the vice-president, who presided, said that notwithstanding the unsatisfactory conditions in the investment field they had been able to declare a dividend as previously at the rate of seven per cent. On the general business situation the vice-president gave the following aptly descriptive view of what he called ‘the general economic condition in Japan’:—‘After the business boom which prevailed so lately a reaction showed itself during the period under review, resulting in the collapse of the share-market, and the general business depression. Financial circles were threatened, the public was seized by panic, and bankers were led to operate with great caution, the period ending in an all-round depression. The banks worked with caution and circumspection, carefully avoiding the possibility of risk. Such being the case, nothing worthy of note was achieved, but at the same time there was no ground for any anxiety as to the condition of the banks.’

PROMOTING TRADE.

Upon the subject of trade prospects in Manchuria the United States Consul General at Mukden, referring to the difficulties to be overcome, says:—

‘As the prospective purchaser cannot travel to the United States for himself, he should be given opportunity to make local examinations. The Chinaman does not care to order articles which he has not seen. An illustrated catalogue may interest, but it does not convince him. In the Occidental markets other methods may be successful, but in gaining a foothold in Manchuria active representatives with samples of goods or exhibits of machinery will be able to secure results, while years of education in western business methods may be necessary before the native merchant will be tempted to engage in correspondence carried on at a distance of several thousand miles with firms with whose goods he is acquainted only through illustrated pamphlets. The Japanese have realized the necessity for establishing intimate relations between the seller and consumer. Their large firms have agents in all the principal Manchurian cities, while under government auspices they have opened a commercial exposition at

Tieh-ling, and will shortly open another at Mukden, for the purpose of placing their goods directly before the public.'

This is quoted for the purpose of backing-up what has been made to appear from time to time in these reports since their begining, and what has been put forward from time to time in correspondence with prospective exporters,—that is, that the Oriental dealer will not close a transaction unless in view of the article, or its equivalent, which is the subject of negotiation. That being the case it is necessary in Japan, as in Manchuria, that the thing offered for sale shall be demonstrated in some way before the buyer. What the Japanese themselves require at home, they know will be required of them over in Manchuria, and they supply it in advance of their commercial movement.

ANGLO-JAPANESE ENTERPRISE.

A few months ago a representative of the Armstrongs, English manufacturers, was in this country completing arrangements with the Hokkaido Colliery and Steamship Company for the joint operation of an extensive steel plant. Construction work is now going on; and as there is no lack of capital on either side, the Hokkaido Company having their railway capital set free by government purchase, a great undertaking may be regarded as assured. Now it is announced by the *Japan Chronicle* of Kobe that 'Coates Cotton' is going 'to be made in Japan.'

The particulars are to the effect that a Mr. Murai, a well-known capitalist who amassed a large fortune in the tobacco and cigarette business before the government monopoly was established, has agreed with the well-known firm of cotton-spinners, Messrs. J. and P. Coates, of Scotland, to form a company with a joint stock of 3,000,000 yen for the manufacture of cotton thread in Japan. The style of the company is the Teikoku Seishi Kaisha (The Imperial Thread Manufacturing Company). On the first instant, the inauguration meeting was held in Tokyo, and Mr. Murai was elected chairman of the board of directors. The board was completed by the election of leading business men including a member of the Coates firm and other foreign promoters. Mr. Murai contributes his thread factory at Osaka, and the Murai spinning mill in Kyoto, in part towards the capital of the company. The factories are to be largely extended, adopting machinery of the most modern type.

THE CIRCULATING MEDIUM.

The total amount of currency including hard cash and Bank of Japan notes, in circulation at the end of each month from January to June last, was as follows:—

Bank of Japan.

January.	Y 463,847,597	Y 326,806,706
February.	459,534,694	319,027,012

		<hr/>
		Y 446,917,690

(1 yen — 50 cents.)

INSURANCE ABUSES.

The Department of Agriculture and Commerce, finding that the development of the insurance business in this country has led to keen competition with various resultant evils, have ordered local authorities to report upon the following matters:—

1. Evils attending competition in canvassing for business.
2. Differences arising out of the settlement of claims.
3. Evils attending canvassing and medical inspection for life risk.
4. Whether there is anything which necessitates legal intervention to prevent property being insured above its actual value against fire; and if so, what measures should be taken.

JAPANESE SLATE.

Until lately the working of slate in Japan was limited to one locality, with production on a small scale, not sufficient for home consumption. The discovery of the great deposit in Formosa, about two years ago, will, it is expected, not only make Japan self-supporting in the matter, but also enable her to export largely. The proprietors have already received orders from Manchuria and Korea to the amount of 40,000 yen; and it is stated by the *Kobe Herald* that negotiations are said to be now in progress between a firm of foreign merchants at Kobe and the company with a view to exporting 6,000,000 pieces for roofing, and 4,000 for billiard tables, the estimated value being about 500,000 yen, to a foreign country. It is believed, according to Japanese papers, that Japan will easily be able to compete with Germany in the trade. Builders in the Pacific coast country of Canada might do well to take note of this, and make their wants known to this office as occasion arises.

BANK OF JAPAN.

The fifteenth annual general meeting of the shareholders of the Bank of Japan was held on the 17th of August, Mr. Matsuo, the governor, occupying the chair. The accounts presented showed the following results of the year's operations, the capital being, yen 30,000,000:—

	Yen.
Gross profit.	3,950,467
Dividends (12 per cent per annum)	1,800,000
To reserve.	750,000
To bonuses.	202,000
Carried forward.	1,198,467

(1 yen—50 cents.)

THE ORIENTAL FLOUR TRADE.

According to the Trade Register of Seattle, the Oriental millers appreciate gluten in flour; although for more gluten, as in the Canada product, they do not show any disposition to pay more money. According to this authority, 'the Japanese millers are extracting every particle of gluten from the grain, and their bran is of poor quality, but it is being offered at such a low figure that a return shipment is feared in California.' Practical men in the trade, however, give the assurance that 'the fear expressed, that by-products of Japanese milling will cut into the American market, should not be taken seriously. The double freight rate that must be paid more than offsets the difference in wages. Despite the fact that Japanese millers are introducing American machinery, Japanese business men engaged in the export trade from Seattle declare that the Japanese mills have not yet become efficient, and that their operations are not extensive. The Japanese flour importers are in touch with the development of the flour trade in their home country, and they hold that the Orient will continue to be a buyer of flour instead of becoming a seller of bran to America. Flour milling is a very interesting business, but is done largely upon a rather narrow margin of profit. This circumstance will operate seriously against milling in Japan, which does not afford a market for milling by-products proportionate to extensive milling.

Manchurian grain-growing has not reached an advanced stage; and, so long as the crude methods employed are continued, Pacific coast millers have no fear from that

market. The shipment of wheat from the United States and Australia to Japanese and Chinese mills is heavy, but it does not interfere with the market for American flour in the Orient. As a matter of fact, the Coast millers cannot supply the flour demanded in the Oriental markets.

DELAY OF SHIPMENTS AND DAMAGED GOODS.

There has been correspondence between the department and this office about ill-conditioned butter received in this market from Canada during last summer and autumn; and also about the delay of butter shipments.

A letter of explanation under date of July 12, copy of which has been forwarded to this office, throws some light upon the allegation of delay; and it does not need to be said that delay of perishable goods leads to damage.

The letter in question, accounting for a case of delay and irregularity of supply, and consequent breach of contract, says:—

‘The first shipment of this order was billed at Calgary on January 15, to go forward by the *Empress of Japan* on January 22. This shipment for some reason did not leave Vancouver until nearly a month later, by the *Empress of China*.’

Now, here was an example of latter-day transportation: creamery butter, which transportation people all know is perishable, leaving Calgary on the 15th with seven days to get to Vancouver for the *Empress* sailing on the 22nd, by which it should have reached Yokohama in nineteen days from Calgary. Instead, it was allowed to lie a month in the sheds at Vancouver, arriving here on the 3rd of March.

If this were a solitary or casual incident it would perhaps not justify the public recording of defective public service. But it is the common complaint with regard to the Canadian Pacific Railway service, in respect of this particular product, the class of butter in question is treated too often with the same consideration as ordinary freight; that is, left over for the *Tartar* and the *Athenian*. Apportioning the complaints to the small quantity, the evidence is that table butter coming here from Canada is very much treated as a common article of freight.

Now that the *Tartar* and the *Athenian* are permanently withdrawn from the route, there will apparently be only the *Monteagle* as a common receptacle for left-over freight. This condition of things it is to be hoped will not last long, in view of the great additions just announced for the Northern Pacific fleet, and now on the route between this and United States ports.

It should be again mentioned that it is regarded here as not creditable to Canadian enterprise, that there is no cold storage afforded by the Canadian route. Australia with efficient cold storage, and represented by Australian houses, easily overcomes the disadvantage of greater distance and tropical route.

A RECORD CARGO.

The *Monteagle*, of the Canadian Pacific Railway line, leaving here for Canada two days ago took over a record cargo, comprising 31,198 chests of tea and 2,456 bales of silk; and a general passenger list of over 1,100.

A. MACLEAN.

BIRMINGHAM.

REPORT OF TRADE COMMISSIONER.

*(Mr. P. B. Ball.)*39 AND 40 CENTRAL HOUSE, CHRISTCHURCH BUILDINGS,
BIRMINGHAM, ENG., September 19, 1907.

COMMERCIAL MOTOR VEHICLE TRIALS.

Some interesting experiments are now being conducted in England with commercial motor vehicles. Not until during the last ten years have developments of road locomotives been possible owing to legislative restrictions prior to the passing of the Motor Car Act of 1896. Since 1896 further favourable legislation has encouraged experiments in road traction, and it is predicted that in Great Britain there is a great future for commercial motor vehicles, not only on account of their extreme usefulness where factories and commercial houses have no railway sidings, but also on account of the high railway rates in existence. Whether or not these vehicles could be run to profit in Canada in competition with electric car traction is questionable, as conditions in the two countries naturally differ very much.

Under the auspices of the Royal Automobile Club a series of trials have been organized as a test of their reliability, and as a demonstration of the extent to which the commercial motor has been put to use. Fifty-six vehicles of British and continental manufacture started from London on September 9, and fifty-four of them reached Birmingham yesterday.

Hitherto steam propelled automobiles have held the fields for loads as heavy as five tons, and an interesting feature of the trials is the running of vehicles driven by internal-combustion engines, in competition with the heavy steam lorries, wagons and tractors. The whole of the vehicles are graded in classes according to their weight carrying capacity. Class A comprising machines having a load of 10 cwt., and class F consisting of those carrying five tons. Steam tractors, which are in a special class by themselves, have a load of six tons, which includes the weight of the trailer. Of the fifty-four vehicles in the trials eleven are steam driven, and forty-three are propelled by internal-combustion engines, and of the latter type three use paraffin as fuel.

COST OF WORKING.

The working cost of these vehicles is given as follows: Class A, 10 cwt. loads for averages of 400 miles a week, an inclusive cost of £322 per annum, or 3·7d. per vehicle mile; class B, 1 ton loads for average of 400 miles a week, an inclusive cost of £361 per annum, or 4·2d per vehicle mile; class C, 30 cwt. loads for average of 400 miles a week, an inclusive cost of £406 per annum, or 4·7d. per vehicle mile; class D, 2-ton loads for average of 350 miles a week, an inclusive cost of £426 per annum, or 5·8d. per vehicle mile; class E, 3-ton loads, for average of 300 miles a week, an inclusive cost of £510 per annum, or 7·85d. per vehicle mile; class F (petrol vehicles), 5-ton loads, for average of 260 miles a week, an inclusive cost of £543 per annum, or 13·1d. per mile; class F (steam vehicles), 5-ton loads for average of 200 miles a week, an inclusive cost of £403 per annum, or 9·3d. per vehicle mile; class H (tractors), 6 tons behind drawbar, for average of 200 miles a week, an inclusive cost of £356 per annum, or 8·2d. per mile. These costs are based upon the experience of many users, and include interest, depreciation, wages, fuel, stores, repairs, insurance. and sundry contingencies.

TRIALS GIVE SATISFACTION.

The vehicles proceed from Birmingham further north until October 10, when the trials terminate. Their journey from London has given every satisfaction, and the trials are being watched with great interest by all classes of business men in Great Britain.

P. B. BALL.

COLONIAL DAIRY PRODUCE REVIEW.

(*W. Weddel & Co., London, Eng., year ended June 30, 1907.*)

CANADIAN BUTTER IMPORTS INTO UNITED STATES.

The receipts of Canadian butter for the past year were about 6,925 tons, or 45 per cent less than in the previous twelve months. This was due partly to the manufacture of Canadian cheese paying better than butter, and partly to the droughty conditions which prevailed in the dairy districts of the Dominion. This import was the smallest since 1901, and from January to June of this year imports from Canada were nil.

QUALITY AND PRICES.

The quality of Canadian butter slowly improves year by year, but does not make the advance it ought to do. Canadian butter, which begins to arrive in May, has all the advantages of a usually rising market here for the five months from July to November; but butter makers in the Dominion make practically no progress in increasing their supply to our markets. The refrigeration facilities that now exist for placing Canadian butter here in about 14 days after its manufacture are such that the quality is virtually as good as when it is made, and the high prices which are obtainable for Danish and other Continental butters of 'choicest' quality should make the exportation of best quality Canadian a profitable business.

CHEESE.

The profitable import of cheese into this country has apparently reached a well-defined limit, which leaves little or no room for expansion. Notwithstanding the attraction of high prices, induced very largely by the scare last year in American tinned meats, the import of cheese for the year ended June 30 last was 1,000 tons below that of ten years ago. Contrast this with the import of butter, which exhibits an increase in the same period of 60,000 tons. New competitors for the supply of cheese to our markets have, therefore, a very uphill task before them, as only by displacing existing supplies can they succeed in getting a footing. This is worthy the serious attention of the dairy interest in New Zealand and Australia, which tempted by the high price of cheese for the last two years, is now expending considerable capital in fitting up cheese factories, in the expectation of a permanent success attending their enterprise. It is difficult to understand the basis on which such expectation exists, as the average price in British markets of Canadian cheese for the past two years is 11s. 9d. per cwt. (or 1½d. per lb.) above the two preceeding years, and 10s. 7d. per cwt. (or 1½d. per lb. above the average of the eight years from 1898 to 1905 inclusive.

COLONIAL CHEESE.

Colonial cheese is slowly but surely ousting the foreign article from British markets. Up to 1904 this operation has been practically carried on by Canada, for until the last two years, when abnormally high prices of cheese have enabled New Zealand to export to this country at a profit, the Australasian product showed scarcely any increase. The total import from New Zealand for the past ten years has been only 40,008 tons against 836,665 tons from Canada, an annual average of 4,000 against 83,666 tons. Before the abnormally high price of the last two years the increase from New Zealand from 1898 to 1905 inclusive, was only 1,674 tons, while within two years the increase has been 4,525 tons. This would appear to suggest that if prices go back to their normal level, and there are at present no sound indications to the contrary, an early check to the cheese industry may occur in New Zealand.

QUALITY.

There has been a steady improvement in quality for some years, both in Canada and New Zealand cheese, and this feature was well maintained during the year just ended. The improved methods of curing at ranges of temperatures lower and better controlled than formerly, the more suitable arrangements for transit, and, in the case of Canadian, for storage after arrival here have brought these desirable results.

PRICES.

The year ended on June 30 last will long be remembered for the high prices which have prevailed all through. In July, 1906, the average top price of Canadian was 58s. 6d. per cwt. and for the remaining eleven months, it has been above 60s., ranging from 60s. 6d. in August, 1906, to 68s. 6d. last May. Such a continuous run of high prices has not been witnessed since 1878. For the highest price in any individual month, April, 1903, keeps the record for the past thirty years, with an average of 17s. 9d. per cwt., against 68s. 6d. in May, the highest of the present year. The price of first grade New Zealand on the London market also never came below 60s. from December to June. It rose steadily from 60s. at the date of the first arrival early in December to 67s. in the beginning of March, when a decline began, and 62s. was reached at the end of April. A rapid rise occurred in May, and towards the close of the month 68s. was made, which was the highest point of the season. In June values again fell away to 63s. per cwt.

CEYLON.

I.—RULES MADE BY THE GOVERNOR, WITH THE ADVICE OF THE EXECUTIVE COUNCIL, TO
REGULATE THE IMPORTATION, STORAGE AND TRANSPORT OF CALCIUM CARBIDE.

(*'Ceylon Government Gazette,' No. 6065 of July 21, 1905.*)

IMPORTATION.

1. Acetylene when liquid or when subject to a pressure above that of the atmosphere capable of supporting a column of water exceeding 100 inches in height and whether or not in admixture with other substances shall be deemed to be dangerous, and shall be prohibited from being manufactured, imported, kept, conveyed, or sold subject to the following exception:—

Acetylene in admixture with oil gas in a proportion not exceeding 20 parts by volume of acetylene in every 100 parts of the mixture, when subjected to a pressure not exceeding 150 pounds to the square inch, shall not be deemed to be dangerous, provided that the acetylene and oil gas shall be mixed together in a chamber or vessel before the gases are subjected to compression.

2. The importation of calcium carbide, which contains impurities liable to generate phosphoretted hydrogen or siliciuretted hydrogen so as to render the gas evolved liable to ignite spontaneously, is hereby prohibited.

3. The owner or master of every ship carrying a cargo, any part of which consists of carbide of calcium shall, on entering the harbour, immediately give notice of the nature of such cargo to the master attendant, and shall place or moor his ship in such place as the master attendant may direct, and while any carbide of calcium remains on board shall not, except for the purpose of proceeding to sea, remove his ship without the written permission of the master attendant.

4. The hold of every vessel carrying carbide calcium shall be efficiently ventilated from the time of entering the harbour until all the carbide has been discharged or until the ship has left the harbour.

5. Carbide of calcium shall only be brought into the harbour in hermetically closed metal vessels containing each not more than 112 pounds, and of such strength and construction as not to be liable to be broken or to become defective or insecure in conveyance otherwise than by gross negligence or extraordinary accident.

6. No such closed metal vessel containing calcium carbide shall be opened within the limits of the port or customs premises except with the written consent of the principal collector of Customs.

7. Every reasonable precaution shall be taken to prevent the contact of water or moisture with the carbide of calcium, and where such contact may have occurred to prevent the gas evolved from being ignited.

8. When carbide of calcium is landed within the ports of Colombo, Galle and Trincomalee:

(a) It shall be landed only in cargo boats and after sunrise and before sunset, and only at such place or places as the collector of Customs shall direct. Every such cargo boat shall carry at its bows in an exposed and prominent position a red flag not less than 18 inches square. When carrying calcium carbide the boat shall carry no other cargo;

(b) No fire, smoking, or light shall be allowed in any boat during the time that the calcium carbide is on board the boat.

9. All calcium carbide landed as aforesaid shall, without being deposited or stacked on the ground, be carried at once from the boat in which it has been conveyed to premises in respect of which a license for the storage of calcium carbide has been granted.

II.—CUSTOMS NOTICE OF SEPTEMBER 19, 1905, RELATING TO THE FREE ADMISSION OF MOTOR TRAILERS.

(*'Ceylon Government Gazette,' No. 6076 of September 22, 1905.*)

It is hereby notified that, from and after the first day of October, 1905, motor trailers shall be exempted from the Customs duty payable upon their importation into the Island.

III.—CUSTOMS NOTICE RESPECTING THE FREE IMPORTATION OF RAW RUBBER.

(*'Ceylon Government Gazette,' of December 22, 1905.*)

This notice provides that, from and after December 1, 1905, raw rubber shall be exempted from Customs import duty.

IV.—PROCLAMATION BY THE GOVERNOR, DATED JANUARY 24, 1907, REPEALING THE TEA EXPORT DUTY ORDINANCE OF 1894.

(*'Ceylon Government Gazette,' No. 6168, of February 1, 1907.*)

Whereas by section 4 of the Ordinance No. 4 of 1894, intituled 'An Ordinance to provide for the continuance of the Export Duty on Tea levied under Ordinance No. 15 of 1892,' it is enacted that the said first-mentioned ordinance shall cease to be in force from and after such time as the Governor in Executive Council shall appoint by proclamation to be published in the *Government Gazette*:

And whereas it is expedient that the said ordinance should cease to be in force from and after the time hereinafter mentioned:
